So it is important to stress that even **if** the Russian Revolution had occurred in better circumstances, it is unlikely that Bolshevism would have resulted in socialism rather than state capitalism. Bolshevik principles ensure that any revolution lead by a vanguard party would not have succeeded. This can be seen from the experience of Bolshevism immediately after it seized power, before the start of the civil war and major economic collapse, so their application in even the best of situations would have undermined socialist tendencies in the revolution. Simply put, a statist revolution will have statist, not libertarian, ends.

The focusing on "objective factors" (particularly the civil war) has become the traditional excuse for people with a romantic attachment to Leninism but who are unwilling to critically analyse what the Bolsheviks actually did in power and how it so often reflected their pre-October policies and promises. This excuse is not viable if you seek to build a revolutionary movement today: you need to choose between the real path of Lenin and the real, anarchist, alternative. As Lenin constantly stressed, a revolution will be difficult — fooling ourselves about what will happen now just undermines our chances of success in the future and ensure that history will repeat itself. For the "objective factors" argument is not a defence of Leninism, but rather one that seeks to evade having to make such a defence. Revolutionary politics would be much better served by confronting this history and the politics behind it head on. Perhaps, if Leninists did do this, they would remain Leninists, but at least then their party members and those who read their publications would have an understanding of what this meant. And they would have to dump Lenin's **State and Revolution** into the same place Lenin himself did when in power — into the rubbish bin — and admit that democracy and Bolshevik revolution do not go together.

Looking at the "subjective factor" and the ideology which drove it means to recognise that it was **not** a case of the Bolshevik regime wanting to introduce communism but, being isolated, ended up imposing state capitalism instead. Rather, these policies were explicitly advocated **from the start**, before the seizure of power in October 1917. So the idea that "objective factors" caused the degeneration of the revolution is valid if and only if the Bolsheviks were implementing socialist policies during the period immediately after the October revolution: that was not the case, Lenin and other leading Bolsheviks explicitly argued for these policies as essential for building socialism (or, at best, the preconditions of socialism) in Russia and Bolshevik practice flowed from this analysis. Unsurprisingly, then, the Bolsheviks happily introduced authoritarian and state capitalist policies **from the start.** Many of the policies denounced as "Stalinist" by Leninists were being advocated and implemented by Lenin in the spring of 1918, i.e. **before** the start of the civil war and the deepening of economic chaos that it produced.

In other words, the usual excuses for Bolshevik tyranny do not hold much water, both factually and logically.

8 Do Leninists usually deny the importance of ideology?

In a word, no. Usually Leninists stress the importance of ideology in both social change and revolution — after all, why join their party if ideology is unimportant as decisions are driven

by "objective factors"? Yet, ironically, other aspects of their analysis of the Russian Revolution recognises that ideology **does** play an important role.

Indeed, the framework which Leninists use in this discussion shows the importance of Bolshevik ideology and the key role it played in the outcome of the revolution. After all, pro-Bolsheviks argue that the "objective factors" forced the **Bolsheviks** to act as they did. However, the proletariat is meant to be the *"ruling class"* in the *"dictatorship of the proletariat."* As such, to argue that the Bolsheviks were forced to act as they did due to circumstances means to implicitly acknowledge that the party held power in Russia, **not** the working class. That a ruling party could become a party dictatorship is not that unsurprising, nor that **its** vision of what "socialism" was would be given preference over the desires of the working class in whose name it ruled. So these apologetics show the validity of Bakunin's critique of Marxism:

> *"Nor can we comprehend talk of freedom of the proletariat or true deliverance of the masses within the State and by the State. State signifies domination, and all domination implies subjection of the masses, and as a result, their exploitation to the advantage of some governing minority.*
>
> *"Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional governments, nor so called revolutionary dictatorships: because we are persuaded that revolution is sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction."* [**No Gods, No Masters**, vol. 1, p. 160]

This is not the only way in which Leninist defences of Bolshevism undermines itself. In their own way, Leninists admit the key role of ideas indirectly when they cannot avoid mentioning the collective resistance to Bolshevism indicated in section 5 above. In the few cases when the class struggle under the Bolsheviks is not ignored, Leninists often argue that while the working class was capable of collective decision making and action, the nature of such action was suspect. This arguments rests on the premise that the "advanced" workers (i.e. party members) left the workplace for the front or for government posts, leaving the "backward" workers behind. This argument is often used, particularly in regard to the garrison of Kronstadt at the time of their revolt in early 1921 (see section 8 of the appendix on "What was the Kronstadt Rebellion?").

Yet this argument raises more problems that its solves. In **any** revolution the most advanced, the most politically consciousness tend to volunteer to go to the front first and, of course, tend to be elected as delegates to committees of various kinds (local, regional and national; economic, political and social). There is little that can be done about it but if soviet — or socialist — democracy depends on the "advanced" workers being there in order for it to work, then it suggests two things. First, and most obvious, that ideas matter — if not, then the question of advanced and backward workers would be irrelevant. Second, that the commitment to democracy is lacking in those who argue along these lines, for what happens if the "backward" masses reject the "advanced" elements? Given the key role played by the latter then do they have the right, even the duty, to impose their will on the former? And it also begs the question of **who** determines what constitutes "backward" — if it means "does not support the party" then it becomes little more than a rationale for party dictatorship (as it did under Lenin and Trotsky).

Writing in 1938 while he defended the repression of the 1921 Kronstadt revolt, Trotsky argued that a *"revolution is 'made' directly by a* ***minority****,"* he argued that the *"success"* of a revolution is *"possible"* when *"this minority finds more or less support, or at least friendly neutrality, on the part of the majority."* So what happens if the majority expresses opposition to the party? Unfortunately Trotsky does not raise this question, but he does answer it indirectly by arguing that *"to free the soviets from the leadership [sic!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the 'ideas' of their participants."* [Lenin and Trotsky, **Kronstadt**, p. 85 and p. 90]

Thus to let the working masses (the *"majority"*) have free soviet elections and so reject the vanguard (the *"minority"*) would mean the end of soviet power, allowing the proletariat a say in the progress of the revolution means the end of the *"proletarian dictatorship"*! Which, of course, is interesting logic. The authoritarian core of the Bolshevik vision of revolution is thus exposed — along with the key role of ideology in the outcome of the revolution!

Victor Serge likewise presented an insight into the Bolshevik perspective on the role of ideology in a revolution when he noted that in 1918 *"[a]gitation conducted by the SRs and Mensheviks called demonstrations in the streets and prepared for a general strike. The demands were: free trade, wage increases, payment of wages one, two or three months in advance and 'democracy.' The intention was to incite the working class itself against the revolution."* Which only makes sense once you realise that by *"the revolution"* Serge simply meant *"the Bolsheviks"* and the obvious truth that the working class was **not** managing the revolution at all, was **not,** in any sense, in power. *"The best elements among the workers,"* explains Serge, *"were away fighting; those in the factories were precisely the less energetic, less revolutionary sections, along with the petty folk, yesterday's small shopkeepers and artisans, who had come there to find refuge. This proletariat of the reserve often allowed itself to fall under the sway of Menshevik propaganda."* [**Year One of the Russian Revolution**, p. 229] Given that Serge is discussing the period **before** the revolt of Czechoslovak Legion (and so the start of the civil war), a greater indictment of Bolshevism cannot be found. After all, what does "workers' democracy" mean unless the proletariat can vote for its own delegates? Little wonder Daniel Guerin described Serge's book as *"largely a justification of the liquidation of the soviets by Bolshevism."* [**Anarchism**, p. 97] What point is there having genuine soviet elections if the *"less revolutionary sections"* (i.e. Trotsky's *"majority"*) will not vote for the vanguard? And can socialism exist without democracy? Can we expect an unaccountable vanguard to govern in the interests of anyone but its own? Of course not!

Thus we find Serge arguing that the *"party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses ... it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences."* [**Op. Cit.**, p. 218] Ideas apparently **do** matter after all. Trotsky comments on this theme allows us to draw the obvious conclusions:

> *"The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation*

> *of the masses themselves ... if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the proletariat is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself."* [*"The Moralists and Sycophants against Marxism"*, pp. 53–66, **Their Morals and Ours**, p. 59]

Of course, by definition, **every** group is *"backward"* compared to the vanguard and so Trotsky's and Serge's argument amounts to little more than a justification for party dictatorship **over** the proletariat. Thus the validity of Bakunin's prediction that Marxism's *"sham people's government would be no other than the completely despotic rule of the masses by a new and very small aristocracy of actual or alleged 'scholars.' The people are no 'scholars,' and therefore they are as a whole to be freed from the toils of government, and as a whole they are to make up the herd that is governed. What a splendid freedom!"* {**Micheal Bakunin: Selected Writings**, p. 269] Is it then that surprising that Bolsheviks revised the Marxist theory of the state to justify elite rule? As discussed in section H.3.8, once in power Lenin and Trotsky saw that the "workers' state" had to be independent of the working class in order to overcome the *"wavering"* and *"vacillation of the masses themselves."*

The reason why such a system would not result in socialism does not take long to discover. For anarchists, freedom is not just a goal, a noble end to be achieved sometime in the distant future, but rather a necessary part of the process of creating socialism. Eliminate freedom (and, as a necessary result, workplace and community self-management, initiative, self-activity) and the end result will be anything **but** socialism. Ultimately, as Malatesta argued, *"the only way that the masses can raise themselves"* is by freedom *"for it is only through freedom that one educates oneself to be free."* [**Op. Cit.**, p. 53] Ironically, by using state repression to combat *"backward"* elements, the Bolsheviks ensured that they stayed that way and, more importantly, disempowered the **whole** working class so ensuring that Bolshevik dictatorship came into constant conflict with it and its continuing struggle for autonomy. Rather than base itself on the creative powers of the masses, Bolshevism crushed it as a threat to its power and so ensured that the economic and social problems affecting Russia increased.

And need it be pointed out that "low" culture or "backwardness" have been used by numerous imperialist and authoritarian regimes to justify their rule over a given population? It matters little whether the population are of the same nationality as the rulers or from a subjugated people, the arguments and the logic are the same. Whether dressed up in racist or classist clothing, the same elitist pedigree lies behind the pro-Bolshevik argument that democracy would have brought *"chaos"* or *"capitalist restoration."* The implicit assumption that working class people are not fit for self-government is clear from these rationales. Equally obvious is the idea that the party knows better than working class people what is best for them.

Sounding like Bolshevik Henry Kissingers, Leninists argue that Lenin and Trotsky had to enforce their dictatorship **over** the proletariat to stop a *"capitalist restoration"* (Kissinger was the US state's liaison with the Chilean military when it helped their coup in 1973 and infamously stated that the country should not be allowed to turn communist due to the stupidity of its own people). Needless to say, anarchists argue that even if the Bolshevik regime had not already been capitalist (specifically, **state** capitalist) this logic simply represents an elitist position based on *"socialism from above"* (see section H.3.3). Yes, soviet democracy **may** have resulted in the return of (private) capitalism but by maintaining party dictatorship the possibility of socialism

was automatically nullified. Simply put, the pro-Leninist argument implies that socialism can be implemented from above as long as the right people with the right ideas are in power. Thus the crudest determinism flips into the most vacuous idealism, with the flipping driven by the overwhelming necessity of defend the Bolshevik regime. And while we can understand Trotsky seeking to absolve his conscious on the role **his** decisions, policies and politicis played in creating the regime Stalin so adroitly utilised in his rise to power, it becomes less clear why modern-day socialists would seek to encase themselves in such contradictions.

Such reasoning by Trotsky and Serge show the role of ideology in the outcome of the revolution, so underming their invocation of "objective factors" to explain all. Yet, at the same time, they stress the importance of Leninist ideology in ensuring the "victory" of the revolution. They seek to have it both ways — the application of the crudest form of deterministic materialism on the one side, the glorification of the will of a few leaders on the other. It also exposes the authoritarian core of Leninism which justified the repression of working class revolt. Given this, it is incredulous for Leninists like Chris Harman to suggest that it was the *"decimation of the working class"* which caused (by *"necessity"*) the *"Soviet institutions"* to take *"on a life independently of the class they had arisen from. Those workers and peasants who fought the Civil War could not govern themselves collectively from their places in the factories."* [*"How the revolution was lost"*, pp. 13–36, P. Binns, T. Cliff, C. Harman, **Russia: From Workers' State to State Capitalism**, p. 18] Given that this *"independent"* life is required to allow the party (requoting Serge) to *"go against the current,"* Harman simply fails to understand the dynamics of the revolution, the actual social position of the vanguard and the resistance of the working class subject to it. Moreover, the reason **why** the *"workers and peasants"* could not govern themselves collectively was because the party had seized power for itself and systematically destroyed soviet, workplace and military democracy to remain there (see section H.6). Then there is the way the Bolsheviks reacted to such collective unrest: they sought to break the workers as a collective force. The use of violence, lockouts and re-registration was typical, as was the arresting of "ringleaders" (see section 5 above for details) It seems ironic, therefore, to blame "objective factors" for the "atomisation" of the working class when, in fact, this was a key aim of Bolshevik repression of labour protest — repression which was easily justified by its ideology.

Ultimately, the degeneration of the Russian Revolution can be traced from when the Bolsheviks seized power **on behalf of** the Russian working class and peasantry and has its roots in Marxist ideology. Most obviously, state implies the delegation of power and initiative into the hands of a few leaders who form the "revolutionary government." Yet the power of any revolution, as Bakunin recognised, derives from the decentralisation of power, from the active participation of the masses in the collective social movement and the direct action it generates. As soon as this power passes out of the hands of the working class, the revolution is doomed: the counter-revolution has begun and it matters little that it is draped in a red flag. Hence anarchist opposition to the state.

Sadly, many socialists have failed to recognise this. Hopefully we have shown that the standard explanations of the failure of the Russian revolution are, at their base, superficial and will only ensure that history will repeat itself. For the idea that Bolshevik policies did not impact on the outcome of the revolution is a false assertion, as the Makhnovists show (see the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?") and Leninists themselves implicitly admit. Beliefs are utopian if subjective ideas are not grounded in objective reality. Anarchists hold that part of the subjective conditions required before socialism can exist

is the existence of free exchange of ideas and working class democracy (i.e. self-management). To believe that revolution is possible without freedom, to believe those in power can, through their good intentions, impose socialism from above, as the Bolsheviks did, is indeed utopian.

How did Bolshevik ideology contribute to the failure of the Revolution?

It is a truism of Leninism that Stalinism has nothing to do with the ideas of Bolshevism. Moreover, most are at pains to stress that these ideas have no relation to the actual practice of the Bolshevik Party after the October Revolution. To re-quote one Leninist:

> *"it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time."* [John Rees, *"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, p. 70]

His fellow party member Duncan Hallas argued that it was *"these desperate conditions"* (namely terrible economic situation combined with civil war) which resulted in *"the Bolshevik Party [coming] to substitute its own rule for that of a decimated, exhausted working class"* anarchists disagree. [**Towards a Revolutionary Socialist Party**, p. 43]

We have discussed in the appendix on "What caused the degeneration of the Russian Revolution?" why the various *"objective factors"* explanations favoured by Leninists to explain the defeat of the Russian Revolution are unconvincing. Ultimately, they rest on the spurious argument that if only what most revolutionaries (including, ironically, Leninists!) consider as inevitable side effects of a revolution did not occur, then Bolshevism would have been fine. It is hard to take seriously the argument that if only the ruling class disappeared without a fight, if the imperialists had not intervened and if the economy was not disrupted then Bolshevism would have resulted in socialism. This is particularly the case as Leninists argue that only **their** version of socialism recognises that the ruling class will **not** disappear after a revolution, that we will face counter-revolution and so we need a state to defend the revolution! As we argued in section H.2.1, this is not the case. Anarchists have long recognised that a revolution will require defending and that it will provoke a serious disruption in the economic life of a country.

Given the somewhat unrealistic tone of these kinds of assertions, it is necessary to look at the ideological underpinnings of Bolshevism and how they played their part in the defeat of the Russian Revolution. This section, therefore, will discuss why such Leninist claims are not true. Simply put, Bolshevik ideology **did** play a role in the degeneration of the Russian Revolution. This is obvious once we look at most aspects of Bolshevik ideology as well as the means advocated by the Bolsheviks to achieve their goals. Rather than being in opposition to the declared aims of the Bolsheviks, the policies implemented by them during the revolution and civil war had clear relations with their pre-revolution ideas and visions. To quote Maurice Brinton's conclusions after looking at this period:

> *"there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practices of Stalinism. We know that many on the revolutionary*

> *left will find this statement hard to swallow. We are convinced however that any honest reading of the facts cannot but lead to this conclusion. The more one unearths about this period the more difficult it becomes to define — or even to see — the 'gulf' allegedly separating what happened in Lenin's time from what happened later. Real knowledge of the facts also makes it impossible to accept ... that the whole course of events was 'historically inevitable' and 'objectively determined'. Bolshevik ideology and practice were themselves important and sometimes decisive factors in the equation, at every critical stage of this critical period. Now that more facts are available self-mystification on these issues should no longer be possible. Should any who have read these pages remain 'confused' it will be because they want to remain in that state — or because (as the future beneficiaries of a society similar to the Russian one) it is their interest to remain so."* [**The Bolsheviks and Workers' Control**, p. 84]

This is unsurprising. The Leninist idea that politics of the Bolsheviks had no influence on the outcome of the revolution, that their policies during the revolution were a product purely of objective forces, is unconvincing. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold – they will **not** occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone who favours centralisation and sees nationalisation as the defining characteristic of socialism will make different decisions than someone who favours decentralising power and sees self-management as the key issue. The former will also create **different** forms of social organisation based on their perceptions of what "socialism" is and what is "efficient." Similarly, the different forms of social organisation favoured will also impact on how a revolution develops and the political decisions they make. For example, if you have a vision which favours centralised, hierarchical organisation then those placed into a position of power over others within such structures will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

In summary, the ideas in people's heads matter, including during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. The organisation they create will create specific forms of social relationships which, in turn, will shape the ideas of those subject to them. This means that a centralised, hierarchical system will create authoritarian social relationships and these will shape those within them and the ideas they have in totally different ways than a decentralised, egalitarian system.

Similarly, if Bolshevik policies hastened the alienation of working class people and peasants from the regime which, in turn, resulted in resistance to them then some of the "objective factors" facing Lenin's regime were themselves the products of earlier political decisions. Unwelcome and unforeseen (at least to the Bolshevik leadership) consequences of specific Bolshevik practices and actions, but still flowing from Bolshevik ideology all the same. So, for example, when leading Bolsheviks had preconceived biases against decentralisation, federalism, "petty-bourgeois" peasants, "declassed" workers or "anarcho-syndicalist" tendencies, this would automatically become an ideological determinant to the policies decided upon by the ruling party. While social circumstances may have limited Bolshevik options, these social circumstances were also shaped by the

results of Bolshevik ideology and practice and, moreover, possible solutions to social problems were also limited by Bolshevik ideology and practice.

So, **political ideas do matter.** And, ironically, the very Leninists who argue that Bolshevik politics played no role in the degeneration of the revolution accept this. Modern day Leninists, while denying Bolshevik ideology had a negative on the development of the revolution also subscribe to the contradictory idea that Bolshevik politics were essential for its "success"! Indeed, the fact that they **are** Leninists shows this is the case. They obviously think that Leninist ideas on centralisation, the role of the party, the *"workers' state"* and a host of other issues are correct and, moreover, essential for the success of a revolution. They just dislike the results when these ideas were applied in practice within the institutional context these ideas promote, subject to the pressures of the objective circumstances they argue **every** revolution will face!

Little wonder anarchists are not convinced by Leninist arguments that their ideology played no role in the rise of Stalinism in Russia. Simply put, if you use certain methods then these will be rooted in the specific vision you are aiming for. If you think socialism is state ownership and centralised planning then you will favour institutions and organisations which facilitate that end. If you want a highly centralised state and consider a state as simply being an *"instrument of class rule"* then you will see little to worry about in the concentration of power into the hands of a few party leaders. However, if you see socialism in terms of working class managing their own affairs then you will view such developments as being fundamentally in opposition to your goals and definitely **not** a means to that end.

So part of the reason why Marxist revolutions yield such anti-working class outcomes is to do with its ideology, methods and goals. It has little to do with the will to power of a few individuals (important a role as that can play, sometimes, in events). In a nutshell, the ideology and vision guiding Leninist parties incorporate hierarchical values and pursue hierarchical aims. Furthermore, the methods and organisations favoured to achieve (their vision of) "socialism" are fundamentally hierarchical, aiming to ensure that power is centralised at the top of pyramidal structures in the hands of the party leaders.

It would be wrong, as Leninists will do, to dismiss this as simply a case of "idealism." After all, we are talking about the ideology of a ruling party. As such, these ideas are more than just ideas: after the seizure of power, they became a part of the real social situation within Russia. Individually, party members assumed leadership posts in all spheres of social life and started to apply their ideology. Then, overtime, the results of this application ensured that the party could not be done otherwise as the framework of exercising power had been shaped by its successful application (e.g. Bolshevik centralism ensured that all its policies were marked by centralist tendencies, simply because Bolshevik power had become centralised). Soon, the only real instance of power is the Party, and very soon, only the summits of the Party. This cannot help but shape its policies and actions. As Castoriadis argues:

> *"If it is true that people's real social existence determines their consciousness, it is from that moment illusory to expect the Bolshevik party to act in any other fashion than according to its real social position. The real social situation of the Party is that of a directorial organ, and its point of view toward this society henceforth is not necessarily the same as the one this society has toward itself."* [**The role of Bolshevik Ideology in the birth of the Bureaucracy**, p. 97]

As such, means and ends are related and cannot be separated. As Emma Goldman argued, there is *"no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual habit and social practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical... The great and inspiring aims of the Revolution became so clouded with and obscured by the methods used by the ruling political power that it was hard to distinguish what was temporary means and what final purpose. Psychologically and socially the means necessarily influence and alter the aims. The whole history of man is continuous proof of the maxim that to divest one's methods of ethical concepts means to Sink into the depths of utter demoralisation. In that lies the real tragedy of the Bolshevik philosophy as applied to the Russian Revolution. May this lesson not be in vain."* In summary, *"[n]o revolution can ever succeed as a factor of liberation unless the MEANS used to further it be identical in spirit and tendency with the PURPOSES to be achieved."* [**My Disillusionment in Russia**, pp. 260–1]

If this analysis of the anarchists against Bolshevism is true then it follows that the Bolsheviks were not just wrong on one or two issues but their political outlook right down to the core was wrong. Its vision of socialism was flawed, which produced a flawed perspective on the potentially valid means available to achieve it. Leninism, we must never forget, does not aim for the same kind of society anarchism does. As we discussed in section H.3.1, the short, medium and long term goals of both movements are radically different. While both claim to aim for "communism," what is mean by that word is radically different in details if somewhat similar in outline. The anarchist ideal of a classless, stateless and free society is based on a decentralised, participatory and bottom-up premise. The Leninist ideal is the product of a centralised, party ruled and top-down paradigm.

This explains why Leninists advocate a democratic-centralist "Revolutionary Party." It arises from the fact that their programme is the capture of state power in order to abolish the *"anarchy of the market."* Not the abolition of wage labour, but its universalisation under the state as one big boss. Not the destruction of alienated forces (political, social and economic) but rather their capture by the party on behalf of the masses. In other words, this section of the FAQ is based on the fact that Leninists are not (libertarian) communists; they have not broken sufficiently with Second International orthodoxy, with the assumption that socialism is basically state capitalism (*"The idea of the State as Capitalist, to which the Social-Democratic fraction of the great Socialist Party is now trying to reduce Socialism."* [Peter Kropotkin, The Great French Revolution, vol. 1, p. 31]). Just as one cannot abolish alienation with alienated means, so we cannot attack Leninist *"means"* also without distinguishing our libertarian *"ends"* from theirs.

This means that both Leninist means and ends are flawed. Both will fail to produce a socialist society. As Kropotkin said at the time, the Bolsheviks *"have shown how the Revolution is **not** to be made."* [quoted by Berkman, **The Bolshevik Myth**, p. 75] If applied today, Leninist ideas will undoubtedly fail from an anarchist point of view while, as under Lenin, "succeeding" from the limited perspective of Bolshevism. Yes, the party may be in power and, yes, capitalist property may be abolished by nationalisation but, no, a socialist society would be no nearer. Rather we would have a new hierarchical and class system rather than the classless and free society which non-anarchist socialists claim to be aiming for.

Let us be perfectly clear. Anarchists are **not** saying that Stalinism will be the inevitable result of any Bolshevik revolution. What we are saying is that some form of class society will result

from any such a revolution. The exact form this class system will take will vary depending on the objective circumstances it faces, but no matter the specific form of such a post-revolutionary society it will not be a socialist one. This is because of the ideology of the party in power will shape the revolution in specific ways which, by necessity, form new forms of hierarchical and class exploitation and oppression. The preferred means of Bolshevism (vanguardism, statism, centralisation, nationalisation, and so on) will determine the ends, the ends being not communist anarchism but some kind of bureaucratic state capitalist society labelled *"socialism"* by those in charge. Stalinism, in this perspective, was the result of an interaction of certain ideological goals and positions as well as organisational principles and preferences with structural and circumstantial pressures resulting from the specific conditions prevalent at the time. For example, a Leninist revolution in an advanced western country would not require the barbaric means used by Stalinism to industrialise Russia.

This section of the FAQ will, therefore, indicate the key areas of Bolshevik ideology which, when applied, will undermine any revolution as they did the Russian. As such, it is all fine and well for Trotskyist Max Shachtman (like so many others) to argue that the Bolsheviks had *"convert[ed] the expediencies and necessities of the civil war period into virtues and principles which had never been part of their original program."* Looking at this *"original program"* we can see elements of what was latter to be applied. Rather than express a divergence it could be argued that it was this that undermined the more democratic aspects of their original program. In other words, perhaps the use of state power and economic nationalisation came into conflict with, and finally destroyed, the original proclaimed socialist principles? And, perhaps, the *"socialist"* vision of Bolshevism was so deeply flawed that even attempting to apply it destroyed the aspirations for liberty, equality and solidarity that inspired it? For, after all, as we indicated in section H.3.1, the anarchist and mainstream Marxist visions of socialism and how to get there **are** different. Can we be surprised if Marxist means cannot achieve anarchist (i.e. authentic socialist) ends? To his credit, Shachtman acknowledges that post-civil war salvation "required full democratic rights" for all workers, and that this was *"precisely what the Bolsheviks ... were determined not to permit."* Sadly he failed to wonder **why** the democratic principles of the *"original program"* were only *"honoured in the breach"* and why *"Lenin and Trotsky did not observe them."* The possibility that Bakunin was right and that statism and socialism cannot go together was not raised. [*"Introduction"* to Trotsky's **Terrorism and Communism**, p. xv]

Equally, there is a tendency of pro-Leninists to concentrate on the period between the two revolutions of 1917 when specifying what Bolshevism "really" stood for, particularly Lenin's book State and Revolution. To use an analogy, when Leninists do this they are like politicians who, when faced with people questioning the results of their policies, ask them to look at their election manifesto rather than what they have done when in power. As we discuss in section 4 of the appendix "What happened during the Russian Revolution?" Lenin's book was never applied in practice. From the very first day, the Bolsheviks ignored it. After 6 months **none** of its keys ideas had been applied. Indeed, in all cases the exact opposite had been imposed. As such, to blame (say) the civil war for the reality of "Bolshevik in power" (as Leninists do) seems without substance. Simply put, **State and Revolution** is no guide to what Bolshevism "really" stood for. Neither is their position **before** seizing power if the realities of their chosen methods (i.e. seizing state power) quickly changed their perspective, practice **and** ideology (i.e. shaped the desired ends). Assuming of course that most of their post-October policies were radically different from their pre-October ones, which (as we indicate here) they were not.

With that said, what do anarchists consider the key aspects of Bolshevik ideology which helped to ensure the defeat of the Russian Revolution and had, long before the civil war started, had started its degeneration into tyranny? These factors are many and so we will, by necessity, concrete on the key ones. These are believe in centralisation, the confusion of party power with popular power, the Marxist theory of the state, the negative influence of Engels' infamous essay *"On Authority"*, the equation of nationalisation and state capitalism with socialism, the lack of awareness that working class economic power was a key factor in socialism, the notion that "big" was automatically "more efficient," the identification of class consciousness with supporting the party, how the vanguard party organises itself and, lastly, the underlying assumptions that vanguardism is based on.

Each one of these factors had a negative impact on the development of the revolution, combined they were devastating. Nor can it be a case of keeping Bolshevism while getting rid of some of these positions. Most go to the heart of Bolshevism and could only be eliminated by eliminating what makes Leninism Leninist. Thus some Leninists now pay lip service to workers' control of production and recognise that the Bolsheviks saw the form of property (i.e., whether private or state owned) as being far more important that workers' management of production. Yet revising Bolshevism to take into account this flaw means little unless the others are also revised. Simply put, workers' management of production would have little impact in a highly centralised state ruled over by a equally centralised vanguard party. Self-management in production or society could not co-exist with a state and party power nor with *"centralised"* economic decision making based on nationalised property. In a nutshell, the only way Bolshevism could result in a genuine socialist society is if it stopped being Bolshevik!

1 How did the Marxist historical materialism affect Bolshevism?

As is well known, Marx argued that history progressed through distinct stages. After his death, this *"materialist conception of history"* became known as *"historical materialism."* The basic idea of this is that the *"totality of [the] relations of production constitutes the economic structure of society, the real foundation, on which arises a legal and political superstructure and to which correspond definite forms of social consciousness ... At a certain stage of development, the material productive forces of society come into conflict with the existing relations of production or — this merely expresses the same thing in legal terms — with the property relations within the framework of which they have operated hitherto. From forms of development of productive forces these relations turn into their fetters. Then begins an era of social revolution."* [**A Contribution to the Critique of Political Economy**, pp. 20–1]

Thus slavery was replaced by feudalism, feudalism with capitalism. For Marx, the *"bourgeois mode of production is the last antagonistic form of the social process of production"* and *"the productive forces developing within bourgeois society create also the material conditions for a solution of this antagonism."* [**Op. Cit.**, p. 21] In other words, after capitalism there would be socialism:

> *"The monopoly of capital becomes a fetter upon the mode of production which has flourished alongside and under it. The centralisation of the means of production and the socialisation of labour reach a point at which they become incompatible with their capitalist integument. The integument is burst asunder. The knell of capitalist private*

property sounds. The expropriators are expropriated." [Karl Marx, **Capital**, vol. 1, p. 929]

Socialism replaces capitalism once the ***"proletariat seized political power and turns the means of production into state property."*** By so doing,* "it abolishes itself as proletariat, abolishes all class distinctions and class antagonisms, abolishes also the state as state." *[Engels, The Marx-Engels Reader, p. 713]***

Most Marxists subscribe to this schema of historical progress. For example, Tony Cliff noted that, *"[f]or Lenin, whose Marxism was never mechanical or fatalistic, the definition of the dictatorship of the proletariat as a* ***transition period*** *meant that there could be* ***two*** *outcomes of this phase: going forward to socialism, or backsliding to capitalism. The policy of the party would tip the balance."* [**Revolution Besieged**, p. 364]

Marxists, like Marx, argue that socialism was the society which would come after capitalism. Thus the Bolsheviks had the mindset that whatever they did there was only two possibilities: (their version of) socialism or the restoration of capitalism. However, this is based on a false premise. Is it valid to assume that there is only one possible post-capitalist future, one that, by definition, is classless? If so, then any action or structure could be utilised to fight reaction as after victory there can be only one outcome. However, if there is more that one post-capitalist future then the question of means becomes decisive. If we assume just two possible post-capitalist futures, one based on self-management and without classes and another with economic, social and political power centralised in a few hands, then the means used in a revolution become decisive in determining which possibility will become reality.

If we accept the Marxist theory and assume only one possible post-capitalist system, then all that is required of revolutionary anti-capitalist movements is that they only need to overthrow capitalism and they will wind up where they wish to arrive as there is no other possible outcome. But if the answer no, then in order to wind up where we wish to arrive, we have to not only overthrow capitalism, we have use means that will push us toward the desired future society. As such, **means** become the key and they cannot be ignored or downplayed in favour of the ends — particularly as these ends will never be reached if the appropriate means are not used.

This is no abstract metaphysical or ideological/theoretical point. The impact of this issue can be seen from the practice of Bolshevism in power. For Lenin and Trotsky, **any** and **all** means could and were used in pursuit of their ends. They simply could not see how the means used shaped the ends reached. Ultimately, there was only two possibilities — socialism (by definition classless) or a return to capitalism.

Once we see that because of their flawed perspective on what comes after capitalism we understand why, for the Bolsheviks, the means used and institutions created were meaningless. We can see one of the roots for Bolshevik indifference to working class self-management. As Samuel Farber notes that *"there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers' control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921."* [**Before Stalinism**, p. 44] There was no need, for such means had no impact on achieving the ends Bolshevik power had set itself. As we discuss in section 6, such questions of meaningful working class participation in the workplace or the soviets were considered by the likes of Trotsky as fundamentally irrelevant to whether Bolshevik Russia was socialist or whether the working class was the ruling class or not, incredible as it may seem.

So if we accept Marx's basic schema, then we simply have to conclude that what means we use are, ultimately, irrelevant as there is only one outcome. As long as property is nationalised and a non-capitalist party holds state power, then the basic socialist nature of the regime automatically flows. This was, of course, Trotsky's argument with regard to Stalinist Russia and why he defended it against those who recognised that it was a new form of class society. Yet it is precisely the rise of Stalinism out of the dictatorship of the Bolsheviks which exposes the limitations in the Marxist schema of historical development.

Simply put, there is no guarantee that getting rid of capitalism will result in a decent society. As anarchists like Bakunin argued against Marx, it is possible to get rid of capitalism while not creating socialism, if we understand by that term a free, classless society of equals. Rather, a Marxist revolution would *"concentrate all the powers of government in strong hands, because the very fact that the people are ignorant necessitates strong, solicitous care by the government. [It] will create a single State bank, concentrating in its hands all the commercial, industrial, agricultural, and even scientific production; and they will divide the mass of people into two armies — industrial and agricultural armies under the direct command of the State engineers who will constitute the new privileged scientific-political class."* [**The Political Philosophy of Bakunin**, p. 289] As Bolshevism proved, there **was** always an alternative to socialism or a reversion to capitalism, in this case **state** capitalism.

So libertarians have long been aware that actually existing capitalism could be replaced by another form of class society. As the experience of Bolshevik tyranny proves beyond doubt, this perspective is the correct one. And that perspective ensured that during the Russian Revolution the Makhnovists **had** to encourage free soviets and workers' self-management, freedom of speech and organisation in order for the revolution to remain socialist (see the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?"). In contrast, the Bolsheviks implemented party dictatorship, nationalisation and one-man management while proclaiming this had something to do with socialism. Little wonder Trotsky had such difficulties understanding the obvious truth that Stalinism has **nothing** to do with socialism.

2 Why did the Marxist theory of the state undermine working class power?

As discussed in section H.3.7, anarchists and Marxists have fundamentally different definitions of what constitutes a state. These different definitions resulted, in practice, to the Bolsheviks undermining **real** working class power during the Russian Revolution in favour of an abstract "power" which served as little more than a fig-leaf for Bolshevik power.

For anarchists, the state is marked by centralised power in the hands of a few. The state, we argue, is designed to ensure minority rule and, consequently, cannot be used by the majority to manage their own affairs. Every bourgeois revolution, moreover, has been marked by a conflict between centralised power and popular power and, unsurprisingly, the bourgeois favoured the former over the latter. As such, we would expect centralised power (i.e. a state) to be the means by which a minority class seized power **over** the masses and never the means by which the majority managed society themselves. It was for this reason that anarchists refuse to confuse a federation of self-managed organisations with a state:

> *"The reader knows by now that the anarchists refused to use the term 'State' even for a transitional situation. The gap between authoritarians and libertarians has not always*

> *been very wide on this score. In the First International the collectivists, whose spokesman was Bakunin, allowed the terms 'regenerate State,' 'new and revolutionary State,' or even 'socialist State' to be accepted as synonyms for 'social collective.' The anarchists soon saw, however, that it was rather dangerous for them to use the same word as the authoritarians while giving it a quite different meaning. They felt that a new concept called for a new word and that the use of the old term could be dangerously ambiguous; so they ceased to give the name 'State' to the social collective of the future."* [Daniel Guerin, **Anarchism**, pp. 60–1]

This is no mere semantics. The essence of statism is the removal of powers that should belong to the community as whole (though they may for reasons of efficiency delegate their actual implementation to elected, mandated and recallable committees) into the hands of a tiny minority who claim to act on our behalf and in our interests but who are not under our direct control. In other words it continues the division into rulers and ruled. Any confusion between two such radically different forms of organisation can only have a seriously negative effect on the development of any revolution. At its most basic, it allows those in power to develop structures and practices which disempower the many while, at the same time, taking about extending working class "power."

The roots of this confusion can be found at the root of Marxism. As discussed in section H.3.7, Marx and Engels had left a somewhat contradictory inheritance on the nature and role of the state. Unlike anarchists, who clearly argued that only confusion would arise by calling the organs of popular self-management required by a revolution a *"state,"* the founders of Marxism confused two radically different ideas. On the one hand, there is the idea of a radical and participatory democracy (as per the model of the Paris Commune). On the other, there is a centralised body with a government in charge (as per the model of the democratic state). By using the term *"state"* to cover these two radically different concepts, it allowed the Bolsheviks to confuse party power with popular power and, moreover, replace the latter by the former without affecting the so-called "proletarian" nature of the state. The confusion of popular organs of self-management with a state ensured that these organs **were** submerged by state structures and top-down rule.

By confusing the state (delegated power, necessarily concentrated in the hands of a few) with the organs of popular self-management Marxism opened up the possibility of a *"workers' state"* which is simply the rule of a few party leaders over the masses. The *"truth of the matter,"* wrote Emma Goldman, *"is that the Russian people have been **locked out** and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviki this tyranny is masked by a world-stirring slogan ... Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party."* [**My Disillusionment in Russia**, p. xlix] In this, she simply saw in practice that which Bakunin had predicted would happen. For Bakunin, like all anarchists, *"every state power, every government, by its nature and by its position stands outside the people and above them, and must invariably try to subject them to rules and objectives which are alien to them."* It was for this reason *"we declare ourselves the enemies of every government and state every state power ... the people can only be happy and free when they create their own life, organising themselves from below upwards."* [**Statism and Anarchy**, p. 136]

The *"workers' state"* proved no exception to that generalisation. The roots of the problem, which expressed itself from the start during the Russian revolution, was the fatal confusion of

the state with organs of popular self-management. Lenin argued in *"State and Revolution"* that, on the one hand, *"the armed proletariat itself shall* ***become the government****"* while, on the other, that *"[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions."* If, as Lenin asserts, democracy *"means equality"* he has reintroduced inequality into the "proletarian" state as the representatives have, by definition, more power than those who elected them. [**Essential Works of Lenin**, p. 363, p. 306 and p. 346] Yet, as noted in section H.1.2, representative bodies necessarily place policy-making in the hands of deputies and do not (and cannot) mean that the working class **as a class** can manage society. Moreover, such bodies ensure that popular power can be usurped without difficulty by a minority. After all, a minority already **does** hold power.

True equality implies the abolition of the state and its replacement by a federation of self-managed communes. The state, as anarchists have long stressed, signifies a power **above** society, a concentration of power into a few hands. Lenin, ironically, quotes Engels on the state being marked by *"the establishment of a* ***public power,*** *which is no longer directly identical with the population organising itself as an armed power."* [quoted by Lenin, **Op. Cit.**, p. 275] As Lenin supported **representative** structures rather than one based on elected, mandated and recallable **delegates** then he has created a *"public power"* no longer identical with the population.

Combine this with an awareness that bureaucracy must continue to exist in the "proletarian" state then we have the ideological preconditions for dictatorship **over** the proletariat. *"There can be no thought,"* asserted Lenin, *"of destroying officialdom immediately everywhere, completely. That is utopia. But to* ***smash*** *the old bureaucratic machine at once and to begin immediately to construct a new one that will enable all officialdom to be gradually abolished is* ***not*** *utopia."* In other words, Lenin expected *"the gradual 'withering away' of all bureaucracy."* [**Op. Cit.**, p. 306 and p. 307]

Yet why expect a "new" bureaucracy to be as easy to control as the old one? Regular election to posts does not undermine the institutional links, pressures and powers a centralised "officialdom" will generate around itself, even a so-called "proletarian" one. Significantly, Lenin justified this defence of temporary state bureaucracy by the kind of straw man argument against anarchism *"State and Revolution"* is riddled with. *"We are not utopians,"* asserted Lenin, *"we do not indulge in 'dreams' of dispensing* ***at once*** *with all administration, with all subordination: these anarchist dreams ... are totally alien to Marxism, and, as a matter of fact, serve only to postpone the socialist revolution until human nature has changed. No, we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and 'managers.'"* [**Op. Cit.**, p. 307] Yet anarchists do not wish to *"dispense"* with *"all administration,"* rather we wish to replace government **by** administration, hierarchical positions (*"subordination"*) with co-operative organisation. Equally, we see the revolution as a process in which *"human nature"* is changed by the struggle itself so that working class people become capable of organising itself and society without bosses, bureaucrats and politicians. If Lenin says that socialism *"cannot dispense"* with the hierarchical structures required by class society why should we expect the same kinds of structures and social relationships to have different ends just because *"red"* managers are in power?

Thus Lenin's work is deeply ambiguous. He is confusing popular self-management with a state structure. Anarchists argue that states, by their very nature, are based on concentrated, centralised, alienated power in the hands of a few. Thus Lenin's *"workers' state"* is just the same as any other state, namely rule by a few over the many. This is confirmed when Lenin argues

that *"[u]nder socialism, **all** will take part in the work of government in turn and will soon become accustomed to no one governing."* In fact, once the *"overwhelming majority"* have *"learned to administer the state **themselves**, have taken this business into their own hands ... the need for government begins to disappear. The more complete democracy becomes, the nearer the moment approaches when it becomes unnecessary. The more democratic the 'state' of the armed workers — which is 'no longer a state in the proper sense of the word' — becomes, the more rapidly does **the state** begin to wither away."* Moreover, *"[u]ntil the 'higher' phase of communism arrives, the Socialists demand the **strictest** control, by society **and by the state,** of the amount of labour and of consumption."* [**Op. Cit.**, p. 361, p. 349 and p. 345]

Clearly, the "proletarian" state is **not** based on direct, mass, participation by the population but, in fact, on giving power to a few representatives. It is **not** identical with *"society,"* i.e. the armed, self-organised people. Rather than look to the popular assemblies of the French revolution, Lenin, like the bourgeoisie, looked to representative structures — structures designed to combat working class power and influence. (at one point Lenin states that *"for a certain time not only bourgeois right, but even the bourgeois state remains under communism, without the bourgeoisie!"* This was because *"bourgeois right in regard to the distribution of articles of **consumption** inevitably presupposes the existence of the **bourgeois state,** for right is nothing without an apparatus capable of **enforcing** the observance of the standards of right."* [**Op. Cit.**, p. 346]).

Can we expect the same types of organs and social relationships to produce different results simply because Lenin is at the head of the state? Of course not.

As the Marxist theory of the state confused party/vanguard power with working class power, we should not be surprised that Lenin's *"State and Revolution"* failed to discuss the practicalities of this essential question in anything but a passing and ambiguous manner. For example, Lenin notes that *"[b]y educating the workers' party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of **leading the whole people** to socialism, of directing and organising the new order."* [**Op. Cit.**, p. 288] It is not clear whether it is the vanguard or the proletariat as a whole which assumes power. Later, he states that *"the dictatorship of the proletariat"* was *"the organisation of the vanguard of the oppressed as the ruling class for the purpose of crushing the oppressors."* [**Op. Cit.**, p. 337] Given that this fits in with subsequent Bolshevik practice, it seems clear that it is the vanguard which assumes power rather than the whole class. The negative effects of this are discussed in section 8.

However, the assumption of power by the party highlights the key problem with the Marxist theory of the state and how it could be used to justify the destruction of popular power. It does not matter in the Marxist schema whether the class or the party is in power, it does not impact on whether the working class is the *"ruling class"* or not. As Lenin put it. *"democracy is **not** identical with the subordination of the minority to the majority. Democracy is a **state** which recognises the subordination of the minority to the majority, i.e. an organisation for the systematic use of **violence** by one class against the other, by one section of the population against another."* [**Op. Cit.**, p. 332] Thus the majority need not actually *"rule"* (i.e. make the fundamental decisions) for a regime to be considered a *"democracy"* or an instrument of class rule. That power can be delegated to a party leadership (even dictatorship) without harming the *"class nature"* of the state. This results of such a theory can be seen from Bolshevik arguments in favour of party dictatorship during the civil war period (and beyond).

The problem with the centralised, representative structures Lenin favours for the *"dictatorship of the proletariat"* is that they are rooted in the inequality of power. They constitute in fact, if

not initially in theory, a power **above** society. As Lenin put it, *"the **essence** of bureaucracy"* is *"privileged persons divorced from the masses and **superior to** the masses."* [**Op. Cit.**, p. 360] In the words of Malatesta, a *"government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of."* [**Anarchy**, p. 34] As we discussed in appendix "What happened during the Russian Revolution?", Lenin's regime provides more than enough evidence to support such an analysis.

This is the fatal flaw in the Marxist theory of the state. As Bakunin put it, *"the theory of the state"* is *"based on this fiction of pseudo-popular representation — which in actual fact means the government of the masses by an insignificant handful of privileged individuals, elected (or even not elected) by mobs of people rounded up for voting and never knowing what or whom they are voting for — on this imaginary and abstract expression of the imaginary thought and will of the all the people, of which the real, living people do not have the faintest idea."* Thus the state represents *"government of the majority by a minority in the name of the presumed stupidity of the one and the presumed intelligence of the other."* [**Op. Cit.**, pp. 136–7]

By confusing popular participation with a state, by ignoring the real inequalities of power in any state structure, Marxism allowed Lenin and the Bolsheviks to usurp state power, implement party dictatorship **and** continue to talk about the working class being in power. Because of Marxism's metaphysical definition of the state (see section H.3.7), actual working class people's power over their lives is downplayed, if not ignored, in favour party power.

As parties represent classes in this schema, if the party is in power then, by definition, so is the class. This raises the possibility of Lenin asserting the *"working class"* held power even when his party was exercising a dictatorship **over** the working class and violently repressing any protests by it. As one socialist historian puts it, *"while it is true that Lenin recognised the different functions and democratic raison d'etre for both the soviets and his party, in the last analysis it was the party that was more important than the soviets. In other words, the party was the final repository of working-class sovereignty. Thus, Lenin did not seem to have been reflected on or have been particularly perturbed by the decline of the soviets after 1918."* [Samuel Farber, **Before Stalinism**, p. 212] This can be seen from how the Marxist theory of the state was changed **after** the Bolsheviks seized power to bring into line with its new role as the means by which the vanguard ruled society (see section H.3.8).

This confusion between two radically different concepts and their submersion into the term *"state"* had its negative impact from the start. Firstly, the Bolsheviks constantly equated rule by the Bolshevik party (in practice, its central committee) with the working class as a whole. Rather than rule by all the masses, the Bolsheviks substituted rule by a handful of leaders. Thus we find Lenin talking about *"the power of the Bolsheviks — that is, the power of the proletariat"* as if these things were the same. Thus it was a case of *"the Bolsheviks"* having *"to take the whole governmental power into their own hands,"* of *"the complete assumption of power by the Bolsheviks alone,"* rather than the masses. Indeed, Russia had been *"ruled by 130,000 landowners"* and *"yet they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interests of the poor and against the rich."* [**Will the Bolsheviks Maintain Power?**, p. 102, p. 7 and pp. 61–2]

However, governing in the *"interests"* of the poor is **not** the same as the poor governing themselves. Thus we have the first key substitution that leads to authoritarian rule, namely the substitution of the power of the masses by the power of a few members who make up the government. Such a small body will require a centralised state system and, consequently, we have the creation of a hierarchical body around the new government which, as we discuss in section 7, will become the real master in society.

The preconditions for a new form of class society have been created and, moreover, they are rooted in the basic ideas of Marxism. Society has been split into two bodies, the masses and those who claim to rule in their name. Given this basic inequality in power we would, according to anarchist theory, expect the interests of the masses and the rulers to separate and come into conflict. While the Bolsheviks had the support of the working class (as they did in the first few months of their rule), this does not equal mass participation in running society. Quite the reverse. So while Lenin raised the vision of mass participation in the *"final"* stage of communism, he unfortunately blocked the means to get there.

Simply put, a self-managed society can only be created by self-managed means. To think we can have a *"public power"* separate from the masses which will, slowly, dissolve itself into it is the height of naivety. Unsurprisingly, once in power the Bolsheviks held onto power by all means available, including gerrymandering and disbanding soviets, suppressing peaceful opposition parties and violently repressing the very workers it claimed ruled in *"soviet"* Russia (see section 6 of the appendix "What happened during the Russian Revolution?"). Significantly, this conflict developed before the start of the civil war (see section 3 of the appendix on "What caused the degeneration of the Russian Revolution?" for details). So when popular support was lost, the basic contradictions in the Bolshevik position and theory became clear. Rather than be a *"soviet"* power, the Bolshevik regime was simply rule over the workers in their name, nothing more. And equally unsurprising, the Leninists revised their theory of the state to take into account the realities of state power and the need to justify minority power **over** the masses (see section H.3.8).

Needless to say, even electoral support for the Bolsheviks should not and cannot be equated to working class management of society. Echoing Marx and Engels at their most reductionist (see section H.3.9), Lenin stressed that the state was *"an organ or machine for the subjection of one class by another .. . when the State has become proletarian, when it has become a machine for the domination of the proletariat over the bourgeoisie, then we shall fully and unreservedly for a strong government and centralism."* [**Op. Cit.**, p. 75] The notions that the state could have interests of its own, that it is not simply an instrument of class rule but rather **minority** class rule are nowhere to be found. The implications of this simplistic analysis had severe ramifications for the Russian Revolution and Trotskyist explanations of both Stalinism and its rise.

Which brings us to the second issue. It is clear that by considering the state simply as an instrument of class rule Lenin could downplay, even ignore, such important questions of **how** the working class can *"rule"* society, how it can be a *"ruling"* class. Blinded by the notion that a state could not be anything **but** an instrument of class rule, the Bolsheviks simply were able to justify any limitation of working class democracy and freedom and argue that it had no impact on whether the Bolshevik regime was really a "dictatorship of the proletariat" or not. This can be seen from Lenin's polemic with German Social-Democrat Karl Kautsky, where he glibly stated that *"**[t]he form of government,** has absolutely nothing to so with it."* [**Collected Works**, vol. 28, p. 238]

Yet the idea that there is a difference between **who** rules in a revolutionary situation and **how** they rule is a key one, and one raised by the anarchists against Marxism. After all, if the working class is politically expropriated how can you maintain that a regime is remotely "proletarian"? Ultimately, the working class can only *"rule"* society through its collective participation in decision making (social, economic and "political"). If working class people are not managing their own affairs, if they have delegated that power to a few party leaders then they are **not** a ruling class and could never be. While the bourgeoisie can, and has, ruled economically under an actual dictatorship, the same cannot be said to be the case with the working class. Every class society is marked by a clear division between order takers and order givers. To think that such a division can be implemented in a socialist revolution and for it to remain socialist is pure naivety. As the Bolshevik revolution showed, representative government is the first step in the political expropriation of the working class from control over their fate.

This can best be seen by Trotsky's confused analyses of Stalinism. He simply could not understand the nature of Stalinism with the simplistic analytical tools he inherited from mainstream Marxism and Bolshevism. Thus we find him arguing in 1933 that:

> *"The dictatorship of a class does not mean by a long shot that its entire mass always participates in the management of the state. This we have seen, first of all, in the case of the propertied classes. The nobility ruled through the monarchy before which the noble stood on his knees. The dictatorship of the bourgeoisie took on comparatively developed democratic forms only under the conditions of capitalist upswing when the ruling class had nothing to fear. Before our own eyes, democracy has been supplanted in Germany by Hitler's autocracy, with all the traditional bourgeois parties smashed to smithereens. Today, the German bourgeoisie does not rule directly; politically it is placed under complete subjection to Hitler and his bands. Nevertheless, the dictatorship of the bourgeoisie remains inviolate in Germany, because all the conditions of its social hegemony have been preserved and strengthened. By expropriating the bourgeoisie politically, Hitler saved it, even if temporarily, from economic expropriation. The fact that the bourgeoisie was compelled to resort to the fascist regime testifies to the fact that its hegemony was endangered but not at all that it had fallen."* [Trotsky, **The Class Nature Of The Soviet State**]

Yet Trotsky is confusing the matter. He is comparing the actions of class society with those a socialist revolution. While a minority class need not *"participate"* **en mass** the question arises does this apply to the transition from class society to a classless one? Can the working class **really** can be *"expropriated"* politically and still remain *"the ruling class"*? Moreover, Trotsky fails to note that the working class was **economically** and **politically** expropriated under Stalinism as well. This is unsurprising, as both forms of expropriation had occurred when he and Lenin held the reins of state power. Yet Trotsky's confused ramblings do serve a purpose in showing how the Marxist theory of the state can be used to rationalise the replacement of popular power by party power. With such ideological baggage, can it be a surprise that the Bolshevik replacement of workers' power by party power could be a revolutionary goal? Ironically, the Marxist theory of the state as an instrument of class rule helped ensure that the Russian working class did **not** become the ruling class post-October. Rather, it ensured that the Bolshevik party did.

To conclude, by its reductionist logic, the Marxist theory of the state ensured that the substitution of popular power by party power could go ahead and, moreover, be justified ideologically.

The first steps towards party dictatorship can be found in such apparently "libertarian" works as Lenin's *"State and Revolution"* with its emphasis on "representation" and "centralisation." The net effect of this was to centralise power into fewer and fewer hands, replacing the essential constructive working class participation and self-activity required by a social revolution with top-down rule by a few party leaders. Such rule could not avoid becoming bureaucratised and coming into conflict with the real aspirations and interests of those it claimed to represent. In such circumstances, in a conflict between the *"workers' state"* and the actual workers the Marxist theory of the state, combined with the assumptions of vanguardism, made the shift to party dictatorship inevitable. As we discussed in section 3 of the appendix on "What caused the degeneration of the Russian Revolution?", authoritarian tendencies had surfaced before the civil war began.

The strange paradox of Leninism, namely that the theoretical dictatorship of the proletariat was, in practice, a dictatorship **over** the proletariat comes as no surprise. In spite of Lenin announcing *"all power to the soviets"* he remained committed to a disciplined party wielding centralised power. This regime soon expropriated the soviets while calling the subsequent regime "Soviet." Rather that create the authoritarian tendencies of the Bolshevik state the "objective factors" facing Lenin's regime simply increased their impact. The preconditions for the minority rule which the civil war intensified to extreme levels already existed within Marxist theory. Consequently, a Leninist revolution which avoided the (inevitable) problems facing a revolution would still create some kind of class society simply because it reproduces minority rule by creating a *"workers' state"* as its first step. Sadly, Marxist theory confuses popular self-government with a state so ensuring the substitution of rule by a few party leaders for the popular participation required to ensure a successful revolution.

3 How did Engels' essay *"On Authority"* affect the revolution?

We have discussed Engels' infamous diatribe against anarchism already (see section H.4 and subsequent sections). Here we discuss how its caricature of anarchism helped disarm the Bolsheviks theoretically to the dangers of their own actions, so helping to undermine the socialist potential of the Russian revolution. While the Marxist theory of the state, with its ahistoric and ambiguous use of the word "state" undermined popular autonomy and power in favour of party power, Engels' essay *"On Authority"* helped undermine popular self-management.

Simply put, Engels essay contained the germs from which Lenin and Trotsky's support for one-man management flowed. He provided the Marxist orthodoxy required to undermine real working class power by confusing all forms of organisation with *"authority"* and equating the necessity of self-discipline with *"subordination"* to one will. Engels' infamous essay helped Lenin to destroy self-management in the workplace and replace it with appointed *"one-man management"* armed with *"dictatorial powers."*

For Lenin and Trotsky, familiar with Engels' *"On Authority,"* it was a truism that any form of organisation was based on *"authoritarianism"* and, consequently, it did not really matter **how** that *"authority"* was constituted. Thus Marxism's agnostic attitude to the patterns of domination and subordination within society was used to justify one-man management and party dictatorship. Indeed, *"Soviet socialist democracy and individual management and dictatorship are in no way contradictory . .. the will of a class may sometimes be carried by a dictator, who sometimes does more alone and is frequently more necessary."* [Lenin, **Collected Works**, vol. 30, p. 476]

Like Engels, Lenin defended the principle of authority. The dictatorship of the Party over the proletariat found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable given the current mode of production, they argued. And no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant **how** a workplace is organised as, no matter what, it would be *"authoritarian."* Thus *"one-man management"* would be, basically, the same as worker's self-management via an elected factory committee.

For Engels, any form of joint activity required as its *"first condition"* a *"dominant will that settles all subordinate questions, whether this will is represented by a single delegate or a committee charged with the execution of the resolutions of the majority of persons interested. In either case there is very pronounced authority."* Thus the *"necessity of authority, and of imperious authority at that."* Collective life, he stressed, required *"a certain authority, no matter how delegated"* and *"a certain subordination, are things which, independently of all social organisation, are imposed upon us."* [**The Marx-Engels Reader**, p. 732]

Lenin was aware of these arguments, even quoting from this essay in his **State and Revolution**. Thus he was aware that for Engels, collective decisions meant *"the will of the single individual will always have to subordinate itself, which means that questions are settled in an authoritarian way."* Thus there was no difference if *"they are settled by decision of a delegate placed at the head of each branch of labour or, if possible, by a majority vote."* The more advanced the technology, the greater the *"despotism"*: *"The automatic machinery of a big factory is much more despotic than the small capitalist who employ workers ever have been."* [**Op. Cit.**, p. 731] Thus Engels had used the modern factory system of mass production as a direct analogy to argue against the anarchist call for workers' councils and self-management in production, for workers' autonomy and participation. Like Engels, Lenin stressed the necessity of central authority in industry.

It can be argued that it was this moment that ensured the creation of state capitalism under the Bolsheviks. This is the moment in Marxist theory when the turn from economics to technics, from proletarian control to technocracy, from workers' self-management to appointed state management was ensured. Henceforth the end of any critique of alienation in mainstream Marxism was assured. Submission to technique under hierarchical authority effectively prevents active participation in the social production of values. And there was no alternative.

As noted in section 8 of the appendix "What happened during the Russian Revolution?"). and section H.3.14, during 1917 Lenin did not favour workers' self-management of production. He raised the idea of *"workers' control"* after the workers spontaneously raised the idea and practice themselves during the revolution. Moreover, he interpreted that slogan in his own way, placing it within a statist context and within institutions inherited from capitalism (see section H.3.12). Once in power, it was (unsurprisingly) **his** vision of socialism and workers' control that was implemented, **not** the workers' factory committees. The core of that vision he repeatedly stressed had been raised **before** the October revolution.

This vision can be best seen in **The Immediate Tasks of the Soviet Government**, written by Lenin and published on the 25th of April 1918. This occurred before the start of the civil war and, indeed, he starts by arguing that *"[t]hanks to the peace which has been achieved"* the Bolsheviks had *"gained an opportunity to concentrate its efforts for a while on the most important and most difficult aspect of the socialist revolution, namely the task of organisation."* The Bolsheviks, who had

"managed to complete the conquest of power," now faced *"the principal task of convincing people"* and doing *"**practical organisational work.**"* Only when this was done *"will it be possible to say that Russia **has become** not only a Soviet, but also a socialist, republic."* [**The Immediate Tasks of the Soviet Government**, p. 2 and p. 8]

Sadly, this *"organisation"* was riddled with authoritarianism and was fundamentally top-down in nature. His "socialist" vision was simply state capitalism (see section 10 of the appendix "What happened during the Russian Revolution?"). However, what interests us here is that his arguments to justify the "socialist" policies he presented are similar to those put forward by Engels in *"On Authority."* As such, we can only reach the following conclusions. Firstly, that the *"state capitalist"* vision of socialism imposed upon Russia by the Bolsheviks was what they had always intended to introduce. It was their limited support for workers' control in 1917 that was atypical and not part of their tradition, **not** their policies once in power (as modern day Leninists assert). Secondly, that this vision had its roots in classical Marxism, specifically Engels' *"On Authority"* and the identification of socialism with nationalised property (see section H.3.13 for more on this).

That Engels diatribe had a negative impact on the development of the Russian revolution can easily be seen from Lenin's arguments. For example, Lenin argues that the *"tightening of discipline"* and *"harmonious organisation"* calls *"for coercion — coercion precisely in the form of dictatorship."* He did not object to granting *"individual executives dictatorial power (or 'unlimited' powers)"* and did not think *"the appointment of individual, dictators with unlimited power"* was incompatible with *"the fundamental principles of the Soviet government."* After all, *"the history of revolutionary movements"* had *"shown"* that *"the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes."* He notes that *"[u]ndoubtably, the dictatorship of individuals was compatible with bourgeois democracy."* [**Op. Cit.**, p. 28 and p. 32] It would be churlish to note that previous revolutionary movements had not been **socialist** in nature and did not aim to **abolish** classes. In such cases, the government appointing people with dictatorial powers would not have harmed the nature of the revolution, which was transferring power from one minority class to another.

Lenin mocked the *"exceedingly poor arguments"* of those who objected, saying that they *"demand of us a higher democracy than bourgeois democracy and say: personal dictatorship is absolutely incompatible with your, Bolshevik (i.e. not bourgeois, **but socialist**) Soviet democracy."* As the Bolsheviks were *"not anarchists,"* he admitted the need *"coercion"* in the *"transition from capitalism to socialism,"* its form being determined *"by the degree of development of the given revolutionary class, and also by special circumstances."* In general, he stressed, there was *"absolutely **no** contradiction in principle between Soviet (**that is,** socialist) democracy and the exercise of dictatorial powers by individuals."* [**Op. Cit.**, pp. 32–3 and p. 33] Which is, of course, sophistry as dictatorship by a few people in some aspects of live will erode democracy in others. For example, being subject to the economic power of the capitalist during work harms the individual and reduces their ability to participate in other aspects of social life. Why should being subject to "red" bosses be any different?

In particular, Lenin argued that *"individual dictatorial power"* was required because *"large-scale machine industry"* (which is the *"foundation of socialism"*) calls for *"absolute and strict **unity of will,** which directs the joint labours of hundreds, thousands and tens of thousands of people... But how can strict unity of will be ensured? By thousands subordinating their will to the will of one."* He reiterated that the *"**unquestioning subordination** to a single will is absolutely necessary for*

the success of processes organised on the pattern of large-scale machine industry." The people must *"**unquestioningly obey the single will** of the leaders of labour."* And so it was a case (for the workers, at least) of *"[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers."* [**Op. Cit.**, p. 33, p. 34 and p. 44]

The parallels with Engels' *"On Authority"* could not be clearer, as are the fallacies of Lenin's assertions (see, for example, section H.4.4). Lenin, like Engels, uses the example of modern industry to bolster his arguments. Yet the net effect of Lenin's argument was to eliminate working class economic power at the point of production. Instead of socialist social relationships, Lenin imposed capitalist ones. Indeed, no capitalist would disagree with Lenin's workplace regime — they try to create such a regime by breaking unions and introducing technologies and techniques which allow them to control the workers. Unsurprisingly, Lenin also urged the introduction of two such techniques, namely *"piece-work"* and *"applying much of what is scientific and progressive in the Taylor system."* [**Op. Cit.**, pp. 23–4] As Trotskyist Tony Cliff reminds us, *"the employers have at their disposal a number of effective methods of disrupting th[e] unity [of workers as a class]. Once of the most important of these is the fostering of competition between workers by means of piece-work systems."* He notes that these were used by the Nazis and the Stalinists *"for the same purpose."* [**State Capitalism in Russia**, pp. 18–9] Obviously piece-work is different when Lenin introduces it! Similarly, when Trotsky notes that *"[b]lind obedience is not a thing to be proud of in a revolutionary,"* it is somewhat different when Lenin calls upon workers to do so (or, for that matter, Trotsky himself when in power — see section 6 for Trotsky's radically different perspective on blind obedience of the worker to "his" state in 1920!). [**Terrorism and Communism**, p. xlvii]

The **economic** dominance of the bourgeoisie ensures the political dispossession of the working class. Why expect the introduction of capitalist social relations in production to have different outcomes just because Lenin was the head of the government? In the words of libertarian socialist Maurice Brinton:

> *"We hold that the 'relations of production' — the relations which individuals or groups enter into with one another in the process of producing wealth — are the essential foundations of any society. A certain pattern of relations of production is the common denominator of all class societies. This pattern is one in which the producer does not dominate the means of production but on the contrary both is 'separated from them' and from the products of his own labour. In all class societies the producer is in a position of subordination to those who manage the productive process. Workers' management of production — implying as it does the total domination of the producer over the productive process — is not for us a marginal matter. It is the core of our politics. It is the only means whereby authoritarian (order-giving, order-taking) relations in production can be transcended and a free, communist or anarchist, society introduced.*
>
> *"We also hold that the means of production may change hands (passing for instance from private hands into those of a bureaucracy, collectively owning them) with out this revolutionising the relations of production. Under such circumstances — and whatever the formal status of property — the society is still a class society for production is still managed by an agency other than the producers themselves. Property relations, in other words, do not necessarily reflect the: relations of production. They may serve to mask*

them — and in fact they often have." [**The Bolsheviks and Workers' Control**, p. vii-viii]

The net effect of Lenin's arguments, as anarchist Peter Arshinov noted a few years later, was that the *"fundamental fact"* of the Bolshevik revolution was *"that the workers and the peasant labourers remained within the earlier situation of 'working classes' — producers managed by authority from above."* He stressed that Bolshevik political and economic ideas may have *"remov[ed] the workers from the hands of individual capitalists"* but they *"delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital ... Wage labour has remained what it was before, expect that it has taken on the character of an obligation to the State.... It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism."* [**The History of the Makhnovist Movement**, p. 35 and p. 71] Moreover, Lenin's position failed to understand that unless workers have power at the point of production, they will soon loose it in society as a whole. Which, of course, they soon did in Bolshevik Russia, even in the limited form of electing a "revolutionary" government.

So while the causes of the failure of the Russian Revolution were many fold, the obvious influence of Engels' *"On Authority"* on the fate of the workers' control movement should be noted. After all, Engels' argument confuses the issues that Bakunin and other anarchists were trying to raise (namely on the nature of the organisations we create and our relationships with others). If, as Engels' argues, all organisation is *"authoritarian,"* then does this mean that there no real difference between organisational structures? Is a dictatorship just the same as a self-managed group, as they are both organisations and so both *"authoritarian"*? If so, surely that means the kinds of organisation we create are irrelevant and what **really** matters is state ownership? Such logic can only lead to the perspective that working class self-management of production is irrelevant to socialism and, unfortunately, the experience of the Russian Revolution tends to suggest that for mainstream Marxism this is the case. The Bolsheviks imposed distinctly authoritarian social structures while arguing that they were creating socialism.

Like Engels, the Bolsheviks defended the principle of authority. The dictatorship of the Party over the proletariat in the workplace (and, indeed, elsewhere) ultimately found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable, given the current mode of production, they argued. And, as Engels had stressed, no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant for the leading Bolsheviks **how** a workplace is organised as, no matter what, it would be *"authoritarian."* Thus *"one-man management"* would be, basically, the same as worker's self-management via an elected factory committee. As Trotsky made clear in 1920, for the Bolsheviks the *"dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers [i.e. the party, which Trotsky cheerfully admits is exercising a **party** dictatorship], and not at all in the form in which individual economic enterprises are administered."* Thus, it *"would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of the factories."* [**Terrorism and Communism**, p. 162]

By equating *"organisation"* with *"authority"* (i.e. hierarchy) and dismissing the importance of revolutionising the social relationships people create between themselves, Engels opened the

way for the Bolsheviks' advocacy of *"one-man management."* His essay is at the root of mainstream Marxism's agnostic attitude to the patterns of domination and subordination within society and was used to justify one-man management. After all, if Engels was right, then it did not matter **how** the workplace was organised. It would, inherently, be *"authoritarian"* and so what mattered, therefore, was who owned property, **not** how the workplace was run. Perhaps, then, *"On Authority"* was a self-fulfilling prophecy — by seeing any form of organisation and any form of advanced technology as needing hierarchy, discipline and obedience, as being "authoritarian," it ensured that mainstream Marxism became blinded to the key question of **how** society was organised. After all, if *"despotism"* was a fact of life within industry regardless of how the wider society was organised, then it does not matter if *"one-man management"* replaces workers' self-management. Little wonder then that the continued alienation of the worker was widespread long before Stalin took power and, more importantly, before the civil war started.

As such, the dubious inheritance of classical Marxism had started to push the Bolshevik revolution down an authoritarian path and create economic structures and social relationships which were in no way socialist and, moreover, laid the foundations for Stalinism. Even if the civil war had not occurred, capitalist social relationships would have been dominant within "socialist" Russia — with the only difference being that rather than private capitalism it would have been state capitalism. As Lenin admitted, incidentally. It is doubtful that this state capitalism would have been made to serve *"the whole people"* as Lenin naively believed.

In another way Engels identification of organisation with authority affected the outcome of the revolution. As **any** form of organisation involved, for Engels, the domination of individuals and, as such, *"authoritarian"* then the nature of the socialist state was as irrelevant as the way workplaces were run. As both party dictatorship and soviet democracy meant that the individual was *"dominated"* by collective decisions, so both were *"authoritarian."* As such, the transformation of the soviet state into a party dictatorship did not fundamentally mean a change for the individuals subject to it. Little wonder that no leading Bolshevik called the end of soviet democracy and its replacement by party dictatorship as a "retreat" or even as something to be worried about (indeed, they all argued the opposite, namely that party dictatorship was essential and not an issue to be worried about).

Perhaps this analogy by the SWP's Tony Cliff of the relationship between the party and the working class provides an insight:

> *"In essence the dictatorship of the proletariat **does not** represent a combination of abstract, immutable elements like democracy and centralism, independent of time and space. The actual level of democracy, as well as centralism, depends on three basic factors: 1. the strength of the proletariat; 2. the material and cultural legacy left to it by the old regime; and 3. the strength of capitalist resistance. The level of democracy feasible must be indirect proportion to the first two factors, and in inverse proportion to the third. The captain of an ocean liner can allow football to be played on his vessel; on a tiny raft in a stormy sea the level of tolerance is far lower."* [**Lenin**, vol. 3, p. 179]

Ignoring the obvious points (such as comparing working class freedom and democracy to a game!), we can see shades of Engels in Cliff's words. Let us not forget that Engels argued that *"a ship on the high seas"* at a *"time of danger"* required *"the necessity of authority, and of imperious authority at that."* [**Op. Cit.**, p. 732] Here Cliff is placing the party into the Captain's role and

the workers as the crew. The Captain, in Engels argument, exercised *"imperious authority."* In Cliff's, the party decides the freedoms which working class people are allowed to have — and so subjects them to its *"imperious authority."*

Little wonder Bolshevism failed. By this simple analogy Cliff shows the authoritarian essence of Bolshevism and who really has *"all power"* under that system. Like the crew and passengers dominated by the will of the captain, the working class under Leninism will be dominated by the party. It does not bode well that Cliff thinks that democracy can be *"feasible"* in some circumstances, but not others and it is up to those in power (i.e. the party leaders) to determine when it was. In his rush to justify Bolshevik party dictatorship in terms of "objective conditions" he clearly forgot his earlier comments that the *"liberation of the working class can only be achieved through the action of the working class. Hence one can have a revolution with more or less violence, with more or less suppression of civil rights of the bourgeoisie and its hangers-on [a general catch-all category which, if Bolshevik practice is anything to go by, can include rebel workers, indeed the whole working class!], with more or less political freedom, but one* ***cannot*** *gave a revolution, as the history of Russia conclusively demonstratives, without workers' democracy — even if restricted and distorted. Socialist advance must be gauged by workers' freedom, by their power to shape their own destiny ... Without workers' democracy the immediate means leads to a very different end, to an end that is prefigured in these same means."* [**Op. Cit.**, p. 110] Obviously if Lenin and Trotsky are the captains of the ship of state, such considerations are less important. When it is Lenin wielding *"imperious authority"* then workers' democracy can be forgotten and the regime remain a *"workers' state"*!

By ignoring the key issue Bakunin and other anarchists drew attention to by attacking *"authority"* (and let us not forget that by that they meant hierarchical organisations in which power is concentrated at the top in a few hands — see section H.4), Engels opened up the way of seeing democratic decision as being less than important. This is **not** to suggest that Engels favoured dictatorship. Rather we are suggesting that by confusing two radically different forms of organisation as self-management and hierarchy he blunted latter Marxists to the importance of participation and collective decision making from below. After all, if all organisation is *"authoritarian"* then it matters little, in the end, how it is structured. Dictatorship, representative democracy and self-management were all equally *"authoritarian"* and so the issues raised by anarchism can safely be ignored (namely that electing bosses does not equate to freedom). Thus the Bolshevik willingness to equate their dictatorship with rule by the working class is not such a surprise after all.

To conclude, rather than the anti-authoritarians not knowing *"what they are talking about," "creating nothing but confusion," "betraying the movement of the proletariat"* and *"serv[ing] the reaction,"* it was Engels' essay that aided the Bolshevik counter-revolution and helped, in its own small way, to lay the foundations for Leninist tyranny and state capitalism. [Engels, **Op. Cit.**, p. 733] Ultimately, Engels *"On Authority"* helped give Lenin the ideological premises by which to undermine workers' economic power during the revolution and recreate capitalist social relations and call it "socialism." His ill thought out diatribe had ramifications even he would never have guessed (but were obvious at the time to libertarians). His use of the modern factory system to argue against the anarchist call for workers' councils, federalism and workers' autonomy, for participation, for self-management, became the basis for re-imposing **capitalist** relations of production in revolutionary Russia.

4 How did the Bolshevik vision of "democracy" affect the revolution?

As discussed in section H.3.2, Marx and Engels had left their followers which a contradictory legacy as regards *"socialism from below."* On the one hand, their praise for the Paris Commune and its libertarian ideas pointed to a participatory democracy run from below. On the other, Marx's comments during the German Revolution in 1850 that the workers must *"strive for ... the most determined centralisation of power in the hands of the state authority"* because *"the path of revolutionary activity"* can "proceed only from the centre" suggests a top-down approach. He stressed that centralisation of power was essential to overcome local autonomy, which would allow *"every village, every town and every province"* to put *"a new obstacle in the path"* the revolution due to *"local and provincial obstinacy."* [**Marx-Engels Reader**, p. 509]

Building upon this contradictory legacy, Lenin unambiguously stressed the *"from above"* aspect of it (see section H.3.3 for details). The only real exception to this perspective occurred in 1917, when Lenin was trying to win mass support for his party. However, even this support for democracy from below was always tempered by reminding the reader that the Bolsheviks stood for centralisation and strong government once they were in power (see section 7).

Once in power, the promises of 1917 were quickly forgotten. Unsurprisingly, modern day Leninists argue that this was due to the difficult circumstances facing the Bolsheviks at the time. They argue that the words of 1917 represent the true democratic vision of Bolshevism. Anarchists are not impressed. After all, for an idea to be useful it must be practical — even in "exceptional circumstances." If the Bolshevik vision is not robust enough to handle the problems that have affected every revolution then we have to question the validity of that vision or the strength of commitment its supporters hold it.

Given this, the question becomes which of these two aspects of Marxism was considered its "essence" by Lenin and the Bolsheviks. Obviously, it is hard to isolate the real Bolshevik vision of democracy from the influence of "objective factors." However, we can get a taste by looking at how the Bolsheviks acted and argued during the first six months in power. During this period, the problems facing the revolution were hard but not as bad as those facing it after the Czech revolt at the end of May, 1918. Particularly after March, 1918, the Bolsheviks were in a position to start constructive work as in the middle of that month Lenin claimed that the *"Soviet Government has triumphed in the Civil War."* [quoted by Maximoff, **The Guillotine at Work**, p. 53]

So the question as to whether the Bolsheviks were forced into authoritarian and hierarchical methods by the practical necessities of the civil war or whether all this was inherent in Leninism all along, and the natural product of Leninist ideology, can be answered by looking at the record of the Bolsheviks prior to the civil war. From this we can ascertain the effect of the civil war. And the obvious conclusion is that the record of the initial months of Bolshevik rule point to a less than democratic approach which suggests that authoritarian policies were inherent in Leninism and, as such, pointed the revolution into a path were further authoritarian policies were not only easy to implement, but had to be as alternative options had been eliminated by previous policies. Moreover, Bolshevik ideology itself made such policies easy to accept and to justify.

As discussed in section 6 of the appendix "What happened during the Russian Revolution?", it was during this period that the Bolsheviks started to gerrymander soviets and disband any they lost elections to. As we indicate in section 9 of the appendix "What happened during the Russian Revolution?", they undermined the factory committees, stopping them federating and basically handed the factories to the state bureaucracy. Lenin argued for and implemented one-

man management, piecework, Taylorism and other things Stalinism is condemned for (see section 3, for example). In the army, Trotsky disbanded the soldier committees and elected officers by decree.

How Trotsky defended this policy of appointing officers is significant. It mirrors Lenin's argument in favour of appointed one-man management and, as such, reflects the basic Bolshevik vision of democracy. By looking at his argument we can see how the Bolshevik vision of democracy fatality undermined the Russian Revolution and its socialist content. The problems of the civil war simply deepened the abscess in democracy created by Lenin and Trotsky in the spring of 1918.

Trotsky acknowledged that that *"the soldier-workers and soldier-peasants"* needed *"to elect commanders for themselves"* in the Tzarist army *"not [as] military chiefs, but simply [as] representatives who could guard them against attacks of counter-revolutionary classes."* However, in the new Red Army this was not needed as it was the *"workers' and peasants' Soviets, i.e. the same classes which compose the army"* which is building it. He blandly asserted that *"[h]ere no internal struggle is possible."* To illustrate his point he pointed to the trade unions. *"The metal workers,"* he noted, *"elect their committee, and the committee finds a secretary, a clerk, and a number of other persons who are necessary. Does it ever happen that the workers should say: 'Why are our clerks and treasurers appointed, and not elected?' No, no intelligent workers will say so."* [**Leon Trotsky Speaks**, p. 112–3]

Thus in less than six months, Lenin's call in *"State and Revolution"* that *"[a]ll officials, without exception, [would be] elected and subject to recall **at any time**"* was dismissed as the demand that *"no intelligent workers"* would raise! [**Essential Works of Lenin**, p. 302] But, then again, Trotsky **was** in the process of destroying another apparent *"principle"* of Leninism, namely (to quote, like Lenin, Marx) *"the suppression of the standing army, and the substitution for it of the armed people."* [quoted by Lenin, **Op. Cit.**, p. 300]

Trotsky continues his argument. The Trade union committee, he asserts, would say *"You yourselves have chosen the committee. If you don't like us, dismiss us, but once you have entrusted us with the direction of the union, then give us the possibility of choosing the clerk or the cashier, since we are better able to judge in the matter than you, and if our way of conducting business is bad, then throw us out and elect another committee."* After this defence of elected dictatorship, he states that the *"Soviet government is the same as the committee of a trade union. It is elected by the workers and peasants, and you can at the All-Russian Congress of the Soviets, at any moment you like, dismiss that government and appoint another."* Until that happens, he was happy to urge blind obedience by the sovereign people to their servants: *"But once you have appointed it, you must give it the right to choose the technical specialists, the clerks, the secretaries in the broad sense of the word, and in military affairs, in particular."* He tried to calm the nerves of those who could see the obvious problems with this argument by asking whether it was *"possible for the Soviet government to appoint military specialists against the interests of the labouring and peasant masses?"* [**Op. Cit.**, p. 113]

And the answer to that question is, of course, an empathic yes. Even looking at his own analogy, namely that of a trade union committee, it is obvious that an elected body can have interests separate from and in opposition to those who elected it. The history of trade unionism is full of examples of committees betraying the membership of the unions. And, of course, the history of the Soviet government under Lenin and Trotsky (never mind Stalin!) shows that just

because it was once elected by a majority of the working people does not mean it will act in their best interests.

Trotsky even went one better. *"The army is now only in the process of formation,"* he noted. *"How could the soldiers who have just entered the army choose the chiefs! Have they have any vote to go by? They have none. And therefore elections are impossible."* [**Op. Cit.**, p. 113] If only the Tsar had thought of that one! If he had, he would still be in power. And, needless to say, Trotsky did not apply that particular logic to himself. After all, he had no experience of holding governmental office or building an army (or even being in combat). Nor did any of the other Bolshevik leaders. By the logic of his argument, not only should the workers not been allowed to vote for a soviet government, he and his fellow Bolsheviks should not have assumed power in 1917. But, clearly, sauce for the goose is definitely **not** sauce for the gander.

For all his talk that the masses could replace the Bolsheviks at the All-Russian Congress of Soviets, Trotsky failed to realise that these proposals (and other ones like it) ensured that this was unlikely to happen. Even assuming that the Bolsheviks had not gerrymandered and disbanded soviets, the fact is that the Bolshevik vision of "democracy" effectively hollowed out the grassroots participation required to make democracy at the top anything more than a fig-leaf for party power. He honestly seemed to believe that eliminating mass participation in other areas of society would have no effect on the levels of participation in soviet elections. Would people subjected to one-man management in the workplace and in the army really be truly free and able to vote for parties which had not appointed their bosses? Could workers who were disenfranchised economically and socially remain in political power (assuming you equate voting a handful of leaders into power with *"political power"*)? And does being able to elect a representative every quarter to the All-Russian congress really mean that the working class was really in charge of society? Of course not.

This vision of top-down "democracy" can, of course, be traced back to Marx's arguments of 1850 and Lenin's comments that the *"organisational principle of revolutionary Social-Democracy"* was *"to proceed from the top downward."* (see sections H.3.2 and H.3.3). By equating centralised, top-down decision making by an elected government with "democracy," the Bolsheviks had the ideological justification to eliminate the functional democracy associated with the factory committees and soldiers committees. In place of workers' and soldiers' direct democracy and self-management, the Bolsheviks appointed managers and officers and justified because a workers' party was in power. After all, had not the masses elected the Bolsheviks into power? This became the means by which **real** democracy was eliminated in area after area of Russian working class life. Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic in any meaningful sense for long. At best, it will be like a bourgeois republic with purely elections where people elect a party to misrepresent them every four or so years while real economic, political and social power rests in the hands of a few. At worse, it would be a dictatorship with "elections" whose results are known before hand.

The Leninist vision of "democracy" is seen purely as a means of placing the party into power. Thus power in society shifts to the top, to the leaders of the centralised party in charge of the centralised state. The workers' become mere electors rather than actual controllers of the revolution and are expected to carry out the orders of the party without comment. In other words, a decidedly bourgeois vision of "democracy." Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace and community assemblies and their councils and conferences.

This vision was not a new development. Far from it. While, ironically enough, Lenin's and Trotsky's support for the appointment of officers/managers can be refuted by looking at Lenin's **State and Revolution**, the fact is that the undemocratic perspectives they are based on can be found in Lenin's **What is to be Done?**. This suggests that his 1917 arguments were the aberration and against the true essence of Leninism, not his and Trotsky's policies once they were in power (as Leninists like to argue).

Forgetting that he had argued against *"primitive democracy"* in What is to Be Done?, Lenin had lambasted the opportunists and "present Kautskyists" for *"repeat[ing] the vulgar bourgeois jeers at 'primitive' democracy."* Now, in 1917, it was a case that *"the transition from capitalism to socialism is **impossible** without some 'reversion' to 'primitive' democracy (how else can the majority, even the whole population, proceed to discharge state functions?)"* [**Op. Cit.**, p. 302] Very true. As Leninism in power showed, the conscious elimination of *"primitive democracy"* in the army and workplace ensured that socialism **was** *"impossible."* And this elimination was not justified in terms of "difficult" circumstances but rather in terms of principle and the inability of working people to manage their own affairs directly.

Particularly ironic, given Trotsky's trade union committee analogy was Lenin's comment that *"Bernstein [the arch revisionist and reformist] combats 'primitive democracy' ... To prove that 'primitive democracy' is worthless, Bernstein refers to the experience of the British trade unions, as interpreted by the Webbs. Seventy years of development ... convinced the trade unions that primitive democracy was useless, and they substituted ordinary democracy, i.e. parliamentarism, combined with bureaucracy, for it."* Lenin replied that because the trade unions operated *"**in absolute capitalist slavery**"* a *"number of concessions to the prevailing evil, violence, falsehood, exclusion of the poor from the affairs of the 'higher' administration 'cannot be avoided.' Under socialism much of the 'primitive' democracy will inevitably be revived, since, for the first time in history of civilised society, the **mass** of the population will rise to **independent** participation, not only in voting and elections, **but also in the everyday administration of affairs**"* [**Op. Cit.**, p. 361] Obviously things looked a bit different once he and his fellow Bolshevik leaders were in power. Then the exclusion of the poor from the affairs of the *"higher"* administration was seen as normal practice, as proven by the practice of the trade unions! And as we note in section H.3.8, this *"exclusion"* was taken as a key lesson of the revolution and built into the Leninist theory of the state.

This development was not unexpected. After all, as we noted in section H.5.5, over a decade before Lenin had been less than enthralled by *"primitive democracy"* and more in agreement with Bernstein than he lets on in **State and Revolution**. In **What is to Be Done?**, he based his argument for centralised, top-down party organisation on the experiences of the labour movement in democratic capitalist regimes. He quotes the same book by the Webb's to defend his position. He notes that *"in the first period of existence in their unions, the British workers thought it was an indispensable sign of democracy for all members to do all the work of managing the unions."* This involved *"all questions [being] decided by the votes of all the members"* and all *"official duties"* being *"fulfilled by all the members in turn."* He dismisses *"such a conception of democracy"* as *"absurd"* and *"historical experience"* made them *"understand the necessity for representative institutions"* and *"full-time professional officials."* Ironically, Lenin records that in Russia the *"'primitive' conception of democracy"* existed in two groups, the *"masses of the students and workers"* and the *"Economists of the Bernstein persuasion."* [**Op. Cit.**, pp. 162–3]

Thus Trotsky's autocratic and top-down vision of democracy has its roots within Leninism. Rather than being forced upon the Bolsheviks by difficult circumstances, the eroding of grass-

roots, functional ("primitive") democracy was at the core of Bolshevism. Lenin's arguments in 1917 were the exception, not his practice after he seized power.

This fundamentally undemocratic perspective can be found today in modern Leninism. As well as defending the Bolshevik dictatorship during the civil war, modern Leninists support the continuation of party dictatorship after its end. In particular, they support the Bolshevik repression of the Kronstadt rebellion (see appendix "What was the Kronstadt Rebellion?" for more details). As Trotsky put it in 1937, if the Kronstadt demand for soviet elections had been implemented then *"to free the soviets from the leadership [sic!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves ... Social-Revolutionary-anarchist soviets would serve only as a bridge from the proletarian dictatorship [sic!] to capitalist restoration."* He generalised this example, by pointing to the *"experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats."* [Lenin and Trotsky, **Kronstadt**, p. 90] Modern day Leninists repeat this argument, failing to note that they sound like leftist Henry Kissingers (Kissinger, let us not forget, ensured US aid for Pinochet's coup in Chile and argued that *"I don't see why we need to stand by and watch a country go communist due to the irresponsibility of its own people"*).

Today we have Leninists combining rhetoric about democratic socialism, with elections and recall, with a mentality which justifies the suppression of working class revolt because they are not prepared to stand by and watch a country go capitalist due to the irresponsibility of its own people. Perhaps, unsurprisingly, previously in 1937 Trotsky expressed his support for the *"objective necessity"* of the *"revolutionary dictatorship of a proletarian party"* and, two years later, that the *"vanguard of the proletariat"* must be *"armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself."* (see section H.3.8). If only modern day Leninists were as honest!

So the Bolshevik contempt for working class self-government still exists. While few, however, explicitly proclaim the logic of this position (namely party dictatorship) most defend the Bolsheviks implementing this conclusion in practice. Can we not conclude that, faced with the same problems the Bolsheviks faced, these modern day Leninists will implement the same policies? That they will go from party power to party dictatorship, simply because they know better than those who elected them on such matters? That answer seems all too obvious.

As such, the Bolshevik preference for centralised state power and of representative forms of democracy involved the substitution of the party for the class and, consequently, will facilitate the dictatorship **over** the proletariat when faced with the inevitable problems facing any revolution. As Bakunin put it, a *"people's administration, according to [the Marxists], must mean a people's administration by virtue of a small number of representatives chosen by the people ... [I]t is a deception which would conceal the despotism of a governing minority, all the more dangerous because it appears as a sham expression of the people's will ... [T]he vast majority, the great mass of people, would be governed by a privileged minority ... [of]* ***former*** *workers, who would stop being workers the moment they became rulers or representatives, and would then come to regard the whole blue-collared world from governmental heights, and would not represent the people but themselves and their pretensions."* So the Marxist state would be *"the reign of the* ***scientific mind,*** *the most aristocratic, despotic, arrogant and contemptuous of all regimes. There will be a new class, a new hierarchy of real of bogus learning, and the world will be divided into a dominant, science-based minority and a vast, ignorant majority. And then let the ignorant masses beware!"* [**Michael Bakunin: Selected Writings**, p. 268, pp. 268–9 and p. 266]

In summary, Trotsky's deeply undemocratic justification for appointing officers, like Lenin's similar arguments for appointing managers, express the logic and reality of Bolshevism far better than statements made before the Bolsheviks seized power and never implemented. Sadly, modern Leninists concentrate on the promises of the election manifesto rather than the grim reality of Bolshevik power and its long standing top-down vision of "democracy." A vision which helped undermine the revolution and ensure its degeneration into a party dictatorship presiding over a state capitalist economy.

5 What was the effect of the Bolshevik vision of "socialism"?

As we discussed in section H.3.1, anarchists and most Marxists are divided not only by **means** but also by **ends**. Simply put, libertarians and Leninist do **not** have the same vision of socialism. Given this, anarchists are not surprised at the negative results of the Bolshevik revolution — the use of anti-socialist means to attain anti-socialist ends would obviously have less than desirable results.

The content of the Bolshevik vision of "socialism" is criticised by anarchists on two main counts. Firstly, it is a top-down, centralised vision of "socialism." This can only result in the destruction of working class economic power at the point of production in favour of centralised bureaucratic power. Secondly, for Bolshevism nationalisation, **not** workers' self-management, was the key issue. We will discuss the first issue here and the second in the following section.

The Bolshevik vision of "socialism" was inherently centralised and top-down. This can be seen from the organisational schemas and arguments made by leading Bolsheviks before and immediately after the Revolution. For example, we discover Trotsky arguing in March 1918 that workplaces *"will be subject to policies laid down by the local council of workmen's deputies"* who, in turn, had *"their range of discretion ... limited in turn by regulations made for each class of industry by the boards or bureaux of the central government."* He dismissed Kropotkin's communalist ideas by saying local autonomy was not *"suited to the state of things in modern industrial society"* and *"would result in endless frictions and difficulties."* As the *"coal from the Donets basin goes all over Russia, and is indispensable in all sorts of industries"* you could not allow *"the organised people of that district [to] do what they pleased with the coal mines"* as they *"could hold up all the rest of Russia."* [contained in Al Richardson (ed.), **In Defence of the Russian Revolution**, p. 186]

Lenin repeated this centralised vision in June of that year, arguing that *"Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the general production directions and decisions of the centre."* He continued by explicitly arguing that *"[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the given industry ... would be regional anarcho-syndicalism, and not communism."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 292]

Thus the Bolshevik economic ideal was centralised and top-down. This is not unsurprising, as Lenin had promised precisely this when the Bolsheviks got into power. As in the Bolshevik party itself, the lower organs were controlled by the higher ones (and as we will discuss, these higher ones were not directly elected by the lower ones). The problems with this vision are many fold.

Firstly, to impose an "ideal" solution would destroy a revolution — the actions and decisions (**including what others may consider mistakes**) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). Thus **real** socialisation must proceed from below, reflecting the real development and desires of those involved. Centralisation can only result in replacing socialisation with nationalisation and the elimination of workers' self-management with hierarchical management. Workers' again would be reduced to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Secondly, Trotsky seems to think that workers at the base of society would be so unchanged by a revolution that they would hold their fellow workers ransom. And, moreover, that other workers would let them. That, to say the least, seems a strange perspective. But not as strange as thinking that giving extensive powers to a central body will **not** produce equally selfish behaviour (but on a wider and more dangerous scale). The basic fallacy of Trotsky's argument is that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin's power was derived from the state bureaucracy which ran the economy in its own interests. Not that did not suddenly arise with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, *"in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies"* and he points to the *"not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People's Commissars of the Northern Region, the Vologda Council of People's Commissars, and the Petrograd Food Commissariat."* [**Before Stalinism**, p. 73]

In other words, centralised bodies are not immune to viewing resources as their own property and doing as they please with it. Compared to an individual workplace, the state's power to enforce its viewpoint against the rest of society is considerably stronger and the centralised system would be harder to control. The requirements of gathering and processing the information required for the centre to make intelligent decisions would be immense, thus provoking a large bureaucracy which would be hard to control and soon become the **real** power in the state. A centralised body, therefore, effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. If that sounds familiar, it should. It is precisely what **did** happen in Lenin's Russia and laid the basis for Stalinism.

Thirdly, to eliminate the dangers of workers' self-management generating "propertarian" notions, the workers' have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates bourgeois social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had *"pointed out the necessity of recognising the dictatorial authority of single individuals for the pursue of carrying out the Soviet idea"* and even claimed that at that stage *"there were no disputes in connection with the question"* of one-man management. [quoted by Brinton, **Op. Cit.**, p. 65] While the first claim is true (Lenin argued for one-man management appointed from above before the start of the Civil War in May 1918) the latter one is not true (excluding anar-

chists, anarcho-syndicalists and Maximalists, there were also the dissent *"Left Communists"* in the Bolshevik party itself).

Fourthly, centralism was not that efficient. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre: *"it seems apparent that many workers themselves ... had now come to believe .. . that confusion and anarchy [sic!]* ***at the top*** *were the major causes of their difficulties, and with some justification. The fact was that Bolshevik administration was chaotic ... Scores of competitive and conflicting Bolshevik and Soviet authorities issued contradictory orders, often brought to factories by armed Chekists. The Supreme Economic Council... issu[ed] dozens of orders and pass[ed] countless directives with virtually no real knowledge of affairs."* [William G. Rosenberg, **Russian Labour and Bolshevik Power**, p. 116] The Bolsheviks, as Lenin had promised, built from the top-down their system of *"unified administration"* based on the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, **Op. Cit.**, p. 36] This was very centralised and very inefficient (see section 7 for more discussion).

Moreover, having little real understanding of the circumstances on the ground they could not compare their ideological assumptions and preferences to reality. As an example, the Bolshevik idea that "big" was automatically "more efficient" and "better" had a negative impact on the revolution. In practice, as Thomas F. Remington notes, this simply resulted generated waste:

> *"The waste of scare materials at [the giant] Putilov [plant] was indeed serious, but not only political unrest had caused it. The general shortage of fuel and materials in the city took its greatest toll on the largest enterprises, whose overhead expenditures for heating the plant and firing the furnaces were proportionally greater than those for smaller enterprises. This point — explained by the relative constant proportions among needed inputs to producers at any given point in time – only was recognised latter. Not until 1919 were the regime's leaders prepared to acknowledge that small enterprises, under the conditions of the time, might be more efficient in using resources: and not until 1921 did a few Bolsheviks theorists grasp the economic reasons for this apparent violation of their standing assumption that larger units were inherently more productive. Thus not only were the workers accused of politically motivated resistance, but the regime blamed them for the effects of circumstances which the workers had no control."* [**Building Socialism in Bolshevik Russia**, p. 106]

All in all, the Bolshevik vision of socialism was a disaster. Centralism was a source of massive economic mismanagement and, moreover, bureaucratisation from the start. As anarchists had long predicted. As we discuss in section 12 of the appendix "What happened during the Russian Revolution?", there was an alternative in the form of the factory committees and the federation. Sadly this was not part of the Bolshevik vision. At best they were tacked onto this vision as a (very) junior partner (as in 1917) or they were quickly marginalised and then dumped when they had outlived their usefulness in securing Bolshevik power (as in 1918).

While some Leninists like to paint the economic policies of the Bolsheviks in power as being different from what they called for in 1917, the truth is radically different. For example, Tony Cliff of the UK's "Socialist Workers Party" asserts, correctly, that in April 1918 the *"defence of state capitalism constituted the essence of his economic policy for this period."* However, he also

states that this was *"an entirely new formulation,"* which was not the case in the slightest. [Cliff, **Op. Cit.**, p. 69] As Lenin himself acknowledged.

Lenin had always confused state capitalism with socialism. *"State capitalism,"* he wrote, *"is a complete **material** preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism **there are no gaps.**"* He argued that socialism *"is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly **made to benefit the whole people**; by this token it **ceases** to be capitalist monopoly."* [**The Threatening Catastrophe and how to avoid it**, p. 38 and p. 37] This was in May, 1917. A few months latter, he was talking about how the institutions of state capitalism could be taken over and used to create socialism (see section H.3.12). Unsurprisingly, when defending Cliff's *"new formulation"* against the *"Left Communists"* in the spring of 1918 he noted that he gave his *"'high' appreciation of state capitalism" "**before** the Bolsheviks seized power."* [**Selected Works**, vol. 2, p. 636]

And, indeed, his praise for state capitalism and its forms of social organisation can be found in his State and Revolution:

> *"the **post-office** [is] an example of the socialist system ... At present ... [it] is organised on the lines of a state **capitalist** monopoly. Imperialism is gradually transforming all trusts into organisations of a similar type ... the mechanism of social management is here already to hand. Overthrow the capitalists ... Our immediate object is to organise the **whole** of national economy on the lines of the postal system ... It is such a state, standing on such an economic basis, that we need."* [**Essential Works of Lenin**, pp. 307–8]

Given this, Lenin's rejection of the factory committee's model of socialism comes as no surprise (see section 10 of the appendix "What happened during the Russian Revolution?" for more details). As we noted in section H.3.14, rather than promote workers' control, Lenin effectively undermined it. Murray Bookchin points out the obvious:

> *"In accepting the concept of worker's control, Lenin's famous decree of November 14, 1917, merely acknowledged an accomplished fact; the Bolsheviks dared not oppose the workers at this early date. But they began to whittle down the power of the factory committees. In January 1918, a scant two months after 'decreeing' workers' control, Lenin began to advocate that the administration of the factories be placed under trade union control. The story that the Bolsheviks 'patiently' experimented with workers' control, only to find it 'inefficient' and 'chaotic,' is a myth. Their 'patience' did not last more than a few weeks. Not only did Lenin oppose direct workers' control within a matter of weeks ... even union control came to an end shortly after it had been established. By the summer of 1918, almost all of Russian industry had been placed under bourgeois forms of management."* [**Post-Scarcity Anarchism**, pp. 200–1]

Significantly, even his initial vision of workers' control was hierarchical, centralised and top-down. In the workplace it was to be exercised by factory committees. The *"higher workers' control bodies"* were to be *"composed of representatives of trade unions, factory and office workers' committees, and workers' co-operatives."* The decisions of the lower bodies *"may be revoked only by higher workers' control bodies."* [quoted by Cliff, **Op. Cit.**, p. 10] As Maurice Brinton notes:

> *"there [was] ... a firm hierarchy of control organs ... each Committee was to be responsible to a 'Regional Council of Workers' Control', subordinated in turn to an 'All-Russian Council of Workers' Control'. The composition of these higher organs was decided by the Party.*
>
> *"The trade unions were massively represented in the middle and higher strata of this new pyramid of 'institutionalised workers' control.' For instance the All-Russian Council of Workers' Control was to consist of 21 'representatives': 5 from the All-Russian Central Executive Committee of the Soviets, 5 from the Executive of the All-Russian Council of Trade Unions, 5 from the Association of Engineers and Technicians, 2 from the Association of Agronomists, 2 from the Petrograd Trade Union Council, 1 from each All-Russian Trade Union Federation numbering fewer than 100,000 members (2 for Federations of over this number)... and 5 from the All-Russian Council of Factory Committees! The Factory Committees often under anarcho-syndicalist influence had been well and truly 'cut down to size'."* [**Op. Cit.**, p. 18]

As we note in section 10 of the appendix "What happened during the Russian Revolution?", this was a conscious preference on Lenin's part. The factory committees had started to federate, creating their own institutional framework of socialism based on the workers own class organisation. Lenin, as he had explained in 1917, favoured using the institutions created by *"state capitalism"* and simply tacked on a form of *"workers' control"* distinctly at odds with the popular usage of the expression. He **rejected** the suggestions of factory committees themselves. The Supreme Economic Council, established by the Soviet government, soon demonstrated how to really mismanage the economy.

As such, the economic developments proposed by Lenin in early 1918 and onwards were **not** the result of the specific problems facing the Russian revolution. The fact is while the dire problems facing the Russian revolution undoubtedly made many aspects of the Bolshevik system worse, they did not create them. Rather, the centralised, bureaucratic and top-down abuses Leninists like to distance themselves from where, in fact, built into Lenin's socialism from the start. A form of socialism Lenin and his government explicitly favoured and created in opposition to other, authentically proletarian, versions.

The path to state capitalism was the one Lenin wanted to trend. It was not forced upon him or the Bolsheviks. And, by re-introducing wage slavery (this time, to the state) the Bolshevik vision of socialism helped undermine the revolution, workers' power and, sadly, build the foundations of Stalinism.

6 How did Bolshevik preference for nationalisation affect the revolution?

As noted in the last section, unlike anarchism, for Bolshevism nationalisation, **not** workers' self-management, was the key issue in socialism. As noted in section 3, Lenin had proclaimed the necessity for appointed one-man managers and implementing *"state capitalism"* in April 1918. Neither policy was thought to harm the socialist character of the regime. As Trotsky stressed in 1920, the decision to place a manager at the head of a factory instead of a workers' collective had no political significance:

> *"It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictator-*

> *ship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers and not at all in the form in which individual economic organisations are administered."* [**Terrorism and Communism**, p. 162]

Nor was this considered a bad thing or forced upon the Bolsheviks as a result of terrible circumstances. Quite the reverse: *"I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully."* [**Op. Cit.**, pp. 162–3] As discussed in the previous section, this evaluation fits perfectly into Bolshevik ideology and practice before and after they seized power. One can easily find dozens of quotations from Lenin expressing the same idea.

Needless to say, Trotsky's *"collective will of the workers"* was simply a euphemism for the Party, whose dictatorship **over** the workers Trotsky glibly justified:

> *"We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class."* [**Op. Cit.**, p. 109]

While Trotsky's honesty on this matter is refreshing (unlike his followers today who hypocritically talk about the "leadership" of the Bolshevik party) we can say that this was a **fatal** position to take. Indeed, for Trotsky **any** system (including the militarisation of labour) was acceptable as the key *"differences ... is defined by a fundamental test: who is in power?"* — the capitalist class or the proletariat (i.e. the party) [**Op. Cit.**, pp. 171–2] Thus working class control over their own affairs was of little importance: *"The worker does not merely bargain with the Soviet State; no, he is subordinated to the Soviet State, under its orders in every direction — for it is **his** State."* [**Op. Cit.**, p. 168] This, of course, echoed his own arguments in favour of appointment (see section 4) **and** Lenin's demands for the *"exercise of dictatorial powers by individuals"* in the workplace (see section 3) in early 1918. Cornelius Castoriadis points out the obvious:

> *"The role of the proletariat in the new State was thus quite clear. It was that of enthusiastic and passive citizens. And the role of the proletariat in work and in production was no less clear. On the whole, it was the same as before — under capitalism — except that workers of 'character and capacity' [to quote Trotsky] were to be chosen to replace factory managers who had fled."* [**The Role of the Bureaucracy in the birth of the Bureaucracy**, p. 99]

Trotsky's position, it should be noted, remained consistent. In the early 1930s he argued (in respect to Stalin's regime) that *"anatomy of society is determined by its economic relations. So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class."* [**The Class Nature of The Soviet State**] Obviously, if

the prime issue is property and not who **manages** the means of production (or even *"the state"*) then having functioning factory-committees becomes as irrelevant as having democratic soviets when determining whether the working class is in power or not.

(As an aside, we should not by that surprised that Trotsky could think the workers were the *"ruling class"* in the vast prison-camp which was Stalin's USSR, given that he thought the workers were the *"ruling class"* when he and Lenin headed the Bolshevik party dictatorship! Thus we have the strange division Leninists make between Lenin's dictatorship and Stalin's (and those of Stalin's followers). When Lenin presides over a one-party dictatorship, breaks up strikes, bans political parties, bans Bolshevik factions, and imprisons and shoots political dissidents these are all regrettable but necessary steps in the protection of the "proletarian state." When Stalin does the exact same thing, a few years later, they are all terrible examples of the deformation of this same "proletarian state"!)

For anarchists (and other libertarian socialists) this was and is nonsense. Without workers' self-management in production, socialism cannot exist. To focus attention of whether individuals own property or whether the state does is fundamentally a red-herring. Without workers' self-management of production, private capitalism will simply have been replaced by **state** capitalism. As one anarchist active in the factory committee movement argued in January, 1918, it is *"not the liberation of the proletariat when many individual plunders are changed for one very powerful plunder — the state. The position of the proletariat remains the same."* Therefore, *"[w]e must not forget that the factory committees are the nuclei of the future socialist order"* nor must we forget *"that the state ... will try to maintain its own interests at the expense of the interests of the workers. There is no doubt that we will be witnesses of a great conflict between the state power in the centre and the organisations composed exclusively of workers which are found in the localities."* He was proved right. Instead of centralised the Bolshevik vision of state capitalism, the anarchists argued that factory committees *"be united on the basic of federalism, into industrial federations ... [and] poly-industrial soviets of national economy."* Only in that way could **real** socialism be created. [quoted by Frederick I. Kaplan, **Bolshevik Ideology and the Ethics of Soviet Labour**, p. 163 and p. 166] (see section 7 of the appendix "What happened during the Russian Revolution?" for more on the factory committee movement).

The reason is obvious. It is worth quoting Cornelius Castoriadis at length on why the Bolshevik system was doomed to failure:

> *"So we end up with the uncontested power of managers in the factories, and the Party's exclusive 'control' (in reality, what kind of control was it, anyway?). And there was the uncontested power of the Party over society, without any control. From that point on, nobody could prevent these two powers from merging, could anyone stop the two strata embodying them from merging, nor could the consolidation of an irremovable bureaucracy ruling over all sectors of social life be halted. The process may have been accelerated or magnified by the entry of non-proletarian elements into the Party, as they rushed to jump on the bandwagon. But this was a consequence, and not a cause, of the Party's orientation ...*
>
> *"Who is to manage production ...? ... the correct answer [is] the collective organs of labouring people. What the party leadership wanted, what it had already imposed — and on this point there was no difference between Lenin and Trotsky — was a hierarchy*

directed from above. We know that this was the conception that triumphed. We know, too, where this 'victory' led ...

"In all Lenin's speeches and writings of this period, what recurs again and again like an obsession is the idea that Russia ought to learn from the advanced capitalist countries; that there are not a hundred and one different ways of developing production and labour productivity if one wants to emerge from backwardness and chaos; that one must adopt capitalist methods of 'rationalisation' and management as well as capitalist forms of work 'incentives.' All these, for Lenin, are just 'means' that apparently could freely be placed in the service of a radically different historical end, the building of socialism.

*"Thus Trotsky, when discussing the merits of militarism, came to separate the army itself, its structure and its methods, from the social system it serves. What is criticisable in bourgeois militarism and in the bourgeois army, Trotsky says in substance, is that they are in the service of the bourgeoisie. Except for that, there is nothing in them to be criticised. The sole difference, he says, lies in this: '**Who is in power**?' Likewise, the dictatorship of the proletariat is not expressed by the 'form in which individual economic enterprises are administered.'*

"The idea that like means cannot be placed indifferently into the service of different ends; that there is an intrinsic relationship between the instruments used and the result obtained; that, especially, neither the army nor the factory are simple 'means' or 'instruments,' but social structures in which are organised two fundamental aspects of human relations (production and violence); that in them can be seen in condensed form the essential expression of the type of social relations that characterise an era — this idea, though perfectly obvious and banal for Marxists, was totally 'forgotten.' It was just a matter of developing production, using proven methods and structures. That among these 'proofs' the principal one was the development of capitalism as a social system and that a factory produces not so much cloth or steel but proletariat and capital were facts that were utterly ignored.

*"Obviously, behind this 'forgetfulness' is hidden something else. At the time, of course, there was the desperate concern to revive production as soon as possible and to put a collapsing economy back on its feet. This preoccupation, however, does not fatally dictate the choice of 'means.' If it seemed obvious to Bolshevik leaders that the sole effective means were capitalist ones, it was because they were imbued with the conviction that capitalism was the only effective and rational system of production. Faithful in this respect to Marx, they wanted to abolish private property and market anarchy, but not the type of organisation capitalism had achieved at the point of production. They wanted to modify the **economy,** not the relations between people at work or the nature of labour itself.*

"At a deeper level still, their philosophy was to develop the forces of production. Here too they were the faithful inheritors of Marx — or at least one side of Marx, which became the predominant one in his mature writings. The development of the forces of production was, if not the ultimate goal, at any rate the essential means, in the sense that everything else would follow as a by-product and that everything else had to be subordinated to it...

> *"To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The 'need' for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the 'need' for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and,* ***in the final analysis****, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy."* [**Op. Cit.**, pp. 100–4]

Therefore, we *"may therefore conclude that, contrary to the prevailing mythology, it was not in 1927, or in 1923, or even in 1921 that the game was played and lost, but much earlier, during the period from 1918 to 1920... . [1921 saw] the beginning of the reconstruction of the productive apparatus. This reconstruction effort, however, was already firmly set in the groove of bureaucratic capitalism."* [**Op. Cit.**, p. 99] In this, they simply followed the economic ideas Lenin had expounded in 1917 and 1918, but in an even more undemocratic way. Modern-day Leninism basically takes the revolutionised Russia of the Bolsheviks and, essentially, imposes upon it a more democratic form of government rather than Lenin's (and then Stalin's). Anarchists, however, still oppose the economy.

Ironically, proof that libertarians are right on this issue can be found in Trotsky's own work. In 1936, he argued that the *"demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war. Thus on all sides the masses were pushed away gradually from actual participation in the leadership of the country."* [**The Revolution Betrayed**] Needless to say, he failed to note who had abolished the election of commanders in the Red Army in March 1918, namely himself (see section 4). Similarly, he failed to note that the *"masses"* had been *"pushed ... from actual participation in the leadership of the country"* well before the end of the civil war and that, at the time, he was not concerned about it. Equally, it would be churlish to note that back in 1920 he thought that *"'Military' qualities ... are valued in every sphere. It was in this sense that I said that every class prefers to have in its service those of its members who, other things being equal, have passed through the military school ... This experience is a great and valuable experience. And when a former regimental commissary returns to his trade union, he becomes not a bad organiser."* [**Terrorism and Communism**, p. 173]

In 1937 Trotsky asserted that *"liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repressions, meant an upheaval of social relations in the interests of the masses, whereas Stalin's Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority."* [Trotsky, **Stalinism and Bolshevism**] Yet Stalin's *"upheaval"* was built upon the social relations created when Lenin and Trotsky held power. State ownership, one-man management, and so on where originally advocated and implemented by Lenin and Trotsky. The bureaucracy did not have to expropriate the working class economically – "real" Bolshevism had already did so. Nor can it be said that the social relations associated with the political sphere had fundamentally changed under Stalin. He had, after all, inherited the one-party state from Lenin and Trotsky. In a nutshell, Trotsky is talking nonsense.

Simply put, as Trotsky himself indicates, Bolshevik preference for nationalisation helped ensure the creation and subsequent rise of the Stalinist bureaucracy. Rather than be the product of terrible objective circumstances as his followers suggest, the Bolshevik state capitalist economic system was at the heart of their vision of what socialism was. The civil war simply brought the underlying logic of vision into the fore.

7 How did Bolshevik preference for centralism affect the revolution?

The next issue we will discuss is centralisation. Before starting, it is essential that it be stressed that anarchists are **not** against co-ordinated activity and organisation on a large scale. Anarchists stress the need for federalism to meet the need for such work (see section A.2.9, for example). As such, our critique of Bolshevik centralism is **not** a call for "localism" or isolation (as many Leninists assert). Rather, it is a critique of **how** the social co-operation essential for society will be conducted. Will it be in a federal (and so bottom-up) way or will it be in a centralised (and so top-down) way?

It goes almost without saying that Bolshevik ideology was centralist in nature. Lenin repeatedly stressed the importance of centralisation, arguing constantly that Marxism was, by its very nature, centralist (and top-down — section H.3.3). Long before the revolution, Lenin had argued that within the party it was a case of *"the transformation of the power of ideas into the power of authority, the subordination of lower Party bodies to higher ones."* [**Collected Works**, vol. 7, p. 367] Such visions of centralised organisation were the model for the revolutionary state. In 1917, he repeatedly stressed that after it the Bolsheviks would be totally in favour of *"centralism"* and *"strong state power."* [Lenin, **Selected Works**, vol. 2, p. 374] Once in power, they did not disappoint.

Anarchists argue that this prejudice in favour of centralisation and centralism is at odds with Leninist claims to be in favour of mass participation. It is all fine and well for Trotskyist Tony Cliff to quote Lenin arguing that under capitalism the *"talent among the people"* is *"merely suppressed"* and that it *"must be given an opportunity to display itself"* and that this can *"save the cause of socialism,"* it is something else for Lenin (and the Leninist tradition) to favour organisational structures that allow that to happen. Similarly, it is fine to record Lenin asserting that *"living, creative socialism is the product of the masses themselves"* but it is something else to justify the barriers Leninist ideology placed in the way of it by its advocacy of centralism. [quoted by Tony Cliff, **Lenin**, vol. 3, p. 20 and p. 21]

The central contradiction of Leninism is that while it (sometimes) talks about mass participation, it has always prefers an organisational form (centralism) which hinders, and ultimately destroys, the participation that **real** socialism needs.

That centralism works in this way should come as no surprise. After all, it based on centralising power at the top of an organisation and, consequently, into a few hands. It was for this precise reason that **every** ruling class in history has utilised centralisation against the masses. As we indicated in section B.2.5, centralisation has always been the tool of minority classes to disempower the masses. In the American and French revolutions, centralisation of state power was the means used to destroy the revolution, to take it out off the hands of the masses and concentrate it into the hands of a minority. In France:

> *"From the moment the bourgeoisie set themselves against the popular stream they were in need of a weapon that could enable them to resist pressure from the bras nus [working people]; they forced one by strengthening the central power ... [This was] the formation of the state machinery through which the bourgeoisie was going to enslave the proletariat. Here is the centralised state, with its bureaucracy and police ... [it was] a conscious attempt to reduce ... the power of the people."* [Daniel Guerin, **Class Struggle in the First French Republic**, p. 176]

The reason is not hard to understand — mass participation and class society do not go together. Thus, *"the move towards bourgeois dictatorship"* saw *"the strengthening of the central power against the masses."* [Guerin, **Op. Cit.**, pp. 177–8] *"To attack the central power,"* argued Kropotkin, *"to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more."* [**Words of a Rebel**, p. 143]

Can we expect a similar concentration of the central power under the Bolsheviks to have a different impact? And, as discussed in appendix "What happened during the Russian Revolution?" we find a similar marginalisation of the working class from its own revolution. Rather than being actively participating in the transformation of society, they were transformed into spectators who simply were expected to implement the decisions made by the Bolsheviks on their behalf. Bolshevik centralisation quickly ensured the disempowerment of working class people. Unsurprisingly enough, given its role in class society and in bourgeois revolutions.

In this section of the FAQ, we will indicate why this process happened, why Bolshevik centralisation undermined the socialist content of the revolution in favour of new forms of oppression and exploitation.

Therefore, anarchists argue, centralism cannot help but generate minority rule, not a classless society. Representative, and so centralised, democracy, argued Malatesta, *"substitutes the will of a few for that of all ... and in the name of a fictitious collective interest, rides roughshod over every real interests, and by means of elections and the vote, disregards the wishes of each and everyone."* [**Life and Ideas**, p. 147]

This is rooted in the nature of the system, for democracy does not mean, in practice, *"rule by all the people."* Rather, as Malatesta pointed out, it *"would be closer to the truth to say 'government of the majority of the people."* And even this is false, as *"it is never the case that the representatives of the majority of the people are in the same mind on all questions; it is therefore necessary to have recourse again to the majority system and thus we will get closer still to the truth with 'government of the majority of the elected by the majority of the electors.'"* This, obviously, *"is already beginning to bear a strong resemblance to minority government."* And so, *"it is easy to understand what has already been proven by universal historical experience: even in the most democratic of democracies it is always a small minority that rules and imposes its will and interests by force."* And so centralism turns democracy into little more than picking masters. Therefore, anarchists argue, *"those who really want 'government of the people' ... must abolish government."* [**The Anarchist Revolution**, p. 78]

The Russian Revolution is a striking confirmation of this libertarian analysis. By applying centralism, the Bolsheviks disempowered the masses and concentrated power into the hands of the party leadership. This places power in a distinct social class and subject to the pervasive

effects of their concrete social circumstances within their institutional position. As Bakunin predicted with amazing accuracy:

> *"The falsehood of the representative system rests upon the fiction that the executive power and the legislative chamber issuing from popular elections must, or even can for that matter, represent the will of the people ... the instinctive aims of those who govern ... are, because of their exceptional position diametrically opposed to the instinctive popular aspirations. Whatever their democratic sentiments and intentions may be, viewing society from the high position in which they find themselves, they cannot consider this society in any other way but that in which a schoolmaster views the pupils. And there can be no equality between the schoolmaster and the pupils... Whoever says political power says domination. And where domination exists, a more or less considerable section of the population is bound to be dominated by others... those who do the dominating necessarily must repress and consequently oppress those who are subject to the domination ... [This] explains why and how men who were democrats and rebels of the reddest variety when they were a part of the mass of governed people, became exceedingly moderate when they rose to power. Usually these backslidings are attributed to treason. That, however, is an erroneous idea; they have for their main cause the change of position and perspective ... if there should be established tomorrow a government . .. made up exclusively of workers, those ... staunch democrats and Socialists, will become determined aristocrats, bold or timid worshippers of the principle of authority, and will also become oppressors and exploiters."* [**The Political Philosophy of Bakunun**, p. 218]

However, due to the inefficiencies of centralised bodies, this is not the end of the process. Around the new ruling bodies inevitably springs up officialdom. This is because a centralised body does not know what is happening in the grassroots. Therefore it needs a bureaucracy to gather and process that information and to implement its decisions. In the words of Bakunin:

> *"where is the head, however brilliant it may be, or if one wishes to speak of a collective dictatorship, were it formed of many hundreds of individuals endowed with superior faculties, where are those brains powerful enough and wide-ranging enough to embrace the infinite multiplicity and diversity of the real interests, aspirations, wishes and needs whose sum total constitutes the collective will of a people, and to invent a social organisation can which can satisfy everybody? This organisation will never be anything but a Procrustean bed which the more or less obvious violence of the State will be able to force unhappy society to lie down on... Such a system ... would lead inevitably to the creation of a new State, and consequently to the formation of a governmental aristocracy, that is, an entire class of people, having nothing in common with the mass of people ... [and would] exploit the people and subject them."* [**Michael Bakunin: Selected Writings**, pp. 204–6]

As the bureaucracy is permanent and controls information and resources, it soon becomes the main source of power in the state. The transformation of the bureaucracy from servant to the master soon results. The "official" government is soon controlled by it, shaping its activities in line with its interests. Being highly centralised, popular control is even more limited than

government control — people would simply not know where real power lay, which officials to replace or even what was going on within the distant bureaucracy. Moreover, if the people did manage to replace the correct people, the newcomers would be subject to the same institutional pressures that corrupted the previous members and so the process would start again (assuming their did not come under the immediate influence of those who remained in the bureaucracy). Consequently, a new bureaucratic class develops around the centralised bodies created by the governing party. This body would soon become riddled with personal influences and favours, so ensuring that members could be sheltered from popular control. As Malatesta argued, they *"would use every means available to those in power to have their friends elected as the successors who would then in turn support and protect them. And thus government would be passes to and fro in the same hands, and **democracy,** which is the alleged government of all, would end up, as usual, in an **oligarchy,** which is the government of a few, the government of a class."* [**Anarchy**, p. 34]

This state bureaucracy, of course, need not be dictatorial nor the regime it rules/administers be totalitarian (for example, bourgeois states combine bureaucracy with many real and important liberties). However, such a regime is still a class one and socialism would still not exist — as proven by the state bureaucracies and nationalised property within bourgeois society.

So the danger to liberty of combining political **and** economic power into one set of hands (the state's) is obvious. As Kropotkin argued:

> *"the state was, and continues to be, the chief instrument for permitting the few to monopolise the land, and the capitalists to appropriate for themselves a quite disproportionate share of the yearly accumulated surplus of production. Consequently, while combating the present monopolisation of land, and capitalism altogether, the anarchists combat with the same energy the state, as the main support of that system. Not this or that special form, but the state altogether .. . The state organisation, having always been, both in ancient and modern history ... the instrument for establishing monopolies in favour of the ruling minorities, cannot be made to work for the destruction of these monopolies. The anarchists consider, therefore, that to hand over to the state all the main sources of economical life — the land, the mines, the railways, banking, insurance, and so on — as also the management of all the main branches of industry, in addition to all the functions already accumulated in its hands (education, state-supported religions, defence of the territory, etc.), would mean to create a new instrument of tyranny. State capitalism would only increase the powers of bureaucracy and capitalism. True progress lies in the direction of decentralisation, both **territorial** and **functional**, in the development of the spirit of local and personal initiative, and of free federation from the simple to the compound, **in lieu** of the present hierarchy from the centre to the periphery."* [**Kropotkin's Revolutionary Pamphlets**, p. 286]

Thus we have the basic argument **why** centralism will result in the continuation of class society. Does the Bolshevik experience contradict this analysis? Essentially, it confirms to Kropotkin's predictions on the uselessness of "revolutionary" government:

> *"Instead of acting for themselves, instead of marching forward, instead of advancing in the direction of the new order of things, the people confiding in their governors, entrusted to them the charge of taking initiative. This was the first consequence of the inevitable*

result of elections... Shut up in the city hall, charged to proceed after the forms established by the preceding governments, these ardent revolutionists, these reformers found themselves smitten with incapacity and sterility... but it was not the men who were the cause for this failure — it was the system...

"The will of the bulk of the nation once expressed, the rest would submit to it with a good grace, but this is not how things are done. The revolution bursts out long before a general understanding has come, and those who have a clear idea of what should be done the next day are only a very small minority. The great mass of the people have as yet only a general idea of the end which they wish realised, without knowing much how to advance towards that end, and without having much confidence in the direction to follow. The practical solution will not be found, will not be made clear until the change will have already begun. It will be the product of the revolution itself, of the people in action, — or else it will be nothing, incapable of finding solutions which can only spring from the life of the people... The government becomes a parliament with all the vices of a middle-class parliament. Far from being a 'revolutionary' government it becomes the greatest obstacle to the revolution and at last the people find themselves compelled to put it out of the way, to dismiss those that but yesterday they acclaimed as their children.

"But it is not so easy to do so. The new government which has hastened to organise a new administration in order to extend it's domination and make itself obeyed does not understand giving up so easily. Jealous of maintaining it's power, it clings to it with all the energy of an institution which has yet had time to fall into senile decay. It decides to oppose force with force, and there is only one means then to dislodge it, namely, to take up arms, to make another revolution in order to dismiss those in whom the people had placed all their hopes." [**Op. Cit.**, pp. 240–2]

By the spring and summer of 1918, the Bolshevik party had consolidated its power. It had created a new state, marked as all states are by the concentration of power in a few hands and bureaucracy. Effective power became concentrated into the hands of the executive committees of the soviets from top to bottom. Faced with rejection at soviet election after soviet election, the Bolsheviks simply disbanded them and gerrymandered the rest. At the summit of the new state, a similar process was at work. The soviets had little real power, which was centralised in Lenin's new government. This is discussed in more detail in section 6 of the appendix "What happened during the Russian Revolution?". Thus centralisation quickly displaced popular power and participation. As predicted by Russia anarchists in November 1917:

"Once their power is consolidated and 'legalised', the Bolsheviks — who are Social Democrats, that is, men of centralist and authoritarian action — will begin to rearrange the life of the country and of the people by governmental and dictatorial methods, imposed by the centre. The[y] ... will dictate the will of the party to all Russia, and command the whole nation. Your Soviets and your other local organisations will become little by little, simply executive organs of the will of the central government. In the place of healthy, constructive work by the labouring masses, in place of free unification from the bottom, we will see the installation of an authoritarian and statist apparatus which would act from above and set about wiping out everything that stood

> *in its way with an iron hand. The Soviets and other organisations will have to obey and do its will. That will be called 'discipline.'"* [quoted by Voline, **The Unknown Revolution**, p. 235]

From top to bottom, the new party in power systematically undermined the influence and power of the soviets they claimed to be ensuring the power of. This process had begun, it should be stressed **before** the start of the civil war in May, 1918. Thus Leninist Tony Cliff is wrong to state that it was *"under the iron pressure of the civil war"* which forced the Bolshevik leaders *"to move, as the price of survival, to a **one-party system.**"* [**Revolution Besieged**, p. 163] From the summer of 1918 (i.e. before the civil war even started), the Bolsheviks had turned from the first of Kropotkin's "revolutionary" governments (representative government) to the other, dictatorship, with sadly predictable results.

So far, the anarchist predictions on the nature of centralised revolutionary governments had been confirmed. Being placed in a new social position and, therefore, different social relationships, produced a dramatic revision on the perspectives of the Bolsheviks. They went from being in favour of party power to being in favour of party dictatorship. They acted to ensure their power by making accountability and recall difficult, if not impossible, and simply ignored any election results which did not favour them.

What of the second prediction of anarchism, namely that centralisation will recreate bureaucracy? That, too, was confirmed. After all, some means were required to gather, collate and provide information by which the central bodies made their decisions. Thus a necessary side-effect of Bolshevik centralism was bureaucracy, which, as is well known, ultimately fused with the party and replaced Leninism with Stalinism. The rise of a state bureaucracy started immediately with the seizure of power by the Bolsheviks. Instead of the state starting to *"wither away"* from the start it grew:

> *"The old state's political apparatus was 'smashed,' but in its place a new bureaucratic and centralised system emerged with extraordinary rapidity. After the transfer of government to Moscow in March 1918 it continued to expand ... As the functions of the state expanded so did the bureaucracy, and by August 1918 nearly a third of Moscow's working population were employed in offices [147,134 employed in state institutions and 83,886 in local ones. This was 13.7% of the total adult population and 29.6% of the independent population of 846,095]. The great increase in the number of employees ... took place in early to mid-1918 and, thereafter, despite many campaigns to reduce their number, they remained a steady proportion of the falling population ... At first the problem was dismissed by arguments that the impressive participation of the working class in state structures was evidence that there was no 'bureaucratism' in the bureaucracy. According to the industrial census of 31 August 1918, out of 123,578 workers in Moscow, only 4,191 (3.4 percent) were involved in some sort of public organisation ... Class composition is a dubious criterion of the level of bureaucratism. Working class participation in state structures did not ensure an organisation against bureaucratism, and this was nowhere more true than in the new organisations that regulated the economic life of the country."* [Richard Sakwa, *"The Commune State in Moscow in 1918,"* pp. 429–449, **Slavic Review**, vol. 46, no. 3/4, pp. 437–8]

The *"bureaucracy grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between 'people' and 'officials,' which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about 'bureaucratic excesses,' lack of contact with voters, and new proletarian bureaucrats grew louder and louder."* [Oskar Anweiler, **The Soviets**, p. 242]

Overtime, this permanent collection of bodies would become the real power in the state, with the party members nominally in charge really under the control of an unelected and uncontrolled officialdom. This was recognised by Lenin in the last years of his life. As he noted in 1922:

> *"Let us look at Moscow ... Who is leading whom? The 4,700 responsible Communists the mass of bureaucrats, or the other way round? I do not believe that you can say that the Communists are leading this mass. To put it honestly, they are not the leaders, but the led."* [quoted by Chris Harman, **Bureaucracy and Revolution in Eastern Europe**, p. 13]

By the end of 1920, there were five times more state officials than industrial workers. 5, 880,000 were members of the state bureaucracy. However, the bureaucracy had existed since the start. As noted above, the 231,000 people employed in offices in in Moscow in August 1918 represented 30 per cent of the workforce there. *"By 1920 the general number of office workers ... still represented about a third of those employed in the city."* In November, 1920, they were 200 000 office workers in Moscow, compared to 231 000 in August, 1918. By July, 1921 (in spite of a plan to transfer 10,000 away) their numbers had increased to 228,000 and by October 1922, to 243,000. [Richard Sakwa, **Soviet Communists in Power**, p. 192, p. 191 and p. 193]

This makes perfect sense as *"on coming to power the Bolsheviks smashed the old state but rapidly created their own apparatus to wage the political and economic offensive against the bourgeois and capitalism. As the functions of the state expanded, so did the bureaucracy ... following the revolution the process of institutional proliferation reached unprecedented heights."* [**Op. Cit.**, p. 191] And with bureaucracy came the abuse of it simply because it held **real** power:

> *"The prevalence of bureaucracy, of committees and commissions ... permitted, and indeed encouraged, endless permutations of corrupt practices. These raged from the style of living of communist functionaries to bribe-taking by officials. With the power of allocation of scare resources, such as housing, there was an inordinate potential for corruption."* [**Op. Cit.**, p. 193]

The growth in **power** of the bureaucracy should not, therefore, come as a major surprise given that had existed from the start in sizeable numbers. However, for the Bolsheviks *"the development of a bureaucracy"* was a puzzle, *"whose emergence and properties mystified them."* However, it should be noted that, *"[f]or the Bolsheviks, bureaucratism signified the escape of this bureaucracy from the will of the party as it took on a life of its own."* [Sakwa, **Op. Cit.**, p. 182 and p. 190] This was the key. They did not object the usurpation of power by the party (indeed they placed party dictatorship at the core of their politics and universalised it to a general principle for **all** *"socialist"* revolutions). Nor did they object to the centralisation of power and activity (and so the bureaucratisation of life). They only objected to it when the bureaucracy was not doing what the party wanted it to. Indeed, this was the basic argument of Trotsky against Stalinism (see section 3 of the appendix on "Were any of the Bolshevik oppositions a real alternative?").

Faced with this bureaucracy, the Bolsheviks tried to combat it (unsuccessfully) and explain it. As the failed to achieve the latter, they failed in the former. Given the Bolshevik fixation for all things centralised, they simply added to the problem rather than solve it. Thus we find that *"[o]n the eve of the VIII Party Congress Lenin had argued that centralisation was the only way to combat bureaucratism."* [Sakwa, **Op. Cit.**, p. 196]

Unsurprisingly, Lenin's "anti-bureaucratic" policies in the last years of his live were *"organisational ones. He purposes the formation of the Workers' and Peasants' Inspection to correct bureaucratic deformations in the party and state — and this body falls under Stalin's control and becomes highly bureaucratic in its own right. Lenin then suggests that the size of the Workers' and Peasants' Inspection be reduced and that it be merged with the Control Commission. He advocates enlarging the Central Committee. Thus it rolls along; this body to be enlarged, this one to be merged with another, still a third to be modified or abolished. The strange ballet of organisational forms continues up to his very death, as though the problem could be resolved by organisational means."* [Murray Bookchin, **Post-Scarcity Anarchism**, p. 205]

Failing to understand the links between centralism and bureaucracy, Lenin had to find another source for the bureaucracy. He found one. He *"argued that the low cultural level of the working class prevented mass involvement in management and this led to bureaucratism ... the new state could only reply on a minuscule layer of workers while the rest were backward because of the low cultural level of the country."* However, such an explanation is by no means convincing: *"Such culturalist assertions, which could neither be proved or disproved but which were politically highly effective in explaining the gulf, served to blur the political and structural causes of the problem. The working class was thus held responsible for the failings of the bureaucracy. At the end of the civil war the theme of the backwardness of the proletariat was given greater elaboration in Lenin's theory of the declassing of the proletariat."* [Sakwa, **Op. Cit.**, p. 195] Given that the bureaucracy had existed from the start, it is hard to say that a more *"cultured"* working class would have been in a better position to control the officials of a highly centralised state bureaucracy. Given the problems workers in "developed" nations have in controlling their (centralised) union bureaucracies, Lenin's explanation seems simply inadequate and, ultimately, self-serving.

Nor was this centralism particularly efficient. You need only read Goldman's or Berkman's accounts of their time in Bolshevik Russia to see how inefficient and wasteful centralisation and its resultant bureaucracy was in practice (see **My Disillusionment in Russia** and **The Bolshevik Myth**, respectively). This can be traced, in part, to the centralised economic structures favoured by the Bolsheviks. Rejecting the alternative vision of socialism advocated and, in part created, by the factory committees (and supported wholeheartedly by the Russian Anarchists at the time), the Bolsheviks basically took over and used the *"state capitalist"* organs created under Tsarism as the basis of their "socialism" (see section 5). As Lenin promised **before** seizing power:

> *"**Forced syndicatisation** — that is, forced fusion into unions [i.e. trusts] under the control of the State — this is what capitalism has prepared for us — this is what the Banker State has realised in Germany – this is what will be completely realisable in Russia by the Soviets, by the dictatorship of the proletariat."* [**Will the Bolsheviks Maintain Power?**, p. 53]

In practice, Lenin's centralised vision soon proved to be a disaster (see section 11 of the appendix "What happened during the Russian Revolution?" for details). It was highly inefficient

and simply spawned a vast bureaucracy. There was an alternative, as we discuss in section 12 of the appendix "What happened during the Russian Revolution?", the only reason that industry did not totally collapse in Russia during the early months of the revolution was the activity of the factory committees. However, such activity was not part of the Bolshevik vision of centralised socialism and so the factory committees were **not** encouraged. At the very moment when mass participation and initiative is required (i.e. during a revolution) the Bolsheviks favoured a system which killed it. As Kropotkin argued a few years later:

> *"production and exchange represented an undertaking so complicated that the plans of the state socialists, which lead to a party directorship, would prove to be absolutely ineffective as soon as they were applied to life. No government would be able to organise production if the workers themselves through their unions did not do it in each branch of industry; for in all production there arise daily thousands of difficulties which no government can solve or foresee ... Only the efforts of thousands of intelligences working on the problems can co-operate in the development of a new social system and find the best solutions for the thousands of local needs."* [**Kropotkin's Revolutionary Pamphlets**, pp. 76–7]

No system is perfect. Any system will take time to develop fully. Of course the factory committees made mistakes and, sometimes, things were pretty chaotic with different factories competing for scarce resources. But that does not prove that factory committees and their federations were not the most efficient way of running things under the circumstances. Unless, of course, you share the Bolsheviks a dogmatic belief that central planning is always more efficient. Moreover, attacks on the factory committees for lack of co-ordination by pro-Leninists seem less than sincere, given the utter lack of encouragement (and, often, actual barriers) the Bolsheviks placed in the way of the creation of federations of factory committees (see section 9 of the appendix "What happened during the Russian Revolution?" for further details).

Lastly, Bolshevik centralism (as well as being extremely inefficient) also ensured that the control of production and the subsequent surplus would be in the hands of the state and, so, class society would continue. In Russia, capitalism became state capitalism under Lenin and Trotsky (see sections 5 and 6 for more discussion of this).

So Bolshevik support for centralised power ensured that minority power replaced popular power, which, in turn, necessitated bureaucracy to maintain it. Bolshevism retained statist and capitalist social relations and, as such, could not develop socialist ones which, by their very nature, imply egalitarianism in terms of social influence and power (i.e. the abolition of concentrated power, both economic and political). Ironically, by being centralists, the Bolsheviks systematically eliminated mass participation and ensured the replacement of popular power with party power. This saw the rebirth of non-socialist social relationships within society, so ensuring the defeat of the socialist tendencies and institutions which had started to grow during 1917.

It cannot be said that this centralism was a product of the civil war. As best it could be argued that the civil war extenuated an existing centralist spirit into ultra-centralism, but it did not create it. After all, Lenin was stressing that the Bolsheviks were *"convinced centralists ... by their programme and the tactics of the whole of their party"* in 1917. Ironically, he never realised (nor much cared, after the seizure of power) that this position precluded his call for *"the deepening and extension of democracy in the administration of a State of the of the proletarian type."* [**Can**

the Bolsheviks Maintain Power?, p. 74 and p. 55] Given that centralism exists to ensure minority rule, we should not be to surprised that party power replaced popular participation and self-government quickly after the October Revolution. Which it did. Writing in September 1918, a Russian anarchist portrays the results of Bolshevik ideology in practice:

> *"Within the framework of this dictatorship [of the proletariat] ... we can see that the centralisation of power has begun to crystallise and grow firm, that the apparatus of the state is being consolidated by the ownership of property and even by an anti-socialist morality. Instead of hundreds of thousands of property owners there is now a single owner served by a whole bureaucratic system and a new 'statised' morality.*
>
> *"The proletariat is gradually being enserfed by the state. The people are being transformed into servants over whom there has risen a new class of administrators — a new class ... Isn't this merely a new class system looming on the revolutionary horizon ...*
>
> *"The resemblance is all too striking ... And if the elements of class inequality are as yet indistinct, it is only a matter of time before privileges will pass to the administrators. We do not mean to say ... that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from, centralisation. It cannot be otherwise ... we are presently moving not towards socialism but towards state capitalism.*
>
> *"Will state capitalism lead us to the gates of socialism? Of this we see not the slightest evidence ... Arrayed against socialism are ... thousands of administrators. And if the workers ... should become a powerful revolutionary force, then it is hardly necessary to point out that the class of administrators, wielding the state apparatus, will be a far from weak opponent. The single owner and state capitalism form a new dam before the waves of our social revolution...*
>
> *"Is it at all possible to conduct the social revolution through a centralised authority? Not even a Solomon could direct the revolutionary struggle or the economy from one centre ..."* [M. Sergven, cited by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 123–5]

Subsequent developments proved this argument correct. Working class revolts were crushed by the state and a new class society developed. little wonder, then, Alexander Berkman's summary of what he saw first hand in Bolshevik Russia a few years later:

> *"Mechanical centralisation, run mad, is paralysing the industrial and economic activities of the country. Initiative is frowned upon, free effort systematically discouraged. The great masses are deprived of the opportunity to shape the policies of the Revolution, or take part in the administration of the affairs of the country. The government is monopolising every avenue of life; the Revolution is divorced from the people. A bureaucratic machine is created that is appalling in its parasitism, inefficiency and corruption. In Moscow alone this new class of* ***sovburs*** *(Soviet bureaucrats) exceeds, in 1920, the total of office holders throughout the whole of Russia under the Tsar in 1914*

> *.. . The Bolshevik economic policies, effectively aided by this bureaucracy, completely disorganise the already crippled industrial life of the country. Lenin, Zinoviev, and other Communist leaders thunder philippics against the new Soviet bourgeoisie, — and issue ever new decrees that strengthen and augment its numbers and influence."* [**The Russian Tragedy**, p. 26]

Bakunin would not have been remotely surprised. As such, the Bolshevik revolution provided a good example to support Malatesta's argument that *"if ... one means government action when one talks of social action, then this is still the resultant of individual forces, but only of those individuals who form the government ... it follows... that far from resulting in an increase in the productive, organising and protective forces in society, it would greatly reduce them, limiting initiative to a few, and giving them the right to do everything without, of course, being able to provide them with the gift of being all-knowing."* [**Anarchy**, pp. 36–7]

By confusing *"state action"* with collective working class action, the Bolsheviks effectively eliminated the latter in favour of the former. The usurpation of all aspects of life by the centralised bodies created by the Bolsheviks left workers with no choice but to act as isolated individuals. Can it be surprising, then, that Bolshevik policies aided the atomisation of the working class by replacing collective organisation and action by state bureaucracy? The potential for collective action **was** there. You need only look at the strikes and protests directed **against** the Bolsheviks to see that was the case (see section 5 of the appendix on "What caused the degeneration of the Russian Revolution?" for details). Ironically, Bolshevik policies and ideology ensured that the collective effort and action of workers was directed not at solving the revolution's problems but resisting Bolshevik tyranny.

That centralism concentrates power in a few hands can be seen even in Leninist accounts of the Russian revolution. To take one example, Tony Cliff may assert that the *"mistakes of the masses were themselves creative"* but when push comes to shove, he (like Lenin) simply does not allow the masses to make such mistakes and, consequently, learn from them. Thus he defends Lenin's economic policies of *"state capitalism"* and *"one-man management"* (and in the process misleadingly suggests that these were **new** ideas on Lenin's part, imposed by objective factors, rather than, as Lenin acknowledged, what he had advocated all along — see section 5). Thus we discover that the collapse of industry (which had started in the start of 1917) meant that *"[d]rastic measures had to be taken."* But never fear, *"Lenin was not one to shirk responsibility, however unpleasant the task."* He called for *"state capitalism,"* and there *"were more difficult decisions to be accepted. To save industry from complete collapse, Lenin argued for the need to impose one-man management."* So much for the creative self-activity of the masses, which was quickly dumped — precisely at the time when it was most desperately needed. And it is nice to know that in a workers' state it is not the workers who decide things. Rather it is Lenin (or his modern equivalent, like Cliff) who would have the task of not shirking from the responsibility of deciding which drastic measures are required. [**Op. Cit.**, p. 21, p. 71 and p. 73] So much for "workers' power"!

Ultimately, centralism is designed to exclude the mass participation anarchists have long argued is required by a social revolution. It helped to undermine what Kropotkin considered the key to the success of a social revolution — *"the people becom[ing] masters of their destiny."* [**Op. Cit.**, p. 133] In his words:

> *"We understand the revolution as a widespread popular movement, during which in every town and village within the region of revolt, the masses will have to take it upon*

> *themselves* ***the work of construction upon communistic bases,*** *without awaiting any orders and directions from above ... As to representative government, whether self-appointed or elected ... , we place in it no hopes whatever. We know beforehand that it will be able to do nothing to accomplish the revolution as long as the people themselves do not accomplish the change by working out on the spot the necessary new institutions ... nowhere and never in history do we find that people carried into government by a revolutionary wave, have proved equal to the occasion.*
>
> *"In the task of reconstructing society on new principles, separate men ... are sure to fail. The collective spirit of the masses is necessary for this purpose ... a socialist government ... would be absolutely powerless without the activity of the people themselves, and that, necessarily, they would soon begin to act fatally as a bridle upon the revolution."* [**Op. Cit.**, pp. 188–190]

The Bolshevik revolution and its mania for centralism proved him right. The use of centralisation helped ensure that workers' lost any meaningful say in their revolution and helped alienate them from it. Instead of the mass participation of all, the Bolsheviks ensured the top-down rule of a few. Unsurprisingly, as mass participation is what centralism was designed to exclude. Wishful thinking on behalf of the Bolshevik leaders (and their later-day followers) could not (and can not) overcome the structural imperatives of centralisation and its role in society. Nor could it stop the creation of a bureaucracy around these new centralised institutions.

8 How did the aim for party power undermine the revolution?

As well as a passion for centralisation and state capitalism, Bolshevism had another aim which helped undermine the revolution. This was the goal of party power (see see section 5 of the appendix "What happened during the Russian Revolution?" for details). Given this, namely that the Bolsheviks had, from the start, aimed for party power it should not come as too surprising that Bolshevik dictatorship quickly replaced soviet democracy.

Given this obvious fact, it seems strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when the Bolshevik Party took power in October 1917, it did "substitute" itself for the working class and did so deliberately and knowingly. As we note in section 2, this usurpation of power by a minority was perfectly acceptable within the Marxist theory of the state, a theory which aided this process no end.

Thus the Bolshevik party would be in power, with the *"conscious workers"* ruling over the rest. The question instantly arises of what happens if the masses turn against the party. If the Bolsheviks embody *"the power of the proletariat,"* what happens if the proletariat reject the party? The undermining of soviet power by party power and the destruction of soviet democracy in the spring and summer of 1918 answers that specific question (see section 6 of the appendix "What happened during the Russian Revolution?"). This should have come as no surprise, given the stated aim (and implementation) of party power plus the Bolshevik identification of party power with workers' power. It is not a great step to party dictatorship **over** the proletariat from these premises (particularly if we include the underlying assumptions of vanguardism — see section

H.5.3). A step, we must stress, that the Bolsheviks quickly took when faced with working class rejection in the soviet elections of spring and summer of 1918.

Nor was this destruction of soviet democracy by party power just the result of specific conditions in 1917–8. This perspective had been in Russian Marxist circles well before the revolution. As we discuss in section H.5, vanguardism implies party power (see, as noted, section H.5.3 in particular). The ideas of Lenin's **What is to be Done?** give the ideological justification for party dictatorship over the masses. Once in power, the logic of vanguardism came into its own, allowing the most disgraceful repression of working class freedoms to be justified in terms of "Soviet Power" and other euphemisms for the party.

The identification of workers' power with party power has deeply undemocratic results, as the experience of the Bolshevik proves. However, these results were actually articulated in Russian socialist circles before hand. At the divisive 1903 congress of the Russian Social Democrats, which saw the split into two factions (Bolshevik and Menshevism) Plekhanov, the father of Russian Marxism, argued as follows:

> *"Every particular democratic principle must be considered not in itself, abstractly, ... the success of the revolution is the highest law. And if, for the success of the revolution's success, we need temporarily to restrict the functioning of a particular democratic principle, then it would be criminal to refrain from imposing that restriction... And we must take the same attitude where the question of the length of parliaments is concerned. If, in an outburst of revolutionary enthusiasm, the people elect a very good parliament ... it would suit us to try and make that a **long Parliament**; but if the elections turned out badly for us, we should have to try and disperse the resulting parliament not after two years but, if possible, after two weeks."* [RSDLP, **Minutes of the Second Congress of the RSDLP**, p. 220]

Another delegate argued that *"[t]here is not a single one among the principles of democracy which we ought not to subordinate **to the interests of our Party** ... we must consider democratic principles exclusively from the standpoint of the most rapid achievement of that aim [i.e. revolution], from the standpoint of the interests of our Party. If any particular demand is against our interests, we must not include it."* To which, Plekhanov replied, *"I fully associate myself with what Comrade Posadovksy has said."* [**Op. Cit.**, p. 219 and p. 220] Lenin *"agreed unreservedly with this subordination of democratic principles to party interests."* [Oskar Anweiler, **The Soviets**, p. 211]

Plekhanov at this time was linked with Lenin, although this association lasted less than a year. After that, he became associated with the Mensheviks (before his support for Russia in World War I saw him form his own faction). Needless to say, he was mightily annoyed when Lenin threw his words back in his face in 1918 when the Bolsheviks disbanded the Constituent Assembly. Yet while Plekhanov came to reject this position (perhaps because the elections had not *"turned out badly for"* his liking) it is obvious that the Bolsheviks embraced it and keenly applied it to elections to soviets and unions as well as Parliaments once in power (see section 6 of the appendix "What happened during the Russian Revolution?" for example). But, at the time, he sided with Lenin against the Mensheviks and it can be argued that the latter applied these teachings of that most respected pre-1914 Russian Marxist thinker.

This undemocratic perspective can also be seen when, in 1905, the St. Petersburg Bolsheviks, like most of the party, opposed the soviets. They argued that *"only a strong party along class*

lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent." [quoted by Oskar Anweiler, **The Soviets**, p. 77] Thus the soviets could not reflect workers' interests because they were elected by the workers!

The Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political program or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the *"subordination of consciousness to spontaneity"* and under the label *"non-party"* allow *"the rotten goods of bourgeois ideology"* to be introduced among the workers. [quoted by Anweilier, **Op. Cit.**, p. 78 and p. 79] In this, the St. Petersburg Bolsheviks were simply following Lenin's **What is to be Done?**, in which Lenin had argued that the *"**spontaneous** development of the labour movement leads to it being subordinated to bourgeois ideology."* [**Essential Works of Lenin**, p. 82] Lenin in 1905, to his credit, rejected these clear conclusions of his own theory and was more supportive of the soviets than his followers (although *"he sided in principle with those who saw in the soviet the danger of amorphous nonpartisan organisation."* [Anweilier, **Op. Cit.**, p. 81]).

This perspective, however, is at the root of all Bolshevik justifications for party power after the October revolution. The logical result of this position can be found in the actions of the Bolsheviks in 1918 and onwards. For the Bolsheviks in power, the soviets were less than important. The key for them was to maintain Bolshevik party power and if soviet democracy was the price to pay, then they were more than willing to pay it. As such, Bolshevik attitudes in 1905 are significant:

> *"Despite the failure of the Bolshevik assault on the non-partisanship of the [St.] Petersburg Soviet, which may be dismissed as a passing episode ... the attempt ... is of particular significance in understanding the Bolshevik's mentality, political ambitions and **modus operandi.** First, starting in [St.] Petersburg, the Bolshevik campaign was repeated in a number of provincial soviets such as Kostroma and Tver, and, possibly, Sormovo. Second, the assault reveals that from the outset the Bolsheviks were distrustful of, if not hostile towards the Soviets, to which they had at best an instrumental and always party-minded attitude. Finally, the attempt to bring the [St.] Petersburg Soviet to heel is an early and major example of Bolshevik take-over techniques hitherto practised within the narrow confines of the underground party and now extended to the larger arena of open mass organisations such as soviets, with the ultimate aim of controlling them and turning them into one-party organisations, or, failing that, of destroying them."* [Israel Getzler, *"The Bolshevik Onslaught on the Non-Party 'Political Profile' of the Petersburg Soviet of Workers' Deputies October-November 1905"*, **Revolutionary History**, pp. 123–146, vol. 5, no. 2, pp. 124–5]

The instrumentalist approach of the Bolsheviks post-1917 can be seen from their arguments and attitudes in 1905. On the day the Moscow soviet opened, a congress of the northern committees of the Social Democratic Party passed a resolution stating that a *"council of workers deputies should be established only in places where the party organisation has no other means of directing the proletariat's revolutionary action ... The soviet of workers deputies must be a technical instrument of the party for the purpose of giving political leadership to the masses through the RSDWP [the Social-Democratic Party]. It is therefore imperative to gain control of the soviet and prevail upon it*

to recognise the program and political leadership of the RSDWP." [quoted by Anweilier, **Op. Cit.**, p. 79]

This perspective that the party should be given precedence can be seen in Lenin's comment that while the Bolsheviks should *"go along with the unpoliticalised proletarians, but on no account and at no time should we forget that animosity among the proletariat toward the Social Democrats is a remnant of bourgeois attitudes ... Participation in unaffiliated organisations can be permitted to socialists only as an exception ... only if the independence of the workers party is guaranteed and if within unaffiliated organisations or soviets individual delegates or party groups are subject to unconditional control and guidance by the party executive."* [quoted by Anweilier, **Op. Cit.**, p. 81] These comments have clear links to Lenin's argument in 1920 that working class protest against the Bolsheviks showed that they had become *"declassed"* (see section 5 of the appendix on "What caused the degeneration of the Russian Revolution?"). It similarly allows soviets to be disbanded if Bolsheviks are not elected (which they were, see section 6 of the appendix "What happened during the Russian Revolution?"). It also ensures that Bolshevik representatives to the soviets are not delegates from the workplace, but rather a "transmission belt" (to use a phrase from the 1920s) for the decisions of the party leadership. In a nutshell, Bolshevik soviets would represent the party's central committee, not those who elected them. As Oskar Anweiler summarised:

> *"The 'revolutionary genius' of the people, which Lenin had mentioned and which was present in the soviets, constantly harboured the danger of 'anarcho-syndicalist tendencies' that Lenin fought against all his life. He detected this danger early in the development of the soviets and hoped to subdue it by subordinating the soviets to the party. The drawback of the new 'soviet democracy' hailed by Lenin in 1906 is that he could envisage the soviets only as* ***controlled*** *organisations; for him they were the instruments by which the party controlled the working masses, rather than true forms of a workers democracy."* [**Op. Cit.**, p. 85]

As we noted in section H.3.11, Lenin had concluded in 1907 that while the party could *"utilise"* the soviets *"for the purpose of developing the Social-Democratic movement,"* the party *"must bear in mind that if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 210] Thus the means by which working class can manage their own affairs would become *"superfluous"* once the party was in power. As Samuel Farber argues, Lenin's position before 1917 was *"clearly implying that the party could normally fulfil its revolutionary role without the existence of broad class organisations ... Consequently, Lenin's and the party's eventual endorsement of the soviets in 1905 seems to have been tactical in character. That is, the Bolshevik support for the soviets did not at the time signify a theoretical and/or principled commitment to these institutions as revolutionary organs to overthrow the old society, let alone as key structural ingredients of the post-revolutionary order. Furthermore, it is again revealing that from 1905 to 1917 the concept of soviets did not play an important role in the thinking of Lenin or of the Bolshevik Party ... [T]hese strategies and tactics vis-a-vis the soviets ... can be fairly seen as expressing a predisposition favouring the party and downgrading the soviets and other non-party class organisations, at least in relative terms."* [**Before Stalinism**, p. 37] Such a perspective on the soviets can be seen once the party was in power when they quickly turned them, without concern, into mere fig-leafs for party power (see section 6 of the appendix "What happened during the Russian Revolution?" for more details).

It cannot be mere coincidence that the ideas and rhetoric against the soviets in 1905 should resurface again once the Bolsheviks were in power. For example, in 1905, in St. Petersburg *"the Bolsheviks pressed on"* with their campaign and, *"according to the testimony of Vladimir Voitinskii, then a young Bolshevik agitator, the initial thrust of the Bolshevik 'plan' was to push the SRs [who were in a minority] out of the Soviet, while 'the final blow' would be directed against the Mensheviks. Voitinskii also recalled the heated argument advanced by the popular agitator Nikolai Krylenko ('Abram') for the 'dispersal of the Soviet' should it reject the 'ultimatum' to declare its affiliation with the RSDP."* [Getzler, **Op., Cit.**, pp. 127–8] This mirrored events in 1918. Then *"at the local political level"* Bolshevik majorities were attained (*"by means fair, foul and terrorist"*) *"in the plenary assemblies of the soviets, and with the barring of all those not 'completely dedicated to Soviet power' [i.e. Mensheviks and SRs] from the newly established network of soviet administrative departments and from the soviet militias. Soviets where Bolshevik majorities could not be achieved were simply disbanded."* A similar process occurred at the summit (see section 7). Thus *"the October revolution marked [the soviets] transformation from agents of democratisation into regional and local administrative organs of the centralised, one-party Soviet state."* [Israel Getzler, **Soviets as Agents of Democratisation**, p. 27 and pp. 26–7]

Can such an outcome really have **no** link at all with the Bolshevik position and practice in period before 1917 and, in particular, during the 1905 revolution? Obviously not. As such, we should not be too surprised or shocked when Lenin replied to a critic who assailed the "dictatorship of one party" in 1919 by clearly and unashamedly stating: *"Yes, the dictatorship of one party! We stand upon it and cannot depart from this ground, since this is the party which in the course of decades has won for itself the position of vanguard of the whole factory and industrial proletariat."* [quoted by E.H. Carr, **The Bolshevik Revolution**, vol. 1, p. 236] Or when he replied to a critic in 1920 that *"[h]e says we understand by the words dictatorship of proletariat what is actually the dictatorship of its determined and conscious minority. And that is the fact."* This *"minority ... may be called a party,"* Lenin stressed. [quoted by Arthur Ransome, **The Crisis in Russia 1920**, p. 35]

This perspective can be traced back to the underlying ideology expounded by the Bolsheviks before and during 1917. For example, mere days after seizing power in the October Revolution Lenin was stressing that the Bolsheviks' *"present slogan is: No compromise, i.e. for a homogeneous Boshevik government."* He did not hesitate to use the threat to *"appeal to the sailors"* against the other socialist parties, stating *"[i]f you get the majority, take power in the Central Executive Committee and carry one. But we will go to the sailors."* [quoted by Tony Cliff, **Lenin**, vol. 3, p. 26] Clearly soviet power was far from Lenin's mind, rejecting soviet democracy if need be in favour of party power. Strangely, Cliff (a supporter of Lenin) states that Lenin *"did not visualise one-party rule"* and that the *"first decrees and laws issued after the October revolution were full of repetitions of the word 'democracy.'"* [**Op. Cit.**, p. 161 and p. 146] He goes on to quote Lenin stating that *"[a]s a democratic government we cannot ignore the decision of the masses of the people, even though we disagree with it."* Cliff strangely fails to mention that Lenin also applied this not only to the land decree (as Cliff notes) but also to the Constituent Assembly. *"And even if,"* Lenin continued, *"the peasants continue to follow the Socialist Revolutionaries, even if they give this party a majority in the Constituent Assembly, we shall still say — what of it?"* [Lenin, **Collected Works**, vol. 26, pp. 260–1] But the Bolsheviks disbanded the Constituent Assembly after one session. The peasants had voted for the SRs and the Assembly went the same way as Lenin's promises. And if Lenin's promises of 1917 on the Assembly proved to be of little value, then why should his

various comments to soviet democracy be considered any different? In a clash between soviet democracy and party power, the Bolsheviks consistently favoured the latter.

Thus Bolshevik ideology had consistently favoured party power and had a long term ideological preference for it. Combine this aim of party power with a vanguardism position (see section H.5) and party dictatorship will soon result. Neil Harding summarises the issue well:

> *"There were a number of very basic axioms that lay at the very heart of the theory and practice of Leninism with regard to the party ... It was the party that disposed of scientific or objective knowledge. Its analysis of the strivings of the proletariat was, therefore, privileged over the proletariat's own class goals and a single discernible class will was, similarly, axiomatic to both Marxism and Leninism. Both maintained that it was the communists who alone articulated these goals and this will — that was the party's principal historical role.*
>
> *"At this point, Leninism (again faithful to the Marxist original) resorted to a little-noticed definitional conjuring trick — one that proved to be of crucial importance for the mesmeric effect of the ideology. The trick was spectacularly simple and audacious — the class was defined as class only to the extent that it conformed to the **party's** account of its objectives, and mobilised itself to fulfil them... . The messy, real proletarians — the aggregation of wage workers with all their diverse projects and aspirations — were to be judged by their progress towards a properly class existence by the party that had itself devised the criteria for the class existence."* [**Leninism**, pp. 173–4]

This authoritarian position, which allows "socialism" to be imposed by force upon the working class, lies at the core of Leninism. Ironically, while Bolshevism claims to be **the** party of the working class, representing it essentially or exclusively, they do so in the name of possessing a theory that, qua theory, can be the possession of intellectuals and, therefore, has to be "introduced" to the working class from outside (see section H.5.1 for details).

This means that Bolshevism is rooted in the identification of "class consciousness" with supporting the party. Given the underlying premises of vanguardism, unsurprisingly the Bolsheviks took "class consciousness" to mean this. If the workers protested against the policies of the party, this represented a fall in class consciousness and, therefore, working class resistance placed "class" power in danger. If, on the other hand, the workers remained quiet and followed the party's decision then, obviously, they showed high levels of class consciousness. The net effect of this position was, of course, to justify party dictatorship. Which, of course, the Bolsheviks did create **and** justified ideologically.

Thus the Bolshevik aim for party power results in disempowering the working class in practice. Moreover, the assumptions of vanguardism ensure that only the party leadership is able to judge what is and is not in the interests of the working class. Any disagreement by elements of that class or the whole class itself can be dismissed as *"wavering"* and *"vacillation."* While this is perfectly acceptable within the Leninist *"from above"* perspective, from an anarchist *"from below"* perspective it means little more than pseudo-theoretical justification for party dictatorship **over** the proletariat and the ensuring that a socialist society will **never** be created. Ultimately, socialism without freedom is meaningless — as the Bolshevik regime proved time and time again.

As such, to claim that the Bolsheviks did not aim to "substitute" party power for working class power seems inconsistent with both Bolshevik theory and practice. Lenin had been aiming

for party power from the start, identifying it with working class power. As the party was the vanguard of the proletariat, it was duty bound to seize power and govern on behalf of the masses and, moreover, take any actions necessary to maintain the revolution — even if these actions violated the basic principles required to have any form of meaningful workers' democracy and freedom. Thus the *"dictatorship of the proletariat"* had long become equated with party power and, once in power, it was only a matter of time before it became the *"dictatorship of the party."* And once this did occur, none of the leading Bolsheviks questioned it. The implications of these Bolshevik perspectives came clear after 1917, when the Bolsheviks raised the need for party dictatorship to an ideological truism.

Thus it seems strange to hear some Leninists complain that the rise of Stalinism can be explained by the rising "independence" of the state machine from the class (i.e. party) it claimed to in service of. Needless to say, few Leninists ponder the links between the rising *"independence"* of the state machine from the proletariat (by which most, in fact, mean the *"vanguard"* of the proletariat, the party) and Bolshevik ideology. As noted in section H.3.8, a key development in Bolshevik theory on the state was the perceived need for the vanguard to ignore the wishes of the class it claimed to represent and lead. For example, Victor Serge (writing in the 1920s) considered it a truism that the *"party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses ... it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences."* [**Year One of the Russian Revolution**, p. 218]

The problem with this is that, by definition, **everyone** is backward in comparison to the vanguard party. Moreover, in Bolshevik ideology it is the party which determines what is and is not *"proletarian consciousness."* Thus we have the party ideologue presenting self-justifications for party power **over** the working class. Now, is the vanguard is to be able to ignore the masses then it must have power **over** them. Moreover, to be independent of the masses the machine it relies on to implement its power must also, by definition, be independent of the masses. Can we be surprised, therefore, with the rise of the "independent" state bureaucracy in such circumstances? If the state machine is to be independent of the masses then why should we expect it not to become independent of the vanguard? Surely it must be the case that we would be far more surprised if the state machine did **not** become "independent" of the ruling party?

Nor can it be said that the Bolsheviks learned from the experience of the Russian Revolution. This can be seen from Trotsky's 1937 comments that the *"proletariat can take power only through its vanguard. In itself the necessity for state power arises from the insufficient cultural level of the masses and their heterogeneity."* Thus *"state power"* is required **not** to defend the revolution against reaction but from the working class itself, who do not have a high enough *"cultural level"* to govern themselves. At best, their role is that of a passive supporter, for "[w]ithout the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power." While soviets *"are the only organised form of the tie between the vanguard and the class"* it does not mean that they are organs of self-management. No, a *"revolutionary content can be given ... only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain)."* [**Stalinism and Bolshevism**]

Sadly, Trotsky failed to explicitly address the question of what happens when the *"masses"* stop having *"confidence in the vanguard"* and decides to support some other group. After all, if

a *"revolutionary content"* can only be given by *"the party"* then if the masses reject the party then the soviets can no only be revolutionary. To save the revolution, it would be necessary to destroy the democracy and power of the soviets. Which is **exactly** what the Bolsheviks did do in 1918. By equating popular power with party power Bolshevism not only opens the door to party dictatorship, it invites it in, gives it some coffee and asks it to make itself a home! Nor can it be said that Trotsky ever appreciated Kropotkin's *"general observation"* that *"those who preach dictatorship do not in general perceive that in sustaining their prejudice they only prepare the way for those who later on will cut their throats."* [**Kropotkin's Revolutionary Pamphlets**, p. 244]

In summary, it cannot be a coincidence that once in power the Bolsheviks acted in ways which had clear links to the political ideology it had been advocating before hand. As such, the Bolshevik aim for party power helped undermine the real power of working class people during the Russian revolution. Rooted in a deeply anti-democratic political tradition, it was ideologically predisposed to substitute party power for soviet power and, finally, to create — and justify — the dictatorship **over** the proletariat. The civil war may have shaped certain aspects of these authoritarian tendencies but it did not create them.

Were any of the Bolshevik oppositions a real alternative?

As well as the obvious failure of the Russian Revolution (see section H.6), the limitations in Bolshevism can be seen by the various oppositions to the mainstream of that party. That Bolshevik politics are not a suitable instrument for working class self-liberation is expressed in the limited way opposition groups questioned Bolshevik orthodoxy — even in the case of the opposition to the rising Stalinist bureaucracy.

All were based on standard vanguardist positions, as discussed in section H.5, such as a privileged position for the party, reflected in the aim for party power and, inevitably, the Bolshevik monopoly of power. This meant their opposition was focused on seeking reforms in areas which did not question the role and position of the party (such as economic policy) or sought to strengthen it (against the bureaucracy). This does not mean that the various oppositions did not have valid points, just that they shared the key assumptions of Bolshevism which undermined the Russian revolution either by their application or their use to justify specific (usually highly authoritarian) practice.

We will not cover all the various oppositions with the Bolshevik party here (Robert V. Daniels' **The Conscience of the Revolution** discusses all of them in some detail, as does Leonard Schapiro's **The Origin of the Communist Autocracy**). We will concentrate on the "Left Communists" of 1918 (in section 1), the "Workers' Opposition" of 1920–1 (in section 2) and the Trotsky-led "Left Opposition" of 1923–7 (in section 3) . Each opposition is a pale reflection of the one before it and each had clear limitations in their ideas which fatally undermined any liberatory potential they had. Indeed, by the time of the "Left Opposition" we are reduced to simply the more radical faction of the state and party bureaucracy fighting the dominant faction with the aim of securing a benevolent state capitalist dictatorship.

As noted, certain elements of these oppositions were undoubtedly correct. So, for example, the (correct) arguments of the "Left Communists" against Lenin's policy of *"one-man management"* were echoed by the "Democratic Centralists" at the Ninth Party Congress (an opposition we do not cover here). One member of this grouping (which included such former "Left Communists"

as Osinsky) argued against Lenin's position in favour of appointed managers inside and outside the party as follows:

> *"The Central Committee finds that the [local] party committee is a bourgeois prejudice, is conservatism bordering on the province of treason, and that the new form is the replacement of party committees by political departments, the heads of which by themselves replace the elected committees ... You transform the members of the party into an obedient gramophone, with leaders who order: go and agitate; but they haven't the right to elect their own committee, their own organs.*
>
> *"I then put the question to comrade Lenin: Who will appoint the Central Committee? You see, there can be individual authority here as well. Here also a single commander can be appointed."* [Sapronov, quoted by Daniels, **Op. Cit.**, p. 114]

Obviously a man ahead of his time. As Stalin proved, if *"one-man management"* was such a good idea then why should it not be practised in the Council of People's Commissars?

So these oppositions did identify real problems and many of their policies had elements of real solutions within them. Yet, as discussed in section H.3.5, placing certain libertarian ideas within an overall centralised vision or system will not undermine its wider authoritarian nature. Most obviously, the Bolshevik preference (at least before embracing party dictatorship after 1917) for centralised "democracy" effectively hollowed out the real democracy at the base which makes it more than just picking masters and created the structures and social relationships which made further degeneration inevitable — the very problems the oppositions themselves raised but whose real roots evaded them.

Here we indicate the positive ideas of the various oppositions but also indicate their limitations, which flow from the fact these are **Bolshevik** oppositions and so shared a similar set of prejudices and vision of (centralised) socialism.

Finally, to contrast these fake "oppositions" with a genuine opposition, we will discuss (in section 4) the "Workers' Group" which was expelled from the Communist Party of 1922–3 and repressed under Lenin and Trotsky. This grouping stood for traditional socialist values, including many of the principles the Bolshevik party claimed to support before it seized power (such as workers' democracy) and some it did not (such as workers' self-management of production). We do so to indicate the limited nature of the previous oppositions and how the repression of a **genuine** dissident working class group within the Communist Party shows how deeply unlibertarian and so anti-socialist the real Bolshevik tradition is.

1 Were the "Left Communists" of 1918 an alternative?

The first opposition of note in the party to the Leninist mainstream was that of the "Left Communists" in early 1918. This was clustered around the Bolshevik leader Bukharin and was focused around opposition to the Brest-Litovsk peace treaty with Germany and Lenin's advocacy of *"state capitalism"* as the means of both building socialism and getting Russia out of its economic problems. Here we focus of the latter issue, namely their critique of Lenin's economic policies and its limitations. In addition, we will discuss the flaws in their political ideas.

The first issue of their theoretical journal **Kommunist** was published in April 1918 and it argued vigorously against Lenin's advocacy of *"one-man management"* and *"state capitalism"* as

necessary and immediate steps for the new regime. It warned of *"bureaucratic centralisation, the rule of various commissars, the loss of independence for local Soviets and in practice the rejection of the type of state-commune administered from below"* if Lenin's policies were continued to be followed. The second issue saw an article by Osinsky which correctly predicted that *"for the construction of the proletarian society by the class creativity of the workers themselves, not by the Ukases of the captains of industry ... If the proletariat itself does not know how to create the necessary prerequisites for the socialist organisation of labour, no one can do this for it and no one can compel it to do this. The stick, if raised against the workers, will find itself in the hands of a social force which is either under the influence of another social class or is in the hands of the soviet power; but the soviet power will then be forced to seek support against the proletariat from another class (e.g. the peasantry) and by this it will destroy itself as the dictatorship of the proletariat. Socialism and socialist organisation will be set up by the proletariat itself, or they will not be set up at all: something else will be set up — state capitalism."* [quoted by Brinton, **The Bolsheviks and Workers' Control**, p. 39]

Lenin reacted sharply, heaping insult upon insult on the "Left Communists" and arguing against their ideas. Rather than see self-management (or even workers' control) as the key, he argued forcefully that *"**economically**, state capitalism is immeasurably superior to our present economic system."* He linked this with his previous writings, correctly noting his *"'high' appreciation of state capitalism"* had been given *"**before** the Bolsheviks seized power"* in, amongst other works, his **State and Revolution** and so it was *"significant that [his opponents] did **not** emphasise **this**"*. For Lenin, *"Socialism is inconceivable without large scale capitalist engineering"* and *"without planned state organisation, which keeps tens of millions of people to the strictest observance of a unified standard in production and distribution."* Thus *"our task is to study the state capitalism of the Germans, to spare **no effort** in copying it and not shrink from adopting **dictatorial** methods to hasten the copying of it."* [**Collected Works**, vol. 27, p. 339, p. 341, p. 354, p. 339 and p. 340]

For Lenin, as long as a workers' party held **political** power, the working class need not fear *"state capitalism"* and the lack of economic power at the point of production. Ignoring the awkward fact that it was the Bolsheviks rather than the proletariat who held political power, Lenin failed to realise that without economic power working class political power would be fatally undermined. Unfortunately, Lenin's arguments carried the day (see section H.3.14) and, in practice, the net effect was simply to hand over the economy to the state bureaucracy and create the social relationships which Stalinism thrived upon. As such, the merit of the "Left Communists" can be seen.

However, the "Left Communists", while correct on socialism needing workers' economic self-management, were limited in other ways. The major problems were three-fold.

Firstly, by basing themselves on Bolshevik orthodoxy they allowed Lenin to dominate the debate. This meant that their more "libertarian" reading of Lenin's work could be nullified by Lenin himself pointing to the authoritarian and state capitalist aspects of those very same works. Which is ironic, as today most Leninists tend to point to these very same democratic sounding aspects of Lenin's ideas while downplaying the more blatant anti-socialist ones. Given that Lenin had dismissed such approaches himself during the debate against the "Left Communists" in 1918, it seems dishonest for his latter day followers to do this.

Secondly, their perspective on the role of the party undermined their commitment to true workers' power and freedom. This can be seen from the comments of Sorin, a leading member of the group, who argued that the "Left Communists" were *"the most passionate proponents of*

soviet power, but ... only so far as this power does not degenerate ... in a petty-bourgeois direction." [quoted by Ronald I. Kowalski, **The Bolshevik Party in Conflict**, p. 135] For them, like any Bolshevik, the party played the key role for it was the only true bastion of the interests of the proletariat and, as such, the party *"is in every case and everywhere superior to the soviets ... The soviets represent labouring democracy in general; and its interest, and in particular the interests of the petty bourgeois peasantry, do not always coincide with the interests of the proletariat."* [quoted by Richard Sakwa, **Soviet Communists in Power**, p. 182]

Thus soviet power was limited to approval of the party line and — as with Lenin — any deviation from that line could be denounced as *"petty bourgeois"* and, therefore, ignored. *"Ironically,"* Kowalski summarises, *"Sorin's call for a revived soviet democracy was becoming vitiated by the dominant role assigned, in the final analysis, to the party."* [**Op. Cit.**, p. 136] Thus their politics were just as authoritarian as the mainstream Bolshevism they attacked on other issues:

> *"Ultimately, the only criterion that they appeared able to offer was to define 'proletarian' in terms of adherence to their own policy prescriptions and 'non-proletarian' by non-adherence to them. In consequence, all who dared to oppose them could be accused either of being non-proletarian, or at the very least suffering from some form of 'false consciousness' — and in the interests of building socialism must recant or be purged from the party. Rather ironically, beneath the surface of their fine rhetoric in defence of the soviets, and of the party as 'a forum for all of proletarian democracy,' there lay a political philosophy that was arguably as authoritarian as that of which they accused Lenin and his faction."* [Kowalski, **Op. Cit.**, pp. 136–7]

"According to the "Left Communists", therefore," notes Richard Sakwa, *"the party was the custodian of an interest higher than that of the soviets. Earlier theoretical considerations on the vanguard role of the party, developed in response to this problem, were confirmed by the circumstances of Bolshevism in power. The political dominance of the party over the soviets encouraged an administrative one as well. Such a development was further encouraged by the emergence of a massive and unwieldy bureaucratic apparatus in 1918 ... The "Left Communists" and the party leadership were therefore in agreement that ... the party should play a tutelary role over the soviets."* Furthermore, *"[w]ith such a formulation it proved difficult to maintain the vitality of the soviet plenum as the soviet was controlled by a party fraction, itself controlled by a party committee outside the soviet."* [**Op. Cit.**, p. 182 and p. 182–3]

This position can be traced back to the fundamentals of Bolshevism (see section H.5 on vanguardism). With this ideological preference for party power and the ideological justification for ignoring soviet democracy, it is doubtful that their (correct) commitment to workers' economic self-management would have been successful. An economic democracy combined with what amounts to a party dictatorship would be an impossibility that could never work in practice.

As such, the fact that Bukharin (one time "Left Communist") *"continued to eulogise the party's dictatorship, sometimes quite unabashedly"* during and after the civil war becomes understandable. In this, he was not being extreme but rather expressing the orthodoxy, for *"Bolsheviks no longer bothered to disclaim that the dictatorship of the proletariat was the 'dictatorship of the party'"* for *"class immaturity was not a peculiarity of the Russian proletariat, but a characteristic of proletarian revolutions in general."* [Stephen F. Cohen, **Bukharin and the Bolshevik Revolution**, p. 145 and p. 142] So by 1921, all the leading Bolsheviks had argued this position for some time (see

section H.1.2, for example). Bukharin even went so far as to argue that *"the watchword"* taken up by some workers (*"even metal workers"*!) of *"For class dictatorship, but against party dictatorship!"* showed that the proletariat *"was declassed."* This also indicated that a *"misunderstanding arose which threatened the whole system of the proletarian dictatorship."* [contained in Al Richardson (ed.), **In Defence of the Russian Revolution**, p. 192] The echoes of the positions argued before the civil war can be seen in Bukharin's glib comment that proletarian management of the revolution meant the end of the "proletarian" dictatorship!

Thirdly, while correctly stressing the need for workers' management and participation the "Left Communists" placed it within a centralised institutional context which nullified it. Incorrectly proclaiming that anarchists aimed at turning all workplaces into the property of their workforce, the "Left Communists" argued for a typically Marxist (centralised) alternative:

> *"It was Bukharin who developed this theme most cogently. In the final analysis, the basic distinction between Communists and Anarchists, he argued, was not their attitude to the state and its power. While they disagreed regarding the role it was to play in the transition period — the Communists ascribed to it a vital role — both sought its ultimate extinction. Rather, what fundamentally divided them was that Communists were convinced that only a centrally-planned economy, in which large-scale production was predominant, would be able to provide the material basis of abundance, on which alone socialism could be founded."* [Kowalski, **Op. Cit.**, p. 111]

Ignoring the akward anarchist advocate no such thing — see section I.3.8 — we will simply note that this typically Marxist position would lead to a new class system. So while Osinskii argued that workplaces would be run by boards elected by workers, but **not** composed of a majority of workers employed in a given enterprise, these would elect regional economic councils, which in turn would create a central economic council and it is the higher bodies which would have the power to affirm or veto those bodies below them: *"in the final analysis the authorities at the lower levels would have to be overridden. Osinskii and his fellow-thinkers were compelled to assign the ultimate power of economic decision making to the centre, as their conception of the economics of socialism demanded."* In short, they *"did not comprehend that their conception of central planning was incompatible with the devolution of authority to the shop floor that they aspired to"* and so it is hard not to conclude that the *"ideological preconceptions of the Left Communists would have spawned a centralised, bureaucratic system, not an emancipated society in which power was diffused to the workers."* [Kowalski, **Op. Cit.**, p. 113, p. 186 and p. 188]

This is unsurprising, given the fact that the "Left Communists" were Marxists, with a vision of socialism inherited from Marx based on a centralised plan. Thus we find Osinskii in 1918 defining his vision as *"state socialism, i.e. a centralised system of socialised production, monopolised product distribution and planned utilisation of labour."* [quoted by Silvana Malle, **The Economic Organization of War Communism 1918–1921**, p. 297] Like other Marxists, they seemed unaware of the bureaucracy needed to gather and process the necessary (overwhelming) data to create a plan as well as the means of implementing it. As we discuss in section H.3.13, such a system would be the very state-capitalism the "Left Communists" correctly railed against: *"we are by every means — by nationalisation, by centralisation — strangling the forces in our country. The masses are being cut off from living creative power in all branches of our national economy."* [Lomov, quoted by Carmen Sirianni, **Workers Control and Socialist Democracy**, p. 155] Combine this

with the privileged role of the party and all the conditions were there to ensure a similar outcome to that created by the Leninist mainstream — even if, ironically, the "Left Communists" were the most vocal in denouncing the inevitable bureaucratic inefficiencies and abuses of the centralised system they both shared.

Finally, how this conflict within the party was resolved is significant, given that the banning of factions (which is generally seen as a key cause in the rise of Stalinism) occurred in 1921 (a ban, incidentally, Trotsky defended throughout the early 1920s). As one historian notes:

> *"The resolution of the party controversy in the spring of 1918 set a pattern that was to be followed throughout the history of the Communist Opposition in Russia. This was the settlement of the issues not by discussion, persuasion, or compromise, but by a high-pressure campaign in the party organisations, backed by a barrage of violent invective in the party press and in the pronouncements of the party leaders. Lenin's polemics set the tone, and his organisational lieutenants brought the membership into line."* [Daniels, **Op. Cit.**, p. 87]

Indeed, *"[s]oon after the party congress had approved the peace [of Brest-Litovsk in the spring of 1918], a Petrograd city party conference produced a majority for Lenin. It ordered the suspension of the newspaper* ***Kommunist*** *which had been serving as a Left Communist organ ... The fourth and final issue of the Moscow* ***Kommunist*** *had to be published as a private factional paper rather than as the official organ of a party organisation."* Ultimately, *"[u]nder the conditions of party life established by Lenin, defence of the Opposition position became impossible within the terms of Bolshevik discipline."* [Daniels, **Op. Cit.**, p. 88 and p. 89] So much for faction rights — three years **before** they were officially prohibited in the 10th Party Congress!

In addition, the "Left Communists" were not defeated by those with superior ideas winning the debate. Rather, Lenin's arguments *"evinced caricatured distortion of their positions, evasiveness, and bitter invective more than principled confrontation and clarification of opposing positions."*. For example, *"[b]y selectively quoting Osinsky's article so as to make it appear that the Left Communist opposed all labour discipline, he was able to avoid confronting their concrete proposals for work norms and self-discipline by democratically elected workers organisations."* Lenin *"caricatured"* other ideas, so *"[c]ompletely misrepresenting"* them while in other cases *"not a word"* was uttered in reply to their critique. [Carmen Sirianni, **Workers Control and Socialist Democracy**, pp. 149–50] A similar response befell the other oppositions discussed here — whether under Lenin or under Stalin.

In this, though, Lenin was hardly being original. In May 1907 Lenin had defended himself within the party for the rhetoric he had used against a group of Mensheviks, arguing that the *"wording is calculated to evoke in the reader hatred, aversion and contempt ... Such wording is calculated not to convince, but to break up the ranks of the opponent . .. to destroy him ... to evoke the worse thoughts, the worst suspicions about the opponent."* This was part of a struggle to *"struggle to* ***destroy*** *the hostile organisation, destroy its influence over the masses of the proletariat."* [**Collected Works**, Vol. 12, pp. 424–5 and p. 427]

Should we be surprised that such techniques should be utilised **within** the party when necessary? Ultimately, as well as exposing how Lenin's economic ideas helped build the bureaucratic state capitalism Stalinism was born from, the saga of the "Left Communists" shows how the polemical and organisational techniques of Stalinism also did not fall from the sky.

2 What were the limitations of the "Workers' Opposition" of 1920?

The next major group of party dissidents were the "Workers' Opposition" of late 1920 and early 1921 (not to be confused with the opposition of **actual** workers to the regime — see section H.6.3). Lead by Alexandra Kollontai and Alexander Shlyapnikov, this grouping is better known than other early oppositions simply because it was the focus for much debate at the tenth party congress in March 1921 and its existence was a precipitating factor in the banning of factions within the Communist Party. Also, the manifesto Kollontai wrote for the group was translated by council communists in Britain and elsewhere.

Unlike the "Left Communists" (see the last section), their support for party dictatorship was more than logically implied, it was taken for granted. Their manifesto fails to mention political democracy at all, instead discussing exclusively economic and party democracy. Thus it was expressing the *"basis on which, in its opinion, the dictatorship of the proletariat must rest in the sphere of industrial reconstruction"*, for the *"whole controversy boils down to one basic question: who shall build the communist economy, and how shall it be build?"* [**Selected Writings of Alexandra Kollontai**, p. 161 and p. 173]

Kollontai was right to state that the working class *"can alone be the creator of communism"* and to ask the question of *"shall we achieve communism through the workers or over their heads, by the hands of Soviet officials?"* The answer was correct, arguing for the former and ***"see[ing] in the unions the managers and creators of the communist economy***." This would be *"a system of self-activity for the masses"* for *"the building of Communism can and must be the work of the toiling masses themselves."* In short: ***"it is impossible to decree communism."*** [**Op. Cit.**, p. 176, p. 174, p. 182, p. 200 and p. 199]

Economically, then, the "Workers' Opposition" had much to recommend it for it raised ideas long argued by anarchists. Yet, as with the "Left Communists", these positive ideas are undermined by a typically Marxist centralised institutional framework in which industrial unions *"elect the central body directing the whole economic life of the republic."* [Kollontai, **Op. Cit.**, p. 176] As such, the arguments raised in the previous section apply, namely that the centralised regime within which these ideas would be applied would nullify them and end up producing a new class system around the bureaucrats such a system requires.

Likewise with their political ideas. The group did not seek actual workers' democracy for the *"task of the Party at its present crisis"* is to *"lend its ear to the healthy class call of the wide working masses"* but *"correction of the activity of the Party"* meant *"going back to democracy, freedom of opinion, and criticism inside the Party."* The struggle was *"to destroy bureaucracy in the party and replace it by workers' democracy"*: *"for establishing democracy in the party, and for the elimination of all bureaucracy"*. [Kollontai, **Op. Cit.**, p. 172, p. 192 and p. 197] Its demands were solely concerning the internal regime of the party, **not** a call for wider democratic reforms in the state or society as a whole:

> *"The arguments of Kollontai were ... strictly limited in their appeal to the communist party ... Nor did they in any form criticise the domination of the communist minority over the majority of the proletariat. The fundamental weakness of the case of the Workers' Opposition was that, while demanding more freedom of initiative for the workers, it was quite content to leave untouched the state of affairs in which a few hundred thousand imposed their will on many millions. 'And since when have we been enemies of*

> ***komitetchina*** *[manipulation and control by communist party committees], I should like to know?' Shlyapnikov asked at the Tenth Party Congress. He went on to explain that the trade union congress in which, as he and his followers proposed, all control of industry should be vested would 'of course' be composed of delegates nominated and elected 'through the party cells, as we always do.' But he argued that the local trade union cells would ensure the election of men qualified by experience and ability in place of those who are 'imposed on us at present' by the centre. Kollontai and her supporters had no wish to disturb the communist party's monopoly of political power."* [Leonard Schapiro, **The Origin of the Communist Autocracy**, p. 294]

Thus they *"sought to preserve the Bolshevik monopoly of power, condoning the use of terror whenever necessary to accomplish this. They limited their demands to internal party reforms, and never advocated sharing political authority with other socialist organisations."* Indeed, Kollontai *"declared that the Workers' Opposition were among the first volunteers to go fight the [Kronstadt] rebels"*, who had raised the demand for soviet democracy (see appendix "What was the Kronstadt Rebellion?" for more information). [Paul Avrich, **Kronstadt 1921**, pp. 182–3]

Even this extremely limited demand for more economic democracy was too much for Lenin. In January 1921, he argued that the Bolsheviks *"have now added to our platform the following: We must combat the ideological discord and the unsound elements of the opposition who talk themselves into repudiating all 'militarisation of industry', and not only the 'appointments method', which has been the prevailing one up to now, but all 'appointments', that is, in the last analysis, repudiating the Party's leading role in relation to the non-Party masses. We must combat the syndicalist deviation, which will kill the Party unless it is entirely cured of it."* Indeed, *"syndicalist deviation ... leads to the collapse of the dictatorship of the proletariat."* [**Collected Works**, Vol. 32, p. 53 and p. 86] Maurice Brinton correctly notes that by this Lenin meant that *"working class power ('the dictatorship of the proletariat') is impossible if there are militants in the Party who think the working class should exert more power in production ('the syndicalist deviation')."* Moreover, *"Lenin here poses quite clearly the question of 'power of the Party' or 'power of the class.' He unambiguously opts for the former — no doubt rationalising his choice by equating the two. But he goes even further. He not only equates 'workers power' with the rule of the Party. He equates it with acceptance of the ideas of the Party leaders!"* [**The Bolsheviks and Workers Control**, p. 76]

The "Workers' Opposition," asserted Lenin was a *"syndicalist and anarchist deviation"* produced partly by *"the influx into the Party of former Mensheviks, and also of workers and peasants who have not yet fully assimilated the communist world outlook."* Their ideas on economic reform were *"radically wrong in theory, and represent a complete break with Marxism and communism, with the practical experience of all semi-proletarian revolutions and of the present proletarian revolution."* [Lenin, **Op. Cit.**, pp. 245–6] Significantly, the *"basic arguments of the Opposition were not dealt with in any depth"* at the tenth party congress. *"What argument — as distinct from invective — there was, was often confused,"* Maurice Brinton summarises. *"For instance, apart from being (a) 'genuinely counter-revolutionary' and (b) 'objectively counter-revolutionary', the Workers' Opposition was also 'too revolutionary'. Their demands were 'too advanced' and the Soviet Government still had to concentrate on overcoming the masses' cultural backwardness. According to Smilga the extreme demands (of the Workers' Opposition) disrupted the Party's efforts and raised hopes among the workers which could only be disappointed. But, most important, the demands of the Workers' Op-*

position were revolutionary in a wrong (anarcho-syndicalist) way. This was the ultimate anathema." [**Op. Cit.**, p. 79]

For Lenin, the idea of industrial democracy was a nonsense. In this he was simply repeating the perspective he had held from the spring of 1918. As he put it, it was *"a term that lends itself to misinterpretations. It may be read as a repudiation of dictatorship and individual authority."* Industry, he argued, *"is indispensable, democracy is not"* and *"on no account must we renounce dictatorship either."* Indeed, *"[i]ndustry is indispensable, democracy is a category proper only to the political sphere".* He did admit *"[t]hat [the opposition] has been penetrating into the broad masses is evident"*, however the *"bidding for or flirtation with the non-Party masses"* was a *"radical departure from Marxism." "Marxism teaches,"* he stressed, *"and this tenet has not only been formally endorsed by the whole Communist International in the decisions of the Second (1920) Congress of the Comintern on the role of the political party of the proletariat, but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat ... . that alone will be capable of withstanding the inevitable petty-bourgeois vacillation of this mass ... Without this the dictatorship of the proletariat is impossible."* [**Collected Works**, vol. 31, p. 82, p. 27, p. 26, p. 197 and p. 246] In other words, *"Marxism"* teaches that workers' democracy and protest (the only means by which *"vacillation"* can be expressed) is a danger to the *"dictatorship of the proletariat"* — see section H.5.3 on why this position is the inevitable outcome of vanguardism.

In a way, Lenin was correct for economic democracy combined with political dictatorship would be a contradiction. Trotsky recognised this contradiction at the Tenth Congress when attacking the "Workers' Opposition": *"Formally speaking this [the creation of factory committees] is indeed the clearest line of workers' democracy. But we are against it. Why? For a basic reason, to preserve the party's dictatorship, and for subordinate reasons: management would be inefficient."* [quoted by Alec Nove, *"Trotsky, collectivization and the five year plan,"* **Socialism, Economics and Development**, p. 100] In terms of his *"subordinate"* reason, it should suffice to note the waste and inefficency in the economy which occurred after he and Lenin imposed *"one-man management"* and the *"militarisation of labour"* (see section H.6.2).

It should be stressed that this opposition and the debate it provoked occurred after the end of the Civil War. The Whites under Wrangel had been defeated in November 1920 and the Russian revolution was no longer in immediate danger. As such, there was an opportunity for constructive activity and mass participation in the rebuilding of Russia. The leading Bolsheviks rejected such demands, even in the limited form advocated by the "Workers' Opposition". Lenin and Trotsky clearly saw **any** working class participation as a danger to their power. Against the idea of economic participation under Communist control raised by the "Workers' Opposition", the leading Bolsheviks favoured the New Economic Policy (NEP). This was a return to the same kind of market-based *"state capitalist"* strategy Lenin had advocated against the "Left Communists" **before** the outbreak of the civil war in May 1918 (and, as noted, he had argued for in 1917). This shows a remarkable consistency in Lenin's thoughts, suggesting that claims the policies he advocated and implemented in power were somehow the opposite of what he "really" wanted are weak.

As with the "Left Communists" of 1918, Lenin saw his opposition to the "Workers' Opposition" as reflecting the basic ideas of his politics. *"If we perish,"* he said privately at the time according to Trotsky, *"it is all the more important to preserve our ideological line and give a lesson to our continuators. This should **never** be forgotten, even in **hopeless** circumstances."* [quoted by Daniels,

Op. Cit., p. 147] Thus the opposition to even limited economic democracy was the lesson — along with party dictatorship — he wished his followers to learn:

> *"the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... Such is the basic mechanism of the dictatorship of the proletariat, and the essentials of transition from capitalism to communism ... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation."* [Lenin, **Op. Cit.**, vol. 32, p. 21]

In short, the proletariat having **economic** power would undermine "the dictatorship of the proletariat":

> *"To govern you need an army of steeled revolutionary Communists. We have it, and it is called the Party. All this syndicalist nonsense about mandatory nominations of producers must go into the wastepaper basket. To proceed on those lines would mean thrusting the Party aside and making the dictatorship of the proletariat in Russia impossible."* [Lenin, **Op. Cit.**, p. 21]

In summary, like the "Left Communists", the "Workers' Opposition" presented a platform of economic and internal party reforms rooted in the assumption of Bolshevik party domination. Such a policy would be too contradictory to be applied: either the economic reforms would remain a dead letter under party control or the economic reforms would provoke demands for political change. This last possibility may explain Lenin's vitriolic attacks on the "Workers' Opposition."

This opposition, like the "Left Communists" of 1918, was ultimately defeated by organisational pressures within the party and state. Victor Serge *"was horrified to see the voting rigged for Lenin's and Zinoviev's 'majority'"* in late 1920. [**Memoirs of a Revolutionary**, p. 123] Kollantai complained that while officially one and a half million copies of the "Workers' Opposition" manifesto were published, in fact only 1500 were *"and that with difficulty."* [quoted by Schaprio, **Op. Cit.**, p. 291] This applied even more after the banning of factions, when the party machine used state power to break up the base of the opposition in the trade unions as well as its influence in the party:

> *"Victimisation of supporters of the "Workers' Opposition" began immediately after the Tenth Party Congress. 'The struggle,' as Shlyapnikov later recounted, 'took place not along ideological lines but by means ... of edging out from appointments, of systematic transfers from one district to another, and even expulsion from the party.' ... the attack was levelled not for heretical opinions, but for criticism of any kind of party shortcomings. 'Every member of the party who spoke in defence of the resolution on workers' democracy [in the party] was declared a supporter of the Workers' Opposition and guilty of disintegrating the party,' and was accordingly victimised."* [Schapiro, **Op. Cit.**, pp. 325–6]

Thus *"the party Secretariat was perfecting its technique of dealing with recalcitrant individuals by the power of removal and transfer, directed primarily at the adherents of the Workers' Opposition. (Of the 37 Workers' Opposition delegates to the Tenth Congress whom Lenin consulted when he was persuading Shlyapnikov and Kutuzov to enter the Central Committee, only four managed to return as voting delegates to the next congress.)"* A similar process was at work in the trade unions. For example, *"[w]hen the metalworkers' union held its congress in May 1921, the Central Committee of the party handed it a list of recommended candidates for the union leadership. The metalworkers' delegates voted down the party-backed list, but this gesture proved futile: the party leadership boldly appointed their own men to the union offices."* This was *"a show of political force"* as the union was a centre of the "Workers' Opposition". [Daniels, **Op. Cit.**, p. 161 and p. 157]

This repression was practised under Lenin and Trotsky, using techniques which were later used by the Stalinists against Trotsky and his followers. Lenin himself was not above seeking to remove his opponents from the central committee by undemocratic methods. At the Tenth Party Congress he had persuaded Shlyapnikov to be elected to the Central Committee in an attempt to undermine the opposition. A mere *"five months later, Lenin was demanding his expulsion for a few sharp words of criticism of the bureaucracy, uttered at a private meeting of a local party cell. If he was looking for a pretext, he could scarcely have picked a weaker one."* [Schapiro, **Op. Cit.**, p. 327] Lenin failed by only one vote short of the necessary two thirds majority of the Committee.

In summary, the "Workers' Opposition" vision was limited. Politically, it merely wanted democracy within the party and did not question the party's monopoly of power. As such, it definitely did not deserve the labels *"anarchist"* and *"syndicalist"* which its opponents labelled it. As far as its economic policy goes, it, too, was limited. Its demands for economic democracy were circumscribed by placing it under the control of the communist cells within the trade unions as well as within a typically Marxist centralised economic structure.

3 What about Trotsky's "Left Opposition" in the 1920s?

We now turn to what is probably the most famous opposition, namely Trotsky's "Left Opposition" of 1923–7, for it spawned numerous Trotskyist sects across the globe as well as the second "Fourth International" (the first had been formed in 1922 by council communists from Germany, Holland and Britain, amongst others). Chris Harman (of the UK's SWP) can be considered typical, arguing that *"there was always an alternative to Stalinism. It meant, in the late 1920s, returning to genuine workers' democracy and consciously linking the fate of Russia to the fate of world revolution."* He asserts that the *"historical merit of the "Left Opposition"* was that it *"did link the question of the expansion of industry with that of working-class democracy and internationalism."* [**Bureaucracy and Revolution in Eastern Europe**, p. 19] Other Leninists make similar claims. Victor Serge, a member of the "Left Opposition" in Russia and then Trotskyist in exile, stated that its programme was *"the reform of the Soviet State by a return to working-class democracy."* [**Memoirs of a Revolutionary**, p. 256]

Unfortunately, such claims are not true. As Serge himself noted elsewhere, Trotsky may have *"ever since 1923 [been] for the renovation of the party through inner party democracy and the struggle against bureaucracy"* but *"the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late."* [**The Serge-Trotsky Papers**, p. 201 and p. 181] Here we show that this was, indeed, the case and will concentrate on the 1923 to

1927 period, before it was crushed and all opposition disappeared for decades (for a refutation of similar claims about Trotsky's opposition to Stalinism which extends into the 1930s, see section 15 of the appendix "Reply to errors and distortions in David McNally's pamphlet 'Socialism from Below'").

It is indeed the case that since 1919 Trotsky, like Lenin, had been wholeheartedly in favour of the party dictatorship and had opposed all oppositions which raised the need for economic reforms which would increase workers' control. This did not change in the 1920s but by 1923 even he could not fail to see that something was going wrong. Unsurprisingly, given its blindness to the substantial evidence of degeneration that had grown every greater since 1917, his opposition was by far the weakest politically as it questioned far fewer things. As Cornelius Castoriadis points out:

> *"From the beginning of 1918 until the banning of factions in March 1921, tendencies within the Bolshevik party were formed that, with farsightedness and sometimes an astonishing clarity, expressed opposition to the Party's bureaucratic line and to its very rapid bureaucratisation. These were the 'Left Communists' (at the beginning of 1918), then the 'Democratic Centralist' tendency (1919), and finally the 'Workers' Opposition' (1920–21)... these oppositions were defeated one by one ... The very feeble echoes of their critique of the bureaucracy that can be found later in the (Trotskyist) 'Left Opposition' after 1923 do not have the same signification. Trotsky was opposed to the* ***bad policies*** *of the bureaucracy and to the excesses of its power. He never put into question its essential nature. Until practically the end of his life, he never brought up the questions raised by the various oppositions of the period from 1918 to 1921 (in essence: 'Who manages production?' and 'What is the proletariat supposed to do during the 'dictatorship of the proletariat,' other than work and follow the orders of 'its' party?')."* [**Political and Social Writings**, vol. 2, p. 98]

While the "Left Communists" and "Workers' Opposition" had challenged Lenin's state capitalist economic policies while upholding the Bolshevik monopoly of power (implicitly or explicitly), Trotsky did not even manage that. His opposition was firmly limited to internal reforms to the party which he hoped would result in wider participation in the soviets and trade unions. Just as he did not bother to explain why continuing party dictatorship would reinvigorate the soviets or unions, he did not explain how benevolent dictatorship was possible nor why an economic regime marked by wage-labour (employed by the state rather than capitalists) would not be exploitative. Instead, these positions were simply asserted — for they were, after all, Leninist orthodoxy and had been for some time.

Politically, Trotsky was unashamedly in favour of party dictatorship. Indeed, his basic opposition to Stalinism was because he considered it as the end of that dictatorship by the rule of the bureaucracy. His comments against the "Workers' Opposition" at the Tenth Party Congress in March 1921 set the tone:

> *"The 'workers opposition' puts forward dangerous slogans which fetishise the principles of democracy. Elections from within the working class were put above the party, as if the party had no right to defend its dictatorship even when this dictatorship was temporarily at odds with the passing feelings of workers' democracy ... It is essential to*

have a sense of — so to speak — the revolutionary-historical primacy of the party, which is obliged to hold on to its dictatorship, despite the temporary waverings of the masses … even of the workers." [quoted by Alec Nove, *"Trotsky, collectivization and the five year plan,"* **Socialism, Economics and Development**, p. 100]

In April 1923, he stressed that *"[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party."* [**Leon Trotsky Speaks**, p. 158] He was true to his word. In *"The New Course"* (generally accepted as being the first public expression of his opposition to the developing Stalinist regime), he stated that *"[w]e are the only party in the country, and in the period of the dictatorship it could not be otherwise."* Moreover, it was *"incontestable that factions [within the party] are a scourge in the present situation"* and so the party *"does not want factions and will not tolerate them."* [**The Challenge of the "Left Opposition" (1923–25)**, p. 78, p. 80 and p. 86] In May 1924, he even went so far as to proclaim that:

> *"Comrades, none of us wants to be or can be right against the party. In the last analysis, the party is always right, because the party is the sole historical instrument that the working class possesses for the solution of its fundamental tasks. I have already said that nothing would be simpler than to say before the party that all these criticisms, all these declarations, warnings, and protests — all were mistaken from beginning to end. I cannot say so, however, comrades, because I do not think it. I know that no one can be right against the party. It is only possible to be right with the party and through it since history has not created any other way to determine the correct position."* [**Op. Cit.**, p.161]

So his opposition was a loyal one, initially accepting defeats and following party discipline. In fact, he made a great deal of being the true heir of Lenin and so not only did not question Bolshevik orthodoxy but instead championed it in every detail. Hence the limitations of his opposition.

However, confusion creeps into the politics of the "Left Opposition" simply because it used the term *"workers' democracy"* a lot. However, a close reading of Trotsky's argument soon clarifies this issue. Trotsky, following the Communist Party itself and the "Workers' Opposition", had simply redefined what *"workers' democracy"* meant. Rather than mean what you would expect it would mean, the Bolsheviks had changed its meaning to become *"party democracy."* Thus Trotsky could talk about *"party dictatorship"* and *"workers' democracy"* without contradiction. As his supporter Max Eastman noted in the mid-1920s, Trotsky was in favour of the *"programme of democracy within the party — called 'Workers' Democracy' by Lenin."* This *"was not something new or especially devised … It was part of the essential policy of Lenin for going forward toward the creation of a Communist society — a principle adopted under his leadership at the Tenth Congress of the party, immediately after the cessation of the civil war."* [**Since Lenin Died**, p. 35] In the words of historian Robert V. Daniels:

> *"The Opposition's political ideal was summed up in the slogan 'workers' democracy,' which referred particularly to two documents [from 1921 and 1923] … Both these statements concerned the need to combat 'bureaucratism' and implement party democracy."* [**Op. Cit.**, p. 300]

That this was the case can be seen from the Fourth All-Russian Congress of Trade Unions in 1921:

> *"At the meeting of delegates who were party members, Tomsky submitted for routine approval a set of theses on the tasks of trade unions. The approval was a matter of form, but an omission was noted, The theses made no reference to the formula of 'proletarian democracy' with which the Tenth Congress had tried to assuage the rank and file. Riazanov .. . offered an amendment to fill the breach, in language almost identical with the Tenth Congress resolution: 'The party must observe with special care the normal methods of proletarian democracy, particularly in the trade unions, where most of all the selection of leaders should be done by the organised party masses themselves.' ... The party leadership reacted instantaneously to this miscarriage of their plans for curtailing the idea of union autonomy. Tomksy was summarily ejected from the trade union congress. Lenin put in an appearance together with Bukharin and Stalin to rectify the unionists' action."* [Daniels, **Op. Cit.**, p. 157]

The *"New Course Resolution"* passed in December 1923 stresses this:

> *"Workers' democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions by those bodies immediately under them. It does not, however, imply the freedom to form factional groupings, which are extremely dangerous for the ruling party, since they always threaten to split or fragment the government and the state apparatus as a whole.*
>
> *"Within a party, which represents a voluntary union of people on the basis of definite ideals and practice, it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers' Truth and Workers' Group."* [Trotsky, **Op. Cit.**, p. 408]

As we show in the next section, these groups actually advocated **genuine** workers' democracy — that is, they opposed the party's monopoly of power and supported multi-party elections. Thus Trotsky's opposition was hardly democratic, defending the practice and concept of *"the dictatorship of the party"* throughout the 1920s and — correctly! — linking it to Lenin and so Leninist orthodoxy:

> *"Of course, the foundation of our regime is the dictatorship of a class. But this in turn ... assumes it is a class that has come to self-consciousness through its vanguard, which is to say, through the party. Without this, the dictatorship could not exist ... Dictatorship is the most highly concentrated function of a class, and therefore the basic instrument of a dictatorship is a party. In the most fundamental aspects a class realises its dictatorship through a party. That is why Lenin spoke not only of the dictatorship of the class but also the dictatorship of the party and, **in a certain sense**, made them identical."* [Trotsky, **The Challenge of the "Left Opposition" (1926–27)**, pp. 75–6]

Trotsky argued that Stalin's policies were, in fact, a ploy to substitute the dictatorship of the party apparatus for the dictatorship of the party. Such a substitution, he argued, had its roots in a *"disproportion"* between the workers and peasants. As long as there was a *"proper 'proportion'"* between the two and *"the advance of democratic methods in the party and working class organisations,"* then *"the identification of the dictatorship of the class with that of the party is fully and completely justified historically and politically."* Needless to say, Trotsky did not bother to ask how much democracy (of **any** kind) was possible under a party dictatorship nor how a class could run society or have democratic organisations if subjected to such a dictatorship. For him it was a truism that the *"dictatorship of a party does not contradict the dictatorship of the class either theoretically or practically, but is an expression of it."* [**Op. Cit.**, p. 76]

This was no temporary aberration. As indicated in section H.3.8, Trotsky repeated this support for party dictatorship ten years later. This was because it was Bolshevik orthodoxy, as indicated in March 1923 by the Central Committee of the Communist Party when it summarised the lessons gained from the Russian revolution, namely that *"the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat."* Vacillations are expressed by workers' democracy and so this was rejected: *"The dictatorship of the working class finds its expression in the dictatorship of the party."* (*"To the Workers of the USSR"*, Zinoviev, **History of the Bolshevik Party**, p. 213 and p. 214)

Unsurprisingly, this perspective was also raised in the 1927 **Platform of the Opposition**, alongside the same contradictory demands for *"workers' democracy"* and the revitalising of the soviets and trade unions. It made the limited nature of Trotsky's opposition clear, for it attacked Stalin for **weakening** the party's dictatorship. In its words, the *"growing replacement of the party by its own apparatus is promoted by a 'theory' of Stalin's which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party."* It repeats this principle by arguing that *"the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry."* As such, *"[w]e will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party."* [*"The Platform of the Opposition"*, **The Challenge of the "Left Opposition" (1926–27)**, p. 395, p. 439 and p. 441]

This conviction was so strong that even after the defeat of the "Left Opposition" it was the case that in the prison camps *"almost all the Trotskyists continued to consider that 'freedom of party' would be 'the end of the revolution.' 'Freedom to choose one's party — that is Menshevism,' was the Trotskyists' final verdict."* [Ante Ciliga, **The Russian Enigma**, p. 280] Such is the power of ideology.

So *"workers' democracy"* had a very specific meaning to the Communist Party, namely one limited to within the party and **not** a call for **genuine** democracy in the unions or soviets. Such a definition, obviously, in no way undermines the dictatorship of the party — but it does allow the use of quotations by Leninists to bolster a false narrative on the nature of Bolshevism.

Politically, then, the opposition urged the benevolent dictatorship of an internally democratic party. Economically, Trotsky's opposition was far more backward than previous ones. For Trotsky, economic democracy was not an issue and so it played no role in determining the socialist nature of a society. Rather state ownership did. Thus he did not question one-man management in the workplace nor the capitalist social relationships it generated. For Trotsky, it was *"neces-*

sary for each state-owned factory, with its technical director and with its commercial director, to be subjected not only to control from the top — by the state organs — but also from below, by the market which will remain the regulator of the state economy for a long time to come." In spite of the obvious fact that the workers did not control their labour or its product, Trotsky asserted that *"[n]o class exploitation exists here, and consequently neither does capitalism exist."* Moreover, *"socialist industry ... utilises methods of development which were invented by capitalist economy."* Ultimately, it was not self-management that mattered, it was *"the growth of Soviet state industry [which] signifies the growth of socialism itself, a direct strengthening of the power of the proletariat"*. [**The First 5 Years of the Communist International**, vol. 2, p. 237 and p. 245]

Unsurprisingly, then, the "Left Opposition" did not even have the merit of the "Left Communists" or "Workers' Opposition" in raising economic reforms. Its Platform simply repeated Bolshevik orthodoxies, arguing that *"nationalisation of the means of production was a decisive step toward the socialist reconstruction of that whole social system which is founded upon the exploitation of man by man"* and that the *"appropriation of surplus value by a workers' state is not, of course, exploitation."* However, it also acknowledged that *"we have a workers' state with bureaucratic distortions"* and a *"swollen and privileged administrative apparatus devours a very considerable part of our surplus value"* while *"all the data testify that the growth of wages is lagging behind the growth of the productivity of labour."* [*"The Platform of the Opposition"*, **The Challenge of the "Left Opposition" (1926–27)**, pp. 347–8, p. 350]

So an economic regime marked by one-man management by state-appointed bosses under a party dictatorship could somehow be without exploitation even though someone other than the workers controlled both their labour and how its product (and any surplus) was used? It is hardly surprising that the new master class sought their own benefit; what is surprising is that the "Left Opposition" could not see the reality of state-capitalism. Rather, it focused its attention on the living standards of the working class and paid no attention to the relations of production in the workplace, raising no proposals nor demands about establishing workers' control of industry. Given its self-proclaimed role as defender of Leninist orthodoxy and its social relations, perhaps this is not so surprising after all.

In summary, Trotsky's "opposition" in no way presented any real alternative to Stalinism. At no time did he question the fundamental social relationships within Soviet society. As the 1927 Platform noted, he saw Stalinism as the victory of the state bureaucracy over the party and **its** dictatorship. Writing ten years after the Platform, Trotsky reiterated this, arguing that the *"bureaucracy won the upper hand. It cowed the revolutionary vanguard, trampled upon Marxism, prostituted the Bolshevik party ... To the extent that the political centre of gravity has shifted from the proletarian vanguard to the bureaucracy, the party has changed its social structure as well as its ideology."* He simply wanted to shift the *"political centre of gravity"* back towards the party, as it had been in the early 1920s when he and Lenin were in power. He in no significant way questioned the nature of the regime or the social relationships it was rooted in (whether political or economic). Indeed, *"[t]hose who counterpose the abstraction of soviets to the party dictatorship should understand that only thanks to the Bolshevik leadership were the soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [*"Stalinism and Bolshevism"*, pp. 416–431, **Writings 1936–37**, p. 422 and p. 430]

This explains his continual self-imposed role after his exile of loyal opposition to Stalinism in spite of the violence applied to him and his followers. It also explains the lack of excitement by the Russian working class over the "Left Opposition" for their choice was between two factions

within the master class. As Serge acknowledged: *"Outraged by the Opposition, they [the bureaucrats] saw it as treason against them; which in a sense it was, since the Opposition itself belonged to the ruling bureaucracy."* [**Memoirs of a Revolutionary**, p. 225]

This may come as a shock to many readers. This is because Trotskyists are notorious for their rewriting of the policies of Trotsky's opposition, as seen by the words of Chris Harman we quoted earlier. Yet this is hardly surprising, as openly saying that benevolent state-capitalist party dictatorship was the only alternative to Stalinism would be hard to maintain. Like Trotsky, there is a pressing need to avoid looking at the social relations under Lenin in case obvious similarities are noticed to those under Stalin. Thus we find Harman stating in his summary of the rise Stalinism that it was after *"Lenin's illness and subsequent death"* when the *"principles of October were abandoned one by one."* [**Op. Cit.**, p. 14] Presumably, in that case, the *"principles of October"* included the practice of, and ideological commitment to, party dictatorship, one-man management, banning opposition parties and groups (as well as factions within the Communist Party), censorship, state repression of working class strikes and protests, piece-work, Taylorism, the end of independent trade unions and a host of other crimes against socialism implemented under Lenin and normal practice at the time of his death.

Like Lenin, the "Left Opposition" did **not** question the Bolshevik's monopoly of power and explicitly supported the idea of party dictatorship. This fact helps explains what Harman seems puzzled by, namely that Trotsky *"continued to his death to harbour the illusion that somehow, despite the lack of workers' democracy, Russia was a 'workers' state.'"* [**Op. Cit.**, p. 20] Strangely, Harman does not explain why Russia was a *"workers' state"* under Lenin and Trotsky, given its *"lack of workers' democracy."* But illusions are hard to dispel, sometimes.

So, for Trotsky, like the rest of the Communist Party including its "Left Opposition", **genuine** workers' democracy was **not** considered important and, in fact, was applicable only within the party. Thus the capitulation of many of the "Left Opposition" to Stalin once he started a policy of industrialisation comes as less of a surprise than Harman thinks it was. As Ante Ciliga saw first-hand in the prison camps:

> *"the majority of the Opposition were ... looking for a road to reconciliation; whilst criticising the Five Year Plan, they put stress not on the part of exploited class played by the proletariat, but on the technical errors made by the Government **qua** employer in the matter of insufficient harmony within the system and inferior quality of production. This criticism did not lead to an appeal to the workers against the Central Committee and against bureaucratic authority; it restricted itself to proposing amendments in a programme of which the essentials were approved. The socialist nature of State industry was taken for granted. They denied the fact that the proletariat was exploited; for 'we were in a period of proletarian dictatorship.'"* [**Op. Cit.**, p. 213]

As Victor Serge noted, *"[f]rom 1928–9 onwards, the Politbureau turned to its own use the great fundamental ideas of the now expelled Opposition (excepting, of course, that of working-class democracy) and implemented them with ruthless violence."* While acknowledging that the Stalinists had applied these ideas in a more extreme form than the Opposition planned, he also acknowledged that *"[b]eginning in those years, a good many Oppositionists rallied to the 'general line' and renounced their errors since, as they put it, 'After all, it is our programme that is being applied.'"* Nor did it help that at *"the end of 1928, Trotsky wrote to [the Opposition] from his exile ... to the effect*

that, since the Right represented the danger of a slide towards capitalism, we had to support the 'Centre' — Stalin — against it." [**Op. Cit.**, p. 252 and p. 253]

However, Serge's comments on *"working-class democracy"* are somewhat incredulous, given (as we noted above) that he knew fine well that the Opposition did not stand for it. His summary of the 1927 Platform was restricted to it aiming *"to restore life to the Soviets ... and above all to revitalise the Party and the trade unions... In conclusion, the Opposition openly demanded a Congress for the reform of the Party, and the implementation of the excellent resolutions on internal democracy that had been adopted in 1921 and 1923."* [**Op. Cit.**, pp. 224–5] Which is essentially correct: once we understand that the Platform was based on redefining "workers' democracy" to mean "party democracy" within the context of its dictatorship.

Yet we can hardly blame the likes of Harman, as it was Trotsky himself who started the process of revising history to exclude his own role in creating the evils he (sometimes) denounced his opponents within the party for. For example, the 1927 Platform states that *"[n]ever before have the trade unions and the working mass stood so far from the management of socialist industry as now"* and that *"[p]re-revolutionary relations between foremen and workmen are frequently found."* [*"The Platform of the Opposition"*, **Op. Cit.**, pp. 353–4] Which is hardly surprising, given that Lenin had argued for, and implemented, appointed one-man management armed with "dictatorial powers" from April 1918 onwards (see section H.3.14).

Trotsky himself supported it wholeheartedly. Thus we find him arguing in 1923 that the *"system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have authority over the selection of functionaries and their transfer and removal."* These economic organs must *"in actual practice have full freedom of selection and appointment."* He also tied payment to performance, arguing that *"the payment of the directors of enterprises must be made to depend on their balance sheets, like wages depend on output."* [quoted by Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 237] In this, it must be noted, he was repeating arguments made during the civil war (as expressed, in say, **Terrorism and Communism**).

Harman argues that the Stalinist bureaucracy became a ruling class and Russia state-capitalist in 1928 when it implemented the first five year plan. This industrialisation was provoked by military competition with the west, which forced the *"drive to accumulate"* which caused the bureaucracy to attack *"the living standards of peasants and workers."* He quotes Stalin: *"to slacken the pace (of industrialisation) would mean to lag behind; and those who lag behind are beaten ... We must make good this lag in ten years. Either we do so or they crush us."* Moreover, the *"environment in which we are placed ... at home and abroad ... compels us to adopt a rapid rate of industrialisation."* [**Op. Cit.**, pp. 15–6] Given that this was exactly the same argument as Trotsky in 1927, it seems far from clear that the "Left Opposition" presented any sort of alternative to Stalinism for it, after all, *"took the stand that large-scale new investment was imperative, especially in heavy industry, and that comprehensive planning and new sources of capital accumulation should be employed immediately to effect a high rate of industrial expansion ... They also stressed the necessity of rapidly overtaking the capitalist powers in economic strength, both as a guarantee of military security and as a demonstration of the superiority of the socialist system."* [Robert V. Daniels, **The Conscience of the Revolution**, p. 290]

Indeed, the idea of *"primitive socialist accumulation"* was raised by Yevgeni Preobrazhensky, a leading member of "Left Opposition", in 1926. Like capitalist "primitive accumulation" (see

section F.8), this argued that the State had to build industry by means of squeezing more surplus from the peasantry. Would the industrialisation advocated by the "Left Opposition" been obtained by any means other than politically enforced exploitation and the repression of first peasant and then, inevitably, proletarian protest? Faced with the same objective pressures and goals, would it have been any different if that faction had become dominant in the party dictatorship? It is doubtful, unless you argue that who is in charge rather than social relationships that determine the socialist nature of a regime. But, then again, that is precisely what Trotskyists like Harman do when they look at Lenin's Russia.

As an added irony, as we discuss in section H.3.13, Harman's party — the British SWP — argues that the USSR under Stalin was *"state capitalist"* due to *"the international arms competition."* [**Op. Cit.**, p. 17] Yet the economic policy of the "Left Opposition" was to industrialise Russia, on increasing accumulation in order to compete militarily with traditional capitalist states, As the 1927 Platform argued, it was a case that the *"present tempo of industrialisation and the tempo indicated for the coming years are obviously inadequate"* and so argued for an acceleration of industrialisation for the *"Soviet Union must not fall further behind the capitalist countries, but in the near future must overtake them."* Thus industrialisation *"must be sufficient to guarantee the defence of the country and in particular an adequate growth of war industries."* [*"The Platform of the Opposition"*, **Op. Cit.**, pp. 369–70] Why does this not make Trotsky an advocate of state capitalism? All that the Oppositionists could argue is that their industrialisation would have been less brutal, less oppressive and with fewer privileges for the bureaucracy… but a nicer ruling class is still a ruling class.

Given this, it is easy to understand why we will ignore as fundamentally meaningless the pseudo-scientific comments on the relative weight of "social forces" in the rise of the bureaucracy so beloved by certain Trotskyists. This is because, ultimately, it is speculation on what could be the "objective" conditions required for a benevolent (party) dictatorship and state-capitalist economy to exist — a pointless task, for obvious reasons (at least if you are not a Leninist). While popular resistance and protest can make a ruling class less oppressive and exploitative, it is something else completely to suggest that it can stop a ruling class being exploitative and oppressive as such. However, as Trotsky refused to recognise the class nature of the bureaucracy — and the identical social relations that existing under Lenin and which Trotsky did not question — perhaps this is unsurprising after all. Indeed, perhaps all the talk of "social forces" and such like is just an attempt to obscure the real issue — the actual, objective, class relationships under the Bolshevik regime (the state bureaucracy as a class in itself with its own interests — see section H.3.9).

So the limitations in Marxist theory means that issue degenerated to such a degree that it is not recognised that the clash between Stalin and Trotsky boils down to the whether a benevolent dictatorship is possible and whether with the right people in charge state-capitalist social relationships cease being exploitative (Trotsky seems to genuinely believe this while Stalin and his cronies paid lip-service to the notion). That this is debated seriously — then and now — says a lot about the ideological limitations of Bolshevism. As such, not only does the programme of the "Left Opposition" offer no real alternative to Stalinism, it present no alternative economic or political vision which would stop the bureaucratic degeneration that produced Stalin in the first place.

In addition, it should be basic materialism that it is a person's real social position which shape their consciousness. As such, it is illusory to expect the rulers of a party dictatorship, the managers of state-capitalist firms or bureaucrats in a highly centralised apparatus to act in any other

fashion than according to their social position — yet Trotsky does so. Apparently being part of the vanguard party — or being part of an immense social institution policed by this small body – negates the objective pressures created by such hierarchies and the authoritarian (and so inevitably exploitative) social relations they produce. As such, he failed to understand the "social forces" at work in Russia for he failed to understand the class nature of the bureaucracy. He failed to understand that the bureaucracy overcame the party because the party itself was — inevitably — corrupted by the social position it held.

Internally, then, the "Left Opposition" was no alternative. As for Harman's assertion that the "Left Opposition" stood for *"internationalism,"* that is less straight forward than he would like to think. As noted, it favoured the industrialisation of Russia to defend the regime against its foreign competitors. As such, the "Left Opposition" were as committed to building "socialism" in the USSR as were the Stalinist promoters of *"socialism in one country."* The difference was that the "Left Opposition" also argued for spreading revolution externally as well. For them, this was the **only** means of assuring the lasting victory of "socialism" (i.e. a nationalised economy) in Russia but they also aimed at building the industrial base in a single country along with this.

Yet this driving necessity to "defend" the conquests of October produced contradictions from the start. Most obviously, this meant — just like the Stalinists later — interfering in Communist Parties of other nations to produce outcomes favourable to the USSR. Thus we find the German Council Communists forming the first "Fourth International" in protest to the Bolshevik domination of the Third International (Comintern) and the imposition of policies (such as parliamentarianism) *"determined not only by the needs of communist agitation in those countries, but also by the political needs of Soviet Russia."* [Anton Pannekoek, *"World Revolution and Communist Tactics: Afterword"*, **Pannekoek and Gorter's Marxism**, p. 144]

As well as favouring the right-wing in various national parties (not least, the German and British) the Bolshevik regime signed numerous agreements with capitalist nations. As anarchist Marie-Louise Berneri summarised in the 1940s:

> *"Quite early in its history, the allegedly revolutionary aims of the Comintern stood in contrast to the diplomatic relations of the Soviet Union with other countries."*
>
> *"Thus the Bolsheviks entered into commercial agreements with Mussolini's Fascist Government soon after it assumed power in Italy. On the morning after the murder of the Socialist deputy Matteotti the Soviet Ambassador called on Mussolini. At the very same time when the German Communists were planning the overthrow of the State, the Russian government was not only making trade agreements with the German capitalist government, but even making secret arrangements whereby the Germans could evade the military terms of the Treaty of Versailles by establishing arms factories, and training armies on Russian soil. Wherever a clash occurred the claims of Soviet foreign policy prevailed over the needs of the revolutionary class struggle."* [**Neither East Nor West**, p. 63]

It is worth discussing the relations between Lenin's Russia and the German military in more detail. Negotiations between the two states started as early as 1920 and involved an important aide of Trotsky's. The fruit of the German military's negotiations were *"secret military understandings"* and by September 1922 German officers and pilots were training in Russia. An organisation of German military and industrial enterprises in Russia was established and under

its auspices shells, tanks and aircraft were manufactured in Russia for the German army (an attempt to produce poison gas failed). [E.H. Carr, **The Bolshevik Revolution**, vol. 3, p. 327 and pp. 431–2] In April, 1923, the German High Command ordered 35 million gold marks worth of war material and *"[w]ith this military rapprochement between Germany and Russia went increasing trade between the two countries. After the Treaty of Rapallo, Krassin, the People's Commissar for Foreign Trade warned the German workers (in an interview in 'Rote Fahne') against strikes which could lead to the interruption of deliveries of essential materials to Russia. Already the interests of the Soviet State were above those of the German proletariat."* [Aberdeen Solidarity, **Spartakism to National Bolshevism**, p. 24]

These relations had their impact on the politics of the German Communist Party, specifically its so-called *"Schlageter Line"* of co-operation with nationalist and fascist groups. This policy was first promoted in the Comintern by leading Communist Radek and inspired by Zinoviev. According to Radek, *"national Bolshevism"* was required as the *"strong emphasis on the nation in Germany is a revolutionary act."* [quoted by E.H. Carr, **The Interregnum 1923–1924**, p. 177] During the summer of 1923, joint meetings were held and both communist and fascist speakers urged an alliance with Soviet Russia against the Entente powers. So, for several months, the German Communists worked with the Nazis, going so as far as to stage rallies and share podiums together. The Communist leader Ruth Fischer even argued that *"he who denounces Jewish capital ... is already a warrior in the class war, even though he does not know it"* (she latter said her remarks had been distorted). [quoted by Carr, **Op. Cit.**, p. 182f] This continued until *"the Nazis leadership placed a ban on further co-operation."* [Carr, **Op. Cit.**, p. 183] Thus the activities of the German communists were tailored to fit into the needs of Lenin's regime.

How *"internationalist"* was it to arm and train the very forces which had crushed revolutionary workers in Germany between 1919 and 1921? How sensible was it, when pressing for world revolution, to enhance the power of the army which would be used to attack any revolution in Germany? Which, of course, was what happened in 1923, when the army repressed the Comintern inspired revolt in November that year. Trotsky was one of the staunchest in favour of this insurrection, insisting that it be fixed for the 7th of that month, the anniversary of the Bolshevik seizure of power. The attempted revolt was a dismal failure. Rather than a revolution in Berlin on the 7th of November, there was a diner at the Russian embassy for German officers, industrialists and officials to celebrate the anniversary of the Russian revolution. [Carr, **Op. Cit.**, p. 205 and p. 226] The obvious question is how many Communists and workers killed in the revolt had been at the receiving end of weapons and training supplied to the German army by the Red Army?

To state another obvious point: *"We are now a long way from the insistence of Liebknecht that, for socialists, the main enemy lies in your own country. The activities above need outlining, not refutation. It cannot be claimed that arming capitalist armies, or working with fascists helps raise the consciousness of the working class. What is important is to point out how by 1923, the activities of the supine K.P.D. were tailored to fit the needs of Russia, in this case an alliance with Germany."* [Aberdeen Solidarity, **Op. Cit.**, p. 25]

Moreover, the **nature** of any such revolution is what counts. The "Left Opposition" would have encouraged revolutions which followed (to re-quote the **Platform of the Opposition**) the *"Leninist principle"* (*"inviolable for every Bolshevik"*) that *"the dictatorship of the proletariat is and can be realised only through the dictatorship of the party."* It would have urged centralisation. It would have opposed workers' self-management in favour of nationalisation and one-man management. In other words, the influence of the "Left Opposition" would have been as detri-

mental to the global workers' movement and other revolutions as Stalin's was (or, for that matter, Lenin's) although, of course, in a different way. Generalising Lenin's state capitalism would not have resulted in socialism, no matter how many revolutions in the west the "Left Opposition" encouraged. Simon Pirani puts it well:

> *"The legacy of the Bolsheviks' actions was not limited to their impact on Soviet history, though. The effect on the political development of the workers' movement internationally was just as important. Authoritarian, vanguardist and statist ways of thinking and assumptions spread out from Moscow — not only directly through the Comintern and the Communist Parties, which for decades influenced radical workers' struggles, but also in many indirect ways. Moscow's instructions to Communist Parties might or might not be obeyed, but, far beyond the ranks of those parties, Bolshevik ideologies clouded, obstructed and diverted efforts to develop socialist ideas and strategies for working-class movements. Bolshevik ideology packed the powerful punch of association with the first successful workers' revolution: it was the great shadow of 1917, hanging over the twentieth century like the shadow of 1789 hung over the nineteenth century, that gave these ideologies force. Socialism was damaged not only by the choices the Bolsheviks made, but by their sincere insistence that those choices were the continuation of the revolution, and by the powerful influence of their ideology on subsequent movements of social liberation."* [**The Russian Revolution in Retreat**, p. 241]

Finally, the fate of the "Left Opposition" should be noted. As befell the previous oppositions, the party machine was used against it. Indeed, by repeatedly and publicly proclaiming himself the greatest defender of party unity and the strongest opponent of inner-party factions, Trotsky himself supplied his enemies with the best argument in favor of the dissolution of the "Left Opposition". Nor was he willing to call upon any social forces outwith the party to combat the bureaucracy. Indeed, he refused to publicly support the party members who had took part in the workers' strike movement and had been expelled from the party. Worse, *"Trotsky, in the very letters to the politburo in which he fired his first broadsides against the 'unhealthy regime' and lack of internal party democracy, supported repressive action against the far left."* Indeed, he *"welcomed an instruction by Dzerzhinskii to party members immediately to report 'any groupings within the party', i.e. the Workers Group and Workers Truth, not only to the CC but also to the GPU, and emphasized that making such reports was 'the elementary duty of every party member'."* [Simon Pirani, **Op. Cit.**, p. 215]

Thus, the Stalinists began by using the very techniques the likes of Trotsky had supported against their opponents years before. For example, the Eighth Party Congress in December 1919 agreed that *"[a]ll decisions of the higher jurisdiction are absolutely binding for the lower."* Moreover, *"[e]ach decision must above all be fulfilled, and only after this is an appeal to the corresponding party organ permissible."* Centralism was reaffirmed: *"The whole matter of assignment of party workers is in the hands of the Central Committee of the party. Its decision is binding for everyone..."* These decisions were used as a weapon against the opposition: *"Translating this principle into practice, the Secretariat under Krestinsky [a Trotsky supporter] began deliberately to transfer party officials for political reasons, to end personal conflicts and curb opposition."* In 1923, the Secretariat *"brought into play its power of transfer, which had already proven to be an effective political weapon against the Ukrainian Leftists and the Workers' Opposition.* [Robert V. Daniels, **Op. Cit.**, p. 113 and p. 229]

The party itself had been reorganised, with *"the replacement of local party committees, which were at least democratic in form, by bureaucratically constituted 'political departments.' With the institution of such bodies, all political activity ... was placed under rigid control from above. This innovation was taken from the army; as its origin suggests, it was strictly a military, authoritarian institution, designed for transmitting propaganda downward rather than opinion upward."* [Daniels, **Op. Cit.**, p. 114] Needless to say, it was Trotsky himself who implemented that regime in the army in March 1918 when he abolished the soldier's committees and elected officers, stating that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree."* [**How the Revolution Armed**, vol. 1, p. 47] This, of course, did not stop him asserting in 1936 that the *"demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war."* [**The Revolution Betrayed**, pp. 89–90]

It should also be remembered that when, in early in 1922, the "Workers' Opposition" had appealed to Communists abroad in the form of a statement to a Congress of the Communist International (Comintern) which included the accusation that the *"party and trade-union bureaucracy ... ignore the decisions of our congresses on putting workers' democracy [inside the party] into practice."* Their *"effort to draw the proletarian masses closer to the state is declared to be 'anarcho-syndicalism,' and its adherents are subjected to persecution and discrediting."* They argued that the *"tutelage and pressure by the bureaucracy goes so far that it is prescribed for members of the party, under threat of exclusion and other repressive measures, to elect not those whom the Communists want themselves, but those whom the ignorant high places want."* [quoted by Daniels, **Op. Cit.**, p. 162] It was Trotsky who defended the party against these claims — unsurprisingly, the Bolshevik dominated Comintern decided against the opposition.

Even more ironically, the dominant faction of the bureaucracy heaped upon Trotsky's opposition faction similar insults to those he (and Lenin) had heaped upon previous oppositions inside and outside the party. In 1924, the Trotskyist opposition was accused of having *"clearly violated the decision of the Tenth Congress ... which prohibited the formation of factions within the party"* and has *"enlivened the hopes of all enemies of the party, including the West-European bourgeoisie, for a split in the ranks of the Russian Communist Party."* It was a *"direct departure of Leninism"* and *"also a clearly expressed **petty-bourgeois deviation**"* reflecting *"the pressure of the petty bourgeois on the position of the proletarian party and its policy."* [contained in Daniels, **A Documentary History of Communism**, vol. 1, pp. 247–8] In 1927, it was the case that the "United Opposition" was *"[o]bjectively ... a tool of the bourgeois elements."* [quoted by Daniels, **The Conscience of the Revolution**, p. 318] This, of course, did not deter Trotsky making similar claims against his opponents on the left during the 1930s.

Ultimately, the Stalinists had a key weapon in its armoury: *"the GPU security police. Having been used against the Workers Group and Workers Truth, it was now mobilized, covertly, against the new opposition."* [Pirani, **Op. Cit.**, p. 219] Indeed, its use in 1923 (as sanctioned by Trotsky) was used as a precedent when it was the turn of the "Left Opposition".

So what would have happened if the "Left Opposition" had won? The first task would have been a purge of the party in order to cleanse it of bureaucratic and corrupt elements. In this it would have repeated the events of 1921 when Lenin had *"proclaimed a purge of the Party, aimed at those revolutionaries who had come in from other parties — i.e. those who were not saturated with the Bolshevik mentality. This meant the establishment within the Party of a dictatorship of the old*

Bolsheviks, and the direction of disciplinary measures, not against the unprincipled careerists and conformist late-comers, but against those sections with a critical outlook." [Serge, **Op. Cit.**, p. 135] It is unlikely that another purge would have been any more successful.

Given the identical social relations between Leninism and Stalinism, all that is left to the supporters of Leninism seeking to differentiate it from Stalinism is to focus on the regime within the Communist Party itself. It is stressed that the Bolshevik party under Lenin was far more democratic than under Stalin and, moreover, the repression of the late 1920s onwards simply did not exist. True, although the suppression of opposition currents within Bolshevism did not start under Stalinism for it had existed to some degree from the start. Of course, the Stalinists did not stop there. Once the "Left Opposition" was broken its members were brutally repressed. Some were simply murdered, many more arrested and placed into prison camps where many died. Which shows, in its own way, a key difference between Lenin's and Stalin's regime. Under Lenin, the opposition **outside** the party was brutally repressed. Stalin simply applied the methods used by Lenin outside the party to oppositions within it. As Emma Goldman summarised:

> *"It does not occur to him that one might detest the savage in the Kremlin and his cruel regime and yet not exonerate Leon Trotsky ... In point of truth I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is. No, I hold no brief for the present ruler of Russia. I must, however, point out that Stalin did not come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner."* [*"Trotsky protests too much"*, **Writings of Emma Goldman**, p. 251]

Ultimately, Trotsky's "opposition" to the regime he helped shape so much was based on the utopian notion that there could be a benevolent dictatorship. That he was sincere in his illusions is as irrelevant as to pointing to a better internal party regime to differentiate Lenin's regime from Stalin's.

4 What do these oppositions tell us about the essence of Leninism?

The history and ideas of these oppositions are important in evaluating the claims of Leninists. If, as modern-day supporters of Bolshevism argue, Leninism is inherently democratic then we have to come to the conclusion that none of the party oppositions represented the real Leninist tradition. Given that many Trotskyists support the "Left Opposition" as the only alternative to Stalinism, defending the true essence of Bolshevism (see last section for details), we can only wonder what the **real** Bolshevik tradition is. After all, the "Left Opposition" wholeheartedly supported party dictatorship, remained silent on workers' control and urged the speeding up of industrialisation to meet military competition from the west — all things which Leninists say they oppose in Stalinism as being incompatible with genuine socialism.

However, there were groups which did raise more substantial critiques of mainstream Bolshevism and did so while Lenin and Trotsky were heads of the State. How Lenin and Trotsky responded to them is significant. Rather than embrace them as expressing what they (according to Leninists) **really** stood for, they used state repression to break them. This, anarchists argue, shows the essence of Leninism was expressed by the regime Lenin and Trotsky had created — and now defended — rather than selective quoting and wishful thinking about the "Left Opposition".

The only groups associated with the Bolshevik party which advocated democracy for working people were the dissidents of the "Workers' Truth" and "Workers' Group." Both were expelled from the party and their members arrested by the Bolsheviks. The latter group is better known and so, by necessity, we will concentrate on that. It was also the largest and boldest, composed mainly of workers. It attacked the *"purely bureaucratic way"* industry was run and urging *"the direct participation of the working class"* in it. However, unlike the "Workers' Opposition", the "Workers' Group" extended their call for workers' democracy to beyond the workplace and party. They wondered if the proletariat might not be *"compelled once again to start anew the struggle ... for the overthrow of the oligarchy."* They noted that ruling clique in the party *"will tolerate no criticism, since it considers itself just as infallible as the Pope of Rome."* [quoted by E.H. Carr, **The Interregnum 1923–1924**, p. 82 and p. 269]

The "Workers' Group" is associated with the old worker Bolshevik G. T. Miasnikov, its founder and leading thinker (see Paul Avrich's *"Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers' Group"* [**The Russian Review**, Vol. 43, No. 1, pp. 1–29] for more details). As Ante Ciliga recalled about the political debate in the prison camps in the late 1920s and early 1930s (for was more freedom of expression in prison than in Bolshevik society):

> *"In the criticism of the Lenin of the revolutionary period the tone was set by ... the Workers Group ... [It was], in origin, from the Bolshevik old guard. But ... they criticised Lenin's course of action from the beginning, and not on details but as a whole. The Workers Opposition denounced Lenin's economic line. The Workers Group went even farther and attacked the political regime and the single party established by Lenin prior to the NEP [that is before the spring of 1921, when the New Economic Policy (NEP) was introduced]...*
>
> *"Having put as the basis of its programme Marx's watchword for the 1st International — 'The emancipation of the workers must be the task of the workers themselves' — the Workers Group declared war from the start on the Leninist concept of the 'dictatorship of the party' and the bureaucratic organisation of production, enunciated by Lenin in the initial period of the revolution's decline. Against the Leninist line, they demanded organisation of production by the masses themselves, beginning with factory collectives. Politically, the Workers Group demanded the control of power and of the party by the worker masses. These, the true political leaders of the country, must have the right to withdraw power from any political party, even from the Communist Party, if they judged that that party was not defending their interests. Contrary to ... the majority of the Workers' Opposition, for whom the demand for 'workers' democracy' was practically limited to the economic domain, and who tried to reconcile it with the 'single party,' the Workers Group extended its struggle for workers' democracy to the demand for the workers to choose among competing political parties of the worker milieu. Socialism could only be the work of free creation by the workers. While that which was being constructed by coercion, and given the name of socialism, was for them nothing but bureaucratic State capitalism from the very beginning."* [**The Russian Enigma**, pp. 277–8]

The group had its origins when Miasnikov had exposed the abuses he had seen first hand in Lenin's regime. In 1921, he stated the obvious that *"[i]t stands to reason that workers' democracy*

presupposes not only the right to vote but also freedom of speech and press. If workers who govern the country, manage factories, do not have freedom of speech, we get a highly abnormal state." He urged total freedom of speech for all. He discussed corruption within the party, noting that a *"special type of Communist is evolving. He is forward, sensible, and, what counts most, he knows how to please his superiors, which the latter like only too much."* Furthermore, *"[i]f one of the party rank and file dares to have an opinion of his own, he is looked upon as a heretic and people scoff at him saying, 'Wouldn't Ilyitch (Lenin) have come to this idea if it were timely now? So you are the only clever man around, eh, you want to be wiser than all? Ha, ha, ha! You want to be clever than Ilyitch!' This is the typical 'argumentation' of the honourable Communist fraternity." "Any one who ventures a critical opinion of his own,"* he noted, *"will be labelled a Menshevik or Social-Revolutionist, with all the consequences that entails."* [quoted by G. P. Maximoff, **The Guillotine at Work**, p. 269 and p. 268]

Lenin tried to reply to Miasnikov's demand for freedom of speech. Freedom of the press, Lenin argued, would, under existing circumstances, strengthen the forces of counter-revolution. Lenin rejected freedom in the abstract: *"**what sort** of freedom of the press? What **for**? For **which class**?" "We do not believe in 'absolutes.' We laugh at 'pure democracy,'"* he asserted. Freedom of press in Russia, Lenin maintained, *"surrounded by the bourgeois enemies of the whole world, means freedom of **political organisation** for the bourgeoisie and its most loyal servants, the Mensheviks and Socialist Revolutionaries"* and so *"means facilitating the enemy's task, means helping the class enemy."* In short: *"We have no wish to commit suicide, and therefore, we will not do this."* According to Lenin, freedom of speech was a *"non-party, **anti-proletarian** slogan"* as well as *"an obvious political mistake."* [**Collected Works**, Vol. 32, pp. 504–8]

Miasnikov — rightly — was not convinced by Lenin's arguments. He wrote a strong reply reminding Lenin of his revolutionary credentials:

> *"You say that I want freedom of the press for the bourgeoisie. On the contrary, I want freedom of the press for myself, a proletarian, a member of the party for fifteen years, who has been a party member in Russia and not abroad. I spent seven and a half of the eleven years of my party membership before 1917 in prisons and at hard labour, with a total of seventy-five days in hunger strikes. I was mercilessly beaten and subjected to other tortures ... I escaped not abroad [like Lenin], but for party work here in Russia. To me one can grant at least a little freedom of press. Or is it that I must leave or be expelled from the party as soon as I disagree with you in the evaluation of social forces? Such simplified treatment evades but does not tackle our problems ...*
>
> *"To break the jaws of international bourgeoisie, is all very well, but the trouble is that, you raise your hand against the bourgeoisie and you strike at the worker. Which class now supplies the greatest numbers of people arrested on charges of counter-revolution? Peasants and workers, to be sure. There is no Communist working class. There is just a working class pure and simple ... "*
>
> *"Don't you know that thousands of proletarians are kept in prison because they talked the way I am talking now, and that bourgeois people are not arrested on this score for the simple reason that they are never concerned with these questions? If I am still at large, that is so because of my standing as a Communist. I have suffered for my Communist views; moreover, I am known by the workers; were it not for these facts, were I just an*

ordinary Communist mechanic from the same factory, where would I be now? In the Che-Ka [prison], or more than this, I would be made to 'escape', just as I made Mikhail Romanov (Tsar's brother) 'escape', as Luxemburg and Liebknecht were made to 'escape'. Once more I say: you raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked." [quoted by Maximoff, **Op. Cit.**, pp. 270–1]

After engaging in political activity in his home area, Miasnikov was summoned to Moscow and placed under the control of the Central Committee. In defiance of it, he returned to the Urals and resumed his agitation. At the end of August in 1922 he appeared before a general meeting of Motovilikha party members and succeeded in winning them over to his side. Adopting a resolution against the censure of Miasnikov by the Central Committee's Organisational Bureau (Orgburo), they branded his transfer to Moscow a form of *"banishment"* and demanded that he be allowed *"full freedom of speech and press within the party."* [quoted by Avrich, *"Bolshevik Opposition To Lenin: G. Miasnikov and the Workers Group"*, **The Russian Review**, Vol. 43, No. 1, p. 12]

On 25 November he wrote to a sympathiser in Petrograd urging a campaign of agitation in preparation for the 11th party congress. By now Miasnikov was being watched by the Cheka and his letter was intercepted. For Lenin, this was the last straw. *"We must devote greater attention to Miasnikov's agitation,"* he wrote to Molotov on 5 December, *"and to report on it to the Politburo twice a month."* [quoted by Avrich, **Op. Cit.**, p. 13] To deal with Miasnikov, meanwhile, the Orgburo formed a new commission which recommended his expulsion from the party, which was agreed by the Central Committee's Political Bureau (Politburo) on 20 February 1922. This was the first instance, except for the brief expulsion of S. A. Lozovsky in 1918, where Lenin actually expelled a well-known Bolshevik of long standing.

By the start of 1923, Miasnikov had organised a clandestine opposition and formed (despite his expulsion) the "Workers' Group of the Russian Communist Party." He claimed that it, and not the Bolshevik leadership, represented the authentic voice of the proletariat. P. B. Moiseev, a Bolshevik since 1914, and N. V. Kuznetsov, a former member of the "Workers' Opposition", joined the group. The three men, all workers, constituted themselves as its *"Provisional Central Organisational Bureau"*. Their first act, in February 1923, was to draw up a statement of principles in anticipation of the Twelfth Party Congress called the *"Manifesto of the Workers' Group of the Russian Communist Party,"* amongst other things *"denouncing the New Exploitation of the Proletariat and urging the workers to fight for soviet democracy"*. [I. Deutscher, **The Prophet Unarmed**, p.107]

The manifesto recapitulated the program of Miasnikov's earlier arguments: workers' self-determination and self-management, the removal of bourgeois specialists from positions of authority, freedom of discussion within the party, and the election of new soviets centred in the factories. It protested against administrative high-handedness, the expanding bureaucracy, the predominance of non-workers within the party, and the suppression of local initiative and debate. It argued that in spite of the abolition of private ownership, the worst features of capitalism had been preserved: wage slavery, differences of income and status, hierarchical authority, bureaucratism. In its words, the *"organisation of this industry since the Ninth Congress of the RCP(b) is carried out without the direct participation of the working class by nominations in a purely bureaucratic way."* [quoted by Daniels, **Op. Cit.**, p. 204] It asked:

> *"What are we being told [by the Bolshevik leadership]? 'You sit quiet, go out and demonstrate when you're invited, sing the Internationale — when required — and the rest will be done without you, by first-class people who are almost the same sort of workers as you, only cleverer.' . .. But what we need is a practice based on the self-activity of the working class, not on the party's fear of it."* [quoted by Simon Pirani, **The Russian Revolution in Retreat**, p. 142]

Within the party the manifesto defended the right to form factions and draw up platforms. *"If criticism does not have a distinct point of view,"* Miasnikov wrote to Zinoviev, *"a platform on which to rally a majority of party members, on which to develop a new policy with regard to this or that question, then it is not really criticism but a mere collection of words, nothing but chatter."* He went even further, calling into question the Bolshevik monopoly of power. Under a single-party dictatorship, he argued, elections remained *"an empty formality."* To speak of *"workers' democracy"* while insisting on one-party government, he told Zinoviev, was to entwine oneself in a contradiction, a *"contradiction in terms."* [quoted by Avrich, **Op. Cit.**, pp. 19–20]

Miasnikov was arrested by the GPU (the new name for the Cheka) on 25 May 1923, a month after the Twelfth Party Congress (the rest of the group's leadership was soon to follow). Miasnikov was released from custody and permitted to leave for Germany (this was a device not infrequently used by the authorities to rid themselves of dissenters — for example, many Russian anarchists were deported in 1921). In Berlin he formed ties with the council communists of the German Communist Workers' Party (KAPD) and with the left wing of the German Communist Party. With the aid of these groups, Miasnikov was able to publish the manifesto of the Workers' Group, prefaced by an appeal drafted by his associates in Moscow. The appeal concluded with a set of slogans proclaiming the aims of the Workers' Group: *"The strength of the working class lies in its solidarity. Long live freedom of speech and press for the proletarians! Long live Soviet Power! Long live Proletarian Democracy! Long live Communism!"* [quoted by Avrich, **Op. Cit.**, p. 22]

Inside Russia the manifesto was having an effect. Fresh recruits were drawn into the Workers' Group. It established ties with discontented workers in several cities and began negotiations with leaders of the now defunct "Workers' Opposition". The group won support within the Red Army garrison quartered in the Kremlin, a company of which had to be transferred to Smolensk. By summer of 1923 the group had some 300 members in Moscow, as well as a sprinkling of adherents in other cities. Many were Old Bolsheviks, and nearly all were workers. Soon an unexpected opportunity for the group to extend its influence arrived. In August and September 1923 a wave of strikes (which recalled the strike wave of February 1921 which inspired the Kronstadt sailors to rebel) swept Russia's industrial centres. An economic crisis had been deepening since the beginning of the year, bringing cuts in wages and the dismissal of large numbers of workers. The resulting strikes, which broke out in Moscow and other cities, were spontaneous and no evidence existed to connect them with any oppositionist faction. The Workers' Group, however, sought to take advantage of the unrest to oppose the party leadership. Stepping up its agitation, it considered calling a one-day general strike and organising a mass demonstration of workers on the lines of Bloody Sunday 1905 with a portrait of Lenin (rather than the Tzar) at its head.

The authorities became alarmed. The *"party leaders"* were *"determined to suppress the Workers' Group and the Workers' Truth"* and ordered the GPU into action. [I. Deutscher, **Op. Cit.**, p. 108] By the end of September its meeting places had been raided, literature seized, and leaders arrested. Twelve members were expelled from the party and fourteen others received reprimands.

Miasnikov was considered such a threat that in the autumn of 1923 he was lured back to Russia on assurances from Zinoviev and Krestinsky, the Soviet ambassador in Berlin, that he would not be arrested. Once in Russia he was immediately placed behind bars, arrested by Dzerzhinsky himself (the infamous creator and head of the Cheka) as a sign of the gravity with which the government viewed the situation.

This response is significant, simply because Trotsky was still an influential member of the Communist Party leadership and, given that for most modern day Leninists he raised the banner of authentic Leninism against the obvious evils of Stalinism, it casts a light on the nature of Bolshevism. More, for as Paul Avrich points out, *"[i]n January 1924, Lenin died. By then the Workers' Group had been silenced. It was the last dissident movement within the party to be liquidated while Lenin was still alive. It was also the last rank-and-file group to be smashed with the blessing of all the top Soviet leaders, who now began their struggle for Lenin's mantle."* [**Op. Cit.**, p. 24]

Thus the response of Trotsky is particularly important. As Deutscher notes, Trotsky *"did not protest"* when the dissidents *"were thrown into prison."* Dzerzhinsky, the head of the GPU (the renamed Cheka) was given the task of breaking the opposition groups by the central committee and *"found that even party members of unquestioned loyalty regarded them as comrades and refused to testify against them. He then turned to the Politburo and asked it to declare it was the duty of any party member to denounce to the GPU people inside the party engaged aggressive action against the official leaders."* Trotsky *"did not tell the Politburo plainly that it should reject Dzerzhinsky's demand. He evaded the question."* [**Op. Cit.**, pp. 108–9]

Neo-Trotskyist Tony Cliff presents a similar picture of Trotsky's lack of concern for opposition groups and his utter failure to support working class self-activity or calls for **real** democracy. He notes that in July and August 1923 Moscow and Petrograd *"were shaken by industrial unrest ... Unofficial strikes broke out in many places .. . In November 1923, rumours of a general strike circulated throughout Moscow, and the movement seems at the point of turning into a political revolt. Not since the Kronstadt rising of 1921 had there been so much tension in the working class and so much alarm in the ruling circles."* The ruling elite, including Trotsky, acted to maintain their position and the secret police turned on any political group which could influence the movement. The *"strike wave gave a new lease of life to the Mensheviks"* and so *"the GPU carried out a massive round up of Mensheviks, and as many as one thousand were arrested in Moscow alone."* When it was the turn of the Workers Group and Workers Truth, Trotsky *"did not condemn their persecution"* and he *"did not support their incitement of workers to industrial unrest."* Moreover, *"[n]or was Trotsky ready to support the demand for workers' democracy in the extreme form to which the Workers Group and Workers Truth raised it."* [**Trotsky**, vol. 3, p. 25, p. 26 and pp. 26–7]

By *"extreme,"* Cliff obviously meant *"genuine"* as Trotsky did not call for workers' democracy in any meaningful form (as Cliff acknowledged elsewhere in his book). Indeed, the *"New Course Resolution"* — a key document of the "Left Opposition" — stated *"it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat. as for instance the Workers' Truth and Workers' Group."* Trotsky himself was at pains to distance himself from Miasnikov. [**The Challenge of the "Left Opposition" (1923–25)**, p. 408 and p. 80] The resolution made it clear that it considered the dictatorship of the proletariat to be incompatible with **real** workers democracy given that both these groups advocated actual soviet and trade union democracy. Indeed, the orthodoxy was reiterated: the dictatorship of the party **was** the dictatorship of the proletariat.

Thus we come to the strange fact that it was Lenin and Trotsky themselves who knowingly destroyed the groups which represent what modern day Leninists assert is the "real" essence of Leninism. Furthermore, modern day Leninists generally ignore or dismiss these opposition groups when they discuss alternatives to Stalinism (precisely because they raised their voices on danger of bureaucratisation **under Lenin** we would suggest). This seems a strange fate to befall tendencies which, if we take Leninists at their word, expressed what their tradition stands for. Equally, in spite of their support for party dictatorship, the "Workers' Opposition" did have some constructive suggestions to make as regards combating the large-scale bureaucratisation which existed under Lenin. Yet almost all modern Leninists (like Lenin and Trotsky before them) dismiss it as utopian. Which is, of course, significant about the **real** essence of Leninism.

As noted as regards the "Left Communists" and "Workers' Opposition," their economic reforms were fatally undermined by their Marxist prejudices and they supported the dominant position of the party. While the "Workers Group" was more advanced than either in their opposition to party dictatorship, ultimately the same problem existed — their opposition (like that of the left-Mensheviks during the civil war) was premised on certain Marxist dogmas which would have produced some kind of class society due to its prejudices in favour of centralisation and representative democracy (see section H). The key issue is, then, is not whether their alternative would have produced genuine — that is, libertarian — socialism nor, indeed, what their alternative was as such but rather that they were repressed under Lenin and Trotsky for advocating ideas modern-day Leninists say they support – **precisely because they are Leninists and Trotskyists**. Yet actions speak louder than words.

Ultimately, the only real alternative existed outwith the party and Leninism. Whether this was recognising the real sources for its failures (as shown by numerous anarchist thinkers at the time, not least eye-witnesses like Emma Goldman and Alexander Berkman) or by creating an actual mass libertarian alternative in the Ukraine (see the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?"). Yet discussing the various Bolshevik oppositions is helpful to understanding why the revolution failed: for the nature of the various oppositions within the party and the fate of such real dissidents as the "Workers' Group" says far more about the real reasons the Russian revolution failed than Trotskyist books on the matter. It proves that the essence of Bolshevism is not a democratic one but rather a deeply authoritarian one hidden (at times) behind libertarian sounding rhetoric. Faced with opposition which were somewhat libertarian, the response of Lenin and Trotsky was to repress them.

In summary, the various opposition groups within Bolshevism were not alternatives and instead show that the problems of the revolution and subsequent civil war did not create but rather revealed Bolshevism's authoritarian core.

Why does the Makhnovist movement show there is an alternative to Bolshevism?

The key Leninist defence of the actions of the Bolsheviks in the Russian revolution is that they had no other choice. Complaints against the Bolshevik attacks on the gains of the revolution and the pro-revolutionary Left in Russia are met with a mantra involving the white terror, the primitive state of Russia and the reactionary peasantry, the invading imperialist armies (although the actual number can, and does, vary depending on who you are talking to) and other such *"forces of nature"*

which we are to believe could only be met by a centralised authoritarian regime that would flinch at nothing in order to survive.

However, this is not the case. This is for three reasons.

Firstly, there is the slight problem that many of the attacks on the revolution (disbanding soviets, undermining the factory committees, repressing socialists and anarchists, and so on) started **before** the start of the civil war. As such, its difficult to blame the degeneration of the revolution on an event which had yet to happen (see section 3 of the appendix "What caused the degeneration of the Russian Revolution?" for details).

Secondly, Leninists like to portray their ideology as "realistic," that it recognises the problems facing a revolution and can provide the necessary solutions. Some even claim, flying in the face of the facts, that anarchists think the ruling class will just *"disappear"* (see section H.2.1) or that we think *"full-blown"* communism will appear *"overnight"* (see section H.2.5). Only Bolshevism, it is claimed, recognises that civil war is inevitable during a revolution and only it provides the necessary solution, namely a *"workers state."* Lenin himself argued that *"[n]ot a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances."* [**Will the Bolsheviks Maintain Power?**, p. 81] As such, its incredulous that modern day followers of Lenin blame the degeneration of the Russian Revolution on the very factors (civil war and exceptional circumstances) that they claim to recognise an inevitable!

Thirdly, and even more embarrassingly for the Leninists, numerous examples exist both from revolutionary Russia at the time and from earlier and later revolutions that suggest far from Bolshevik tactics being the most efficient way of defending the revolution other methods existed which looked to the massive creative energies of the working masses unleashed by the revolution.

During the Russian Revolution the biggest example of this is found in South-Eastern Ukraine. For much of the Civil War this area operated without a centralised state apparatus of the Bolshevik type and was, instead, based on the anarchist idea of Free Soviets. There *"the insurgents raised the black flag of anarchism and set forth on the anti-authoritarian road of the free organisation of the workers."* [Arshinov, **The History of the Makhnovist Movement**, p. 50] The space in which this happened was created by a partisan force that instead of using the *"efficiency"* of executions for desertion, tsarist officers appointed over the rank and file soldiers' wishes and saluting so loved by the Bolsheviks instead operated as a volunteer army with elected officers and voluntary discipline. This movement was the Makhnovists, named after its leader, the Ukrainian anarchist Nestor Makhno. The Black Flag which floated over the lead wagon of the Insurgent Army was inscribed with the slogans ***"Liberty or Death"*** and ***"The Land to the Peasants, the Factories to the Workers."*** These slogans summarised what the Makhnovist were fighting for — a libertarian socialist society. At its height in the autumn of 1919, the Maknovists numbered around 40,000 and its extended area of influence corresponded to nearly one third of the Ukrainian Soviet Republic, comprising a population of over seven million.

It is this that explains the importance of the Makhnovists. As historian Christopher Reed notes, the *"Bolsheviks' main claim to legitimacy rested on the argument that they were the only ones capable of preventing a similar disaster [counter-revolution] for the workers and peasants of Russia and that their harsh methods were necessary in the face of a ruthless and unrelenting enemy."* However, Reed argues that *"the Makhno movement in the Ukraine suggests that there was more than one way to fight against the counter-revolution."* [**From Tsar to Soviets**, pp. 258–9] This is why the Makhnovist movement is so important, why it shows that there was, and is, an

alternative to the ideas of Bolshevism. Here we have a mass movement operating in the same *"exceptional circumstances"* as the Bolsheviks which did **not** implement the same policies. Indeed, rather than suppress soviet, workplace and military democracy in favour of centralised, top-down party power and modify their political line to justify their implementation of party dictatorship, the Makhnovists did all they could to implement and encourage working-class self-government.

As such, it is difficult to blame the development of Bolshevik policies towards state-capitalist and party-dictatorship directions on the problems caused during the revolution when the Makhnovists, facing similar conditions, did all they could to protect working- class autonomy and freedom. Indeed, it could be argued that the problems facing the Makhnovists were greater in many ways. The Ukraine probably saw more fighting in the Russian Civil War then any other area. Unlike the Bolsheviks, the Makhnovists lost the centre of their movement and had to re-liberate it. To do so they fought the Austrian and German armies, Ukrainian Nationalists, Bolsheviks and the White Armies of Denikin and then Wrangel. There were smaller skirmishes involving Cossacks returning to the Don and independent *"Green"* bands. The anarchists fought all these various armies over the four years their movement was in existence. This war was not only bloody but saw constant shifts of fronts, advances and retreats and changes from near conventional war to mobile partisan war. The consequences of this was that no area of the territory was a safe *"rear"* area for any period of time and so little constructive activity was possible. Section 4 presents a summary of the military campaigns of these years. A brief idea of the depth of fighting in these years can be seen by considering the town at the centre of the Makhnovists, Hulyai Pole which changed hands no less then 16 times in the period from 1917–1921.

Clearly, in terms of conflict (and the resulting disruption caused by it), the Makhnovists did not have the relative peace the Bolsheviks had (who never once lost their main bases of Petrograd or Moscow, although they came close). As such, the problems used to justify the repressive and dictatorial policies of the Bolsheviks also apply to the Makhnovists. Despite this, the activity of the Makhnovists in the Ukraine demonstrated that an alternative to the supposedly necessary methods of the Bolsheviks did exist. Where the Bolsheviks suppressed freedom of speech, assembly and press, the Makhnovists encouraged it. Where the Bolsheviks turned the soviets into mere cyphers of their government and undermined soviet power, the Makhnovists encouraged working-class participation and free soviets. As we discuss in section 7, the Makhnovists applied their ideas of working class self-management whenever and wherever they could.

Sadly, the Makhnovist movement is a relatively unknown event during the revolution. There are few non-anarchist accounts of it and the few histories which do mention it often simply slander it. However, as the Cohn-Bendit brothers correctly argue, the movement, *"better perhaps than any other movement, shows that the Russian Revolution could have been a great liberating force."* Equally, the reason why it has been almost totally ignored (or slandered, when mentioned) by Stalinist and Trotskyist writers is simple: *"It shows the Bolsheviks stifling workers and peasants with lies and calumnies, and then crushing them in a bloody massacre."* [Daniel and Gabriel Cohn-Bendit, **Obsolete Communism: The Left-Wing Alternative**, p. 200]

This section of our FAQ will indicate the nature and history of this important social movement. As we will prove, *"the Makhnovshchina ... was a true popular movement of peasants and workers, and ... its essential goal was to establish the freedom of workers by means of revolutionary self-activity on the part of the masses."* [Arshinov, **The History of the Makhnovist Movement**,

p. 209] They achieved this goal in extremely difficult circumstances and resisted all attempts to limit the freedom of the working class, no matter where it came from. As Makhno himself once noted:

> *"Our practice in the Ukraine showed clearly that the peasant problem had very different solutions from those imposed by Bolshevism. If our experience had spread to the rest of Russia, a pernicious division between country and city would not have been created. Years of famine would have been avoided and useless struggles between peasant and workers. And what is more important, the revolution would have grown and developed along very different lines ... We were all fighters and workers. The popular assembly made the decisions. In military life it was the War Committee composed of delegates of all the guerrilla detachments which acted. To sum up, everyone took part in the collective work, to prevent the birth of a managing class which would monopolise power. And we were successful. Because we had succeeded and gave lie to Bolshevik bureaucratic practices, Trotsky, betraying the treaty between the Ukraine and the Bolshevik authorities, sent the Red Army to fight us. Bolshevism triumphed militarily over the Ukraine and at Kronstadt, but revolutionary history will acclaim us one day and condemn the victors as counter-revolutionary grave-diggers of the Russian Revolution."* [quoted by Abel Paz, **Durruti: The People Armed**, p. 88–9]

Two distinct aspects of the anarchist movement existed in the Ukraine at this time, a political and non-military structure called the Nabat (Alarm) federation which operated through the soviets and collectives and a military command structure usually known after is commander Nestor Makhno as the

Makhnovshchina (which means the *"Makhno movement"*) although its proper name was the *Revolutionary Insurgent Army of the Ukraine.* This section of the FAQ will cover both, although the Makhnovshchina will be the main focus.

For more information on the Makhnovist movement, consult the following books. Anarchist accounts of the movement can be found in Peter Arshinov's excellent **The History of the Makhnovist Movement** and Voline's **The Unknown Revolution** (Voline's work is based on extensive quotes from Arshinov's work, but does contain useful additional material). For non-anarchist accounts, Michael Malet's **Nestor Makhno in the Russian Revolution** is essential reading as it contains useful information on both the history of the movement, its social basis and political ideas. Malet considers his work as a supplement to Michael Palij's **The Anarchism of Nestor Makhno, 1918–1921** which is primarily a military account of the movement but which does cover some of its social and political aspects. Unfortunately, both books are rare. Paul Avrich's **The Russian Anarchists** contains a short account of the movement and his **Anarchist Portraits** has a chapter on Nestor Makhno. Makhnovist source material is included in Avrich's **The Anarchists in the Russian Revolution**. Daniel Guerin includes a section on Makhno and the Makhnovist Movement in volume 2 of **No Gods, No Masters**. As well as extracts from Arshinov's book, it has various manifestos from the movement as well as Makhno's account of his meeting with Lenin. Christopher Read's **From Tsar to Soviets** has an excellent section on the Makhnovists. Serge Cipko presents an excellent overview of works on the Makhnovists in his *"Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921"* (**The Raven**, no. 13). Alexander Skirda presents an overview of perestroika soviet accounts of

Makhno in his essay *"The Rehabilitation of Makhno"* (**The Raven**, no. 8). Skirda's biography **Nestor Makhno: Le Cosaque de l'anarchie** is by far the best account of the movement available.

Lastly, a few words on names. There is a large variation on the spelling of names within the source material. For example, Makhno's home town has been translated as Gulyai Pole, Gulyai Polye Huliai-Pole and Hulyai Pole. Similarly, with other place names. The bandit Grigor'ev has been also translated as Hryhor'iv and Hryhoriyiv. We generally take Michael Malet's translations of names as a basis (i.e. we use Hulyai Pole and Hryhoriyiv, for example).

1 Who was Nestor Makhno?

The Makhnovist movement was named after Nestor Makhno, a Ukrainian anarchist who played a key role in the movement from the start. Indeed, Makhnoshchina literally means *"Makhno movement"* and his name is forever linked with the revolution in the South-East of the Ukraine. So who was Makhno?

Nestor Ivanovich Makhno was born on the 27th of October, 1889 in Hulyai Pole, which is situated in Katerynoslav province, in the south east of the Ukraine between the Dnieper River and the Sea of Azov. While it seems to be conventional for many historians to call Hulyai Pole a "village," it was in fact a town with a population of about 30,000 and boasted several factories and schools.

Makhno was the son of a poor peasant family. His father died when he was ten months old, leaving him and his four brothers in the care of their mother. Due to the extreme poverty of his family, he had to start work as a shepherd at the age of seven. At eight he started to attend the Second Hulyai Pole primary school in winter and worked for local landlords during the summer. He left school when he was twelve and took up full-time employment as a farmhand on the estates of nobles and on the farms of the German colonist **kulaks.** At the age of seventeen, he started to work in Hulyai Pole itself, first as an apprentice painter, then as an unskilled worker in a local iron foundry and, finally, as a founder in the same establishment.

It was when he was working in the iron foundry that he became involved in revolutionary politics. In the stormy years following the 1905 revolution, Makhno got involved in revolutionary politics. This decision was based on his experiences of injustice at work and seeing the terror of the Russian regime during the 1905 events (in Hulyai Pole there had been no serious disorder, yet the regime sent a detachment of mounted police to suppress gatherings and meetings in the town, terrorising the population by whipping those caught in the streets and beating prisoners with rifle butts). In 1906, Makhno decided to join the anarchist group in Hulyai Pole (which had been formed the previous year and consisted mainly of sons of poorer peasants).

At the end of 1906 and in 1907, Makhno was arrested and accused of political assassinations, but was released due to lack of evidence. In 1908, due to the denunciation of a police spy within the anarchist group, he was arrested and put in jail. In March, 1910, Makhno and thirteen others were tried by a military court and sentenced to death by hanging. Due to his youth and the efforts of his mother, the death penalty was commuted to life imprisonment with hard labour. He served his time at the Butyrki prison in Moscow, resisting the prison authorities by every means available to him. Due to this resistance, he spent much of his time in chains or in damp and freezing confinement. This experience ensured that Makhno developed an intense hatred

of prisons (later, during the revolution, his first act in entering a town or city was to release all prisoners and destroy the prison).

It was during his time in Butykri that Makhno met Peter Arshinov, a fellow anarchist prisoner and later activist and historian of the Makhnovist movement. Arshinov was born in 1887 in the Ukrainian industrial town of Katerinoslav. His father was a factory worker and he was a metal worker. Originally a Bolshevik, he had become an anarchist in 1906, taking a leading part in organising factory workers and actions against the regime. In 1907 he was arrested and sentenced to death, escaping to Western Europe. In 1909, he returned to Russia and was again arrested and again escaped. In 1910, he was arrested and placed in the Butykri prison where he met Makhno. The two anarchists established a close personal and political friendship, with Arshinov helping Makhno develop and deepen his anarchist ideas.

On March 2nd, 1917, after eight years and eight months in prison, Makhno was released along with all other political prisoners as a result of the February Revolution. After spending three weeks in Moscow with the Moscow anarchists, Makhno returned to Hulyai Pole. As the only political prisoner who was returned to his family by the revolution, Makhno became very well-respected in his home town. After years of imprisonment, suffering but learning, Makhno was no longer an inexperienced young activist, but a tested anarchist militant with both a powerful will and strong ideas about social conflict and revolutionary politics. Ideas which he immediately set about applying.

Once home in Hulyai Pole, Makhno immediately devoted himself to revolutionary work. Unsurprisingly, the remaining members of the anarchist group, as well as many peasants, came to visit him. After discussing ideas with them, Makhno proposed beginning organisational work immediately in order to strengthen links between the peasants in Hulyai Pole and its region with the anarchist group. On March 28–29, a Peasant Union was created with Makhno as its chairman. Subsequently, he organised similar unions in other villages and towns in the area. Makhno also played a large part in a successful strike by wood and metal workers at a factory owned by his old boss (this defeat led to the other bosses capitulating to the workers as well). At the same time, peasants refused to pay their rent to the landlords. [Michael Malet, **Nestor Makhno in the Russian Civil War**, p. 4] Regional assemblies of peasants were called, both at Hulyai Pole and elsewhere, and on August 5–7, the provincial congress at Katerinoslav decided to reorganise the Peasant Unions into Soviets of Peasants' and Workers' Deputies.

In this way, *"Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported his efforts, hoping to expedite the expropriation of large estates."* [Michael Palij, **The Anarchism of Nestor Makhno**, p. 71] In Hulyai Pole, the revolution was moving faster than elsewhere (for example, while the Aleksandrovsk soviet supported the actions of the Provisional Government during the July days in Petrograd, a meeting in Hulyai Pole saluted the rebellious soldiers and workers). Peasants were drawn to Hulyai Pole for advice and help from the neighbouring **volosts** (administrative districts). The peasantry wanted to seize the land of the large landowners and the kulaks (rich peasants). Makhno presented this demand at the first sessions of the regional Soviet, which were held in Hulyai Pole. In August, Makhno called all the local landlords and rich peasants (kulaks) together and all documents concerning ownership (of land, livestock and equipment) were taken from them. An inventory of this property was taken and reported to the session of the local soviet and then at a regional meeting. It was agreed that all land, livestock and equipment was to be divided equally, the division to include the former owners. This was the core of the agrarian program of the movement, namely the liquidation of

the property of the landowners and kulaks. No-one could own more land than they could work with their own labour. All this was in flat defiance to the Provisional Government which was insisting that all such questions be left to the Constituent Assembly. Free communes were also created on ex-landlord estates.

Unsurprisingly, the implementation of these decisions was delayed because of the opposition of the landlords and kulaks, who organised themselves and appealed to the provisional authorities. When General Kornilov tried to march on Petrograd and take power, the Hulyai Pole soviet took the initiative and formed a local *"Committee for the Salvation of the Revolution"* headed by Makhno. The real aim was to disarm the potential local enemy — the landlords, bourgeoisie, and kulaks — as well as to expropriate their ownership of the people's wealth: the land, factories, plants, printing shops, theatres and so on. On 25 September a volost congress of Soviets and peasant organisations in Hulyai Pole proclaimed the confiscation of the landowners' land and its transformation into social property. Raids on the estates of landlords and rich peasants, including German colonists, began and the expropriation of the expropriators began.

Makhno's activities came to a halt the following spring when Lenin's government signed the Treaty of Brest-Litovsk. This treaty gave sizeable parts of the Russian Empire, including the Ukraine, to Germany and Austria in return for peace. The Treaty also saw the invasion of the Ukraine by large numbers of German and Austrian troops, who conquered the entire country in less than three months. Makhno succeeded in forming several military units, consisting of 1700 men, but could not stop Hulyai Pole being taken. After an anarchist congress at the end of April in Taganrog, it was decided to organise small combat units of five to ten peasants and workers, to collect arms from the enemy and to prepare for a general peasant uprising against the Austro-German troops and, finally, to send a small group to Soviet Russia to see at first hand what was happening there to both the revolution and to the anarchists under Bolshevik rule. Makhno was part of that group.

By June, Makhno had arrived in Moscow. He immediately visited a number of Russian anarchists (including his old friend Peter Arshinov). The anarchist movement in Moscow was cowed, due to a Cheka raid in April which broke the backbone of the movement, so ending a political threat to the Bolsheviks from the left. To Makhno, coming from an area where freedom of speech and organisation was taken for granted, the low level of activity came as a shock. He regarded Moscow as the capital of the *"paper revolution,"* whose red tape and meaninglessness had affected even the anarchists. Makhno also visited Peter Kropotkin, asking his advice on revolutionary work and the situation in the Ukraine. To Makhno, *"Moscow appeared as 'the capital of the Paper Revolution,' a vast factory turning out empty resolutions and slogans while one political party, by means of force and fraud, elevated itself into the position of a ruling class."* [David Footman, **Op. Cit.**, p. 252]

While in Moscow, Makhno met with Lenin. This meeting came about by chance. Visiting the Kremlin to obtain a permit for free board and lodging, he met the chairman of the All-Russian Central Executive Committee of the Soviets, Jakov M. Sverdlov, who arranged for Makhno to meet Lenin. Lenin asked Makhno, *"How did the peasants of your region understand the slogan ALL POWER TO THE SOVIETS IN THE VILLAGES?"* Makhno states that Lenin *"was astonished"* at his reply:

> *"The peasants understood this slogan in their own way. According to their interpretation, all power, in all areas of life, must be identified with the consciousness and will of the*

working people. The peasants understand that the soviets of workers and peasants of village, country and district are neither more nor less than the means of revolutionary organisation and economic self-management of working people in the struggle against the bourgeoisie and its lackeys, the Right socialists and their coalition government."

To this Lenin replied: *"Well, then, the peasants of your region are infected with anarchism!"* [Nestor Makhno, **My Visit to the Kremlin**, p. 18] Later in the interview, Lenin stated: *"Do the anarchists ever recognise their lack of realism in present-day life? Why, they don't even think of it."* Makhno replied:

"But I must tell you, comrade Lenin, that your assertion that the anarchists don't understand 'the present' realistically, that they have no real connection with it and so forth, is fundamentally mistaken. The anarchist-communists in the Ukraine ... the anarchist-communists, I say, have already given many proofs that they are firmly planted in 'the present.' The whole struggle of the revolutionary Ukrainian countryside against the Central Rada has been carried out under the ideological guidance of the anarchist-communists and also in part by the Socialist Revolutionaries ... Your Bolsheviks have scarcely any presence in our villages. Where they have penetrated, their influence is minimal. Almost all the communes or peasant associations in the Ukraine were formed at the instigation of the anarchist-communists. The armed struggle of the working people against the counter-revolution in general and the Austro-German invasion in particular has been undertaken with the ideological and organic guidance of the anarchist-communists exclusively.

"Certainly it is not in your party's interest to give us credit for all this, but these are the facts and you can't dispute them. You know perfectly well, I assume, the effective force and the fighting capacity of the free, revolutionary forces of the Ukraine. It is not without reason that you have evoked the courage with which they have heroically defended the common revolutionary conquests. Among them, at least one half have fought under the anarchist banner...

"All this shows how mistaken you are, comrade Lenin, in alleging that we, the anarchist-communists, don't have our feet on the ground, that our attitude towards 'the present' is deplorable and that we are too fond of dreaming about the future. What I have said to you in the course of this interview cannot be questioned because it is the truth. The account which I have made to you contradicts the conclusions you expressed about us. Everyone can see we are firmly planted in 'the present,' that we are working and searching for the means to bring about the future we desire, and that we are in fact dealing very seriously with this problem."

Lenin replied: *"Perhaps I am mistaken."* [Makhno, **Op. Cit.**, pp. 24–5]

The Bolsheviks helped Makhno to return to the Ukraine. The trip was accomplished with great difficulty. Once Makhno was almost killed. He was arrested by Austro-German troops and was carrying libertarian pamphlets at the time. A Jewish inhabitant of Hulyai Pole, who had know Makhno for some time, succeeded in saving him by paying a considerable sum of money for his liberation. Once back in Hulyai-Pole, he started to organise resistance to the occupying forces of the Austro-Germans and their puppet regime led by Hetman Skoropadsky.

With the resistance, the Makhno movement can be said to have arisen (see section 3 on way it was named after Makhno). From July 1918 to August 1921, Makhno led the struggle for working class freedom against all oppressors, whether Bolshevik, White or Nationalist. During the course of this struggle, he proved himself to be *"a guerrilla leader of quite outstanding ability."* [David Footman, **Civil War in Russia**, p. 245] The military history of this movement is discussed in section 4, while other aspects of the movement are discussed in other sections.

After the defeat of the Makhnovist movement in 1921, Makhno was exiled in Western Europe. In 1925 he ended up in Paris, where he lived for the rest of his life. While there, he remained active in the anarchist movement, with the pen replacing the sabre (to use Alexander Skirda's colourful expression). Makhno contributed articles to various anarchist journals and in particular to **Delo Truda**, an anarchist-communist paper started in Paris by Peter Arshinov (many of these articles have been published in the book **The Struggle Against the State and Other Essays**). He remained active in the anarchist movement to the end.

In Paris, Makhno met the famous Spanish anarchists Buenaventura Durruti and Francisco Ascaso in 1927. He argued that in Spain *"conditions for a revolution with a strong anarchist content are better than in Russia"* because not only was there *"a proletariat and a peasantry with a revolutionary tradition whose political maturity is shown in its reactions,"* the Spanish anarchists had *"a sense of organisation which we lacked in Russia. It is organisation which assures the success in depth of all revolutions."* Makhno recounted the activities of the Hulyai Pole anarchist group and the events in revolutionary Ukraine:

> *"Our agrarian commune was at once the economic and political vital centre of our social system. These communities were not based on individual egoism but rested on principles of communal, local and regional solidarity. In the same way that the members of a community felt solidarity among themselves, the communities were federated with each other ... It is said against our system that in the Ukraine, that it was able to last because it was based only on peasant foundations. It isn't true. Our communities were mixed, agricultural-industrial, and, even, some of them were only industrial. We were all fighters and workers. The popular assembly made the decisions. In military life it was the War Committee composed of delegates of all the guerrilla detachments which acted. To sum up, everyone took part in the collective work, to prevent the birth of a managing class which would monopolise power. And we were successful."* [quoted by Abel Paz, **Durruti: The People Armed**, p. 88–9]

As can be seen from the social revolution in Aragon, Durruti took Makhno's advice seriously (see section I.8 for more on the Spanish Revolution). Unsurprisingly, in 1936 a number of veterans of Makhno's Insurgent Army went to fight in the Durruti column. Sadly, Makhno's death in 1934 prevented his own concluding statement to the two Spaniards: *"Makhno has never refused to fight. If I am alive when you start your struggle, I will be with you."* [quoted by Paz, **Op. Cit.**, p. 90]

Makhno's most famous activity in exile was his association with, and defence of, the **Organisational Platform of the Libertarian Communists** (known as the *"Platform"*). As discussed in section J.3.3, the Platform was an attempt to analyse what had gone wrong in the Russian Revolution and suggested a much tighter anarchist organisation in future. This idea provoked intense debate after its publication, with the majority of anarchists rejecting it (for Makhno's discussion with Malatesta on this issue, see **The Anarchist Revolution** published by Freedom

Press). This debate often resulted in bitter polemics and left Makhno somewhat isolated as some of his friends, like Voline, opposed the Platform. However, he remained an anarchist to his death in 1934.

Makhno died on the morning of July 25th and was cremated three days later and his ashes placed in an urn within Pere Lachaise, the cemetery of the Paris Commune. Five hundred Russian, French, Spanish and Italian comrades attended the funeral, at which the French anarchist Benar and Voline spoke (Voline used the occasion to refute Bolshevik allegations of anti-Semitism). Makhno's wife, Halyna, was too overcome to speak.

So ended the life of one great fighters for working-class freedom. Little wonder Durruti's words to Makhno:

> *"We have come to salute you, the symbol of all those revolutionaries who struggled for the realisation of Anarchist ideas in Russia. We also come to pay our respects to the rich experience of the Ukraine."* [quoted by Abel Paz, **Op. Cit.**, p. 88]

For fuller details of Makhno's life, see the accounts by Peter Arshinov (**The History of the Makhnovist Movement**), Paul Avrich (*"Nestor Makhno: The Man and the Myth,"* in **Anarchist Portraits**), Michael Palij, (**The Anarchism of Nestor Makhno**) and Michael Malet (**Nestor Makhno in the Russian Revolution**).

2 Why was the movement named after Makhno?

Officially, the Makhnovist movement was called the **Revolutionary Insurrectionary Army of the Ukraine**. In practice, it was usually called the *"Makhno movement"* (***"Makhnovshchina"*** in Russian) or the Makhnovists. Unsurprisingly, Trotsky placed great significance on this:

> *"The anti-popular character of the Makhno movement is most clearly revealed in the fact that the army of Hulyai Pole is actually called 'Makhno's Army'.* ***There, armed men are united not around a programme, not around an ideological banner, but around a man."*** [**The Makhno Movement**]

Ignoring the irony of a self-proclaimed Marxist (and later Leninist and founder of Trotskyism!) making such a comment, we can only indicate why the Makhnovists called themselves by that name:

> *"Because, first, in the terrible days of reaction in the Ukraine, we saw in our ranks an unfailing friend and leader, MAKHNO, whose voice of protest against any kind of coercion of the working people rang out in all the Ukraine, calling for a battle against all oppressors, pillagers and political charlatans who betray us; and who is now marching together with us in our common ranks unwavering toward the final goal: liberation of the working people from any kind of oppression."* [contained in Arshinov, **Op. Cit.**, p. 272]

The two of the anarchists who took part in the movement and later wrote its history concur. Voline argues that the reason why the movement was known as the *"Makhnovist movement"* was because the *"most important role in this work of unification [of the peasant masses] and in*

the general development of the revolutionary insurrection in the southern Ukraine was performed by the detachment of partisans guided by a peasant native to the region: Nestor Makhno." [**The Unknown Revolution**, p. 551] *"From the first days of the movement,"* Arshinov notes, *"up to its culminating point, when the peasants vanquished the landowners, Makhno played a preponderant and central role to such an extent that the whole insurgent region and the most heroic moments of the struggle are linked to his name. Later, when the insurrection had triumphed completely over the Skoropadsky counter-revolution and the region was threatened by Denikin, Makhno became the rallying point for millions of peasants in several regions."* [**Op. Cit.**, p. 50]

It must be stressed that Nestor Mahkno was not the boss of the Mahknovista. He was not their ruler or general. As such, the fact that the Makhnovists were (unofficially) named after Makhno does not imply that it was his personal fiefdom, nor that those involved followed him as an individual. Rather, the movement was named after him because he was universally respected within it as a leading militant. This fact also explains why Makhno was nicknamed *"Batko"* (see next section).

This can be seen from how the movement was organised and was run. As we discuss in section 5, it was organised in a fundamentally democratic way, by means of mass assemblies of insurgents, elected officers, regular insurgent, peasant and worker congresses and an elected *"Revolutionary Military Soviet."* The driving force in the Makhnovist movement was not, therefore, Makhno but rather the anarchist ideas of self-management. As Trotsky himself was aware, the Makhnovists were influenced by anarchist ideas:

> *"Makhno and his companions-in-arms are not non-party people at all. They are all of the Anarchist persuasion, and send out circulars and letters summoning Anarchists to Hulyai Pole so as to organise their own Anarchist power there."* [Trotsky, **Op. Cit.**]

As part of this support for anarchist theory, the Makhnovists organised insurgent, peasant and worker conferences to discuss key issues in the revolution and the activities of the Makhno movement itself. Three such conferences had been before Trotsky wrote his diatribe **The Makhno Movement** on June 2nd, 1919. A fourth one was called for June 15th, which Trotsky promptly banned (on pain of death) on June 4th (see section 13 for full details). Unlike the Bolshevik dictatorship, the Makhnovists took every possibility of ensuring the participation of the working people they were fighting for in the revolution. The calling of congresses by the Makhnovists shows clearly that the movement did not, as Trotsky asserted, follow a man, but rather ideas.

As Voline argued, *"the movement would have existed without Makhno, since the living forces, the living masses who created and developed the movement, and who brought Makhno forward merely as their talented military leader, would have existed without Makhno."* Ultimately, the term *"Makhnovshchina"* is used *"to describe a unique, completely original and independent revolutionary movement of the working class which gradually becomes conscious of itself and steps out on the broad arena of historical activity."* [*"preface,"* Arshinov, **Op. Cit.**, p. 19]

3 Why was Makhno called *"Batko"*?

Nestor Makhno was often called in the movement *"Batko"*, which is Ukrainian for *"father."* Peter Arshinov explains how and in what circumstances Makhno was given this name:

*"It was ... in September 1918, that Makhno received the nickname **Batko** — general leader of the revolutionary insurrection in the Ukraine. This took place in the following circumstances. Local **pomeshchiks** [landed gentry] in the major centres, the **kulaks** [rich peasants], and the German authorities [the Ukraine being occupied by them at the time], decided to eliminate Makhno and his detachment [of partisans] at any cost. The **pomeshchiks** created a special volunteer detachment consisting of their own sons and those of **kulaks** for the decisive struggle against Makhno. On the 30th of September this detachment, with the help of the Austro-Germans, corned Makhno in the region of Bol'shaya Mihhailovka, setting up strong military posts on all roads. At this time Makhno found himself with only 30 partisans and one machine gun. He was forced to make a fighting retreat, manoeuvring in the midst of numerous enemy forces. Arriving in the forest of Dibrivki, Makhno found himself in an extremely difficult situation. The paths of retreat were occupied by the enemy. It was impossible for the detachment to break through, and escaping individually was beneath their revolutionary dignity. No-one in the detachment would agree to abandon their leader so as to save himself. After some reflection, two days later, Makhno decided to return to the village of Bol'shaya Mikhailovka (Dibrivki). Leaving the forest the partisans met peasants who came to warn them that there were large enemy forces in Dibrivki and that they should make haste to go elsewhere. This information did not stop Makhno and his partisans ... [and] they set out for Bol'shaya Mikhailovka. They approached the village guardedly. Makhno himself and a few of his comrades went on reconnaissance and saw a large enemy camp on the church square, dozens of machine guns, hundreds of saddle horses, and groups of cavalry. Peasants informed them that a battalion of Austrians and a special **pomeshchik** detachment were in the village. Retreat was impossible. Then Makhno, with his usual stubbornness and determination, said to his companions: 'Well, my friends! We should all be ready to die on this spot ...' The movement was ominous, the men were firm and full of enthusiasm. All 30 saw only one path before them — the path toward the enemy, who had about a thousand well-armed men, and they all realised that this meant certain death for them. All were moved, but none lost courage.*

"It was at this movement that one of the partisans, Shchus', turned to Makhno and said:

*"'From now on you will be **Batko** to all of us, and we vow to die with you in the ranks of the insurgents.'*

*"Then the whole detachment swore never to abandon the insurgent ranks, and to consider Makhno the general **Batko** of the entire revolutionary insurrection. Then they prepared to attack. Shchus' with five to seven men was assigned to attack the flank of the enemy. Makhno with the others attacked from the front. With a ferocious 'Hurrah!' the partisans threw themselves headlong against the enemy, smiting the very centre with sabres, rifles and revolvers. The attack had a shattering effect. The enemy, who were expecting nothing of the kind, were bowled over and began to flee in panic, saving themselves in groups and individually, abandoning arms, machine guns and horses. Without leaving them time to come to themselves, to become aware of the number of attacking forces, and to pass to a counter-attack, the insurgents chased them in separate groups, cutting them down in full gallop. A part of the **pomeshchik** detachment fled to the Volchya*

River, where they were drowned by peasants who had joined the battle. The enemy's defeat was complete.

"Local peasants and detachments of revolutionary insurgents came from all directions to triumphantly acclaim the heroes. They unanimously agreed to consider Makhno as ***Batko*** *of the entire revolutionary insurrection in the Urkaine."* [Arshinov, **Op. Cit.**, pp. 59–60]

This was how Makhno acquired the nickname *"Batko,"* which stuck to him thereafter.

It should be stressed that *"Batko"* was a nickname and did not signify any form of autocratic or hierarchical position within the movement:

"During the civil war, it signified the leadership and control of a specific area and its population in both civil and military fields. The central point of the use of the word, rather than 'leader' or 'dictator' is that the leadership is usually based on respect, as in Makhno's case, and always on intimate knowledge of the home territory." [Michael Malet, **Op. Cit.**, p. 17]

That this was a nickname can be seen from the fact that *"[a]fter 1920 he was usually called 'Malyi' ('Shorty'), a nickname referring to his short stature, which was introduced by chance by one of the insurgents."* [Peter Arshinov, **Op. Cit.**, p. 226] To attach significance to the fact that the peasants called Makhno *"Batko"* (as the Bolsheviks did) simply signifies an ignorance of the Makhnovist movement and its social environment.

4 Can you give a short overview of the Makhnovist movement?

This section of the FAQ gives a short overview of the Makhnovists from July 1918 (when Makhno returned to the Ukraine) and August 1921, when it was finally defeated by Bolshevik armed force. It will be primarily a military history, with the socio-political aspects of the movement discussed in sections 6 (its theory) and 7 (its practice). For details of the rise of influence of Makhno after his release from prison in 1917, see section 1.

The history of the Makhno movement can be broken up into roughly four periods — from July 1918 to February 1919, then the rest of 1919, then January to October 1920 and, finally, from October 1920 to August 1921. This section will give an overview of each period in turn.

By the time Makhno arrived back in the Ukraine in July, 1918, opposition to the German-backed Hetman's regime was mounting and was frequently met with brutal repression, including reprisal executions. Makhno was forced to live underground and on the move, secretly meeting with others, with the Austrians always close behind. Voline recounts Makhno's activities at this time:

"Back in Hulyai Pole, Makhno came to the decision to die or obtain victory for the peasants ... He did not delay starting his mission openly among the great masses of peasants, speaking at improvised meetings, writing and distributing letters and tracts. By pen and mouth, he called on the peasants for a decisive struggle against the power of Skoropadsky and the landlords. He declared tirelessly that the workers should now take their fates into their own hands and not let their freedom to act be taken from them ...

"Besides his appeals, Makhno proceeded immediately to direct action. His first concern was to form a revolutionary military unit, sufficiently strong to guarantee freedom of propaganda and action in the villages and towns and at the same time to begin guerrilla operations. This unit was quickly organised ...

"His first unit undertook two urgent tasks, namely, pursuing energetically the work of propaganda and organisation among the peasants and carrying out a stubborn armed struggle against all their enemies. The guiding principle of this merciless struggle was as follows. No lord who persecuted the peasants, no policeman of the Hetman, no Russian or German officer who was an implacable enemy of the peasants, deserved any pity; he must be destroyed. All who participated in the oppression of the poor peasants and workers, all who sought to suppress their rights, to exploit their labour, should be executed.

"Within two or three weeks, the unit had already become the terror, not only of the local bourgeoisie, but also of the Austro-German authorities." [**The Unknown Revolution**, p. 558]

The night of 26 September saw Hulyai Pole briefly liberated from Hetman and Austrian troops by the actions of Makhno's troops in association with local people. On the retreat from this Makhno's small band grew when he met the partisan troops headed by Schus. When the Austrians cornered them, they launched a surprise counter attack and routed the opposition. This became known as the battle of Dibrivki and it is from this date, 5 October 1918 that Makhno is given the nickname 'Batko', meaning *"father"* (see section 3 for details). For the next two months already- existing partisan groups sought out and joined the growing army.

In this period, Makhno, with portable printing equipment, was raiding the occupying garrisons and troop trains in the Southern Ukraine. Normal practice was to execute the officers and free the troops. In this period the moral of the occupying troops had crumbled and revolutionary propaganda had made inroads into many units. This was also affecting the nationalist troops and on 20 November the first nationalist unit defected to the Makhnovists. This encouraged them to return to Hulyai Pole on 27 December and there the insurrectionary Staff was formed, this body was to lead the army in the coming years and consisted initially of four old and trusted friends and three political comrades. The Makhnovist presence allowed the setting up of a local soviet and the re-opening of the anarchist clubs. German forces started pulling back to the major cities and on December 14 the Hetman fled Kiyiv. In the resulting vacuum, the Makhnovists rapidly expanded taking in most of the South East Ukraine and setting up fronts against local whites. The Ukrainian nationalists had taken power in the rest of the Ukraine under Petliura and on the 15th December the Makhnovists agreed to make common cause with them against the Whites. In return for arms and ammunition they allowed the nationalists to mobilise in the Makhnovist area (while engaging in propaganda directed at the mobilised troops on their way by train to Katerynoslav).

This was a temporary and pragmatic arrangement directed against the greater enemy of the Whites. However, the nationalists were no friends of working-class autonomy. The nationalists banned elections to the Katerynoslav soviet on 6th of December and the provincial soviet at Kharkiv meet with a similar fate on the 22nd. [Malet, **Op. Cit.**, p. 22] At the same time as their agreement with the nationalists, the Makhnovista had set up links with Bolshevik partisans to

the south and before dawn on the 26th the Bolshevik and Makhnovista forces launched a joint attack on the nationalists at Katerynoslav. The city was taken but held only briefly when a nationalist attack on the 29th drove out all the insurgent forces with heavy losses. In the south, White reinforcements led to the insurgents being pushed North and losing Hulyai Pole.

1919 opened with the Makhnovists organising a congress of front- unit delegates to discuss the progress of the struggle. Over forty delegates attended and a committee of five was elected, along with an operational staff to take charge of the southern front and its rear. It was agreed that local soviets were to be supported in every way, with no military violence directed towards them permitted. [Malet, **Op. Cit.**, p. 25]

By the end of January, white reinforcements were landing in the ports of the south. On January 22nd, a worker, peasant and insurgent congress was held at Velyka Mykhailivka. A resolution was passed urging an end to conflict between Makhnovists, Nationalists and Bolsheviks. An alliance was signed between the Makhnovists and the Bolsheviks in early February. This agreement ensured that the Partisan units entered the Red Army as distinct formations, with their internal organisation (including the election of commanders) intact, and the Red Army in the area formed a brigade to be known as *"the third Transdnieper Batko Makhno brigade"* with Makhno as commander. The Whites were repulsed and Hulyai Pole retaken and the front pushed some distance eastwards.

Thus the military situation had improved by the time of the second worker, peasant and insurgent congress held at Hulyai Pole on February 12th. This congress set up a *"Revolutionary Military Soviet"* to co-ordinate civilian affairs and execute its decisions. The congress resolved that *"the land belongs to nobody"* and should be cultivated without the use of hired labour. It also accepted a resolution opposing anti-Jewish pogroms. Also passed was a resolution which sharply attacked the Bolsheviks, caused by their behaviour since their arrival in the Ukraine. [Palij, **Op. Cit.**, pp. 154–5] A report by the commander of the 2nd Red Army, Skatchco, indicates the nature of this behaviour:

> *"Little local Chekas are undertaking a relentless campaign against the Makhnovists, even when they are shedding their blood at the front. They are hunting them down from the rear and persecuting them solely for belonging to the Makhnovist movement ... It cannot continue like this: the activity of the local Chekas is deliberately ruining the front, reducing all military successes to nothing, and contributing to the creation of a counter-revolution that neither Denikin nor Krasnov [Hetman of the Don Cossacks] could have achieved..."* [quoted by Alexander Skirda, **The Rehabilitation of Makhno**, p. 346]

Unsurprisingly, the peasants reacted strongly to the Bolshevik regime. Their *"agricultural policy and terrorism"* ensured that *"by the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks."* [Palij, **Op. Cit.**, p. 156] In April alone, there were 93 separate armed rebellions against the Bolsheviks in the Ukraine. The *"more oppressive the Bolshevik policy, the more the peasants supported Makhno. Consequently, the Bolsheviks began to organise more systematically against the Makhno movement, both as an ideology and as a social movement."* [Palij, **Op. Cit.**, p. 157]

In mid-March the Red Army attacked eastwards. In the course of this Dybenko, commander of the Trandneiper division, recommended one of Makhno's commanders for a medal. Then the

Makhnovists attacked the Donbas (east) to relieve the pressure on the Soviet 8th Army caused by a White advance. They took Mariupol following a White incursion at the beginning of April. A White counter-offensive resulted in the Red 9th division panicking, allowing the Whites into Makhno's rear. Red Commander Dybenko refused orders to come to the Makhnovists aid as he was more interested in the Crimea (south). [Malet, **Op. Cit.**, p. 31]

This period saw the most sustained freedom for the region around Hulyai Pole. It had been free of enemy occupation since January, allowing constructive activity to restart. The inhabitants of the free region *"created new forms of social organisation: free workers' communes and Soviets."* [Voline, **Op. Cit.**, p. 574] The Revolutionary Military Soviet (RMS) called a third regional worker, peasant and insurgent congresses had on April 10th to review progress and to look forward. This was the largest congress to date, with delegates from 72 volosts containing two million people. The Bolshevik military commander Dybenko tried to ban it. The Makhnovists, needless to say, ignored him and the RMS made a famous reply to his arrogance (see section 13 for more details).

It was during this period (late 1918 and early 1919), that the ***Nabat*** anarchist federation was organised. *"Anarchist influence was reported from Aleksandrovsk and other centres,"* notes David Footman, *"Anarchists were holding a conference in Kursk at about the same time and in one of their resolutions it was stated that 'the Ukrainian Revolution will have great chances of rapidly becoming Anarchist in its ideas.' The position called for renewed Bolshevik measures against the Anarchists. **Nabat**, the main Anarchist newspaper in the Ukraine, was suppressed, and its editorial board dispersed under threat of arrest."* [**Op. Cit.**, p. 270] Daniel Guerin has reproduced two documents from the Nabat federation in volume II of his **No Gods, No Masters**.

The anarchist influence in and around Hulyai Pole also worried the Bolsheviks. They started a slander campaign against the Makhnovists, to the alarm of Antonov, the overall front commander, who replied in response to an article in Kharkiv Izvestiya:

> *"The article is the most perverted fiction and does not in the least correspond to the existing situation. The insurgents fighting the whites are on a level with the Red Army men, but are in a far worse condition for supplies."* [quoted by Malet, **Op. Cit.**, p. 33]

In a postscript, Antonov added that the press campaign had certainly helped turn Makhno anti-Soviet (i.e. anti-Bolshevik, as Makhno supported free soviets).

At the beginning of May, another partisan commander, Hryhoriyiv, revolted against the Bolsheviks in the central Ukraine. Hryhoriyiv, like the Makhnovists, had joined with the Bolsheviks when they had re-entered the Ukraine, however his social and political background was totally different. Hryhoriyiv was a former Tsarist officer, who had commanded numerous troops under the Petliurist authority and joined the Bolsheviks once that that regime's armed forces had disintegrated. Arshinov notes that he had *"never been a revolutionary"* and that there had been a *"great deal of adventurism in his joining the ranks of the Petliurists and then the ranks of the Red Army."* His temperament was mixed, consisting of *"a certain amount of sympathy for oppressed peasants, authoritarianism, the extravagance of a Cossack chieftain, nationalist sentiments and anti-Semitism."* [**Op. Cit.**, p. 110]

Hryhoriyov started his revolt by issuing a Universal, or declaration to the Ukrainian people, which contained a virulent attack on the Bolsheviks as well as one explicit anti-Semitic reference, but without mention of Makhno. The height of the revolt was his appearance in the suburbs of Katerynoslav, which he was stopped from taking. He started a pogrom in Yelyzavethrad which claimed three thousand victims.

Once the Makhnovists had been informed of this rebellion, an enlarged staff and RMS meeting was held. A telegram was sent to the soldiers at the front urging them to hold the front and another to the Bolsheviks with a similar message. A few days latter, when more information had been received, a proclamation was issued against Hyyhoriyiv attacking him for seeking to impose a new authority on the working class, for encouraging toiling people to attack each other, and for inciting pogroms. [Arshinov, **Op. Cit.**, p. 112 and pp. 114–7]

While it took a fortnight for Red forces to contain Hryhoriyiv without trouble, this involved using all available reverses of all three Ukrainian armies. This left none for Makhno's hard-pressed forces at the front. In addition, Dybenko withdrew a front-line regiment from Makhno for use against the revolt and diverted reinforcements from the Crimea which were intended for Makhno. Despite this Makhnos forces (now numbering 20,000) were ordered to resume the attack on the whites. This was due to *"unremitting pressure from Moscow to take Taganrog and Rostov."* [Malet, **Op. Cit.**, p. 36] The Makhnovist advance stopped due to the non-fulfilment of an urgent order for ammunition.

On the 19th of May, a White counter-attack not only stopped the advance of the Red Army, it forced the 9th division (and then the Makhnovists) to retreat. On the 29th, the Whites launched a further offensive against the northern Donblas, opening a gap between the 13th and 8th Red Armies. Due to the gravity of the situation, the RSV summoned a fourth congress for June 15th. Trotsky not only banned this congress but took the lead in slandering the Makhnovists and calling for their elimination (see section 13 for details). As well as *"this deliberately false agitational campaign, the [Bolshevik] blockade of the region was carried to the limit ... The provisioning of shells, cartridges and other indispensable equipment which was used by daily at the front, ceased completely."* [Arshinov, **Op. Cit.**, p. 118] Palij confirms this, noting that *"the supplies of arms and other war material to Makhno was stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops."* [**Op. Cit.**, p. 175] David Footman also notes that the Bolshevik *"hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition."* He also mentions that *"[i]n the latter part of May the **Cheka** sent over two agents to assassinate Makhno."* [**Civil War in Russia**, p. 271]

Needless to say, Trotsky blamed this White success to the Makhnovists, arguing it was retreating constantly before even the slightest attack by the Whites. However, this was not the case. Analysing these events in July 1919, Antonov (the commander of the Southern Front before Trotsky replaced him) wrote:

> *"Above all, the facts witness that the affirmations about the weakness of the most contaminated region — that from Hulyai Pole to Berdiansk — are without foundation ... It is not because we ourselves have been better organised militarily, but because those troops were directly defending their native place ... Makhno stayed at the front, in spite of the flight of the neighbouring 9th division, following by the whole of the 13th army ... The reasons for the defeat on the southern front do not rest at all in the existence of 'Ukrainian partisans' ... above all it must be attributed to the machinery of the southern front, in not keeping its fighting spirit and reinforcing its revolutionary discipline."* [quoted by Alexander Skirda, **The Rehabilitation of Makhno**, p. 348]

This, incidentally, tallies with Arshinov's account that *"hordes of Cossacks had overrun the region, **not through the insurrectionary front but from the left flank where the Red Army***

***was stationed.*"** [**Op. Cit.**, p. 126] For what it is worth, General Denikin himself concurs with this account of events, noting that by the 4th of June his forces *"repulsed the routed and demoralised contingents of the Eight and Thirteenth Soviet Armies ... The resistance of the Thirteenth Army being completely broken."* He notes that an attempt by the Fourteenth Army (which Makhno's troops were part of) to attack on the flank came to nothing. He only mentions Makhno when he recounts that *"General Shkuro's division routed Makhno at Hulyai Pole."* [**The White Armies**, p. 272] With Whites broken through on their flank and with limited ammunition and other supplies (thanks to the Bolsheviks), the Makhnovists had no choice but to retreat.

It was around this time that Trotsky, in a public meeting in Kharkov, *"announced that it were better to permit the Whites to remain in the Ukraine than to suffer Makhno. The presence of the Whites, he said, would influence the Ukrainian peasantry in favour of the Soviet Government, whereas Makhno and his **povstantsi**, would never make peace with the Bolsheviki; they would attempt to possess themselves of some territory and to practise their ideas, which would be a constant menace to the Communist Government."* [Emma Goldman, **My Disillusionment in Russia**, p. 63]

Due to this Bolshevik betrayal, the Makhnovist sector was in very grave danger. At Hulyai Pole, a peasant regiment was scraped together in 24 hours in an attempt to save the town. It encountered White Cossacks ten miles away from the town and was mown down. The Whites entered Hulyai Pole the next day (June 6th) and gave it a good going over. On the same day, the Bolsheviks issued an order for Makhno's arrest. Makhno was warned and put in his resignation, arguing that it was *"an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs."* Combined with the *"hostile attitude"* of the Bolshevik authorities towards him, which would lead *"unavoidably to the creation of a special internal front,"* Makhno believed it was his duty to do what he could to avert it, and so he left his post. [quoted by Arshinov, **Op. Cit.**, p. 129] While Makhno escaped, his staff was not so lucky. Five of them were arrested the same day and shot as a result of Trotsky's order to ban the fourth congress.

Leaving his troops in the frontline, Makhno left with a small cavalry detachment. While leaving the rest under Red command, Makhno made a secret agreement with his regimental commanders to await a message from him to leave the Red Army and join up against with the partisans. On the 9th and 10th of June, Hulyai Pole was retaken by Bolshevik forces, who took the opportunity to attack and sack the Makhnovist communes. [Arshinov, **Op. Cit.**, p. 86f]

After intense fighting, the Whites finally split the Southern Front into three on June 21st. Needless to say, Trotsky and the Bolsheviks blamed this on the partisan forces (even stating that they had *"opened the front"* to the Whites). This was nonsense, as noted above.

After leaving the front, Makhno took refuge in the Chorno-Znamenski forest before continuing the retreat north and skirmishing with Red Army units. This brought him into the territory held by Hryhoriyiv and this, in turn, meant they had to proceed carefully. While the Makhnovists had made a public denunciation of Hryhoriyiv, Makhno was approaching the centre of Hryhoriyov's remaining influence. Surrounded by enemies, Makhno had little choice but to begin discussions with Hryhoriyiv. This was problematic to say the least. Hryhoriyiv's revolt had been tinged with anti-Semitism and had seen at least one major pogrom. Being faced with Hryhoriyov's anti-Semitism and his proposal for an alliance with the Whites against the Reds led the Makhnovists to plot his downfall at a meeting planned for the 27th July.

This meeting had originally been called to discuss the current tasks of the insurgents in the Ukraine and was attended by nearly 20,000 insurgents and local peasants. Hryhoriyiv spoke first, arguing that the most urgent task was to chase out the Bolsheviks and that they should ally themselves with any anti-Red forces available (a clear reference to the Whites under Denikin). The Makhnovist Chubenko spoke next, declaring that the *"struggle against the Bolsheviks could be revolutionary only if it were carried out in the name of the social revolution. An alliance with the worst enemies of the people — with generals — could only be a counter-revolutionary and criminal adventure."* Following him, Makhno *"demanded before the entire congress"* that Hryhoriyiv *"immediately answer for the appalling pogrom of Jews he had organised in Elisavetgrad in May, 1919, as well as other anti-Semitic actions."* [Arshinov, **Op. Cit.**, p. 136]

Seeing that things were going badly, Hryhoriyiv went for his revolver, but was shot by a Makhnovist. Makhno finished him off. Makhnovist guards disarmed the leading Hryhoriyivists. Then Makhno, Chubenko and others justified the killing before the mass meeting, which approved the act passing a resolution that stated that Hryhoriyiv's death was *"an historical and necessary fact, for his policy, acts and aims were counter-revolutionary and mainly directed to helping Denikin and other counter-revolutionaries, as is proved by his Jewish pogroms."* [quoted by Malet, **Op. Cit.**, p. 42] The troops under Hryhoriyiv became part of the general Insurrectionary Army.

At the end of July, Makhno recalled the troops he had earlier left in the Red Army and by mid-August the forces met up, becoming an army of some 15,000. At Mykolaiv, the Red Army units were defecting to Makhno in large numbers due in part to the feeling that the Red Army were abandoning the defence of the Ukraine. This was the start of Denikin's massive push north and Petliura's push east. By the end of August, Makhno felt strong enough to go on the offensive against the Whites. Superior White forces pushed the Makhnovists further and further west, away from their home region. *"Denikin,"* in Voline's words, *"not only made war on the army as such, but also on the whole peasant population. In addition to the usual persecutions and beatings, the villages he occupied were burnt and wrecked. The greater part of the peasants' dwellings were looted and wrecked. Hundreds of peasants were shot. The women maltreated, and nearly all the Jewish women ... were raped."* This repression *"obliged the inhabitants of the villages threatened by the approach of the Denikinists to abandon their hearths and flee. Thus the Makhnovist army was joined and followed in their retreat by thousands of peaant families in flight from their homes with their livestock and belongings. It was a veritable migration. An enormous mass of men, women and children trailed after the army in its slow retreat towards the west, a retreat which gradually extended over hundreds of kilometres."* [**Op. Cit.**, p. 607]

Meeting the Nationalists in mid-September, it was agreed on both sides that fighting would only aid the Whites and so the Makhnovists entered a non-aggression pact with Petliura. This enabled them to offload over 1,000 wounded. The Makhnovists continued their propaganda campaign against the Nationalists, however. By the 24th of September, intelligence reports suggested that White forces had appeared to the west of their current position (i.e. where the Nationalists where). The Makhnovists concluded that the only way this could have happened was if the Nationalists had allowed the Whites to cross their territory (the Nationalists disputed this, pointing to the fighting that had started two days before between them and the Whites).

This meant that the Makhnovists were forced to fight the numerically superior Whites. After two days of desperate fighting, the Whites were routed and two regiments were destroyed at the battle of Peregonovka village. Makhno's forces then conducted an incredibly rapid advance in

three directions helped by their mobile cart-transported infantry, in three days smashing three reserve regiments and at the greatest point advancing 235 miles east. On the 6th October a drive to the south started which took key White ports and captured a huge quantity of equipment including 600 trucks of British-supplied ammunition and an aeroplane. This was disastrous for Denikin whose forces had reached the northernmost point on their advance on Moscow, for these ports were key for his supply routes. The advance continued, cutting the railway route and so stopping all shells reaching Denikin's Moscow front.

Denikin was forced to send some of his best troops from the Moscow front to drive back the Makhnovists and British boats were sent to towns on the coast where Makhno might retreat through. The key city of Katerinoslav was taken with the aid of a workers' uprising on November 9th and held for a month before the advancing Whites and a typhoid epidemic which was to devastate the Makhnovista ranks by the end of the year forced them out of the city. In December, the Red Army advance made possible by Makhno's devastation of Denikin's supply lines continued.

Thus Voline:

> *"It is necessary to emphasise here the historic fact that the honour of having annihilated the Denikinist counter-revolution in the autumn of 1919, belongs entirely to the Makhnovist Insurrectionary Army. If the insurgents had not won the decisive victory of Peregonovka, and had not continued to sap the bases in Denikin's rear, destroying his supply service for artillery, food and ammunition, the Whites would probably have entered Moscow in December 1919 at the latest."* [**Op. Cit.**, p. 625]

In December the Red Army advance made possible by Makhno's devastation of Denikin's supply lines continued. By early January the Reds had split White forces into three and their troops had reached Katerynoslav. The attitude of the Bolsheviks to the Makhnovists had already been decided. On December 12th, 1919, Trotsky stated that when the two forces met, the Bolsheviks had *"an order ... from which we must not retreat one single step."* While we discuss this secret order in more depth in section 13, we will note here that it gave partisans the option of becoming *"fully subordinate to [Bolshevik] command"* or *"be subjected to ruthless punishment."* [**How the Revolution Armed**, vol. II., pp. 110–1 and p. 442] Another secret order to the 45th division issued on January 4th instructed them to *"annihilate Makhnovist bands"* and *"disarm the population."* The 41st was sent *"into reserve"* to the Hulyai Pole region. This was *"five days before Makhno was outlawed, and shows that the Bolshevik command had a clear view of Makhno's future, even if the latter did not."* [Malet, **Op. Cit.**, p. 54]

Unaware of this, the Makhnovista put out propaganda leaflets directed at the Red Army rank and file, appealing to them as comrades. At Aleksandrovsk on December 5th talks occurred between a representative of the Makhnovists and the commander of the 45th division's 1st brigade. These broke down when Makhno was ordered to the Polish front, which the Makhnovists refused. On January 9th, Yegorov, commander of the Red Army southern front, used this pretext to outlaw Makhno. This outlawing was engineered deliberately by the Bolsheviks:

> *"The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon his region .... Uborevich [the author] explained that 'an appropriate reaction by Makhno to*

> *this order would give us the chance to have accurate grounds for our next steps' ... [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.'"* [Palij, **Op. Cit.**, p. 210]

In addition, war with Poland did not break out until the end of April, over three months later.

Needless to say, the Makhnovists **did** realise the political motivations behind the order. As Arshinov notes, *"[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this."* Moreover, the Makhnovists considered the move *"physically impossible"* as *"half the men, the entire staff and the commander himself were in hospital with typhus."* [**Op. Cit.**, p. 163]

This was the signal for nine months of bitter fighting between the Red Army and the Makhnovists. Military events in this period are confused, with the Red Army claiming victory again and again, only for the Makhnovists to appear somewhere else. Hulyai Pole changed hands on a couple of occasions. The Bolsheviks did not use local troops in this campaign, due to fear of fraternisation. In addition, they used *"new tactics,"* and *"attacked not only Makhno's partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved."* They also set up *"Committees of the Poor"* as part of the Bolshevik administrative apparatus, which acted as *"informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans."* [Palij, **Op. Cit.**, pp. 212–3]

In addition to this suffering, the Bolshevik decision to attack Makhno rather than push into the Crimea was also to prolong the civil war by nine more months. The Whites re-organised themselves under General Wrangel, who began a limited offensive in June. Indeed, the Bolshevik *"policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region."* [Palij, **Op. Cit.**, p. 214]

It was widely believed on the White side that Makhno was ready to co-operate with them and, desperate for men, Wrangel decided to appeal to the Makhnovists for an alliance. Their response was simple and direct, they decided to immediately execute his delegate and publish both his letter and a response in the Makhnovist paper *"The Road to Freedom."* [Malet, **Op. Cit.**, p. 60] Of course, this did not stop the Bolsheviks later claiming such an alliance existed!

Ironically enough, at a general assembly of insurgents, it was decided that *"the destruction of Wrangel"* would *"eliminate a threat to the revolution"* and so free *"all of Russia"* from *"the counter-revolutionary barrage."* The mass of workers and peasants *"urgently needed an end to all those wars"* and so they proposed *"to the Communists that hostilities between them and the Makhnovists be suspended in order that they might wipe out Wrangel. In July and August, 1920, telegrams to this effect were sent to Moscow and Kharkov."* There was no reply and the Bolsheviks *"continued their war against the Makhnovists, and they also continued their previous campaign of lies and calumnies against them."* [Arshinov, **Op. Cit.**, p. 176]

In July and August the Makhnovists went on the offensive, raiding the Bolsheviks in three provinces and attacking the Red Army infrastructure. Wrangel began another offensive in September, driving the Red Army back again and again and threatening the Makhnovist area. Faced with Wrangel's success, the Bolsheviks started to rethink their position on Makhno, although on the 24th of September the Bolshevik commander-in-chief Kamenev was still declaring the need for *"the final liquidation of the Makhno band."* [Malet, **Op. Cit.**, p. 62] A few days later, the Bolsheviks changed their mind and negotiations began.

So, by October 1920, the success of the Wrangel offensive was again forcing the Bolsheviks and Makhnovists to put aside their differences and take on the common enemy. A deal was reached and on October 2nd, Frunze, the new Red Army commander of the Southern Front, ordered a cessation of hostilities against the Makhnovists. A statement from the Soviet of the Revolutionary Insurgent Army of the Ukraine (Makhnovists) explained the treaty as necessitated by the White offensive but also representing a victory over the *"high-handed communists and commissars"* in forcing them to recognise the *"free insurrection."* [Malet, **Op. Cit.**, p. 64]

The agreement was signed between October 10th and 15th. It consisted of two parts, a Political and a Military agreement (see section 13 for full details). The Political agreement simply gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution. The Military agreement resulted in the Makhnovists becoming part of the Red Army, keeping their established internal structure and, significantly, stopped them from accepting into their ranks any Red Army detachments or deserters therefrom. According to Bolshevik sources, *"there was never the slightest intention on the Bolshevik side of keeping to the agreement once its military value had passed."* [David Footman, **Op. Cit.**, p. 296]

Even before the agreement came into effect, the Makhnovists were fighting alongside the Bolsheviks and between October 4 and 17, Hulyai Pole was retaken by the Aleksandrovsk group, which included 10,000 Makhnovista. On October 22, Aleksandrovsk was taken with 4,000 white prisoners and from then to early November the Makhnovists cut through Wrangel's rear, hoping to cut off his retreat by seizing the Crimean passes. The Whites fought a skilful rearguard which together with the new White fortifications on the peninsula held up the advance. But by the 11th, his hold in the Crimea gone, Wrangel had no choice but to order a general retreat to the ports and an evacuation. Even the Bolsheviks had to acknowledge that the *"Makhnovist units fulfilled their military tasks with no less heroism than the Red Army units."* [quoted by Malet, **Op. Cit.**, p. 69]

On hearing this success on 16th November, the reaction of the Makhnovista still at Hulyai Pole was cynical but realistic: *"It's the end of the agreement. I'll bet you anything that the Bolsheviks will be on us within the week."* [quoted by Malet, **Op. Cit.**, p. 70] They were not wrong. Already Frunze, the Red Army commander, had ordered two entire cavalry armies to concentrate near Hulyai Pole at the same time as he ordered the Makhnovist forces to the Caucasus Front! By 24th November Frunze was preparing for the treachery to come, in Order 00149 (which was not sent to the Makhnovist units) saying if they had not departed to the Caucasus front by the 26th *"the Red regiments of the front, who have now finished with Wrangel, will start speaking a different language to these Makhnovist youths."* [quoted by Malet, **Op. Cit.**, p. 71]

Of course this treachery went right to the top, just before the 26th *"deadline"* (which Makhno, not having seen the orders, was unaware of), Lenin urged Rakovski, head of the Ukrainian government to *"[k]eep a close watch on all anarchists and prepare documents of a criminal nature as soon as possible, on the basis of which charges can be preferred against them."* [quoted by Malet,

Op. Cit., p. 71] Indeed, it later appeared the treachery had been prepared from at least 14th or 16th November, as prisoners captured later stated they had received undated anti-Makhnovist proclamations on that date. [Malet, **Ibid.**]

At 3am on the 26th the attacks on the Makhnovists started. Alongside this one of the Makhnovist commanders was lured to a meeting by the Bolsheviks, seized and shot. Some Makhnovist forces managed to break through the encircling Bolsheviks but only after taking heavy losses — of the 2,000–4,000 cavalry at Simferopol, only 250 escaped. By the 1st December, Rakovsi reported the imminent demise of the Makhnovists to the Kharkiv soviet only to have to eat his words when Makhno routed the 42nd division on the 6th, retaking Hulyai Pole and 6,000 prisoners, of whom 2,000 joined his forces. [Malet, **Op. Cit.**, p. 72] Simultaneously with the attack on the Makhnovists, the Bolsheviks rounded up all known anarchists in the Ukraine (many of whom were in Kharkiv waiting for a legally organised **Nabat** conference to begin).

In the resulting struggle between the two forces, as Palij notes, the *"support of the population was a significant advantage to Makhno, for they supplied the partisans with needed material, including horses and food, while the Red troops operated among a foreign and hostile people."* The Bolsheviks found that the peasants not only refused to supply them with goods, they also refused to answer their questions or, at best, gave answers which were vague and confusing. *"In contrast to the Bolsheviks, Makhno partisans received detailed, accurate information from the population at all times."* [Palij, **Op. Cit.**, pp. 236–7]

Frunze brought in extra forces and ordered both the *"annihilation of the Makhnovists"* and total disarming of the region. Plagued by desertions, it was also ordered that all Makhnovist prisoners were to be shot, to discourage the local population and Red Army soldiers thinking of joining them. There is also evidence of unrest in the Azov fleet, with acts of sabotage being carried out by sailors to prevent their weapons being used against the Makhnovists. [Malet, **Op. Cit.**, p. 73] While it was common practice for the Bolsheviks to shoot all Makhnovist prisoners, the *"existence of roundup detachments at the end of 1920, whose task was to re-collect prisoners freed by the Makhnovists"* shows that the Makhnovists did not reciprocate in kind. [Malet **Op. Cit.**, p. 129]

At the end of 1920, the Makhnovists had ten to fifteen thousand troops and the *"growing strength of the Makhno army and its successes caused serious concern in the Bolshevik regime, so it was decided to increase the number of troops opposing Makhno."* [Palij, **Op. Cit.**, p. 237] All the pressure exerted by the Bolsheviks was paying off. Although Makhno repeatedly broke through numerous mass encirclements and picked up deserters from the Red Army, his forces were being eroded by the far greater numbers employed against them. In addition, *"the Red command worked out new plans to fight Makhno by stationing whole regiments, primarily cavalry, in the occupied villages, to terrorise the peasants and prevent them from supporting Makhno... Also the Cheka punitive units were constantly trailing the partisans, executing Makhno's sympathisers and the partisans' families."* [Palij, **Op. Cit.**, p. 238] In spite of the difficult conditions, Makhno was still able to attract some Red Army soldiers and even whole units to his side. For example, *"when the partisans were fighting Budenny's Fourth Cavalry Division, their First Brigade, commanded by Maslak, joined Makhno."* [Palij, **Op. Cit.**, p. 239]

Makhno was forced to leave his home areas of operations and flee east, then west again. By early January his forces had fought 24 battles in 24 days. This pattern continued throughout March and April into May. In June, the Bolsheviks changed their strategy to one of predicting where Makhno was heading and garrisoning troops in that area. In one battle on 15 June, Frunze

himself was almost captured. Despite this, the insurgents were very weak and their peasant base was exhausted by years of war and civil war. In the most sympathetic areas, Red Army troops were garrisoned on the peasants. Thus Palij:

> *"[T]hrough combat losses, hardship, and sickness, the number of Makhno partisans was diminishing and they were cut off from their main sources of recruits and supplies. The Ukrainian peasants were tried of the endless terror caused by successive occupation of village after village by the Red troops and the Cheka. The continuous fighting and requisitions were leaving the peasants with little food and horses for the partisans. They could not live in a state of permanent revolution. Moreover, there was extreme drought and consequently a bad harvest in Ukraine, especially in the region of the Makhno movement."* [**Op. Cit.**, pp. 240–1]

The state terrorism and the summer drought caused Makhno to give up the struggle in mid-August and instead fight his way to the Dniester with the last of his forces and cross into Romania on August 26. Some of his forces which stayed behind were still active for a short time. In November 1921 the Cheka seized 20 machine guns and 2,833 rifles in the new Zaporizhya province alone.

For more details of the history of the movement, Michael Malet's **Nestor Makhno in the Russian Revolution** is an excellent summary. Michael Palij's **The Anarchism of Nestor Makhno** is also worth consulting, as are the anarchist histories of Voline and Arshinov.

5 How were the Makhnovists organised?

Being influenced by anarchist ideas, the Makhnovists were organised along libertarian lines. This meant that in both civilian and military areas, self-management was practised. This section discusses the military organisation, while the next discusses the social aspect of the movement.

By practising self-management, the Makhnovists offered a completely different model of military organisation to that of both the Red Army and traditional military forces. While the army structure changed depending on its circumstances, the core ideas remained. These were as follows:

> *"The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline.*
>
> *"**Voluntary enlistment** meant that the army was composed only of revolutionary fighters who entered it of their own free will.*
>
> *"**The electoral principle** meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.*
>
> *"**Self-discipline** meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander."* [**Op. Cit.**, p. 96]

Voline paints a similar picture. He also notes that the electoral principle was sometimes violated and commanders appointed *"in urgent situations by the commander himself,"* although such people had to be *"accepted without reservation"* by *"the insurgents of the unit in question or by the whole army."* [**Op. Cit.**, p. 584]

Thus the Makhnovist army, bar some deviation provoked by circumstances, was a fundamentally democratic organisation. The guerrillas elected the officers of their detachments, and, at mass assemblies and congresses, decided policy and discipline for the army. In the words of historian Michael Palij:

> *"As the Makhno army gradually grew, it assumed a more regular army organisation. Each tactical unit was composed of three subordinate units: a division consisted of three brigades; a brigade, of three regiments; a regiment, of three battalions. Theoretically commanders were elected; in practice, however, the top commanders were usually carefully selected by Makhno from among his close friends. As a rule, they were all equal and if several units fought together the top commanders commanded jointly. The army was nominally headed by a Revolutionary Military Council of about ten to twenty members ... Like the commanders, the council members were elected, but some were appointed by Makhno .... There also was an elected cultural section in the army. Its aim was to conduct political and ideological propaganda among the partisans and peasants."* [Palij, **Op. Cit.**, pp. 108–9]

The Revolutionary Military Council was elected and directly accountable to the regional workers, peasants and insurgent congresses. It was designed to co-ordinate the local soviets and execute the decisions of the regional congresses.

Hence Voline:

> *"This council embraced the whole free region. It was supposed to carry out all the economic, political, social and military decisions made at the congress. It was thus, in a certain sense, the supreme executive of the whole movement.* ***But it was not at all an authoritarian organ.*** *Only strictly executive functions were assigned to it. It confined itself to carrying out the instructions and decisions of the congress. At any moment, it could be dissolved by the congress and cease to exist."* [**Op. Cit.**, p. 577]

As such, when Palij notes that this council *"had no decisive voice in the army's actions,"* he misses the point of the council. [Palij, **Ibid.**] It did not determine the military affairs of the army, but rather the interaction of the military and civilians and made sure that the decisions of congresses were executed. Thus the whole army was nominally under the control of the regional congresses of workers, peasants and insurgents. At these congresses, delegates of the toiling people decided upon the policy to be pursued by the Makhnovist Army. The Revolutionary Military Soviet existed to oversee that decisions were implemented, not to determine the military activities of the troops.

It should also be noted that women not only supported the Makhnovists, they also *"fought alongside the men."* [Arshinov, **Op. Cit.**, p. 145] However, *"the participation of women in the movement (by all accounts, quite substantial)"* needs *"further investigation."* [Serge Cipko, *"Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,"* pp. 57–75, **The Raven**, no. 13, p. 75]

At its height, the army was made up of infantry, cavalry, artillery, machine-gun units, and special branches, including an intelligence service. As the success of partisan warfare depends upon mobility, the army gradually mounted its infantry in light carts (called *"tachanka"*) during 1918–19. As Michael Malet notes, this was a *"novel tactic"* and Makhno *"could be described as the inventor of the motorised division before the car came into general use."* [**Op. Cit.**, p. 85] The tachanka was used to transport as many troops as possible, giving the Makhnovists mobile infantry which could keep up with the cavalry. In addition, a machine-gun was sometimes mounted in the rear (in autumn 1919, the 1st machine-gun regiment consisted of 120 guns, all mounted on tachanki).

For the most part the Makhnovist army was a volunteer army, unlike all others operating in the Russian Civil War. However, at times of crisis attempts were made to mobilise troops. For example, the Second regional congress agreed that a *"general voluntary and equalitarian mobilisation"* should take place. This meant that this appeal, *"sanctioned by the moral authority of the congress, emphasised the need for fresh troops in the insurrectionary army, no-one was compelled to enlist."* [Voline, **Op. Cit.**, p. 577] The Congress itself passed a resolution after a long and passionate debate that stated it *"rejected 'compulsory' mobilisation, opting for an 'obligatory' one; that is, each peasant who is able to carry arms, should recognise his obligation to enlist in the ranks of the partisans and to defend the interests of the entire toiling people of Ukraine."* [quoted by Palij, **Op. Cit.**, p. 155] There were far more volunteers than arms, the opposite of what occurred to both the Reds and Whites during the Civil War. [Malet, **Op. Cit.**, p. 106]

The third Congress decided to conduct a voluntary mobilisation all those born between 1889 and 1898. This congress told them to assemble at certain points, organise themselves and elect their officers. Another mobilisation decided at the Aleksandrovsk congress never took place. How far the Makhnovists were forced to conscript troops is still a matter of debate. Paul Avrich, for example, states that *"voluntary mobilisation"* in reality *"meant outright conscription, as all able-bodied men were required to serve."* [**Op. Cit.**, p. 114] On the other side, surviving leaflets from 1920 *"are in the nature of appeals to join up, not instructions."* [Malet,**Op. Cit.**, p. 105] Trotsky, ironically, noted that *"Makhno does not have general mobilisations, and indeed these would be impossible, as he lacks the necessary apparatus."* [quoted by Malet, **Op. Cit.**, p. 106] It is probably right to say that the Congresses desired that every able-bodied man join the Makhnovist army, but they simply did not have the means to enforce that desire and that the Makhnovists tried their best to avoid conscription by appealing to the peasants' revolutionary conscience, with some success.

As well as the military organisation, there was also an explicitly anarchist federation operating in the Ukraine at the same time. The first conference to organise a *"Confederation of Anarchist Organisations of the Ukraine"* was held between November 12th to 16th, 1918. The new federation was named *"Nabat"* (Alarm) and had a six-person Secretariat. Kharkiv was chosen as its headquarters, while it had groups in other major Ukrainian cities (including Kyiv, Odessa and Katerynoslav). The final organisation of the Nabat was accomplished at a conference held in April 2–7, 1919. The federation aimed to form a *"united anarchism"* and guaranteed a substantial degree of autonomy for every participating group and individual. A number of newspapers appeared in a Ukrainian towns and cities (mostly entitled **Nabat**), as did leaflets and pamphlets. There was a main weekly paper (called **Nabat**) which was concerned largely with anarchist theory. This completed the Makhnovist papers **Road to Freedom** (which was often daily, sometimes weekly and dealt with libertarian ideas, everyday problems and information on partisan

activities) and **The Makhnovist Voice** (which dealt primarily with the interests, problems, and tasks of the Makhnovist movement and its army). The Nabat organisation was also published a pamphlet dealing with the Makhnovist movement's problems, the economic organisation of the region, the free soviets, the social basis of the society that was to be built, and the problem of defence.

Unsurprisingly, the Nabat federation and the Makhnovists worked together closely, with Nabat members worked in the army (particularly its cultural section). Some of its members were also elected to the Makhnovist Revolutionary Military Soviet. It should be noted that the Nabat federation gained a number of experienced anarchists from Soviet Russia, who fled to the Ukraine to escape Bolshevik repression. The Nabat shared the fortunes of the Makhno movement. It carried on its work freely as long as the region was controlled by the Makhnovist Army, but when Bolshevik or White forces prevailed, the anarchists were forced underground. The movement was finally crushed in November 1920, when the Bolsheviks betrayed the Makhnovists.

As can be seen, the Makhnovists implemented to a large degree the anarchist idea of self-managed, horizontally federated associations (when possible, of course). Both the two major organisational layers to the Makhnovist structure (the army and the congresses) were federated horizontally and the "top" structure was essentially a mass peasant, worker and guerrilla decision-making coalition. In other words, the masses took decisions at the "top" level that the Revolutionary Military Soviet and the Makhnovist army were bound to follow. The army was answerable to the local Soviets and to the congresses of soviets and, as we discuss in section 7, the Makhnovists called working-people and insurgent congresses whenever they could.

The Makhnovist movement was, fundamentally, a working class movement. It was *"one of the very few revolutionary movements to be led and controlled throughout by members of 'the toiling masses.'"* [David Footman, **Op. Cit.**, p. 245] It applied its principles of working class autonomy and self-organisation as far as it could. Unlike the Red Army, it was predominantly organised from the bottom up, rejecting the use of Tsarist officers, appointed commanders, and other "top-down" ways of the Red Army (see section 14 for further discussion of the differences between the two forces).

The Makhnovist army was not by any means a perfect model of anarchist military organisation. However, compared to the Red Army, its violations of principle are small and hardly detract from their accomplishment of applying anarchist ideas in often extremely difficult circumstances.

6 Did the Makhnovists have a constructive social programme?

Yes, they did. The Makhnovists spent a great deal of energy and effort in developing, propagating and explaining their ideas on how a free society should be created and run. As Michael Malet noted, the *"leading Makhnovists had definite ideas about the ideal form of social organisation."* [**Nestor Makhno in the Russian Civil War**, p. 107] Moreover, as we discuss in the next section, they also successfully applied these ideas when and where they could.

So what was their social programme? Being anarchists, it comprised two parts, namely political and economic aspects. The Makhnovists aimed for a true social revolution in which the working classes (both urban and rural) could actively manage their own affairs and society. As such, their social programme reflected the fact that oppression has its roots in both political and economic power and so aimed at eliminating both the state and private property. As the core of

their social ideas was the simple principle of working-class autonomy, the idea that the liberation of working-class people must be the task of the working-class people themselves. This vision is at the heart of anarchism and was expressed most elegantly by Makhno:

> *"Conquer or die — such is the dilemma that faces the Ukrainian peasants and workers at this historic moment ... But we will not conquer in order to repeat the errors of the past years, the error of putting our fate into the hands of new masters; we will conquer in order to take our destinies into our own hands, to conduct our lives according to our own will and our own conception of the truth."* [quoted by Peter Arshinov, **The History of the Makhnovist Movement**, p. 58]

As such, the Makhnovists were extremely hostile to the idea of state power, recognising it simply as a means by which the majority are ruled by the few. Equally, they were opposed to wage slavery (to private or state bosses), recognising that as long as the workers do not manage their own work, they can never be free. As they put it, their goals could only be achieved by an *"implacable revolution and consistent struggle against all lies, arbitrariness and coercion, wherever they come from, a struggle to the death, a struggle for free speech, for the righteous cause, a struggle with weapons in hand. Only through the abolition of all rulers, through the destruction of the whole foundation of their lies, in state affairs as well as in political and economic affairs. And only through the social revolution can the genuine Worker-Peasant soviet system be realised and can we arrive at SOCIALISM."* [contained in Arshinov, **Op. Cit.**, p. 273] They, like other anarchists and the Kronstadt rebels, termed this programme of working class self-management the ***"third revolution."***

We will discuss the political aspect of the Makhnovist programme first, then its economic one. However, the Maknovists considered (correctly) that both aspects could not be separated. As they put it: *"We will not lay down our arms until we have wiped out once and for all every political and economic oppression and until genuine equality and brotherhood is established in the land."* [contained in Arshinov, **Op. Cit.**, p. 281] We split the aspects simply to aid the presentation of their ideas.

At the core of their ideas was what they termed the ***"Free Soviet System"*** (or ***"free soviets"*** for short). It was this system which would allow the working class to create and run a new society. As they put it:

> *"[The] Makhnovists realise that the working people are no longer a flock of sheep to be ordered about by anyone. We consider the working people capable of building, on their own and without parties, commissars or generals, their own FREE SOVIET SYSTEM, in which those who are elected to the Soviet will not, as now [under the Bolsheviks], command and order us, but on the contrary, will be only the executors of the decisions made in our own workers' gatherings and conferences."* [contained in Peter Arshinov, **Op. Cit.**, pp. 280–1]

Thus the key idea advocated by the leading Makhnovista for social organisation and decision-making was the *"free toilers' soviet of peasant and worker organisations."* This meant they were to be independent of all central authority and composed of those who worked, and not political parties. They were to federate on a local, then regional and then national level, and power within

the federation was to be horizontal and not vertical. [Michael Malet, **Op. Cit.**, p. 107] Such a system was in opposition to the Bolshevik practice of Soviets defined and dominated by political parties with a vertical decision- making structure that reached its highest point in the Bolshevik Central Committee.

Thus, for the Makhnovists, the soviet system would be a "bottom-up" system, one designed not to empower a few party leaders at the centre but rather a means by which working people could manage their own affairs. As the put it, the *"soviet system is not the power of the social-democratic Communist-Bolsheviks who now call themselves a soviet power; rather it is the supreme form of non-authoritarian anti-state socialism, which expresses itself in the organisation of a free, happy and independent system of social life for the working people."* This would be based on the *"principles of solidarity, friendship and equality."* This meant that in the Makhnovist system of free soviets, the *"working people themselves must freely choose their own soviets, which will carry out the will and desires of the working people themselvs, that is to say, ADMINISTRATIVE, not ruling soviets."* [contained in Arshinov, **Op. Cit.**, pp. 272–3]

As David Footman summarises, Makhno's *"ultimate aims were simple. All instruments of government were to be destroyed. All political parties were to be opposed, as all of them were working for some or other form of new government in which the party members would assume the role of a ruling class. All social and economic affairs were to be settled in friendly discussion between freely elected representatives of the toiling masses."* [**Op. Cit.**, p. 247]

Hence the Makhnovist social organisation was a federation of self-managed workers' and peasants' councils (soviets), which would *"be only the executors of the decisions made in our workers' gatherings and conferences."* [contained in Arshinov, **Op. Cit.**, p. 281] In other words, an anarchist system based on mass assemblies and decision-making from the bottom up.

Economically, as is to be expected, the Makhnovists opposed private property, capitalism and wage-slavery. Their economic ideas were summarised in a Makhnovist declaration as follows:

> *"The lands of the service gentry, of the monasteries, of the princes and other enemies of the toiling masses, with all their livestock and goods, are passed on to the use of those peasants who support themselves solely through their own labour. This transfer will be carried out in an orderly fashion determined in common at peasant assemblies, which must remember in this matter not only each of their own personal interests, but also bear in mind the common interest of all the oppressed, working peasantry.*
>
> *"Factories, workshops, mines and other tools and means of production become the property of the working class as a whole, which will run all enterprises themselves, through their trade unions, getting production under way and striving to tie together all industry in the country in a single, unitary organisation."* [contained in Arshinov, **Op. Cit.**, p. 266]

They continually stressed that the *"land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised."* This meant a system of use-rights, as *"the land, the mines, the factories, the workshops, the railroads, and so on, will belong neither to individuals nor to the government, but solely to those who work with them."* [**Op. Cit.**, p. 273 and p. 281]

In industry, such a system clearly implied a system of worker's self-management within a system of federated factory committees or union branches. On the land, it meant the end of

landlordism, with peasants being entitled to as much land and equipment as they could cultivate without the use of hired labour. As a Makhnovist congress in 1919 resolved:

> *"The land question should be decided on a Ukraine-wide scale at an all-Ukrainian congress of peasants on the following basis: in the interests of socialism and the struggle against the bourgeoisie, all land should be transferred to the hands of the toiling peasants. According to the principle that 'the land belongs to nobody' and can be used only by those who care about it, who cultivate it, the land should be transferred to the toiling peasantry of Ukraine for their use without pay according to the norm of equal distribution."* [quoted by Palij, **Op. Cit.**, p. 155]

In addition to advocating the abolition of private property in land and the end of wage labour by distributing land to those who worked it, the Makhnovists also supported the forming of *"free"* or *"working"* communes. Like their policy of land distribution, it also aimed to benefit the poorer peasants and rural wage labourers. The *"free commune"* was a voluntary association of rural workers who took over an expropriated estate and managed the land in common. The commune was managed by a general meeting of all its members and based on the liberty, equality and solidarity of its members.

Clearly, in terms of their economic policies, the Makhnovists proposed a clear and viable alternative to both rural and urban capitalism, namely workers' self-management. Industry and land would be socialised, with the actual management of production resting in the hands of the workers themselves and co-ordinated by federated workers' organisations. On the land, they proposed the creation of voluntary communes which would enable the benefits of co-operative labour to be applied. Like their political ideas, their economic ideas were designed to ensure the freedom of working people and the end of hierarchy in all aspects of society.

In summary, the Makhnovist had a constructive social ideas which aimed to ensure the total economic and political emancipation of the working people. Their vision of a free society was based on a federation of free, self-managed soviets, the socialisation of the means of life and workers' self-management of production by a federation of labour unions or factory committees. As the black flags they carried into battle read, *"liberty or death"* and *"the land to the peasants, the factories to the workers."*

7 Did they apply their ideas in practice?

Yes, the Makhnovists consistently applied their political and social ideas when they had the opportunity to do so. Unlike the Bolsheviks, who quickly turned away from their stated aims of soviet democracy and workers' control in favour of dictatorship by the Bolshevik party, the Makhnovists did all in their power to encourage, create and defend working-class freedom and self-management (see section 14 for further discussion). In the words of historian Christopher Reed:

> *"there can be no question that the anarchists did everything they could to free the peasants and workers and give them the opportunity to develop their own forms of collective control over land and factories . .. [T]he Ukrainian anarchists fought under the slogan of land to the peasants, factories to the workers and power to the soviets. Wherever they had influence they supported the setting up of communes and soviets. They introduced*

> *safeguards intended to protect direct self-government from organised interference ... They conducted relentless class war against landlords, officers, factory owners and the commercial classes could expect short shrift from Makhno and his men, especially if they had taken up arms against the people or, like the Whites ..., had been responsible for looting, pogroms and vicious reprisals against unarmed peasants on a colossal scale."* [**From Tsar to Soviets**, p. 263]

As we discussed in the last section, the core ideas which inspired the Makhnovists were working-class self-determination and self-management. They aimed at the creation of a *"free soviet system"* and the end of capitalism by rural and industrial self-management. It is to the credit of the Makhnovists that they applied these ideas in practice rather than talking about high principles and doing the exact opposite.

In practice, of course, the war left little room for much construction work. As Voline pointed out, one of the key disadvantages of the movement was the *"almost continual necessity of fighting and defending itself against all kinds of enemies, without being able to concentrate on peaceful and truly positive works."* [**The Unknown Revolution**, p. 571] However, in the disruption of the Civil War the Makhnovists applied their ideas when and where they could.

Within the army, as we discussed in section 5, the insurgent troops elected their own commanders and had regular mass assemblies to discuss policy and the agreed norms of conduct within it. In civilian matters, the Makhnovists **from the start** encouraged working-class self-organisation and self-government. By late 1917, in the area around Hulyai Pole *"the toiling masses proceeded ... to consolidate their revolution. The little factories functioned ... under the control of the workers. The estates were split up ... among the peasants ... a certain number of agricultural communes were formed."* [David Footman, **Op. Cit.**, p. 248]

The aim of the Makhnovists was to *"transfer all the lands owned by the gentry, monasteries, and the state into the hands of peasants or to organise, if they wished, peasant communes."* [Palij, **Op. Cit.**, p. 70] This policy was introduced from the start, and by the autumn of 1917, all land, equipment and livestock around Hulyai Pole had been expropriated from the gentry and kulaks and placed in the hands of working peasants. Land reform had been achieved by the direct action of the peasantry.

However, *"many of the peasants understood that the task was not finished, that it was not enough to appropriate a plot of land and be content with it. From the hardships of their lives they learned that enemies were watching from all sides, and that they must stick together. In several places there were attempts to organise social life communally."* [Arshinov, **Op. Cit.**, p. 86]

In line with social anarchist theory, the Makhnovists also tried to introduce collective forms of farming. These experiments in collective working and living were called *"free communes."* Despite the difficult military situation communes were established, principally near Hulyai Pole, in the autumn of 1917. This activity was resumed in February to March of 1918. They re-appeared in early 1919, once the threat of counter-revolution had been (temporarily) defeated.

There were four of these communes within five miles of Hulyai Pole itself and many more further afield. According to Makhno, these agricultural communes *"were in most cases organised by peasants, though sometimes their composition was a mixture of peasants and workmen [sic!]. Their organisation was based on equality and solidarity of the members. All members of these communes — both men and women — applied themselves willingly to their tasks, whether in the field or the household."* Unlike many communes, people were given the personal space they desired,

so *"any members of the commune who wanted to cook separately for themselves and their children, or to take food from the communal kitchens and eat it in their own quarters, met with no objection from the other members."* The management of each commune *"was conducted by a general meeting of all its members."* In addition, the communes decided to introducing anarchist schooling based on the ideas of Franciso Ferrer (see section J.5.13 for details). Makhno himself worked on one for two days a week for a period. [Makhno, quoted by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 131]

They were set up on the former estates of landlords, and consisted of around 10 families or 100 to 300 people and although each had peasant anarchist members not all the members were anarchists. Makhno worked on Commune No. 1, which was on the estate of former landlord Klassen. When re-founded in 1919 this commune was named after Rosa Luxemburg, the Marxist revolutionary who had recently been murdered in the German revolution. It was a success, for by the spring sowing it had grown from nine families to 285 members working 340 acres of land. The communes represented a way that poor and middle peasants could pool resources to work estates that they could not have worked otherwise and, as Michael Malet points out, *"they were organised from the bottom up, not the top down."* [**Op. Cit.**, p. 121]

However, as Makhno himself acknowledged, while the *"majority of the toiling population saw in the organisation of rural communes the healthy germ of a new social life"* which could provide a *"model of a free and communal form of life,"* the *"mass of people did not go over to it."* They cited as their reasons *"the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new 'revolutionary' [Bolshevik] and counter-revolutionary authorities. For this reason the toiling population of the district limited their revolutionary activity to supporting in every way those bold springs."* [Makhno, quoted by Avrich, **Op. Cit.**, p. 132] Given that the communes were finally destroyed by White and Red forces in June 1919, their caution was justified. After this, peace did not return long enough for the experiment to be restarted.

As Michael Malet argues:

> *"Very few peasant movements in history have been able to show in practice the sort of society and type of landholding they would like to see. The Makhnovist movement is proof that peasant revolutionaries can put forward positive, practical ideas."* [**Op. Cit.**, p. 121]

The Makhnovist experiments, it should be noted, have strong similarities to the rural revolution during the Spanish Revolution of 1936 (see sections I.8.5 and I.8.6 for more details).

As well as implementing their economic ideas on workers' self-management, land reform and free communes, the Makhnovists also organised regional congresses as well as local soviets. Most of the activity happened in and around Hulyai Pole, the focal point of the movement.This was in accord with their vision of a *"free soviet system."* Needless to say, the congresses could only be called during periods of relative calm (i.e. the Makhnovist home area was not occupied by hostile forces) and so congresses of insurgents, peasants and workers were called in early 1919 and another in October of that year. The actual dates of the regional congresses were:

> 23 January 1919 at Velyka Mykhailivka
>
> 12 February 1919 at Hulyai Pole

10 April 1919 at Hulyai Pole

20 October 1919 at Aleksandrovsk

A congress for the fifteenth of June 1919 never met because Trotsky unilaterally banned it, under pain of death to anyone even **discussing** it, never mind calling for it or attending as a delegate. Unlike the third congress, which ignored a similar ban by Dybenko, the fourth congress could not go ahead due to the treacherous attack by the Red Army that preceded it. Four Makhnovist commanders were executed by the Red Army for advertising this congress. Another congress planned for Aleksandrovsk in November 1920 was also prevented by Bolshevik betrayal, namely the attack after Wrangel had been defeated. [Malet, **Op. Cit.**, p. 108] See section 13 for further details.

The reason for these regional congresses was simple, to co-ordinate the revolution. *"It was indispensable,"* Arshinov notes, *"to establish institutions which unified first a district composed of various villages, and then the districts and departments which composed the liberated region. It was indispensable to find general solutions for problems common to the entire region. It was indispensable to create organs suitable for these tasks. And the peasants did not fail to create them. These organs were the regional congresses of peasants and workers."* [**Op. Cit.**, pp. 87–8] These congresses *"were composed of delegates of peasants, workers and of the insurgent army, and were intended to clarify and record the decisions of the toiling masses and to be regarded as the supreme authority for the liberated area."* [David Footman, **Op. Cit.**, p. 266]

The first congress, which was the smallest, discussed the strengthening of the front, the adoption of a common nomenclature for popular organisations (soviets and the like) and to send a delegation to convince the draftees in the Nationalist forces to return home. It was also decided to organise a second congress. The second congress was larger, having 245 delegates from 350 districts. This congress *"was strongly anti-Bolshevik and favoured a democratic socio-political way of life."* [Palij, **Op. Cit.**, p. 153] One delegate made the issue clear:

> *"No party has a right to usurp governmental power into its own hands . .. We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers' wish."* [quoted by Palij, **Op. Cit.**, p. 154]

A general resolution was passed, which acknowledged the fact that the Bolshevik party was *"demanding a monopoly of the Revolution."* It also stated:

> *"With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers' deputies of their freedom and autonomy."* [quoted by Footman, **Op. Cit.**, p. 267]

As noted in section 5, the congress also decided to issue an *"obligatory"* mobilisation to gather troops for the Army. It also accepted a resolution on land reform, stating that the land *"belongs to nobody"* and could be used by anyone as long as they did not use wage labour (see section 6

for the full resolution). The congress accepted a resolution against plunder, violence, and anti-Jewish pogroms, recognising it as an attempt by the Tsarist government to *"turn the attention of all toiling people away from the real reason for their poverty,"* namely the Tsarist regime's oppression. [quoted by Palij, **Op. Cit.**, p. 155]

The second congress also elected the Revolutionary Military Soviet of Peasants, Workers and Insurgents, which had *"no powers to initiate policy but designed merely to implement the decisions of the periodic congresses."* [Footman, **Op. Cit.**, p. 267]

The third congress was the largest and most representative, with delegates from 72 volosts (in which two million people lived). This congress aimed to *"clarify the situation and to consider the prospects for the future of the region."* It decided to conduct a voluntary mobilisation of men to fight the Whites and *"rejected, with the approval of both rich and poor peasants, the Bolshevik expropriations."* [Palij, **Op. Cit.**, p. 158] Toward the end of the congress, it received a telegram from the Bolshevik commander Dybenko calling it *"counter-revolutionary,"* its organisers *"outlaws"* and dissolving it by his order. The congress immediately voted an indignant resolution in rely. This corrected Dybenko's factual mistakes on who called it, informed him why it was called, gave him a history lesson on the Makhnovist region and asked him:

> *"Can there exist laws made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves? ...*
>
> *"Is it permissible, is it admissible, that they should come to the country to establish laws of violence, to subjugate a people who have just overthrown all lawmakers and all laws?*
>
> *"Does there exist a law according to which a revolutionary has the right to apply the most severe penalties to a revolutionary mass, of which he calls himself the defender, simply because this mass has taken the good things which the revolution promised them, freedom and equality, without his permission?*
>
> *"Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the freedom which they have just conquered?*
>
> *"Do the laws of the revolution order the shooting of a delegate because he believes he ought to carry out the mandate given him by the revolutionary mass which elected him?*
>
> *"Whose interests should the revolutionary defend; those of the Party or those of the people who set the revolution in motion with their blood?"* [quoted by Arshinov, **Op. Cit.**, p. 103]

As we discuss in section 13, Trotsky's order to ban the fourth congress indicates that such laws do exist, with the *"entire peasant and labouring population are declared guilty of high treason if they dare participate in their own free congress."* [Arshinov, **Op. Cit.**, p. 123]

The last congress was held between 20th and 26th of October in Aleksandrovsk. One delegate was to be elected per 3000 people and one delegate per military unit. This gave 270 mostly peasant delegates. Only 18 were workers, of which 6 were Mensheviks, who walked out after Makhno called them *"lapdogs of the bourgeoisie"* during the discussion on *"free socio-economic organisations"*! [Malet, **Op. Cit.**, p. 109] The congress passed a number of resolutions, concentrating

on the care of the wounded and the poorest part of the population, a voluntary mobilisation, voluntary peasant contributions to feed the army and forced levies on the bourgeoisie.

According to Voline, the chairman, Makhnovist ideas were freely discussed:

> *"The idea of free Soviets, genuinely functioning in the interests of the working population; the question of direct relationships between peasants and city workers, based on mutual exchange of the products of their labour; the launching of a libertarian and egalitarian social organisation in the cities and the country; all these question were seriously and closely studied by the delegates themselves, with the assistance and co-operation of qualified comrades."* [**Op. Cit.**, p. 640]

He notes that the congress *"decided that the workers, without any authority, would organise their economic, political and administrative life for themselves, by means of their own abilities, and through their own direct organs, united on a federative basis."* [**Op. Cit.**, p. 641]

It is significant to note that the congress also discussed the activities of the Makhnovists within the city itself. One delegate raised the issue of the activities of the Kontrrazvedka, the Makhnovist *"counter-intelligence"* section. As noted in section 5, the Makhnovists, like all the armies in the Russian Civil War, had its intelligence service. It combined a number of functions, such as military reconnaissance, arrest and holding of prisoners, counter-insurgency (*"Originally it had a punitive function, but because of improper treatment of prisoners of war, it was deprived of its punitive function."* [Palij, **Op. Cit.**, p. 300]). The delegate stated that this *"counter-espionage service"* was engaged in *"arbitrary acts and uncontrolled actions — of which some are very serious, rather like the Bolshevik Cheka."* [quoted by Voline, **Op. Cit.**, p. 643] Immediately a commission of several delegates was created to investigate the situation. Voline argues that *"[s]uch an initiative on the part of workers' delegates would not have been possible under the Bolshevik regime. It was by activity of this kind that the congress gave a preview of the way in which a society should function from the beginning if it is based on a desire for progress and self-realisation."* [Voline, **Ibid.**] Sadly, the commission could not complete its work due to the city being evacuated soon after the congress.

Another incident shows that under the Makhnovists the civilian population was in control. A delegate noted that Klein, the Makhnovist military commander in the city, had become publicly and riotously drunk after issuing proclamations against drunkenness. Klein was called before the congress, which accepted his apology and his request to be sent to the front, away from the boredom of desk work which had driven him to drink! This, according to Voline, showed that the workers and their congress were the masters and the army its servant. [Voline, **Op. Cit.**, pp. 645–7]

Outside of the congresses the work of local Soviets was to be co-ordinated through the Revolutionary Military Soviet (RMS), the first RMS was set up by the 2nd congress and consisted of one delegate for each of the 32 volsts the Makhnovista had liberated. The RMS was to be answerable to the congresses and limited to implementing their decisions but the difficult military situation meant this seldom happened. When it did (the 3rd Congress) the Congress had no problems with its actions in the previous period. After the Aleksandrovsk congress, the RMS consisted of 22 delegates including three known Bolsheviks and four known Makhnovists, the Bolsheviks considered the remaining delegates *"anarchists or anarchist sympathisers"*.

The military chaos of 1920 saw the RMS dissolved and replaced by the Soviet of Revolutionary Insurgents of the Ukraine, which consisted of seven members elected by the insurgent army. Its

secretary was a left Socialist Revolutionary. The RMS in addition to making decisions between Congresses carried out propaganda work including the editing of the Makhnovist paper *"The Road to Freedom"* and collected and distributed money.

Lastly, we must discuss what happened when the Makhnovists applied their ideas in any cities they liberated as this gives a clear idea of the way they applied their ideas in practice. Anarchist participant Yossif the Emigrant stated that it was *"Makhno's custom upon taking a city or town to call the people together and announce to them that henceforth they are free to organise their lives as they think best for themselves. He always proclaims complete freedom of speech and press; he does not fill the prisons or begin executions, as the Communists do."* He stressed it was *"the expression of the toilers themselves"* and *"the first great mass movement that by its own efforts seeks to free itself from government and establish economic self-determination. In that sense it is thoroughly Anarchistic."* [Alexander Berkman, **The Bolshevik Myth**, pp. 193–5]

Arshinov paints a similar picture:

> *"As soon as they entered a city, they declared that they did not represent any kind of authority, that their armed forces obliged no one to any sort of obligation and had no other aim than to protect the freedom of the working people. The freedom of the peasants and the workers, said the Makhnovists, resides in the peasants and workers themselves and may not be restricted. In all fields of their lives it is up to the workers and peasants themselves to construct whatever they consider necessary. As for the Makhnovists — they can only assist them with advice, by putting at their disposal the intellectual or military forces they need, but under no circumstances can the Makhnovists prescribe for them in any manner."* [Arshinov, **Op. Cit.**, p. 148]

In addition, the Makhnovists *"fully applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power."* Indeed, the *"only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statists was a prohibition on the formation of those 'revolutionary committees' which sought to impose a dictatorship over the people."* They also took the opportunity to destroy every prison they got their hands on, believing that free people *"have no use for prisons"* which are *"always built only to subjugate the people, the workers and peasants."* [**Op. Cit.**, p. 153, p. 154 and p. 153]

The Makhnovists encouraged self-management. Looking at Aleksandrovsk:

> *"They immediately invited the working population to participate in a general conference of the workers of the city. When the conference met, a detailed report was given on the military situation in the region and it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations, basing themselves on the principles of labour and equality. The workers enthusiastically acclaimed all these suggestions; but they hesitated to carry them out, troubled by their novelty, and troubled mainly by the nearness of the front, which made them fear that the situation of the town was uncertain and unstable. The first conference was followed by a second. The problems of organising life according to principles of self-management by workers were examined and discussed with animation by the masses*

> *of workers, who all welcomed these ideas with the greatest enthusiasm, but who only with difficulty succeeded in giving them concrete forms. Railroad workers took the first step in this direction. They formed a committee charged with organising the railway network of the region ... From this point, the proletariat of Aleksandrovsk began to turn systematically to the problem of creating organs of self-management."* [**Op. Cit.**, p. 149]

Unfortunately, the Makhnovists occupied only two cities (Alexandrovsk for four weeks and Katerinoslav for two periods of one and five weeks respectively). As a rule the Makhnovist rank and file had little or no experience of life in the cities and this placed severe limits on their ability to understand the specific problems of the workers there. In addition, the cities did not have a large anarchist movement, meaning that the Mensheviks and Bolsheviks had more support then they did. Both parties were, at best, neutral to the Makhnovists and anarchists, so making it likely that they would influence the city workers against the movement. As Voline noted, the *"absence of a vigorous organised workers' movement which could support the peasant insurgents"* was a disadvantage. [**Op. Cit.**, p. 571]

There were minor successes in both cities. In Alexandrovsk, some trains were got running and a few factories reopened. In Katerinoslav (where the city was under a state of siege and constant bombardment by the Whites), the tobacco workers won a collective agreement that had long been refused and the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, **Op. Cit.**, p. 124]

Clearly, whenever they could, the Makhnovists practised their stated goals of working-class self-management and supported the organisational structures to ensure the control of and participation in the social revolution by the toiling masses. Equally, when they liberated towns and cities they did not impose their own power upon the working-class population but rather urged it to organise itself by setting up soviets, unions and other forms of working-class power. They urged workers to organise self-management of industry. True to the anarchist vision of a free society, they advocated and practised freedom of assembly, speech and organisation. In the words of historian Christopher Reed:

> *"Makhno's Insurgent Army ... was the quintessence of a self-administered, people's revolutionary army. It arose from the peasants, it was composed of peasants, it handed power to the peasants. It encouraged the growth of communes, co-operatives and soviets but distrusted all permanent elites attempting to take hold within them. It would be foolish to think that Makhno was supported by every peasant or that he and his followers could not, on occasions, direct their cruelty towards dissidents within their own ranks, but, on the whole, the movement perhaps erred on the side of being too self-effacing, of handing too much authority to the population at key moments."* [**From Tsar to Soviets**, p. 260]

As such, Makhnovist practice matched its theory. This can be said of few social movements and it is to their credit that this is the case.

8 Weren't the Makhnovists just Kulaks?

According to Trotsky (and, of course, repeated by his followers), *"Makhno created a cavalry of peasants who supplied their own horses. These were not the downtrodden village poor whom the October revolution first awakened, but the strong and well-fed peasants who were afraid of losing what they had. The anarchist ideas of Makhno (ignoring of the state, non-recognition of the central power) corresponded to the spirit of this kulak cavalry as nothing else could."* He argued that the Makhnovist struggle was not the anarchist struggle against the state and capitalism, but rather *"a struggle of the infuriated petty property owner against the proletarian dictatorship."* The Makhno movement, he stressed, was just an example of the *"convulsions of the peasant petty bourgeoisie which desired, of course, to liberate itself from capital but at the same time did not consent to subordinate itself to the dictatorship of the proletariat."* [Lenin and Trotsky, **Kronstadt**, p. 80, p. 89 and pp. 89–90]

Unfortunately for those who use this kind of argument against the Makhnovists, it fails to stand up to any kind of scrutiny. Ignoring the sophistry of equating the Bolshevik party's dictatorship with the "dictatorship of the proletariat," we can easily refute Trotsky's somewhat spurious argument concerning the background of the Makhnovists.

Firstly, however, we should clarify what is meant by the term *"kulak."* According to one set of Trotskyist editors, it was *"popularly used to refer to well-to-do peasants who owned land and hired poor peasants to work it."* [*"glossary,"* Lenin and Trotsky, **Kronstadt**, p. 146] The term itself derives from the Russian for *"fist,"* with appropriate overtones of grasping and meanness. In other words, a rural small-scale capitalist (employer of wage labour and often the renter of land and loaner of money as well) rather than a well-off peasant as such. Trotsky, however, muddies the water considerably by talking about the *"peasant petty bourgeoisie"* as well. Given that a peasant **is** *"petty"* (i.e. petit) bourgeois (i.e. own and use their own means of production), Trotsky is blurring the lines between rural capitalist (kulak) and the middle peasantry, as occurred so often under Bolshevik rule.

Secondly, we could just point to the eyewitness accounts of the anarchists Arshinov and Voline. Both stress that the Makhno movement was a mass revolutionary movement of the peasant and working poor in the Southern Ukraine. Arshinov states that after Denikin's troops had been broken in 1919, the Makhnovists *"literally swept through villages, towns and cities like an enormous broom"* and the *"returned **pomeshchiks** [landlords], the **kulaks** , the police, the priests"* were destroyed, so refuting the *"the myth spread by the Bolsheviks about the so-called **kulak** character of the Makhnovshchina."* Ironically, he states that *"wherever the Makhnovist movement developed, the **kulaks** sought the protection of the Soviet authorities, and found it there."* [**Op. Cit.**, p. 145] Yossif the Emigrant, another anarchist active in the movement, told anarchist Alexander Berkman that while there was a *"kulak"* element within it, *"the great majority are not of that type."* [quoted by Berkman, **The Bolshevik Myth**, p. 187] According to Gallina Makhno (Makhno's wife), when entering a town or village it was *"always Makhno's practice to compel the rich peasants, the **kulaki** , to give up their surplus wealth, which was then divided among the poor, Makhno keeping a share for his army. Then he would call a meeting of the villagers, address them on the purposes of the **povstantsi** [partisan] movement, and distribute his literature."* [Emma Goldman, **My Disillusionment in Russia**, p. 149]

However, this would be replying to Trotsky's assertions with testimony which was obviously pro-Makhnovist. As such, we need to do more than this, we need to refute Trotsky's assertions in depth, drawing on as many non-anarchist sources and facts as possible.

The key to refuting Trotsky's argument that the Makhnovists were just kulaks is to understand the nature of rural life before and during 1917. Michael Malet estimates that in 1917, the peasantry could be divided into three broad categories. About 40 percent could no longer make a living off their land or had none, another 40 per cent who could make ends meet, except in a bad year, and 20 per cent who were relatively well off, with a fraction at the very top who were very well off. [**Op. Cit.**, p. 117] Assuming that *"kulak"* simply meant *"rich"* or *"well-off"* peasant, then Trotsky is arguing that the Makhnovist movement represented and was based on this top 20 per cent. However, if we take the term *"kulak"* to mean *"small rural capitalist"* (i.e. employer of wage labour) then this figure would be substantially smaller as few within this group would employ hired labour or rent land. In fact, the percentage of peasant households in Russia employing permanent wage-labour was 3.3% in 1917, falling to 1% in 1920. [Teodor Shanin, **The Awkward Class**, p. 171]

In 1917, the peasants all across the Russian Empire took back the land stolen by the landlords. This lead to two developments. Firstly, there was a *"powerful levelling effect"* in rural life. [Shanin, **Op. Cit.**, p. 159] Secondly, the peasants would only support those who supported their aspirations for land reform (which was why the Bolsheviks effectively stole the Socialist-Revolutionary land policy in 1917). The Ukraine was no different. In 1917 the class structure in the countryside changed when the Hulyai Pole peasants were amongst the first to seize the landlords' land. In August 1917 Makhno assembled all the landed gentry (***"pomeshchiks"***) of the region *"and made them give him all the documents relating to lands and buildings."* After making an exact inventory of all this property and presenting a report to the local and then district congress of soviets, he *"proceeded to equalise the rights of the **pomeshchiks** and **kulaks** with those of the poor peasant labourers in regard to the use of the land ... the congress decided to let the **pomeshchiks** and **kulaks** have a share of the land, as well as tools and livestock, equal to that of the labourers."* Several other peasant congresses nearby followed this example and adopted the same measure. [Peter Arshinov, **Op. Cit.**, pp. 53–4]

Most of this land, tools and livestock was distributed to poor peasants, the rest was used to set up voluntary communes where the peasants themselves (and not the state) self-managed the land. Thus the peasants' *"economic conditions in the region of the Makhno movement were greatly improved at the expense of the landlords, the church, monasteries, and the richest peasants."* [Palij, **Op. Cit.**, p. 214] This redistribution was based on the principle that every peasant was entitled to as much land as their family could cultivate without the use of hired labour. The abolition of wage labour in the countryside was also the method the anarchists were to use in Spain to divide up the land some 20 years later.

We should also note that the Makhnovist policy of land reform based on the abolition of wage labour was, as we noted in section 7, the position agreed at the second regional congress called in 1919. The Makhnovists specifically argued with regards to the kulaks:

> *"We are sure that ... the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak's surplus land for general use, then naturally drawing the*

kulak elements into the social organisation." [cited by Michael Malet, **Op. Cit.**, pp. 118–9]

As such, when Trotsky talks about the *"downtrodden village poor whom the October revolution first awakened,"* he is wrong. In the area around Hulyai Pole it was **not** the October revolution which *"first awakened"* them into action, it was the activities of Makhno and the anarchists during the summer and autumn of 1917 which had done that (or, more correctly, it was their activities which aided this process as the poor peasants and landless workers needed no encouragement to expropriate the landlords).

Needless to say, this land redistribution reinforced Makhno's popularity with the people and was essential for the army's later popularity and its ability to depend on the peasants for support. However, the landlords and richer kulaks did not appreciate it and, unsurprisingly, tried to crush the movement when they could. Once the Austro-Germans invaded, the local rich took the opportunity to roll back the social revolution and the local **pomeshchiks** and **kulaks** formed a *"special volunteer detachment"* to fight Makhno once he had returned from exile in July 1918. [Arshinov, **Op. Cit.**, p. 59]

This system of land reform did not seek to divide the village. Indeed, the Makhnovist approach is sometimes called the *"united village"* theory. Rather than provoke unnecessary and damaging conflict behind the frontlines, land reform would be placed in the hands of the village community, which would ensure that even the kulaks would have a fair stake in the post-revolutionary society as everyone would have as much land as they could till without using hired labour. The Bolshevik policy, as we will see, aimed at artificially imposing "class conflict" upon the villages from without and was a disaster as it was totally alien to the actual socio-economic situation. Unsurprisingly, peasant communities **as a whole** rose up against the Bolsheviks all across Russia.

As such, the claim that the Makhnovists were simply *"kulaks"* is false as it fails to, firstly, acknowledge the actual pre-revolutionary composition of the peasantry and, secondly, to understand the social-revolution that had happened in the region of Hulyai Pole in 1917 and, thirdly, totally ignores the actual Makhnovist position on land reform. As Michael Malet argues, the Bolsheviks *"totally misconstrued the nature of the Makhno movement. It was not a movement of kulaks, but of the broad mass of the peasants, especially the poor and middle peasants."* [**Op. Cit.**, p. 122]

This was sometimes acknowledged by Bolsheviks themselves. IAkovlev acknowledged in 1920 that in 1919 Makhno *"was a real peasant idol, an expression of all peasant spontaneity against ... Communists in the cities and simultaneously against city capitalists and landowners. In the Makhno movement it is difficult to distinguish where the poor peasant begins [and] the 'kulak' ends. It was a spontaneous peasant movement .... In the village we had no foothold, there was not one element with which we could join that would be our ally in the struggle against the bandits [sic!]."* [quoted by Palij, **Op. Cit.**, p. 157]

According to a Soviet author present at the Makhnovist regional congresses on January 23 and February 12: *"In 1919 when I asked the chairman of the two Congresses (a Jewish farmer) whether the 'kulaks' were allowed to participate in the Congress, he angrily responded: 'When will you finally stop talking about kulaks? Now we have no kulaks among us: everybody is tilling as much land as he wishes and as much as he can.'"* [quoted by Palij, **Op. Cit.**, p. 293]

According to Christian Rakovskii, the Bolshevik ruler of Ukraine, *"three-fourths of the membership of the [partisan] bands were poor peasants."* He presented a highly original and inventive

explanation of this fact by arguing that *"rich peasants stayed in the village and paid poor ones to fight. Poor peasants were the hired army of the kulaks."* [Vladimir N. Brovkin, **Behind the Front the Lines of the Civil War**, p. 112 and p. 328]

Even Trotsky (himself the son of a rich peasant!) let the cat out of the bag in 1919:

> *"The liquidation of Makhno does not mean the end of the Makhnovschyna, which has its roots in the ignorant popular masses."* [quoted by Malet, **Op. Cit.**, p. 122]

Ultimately, all sources (including Bolshevik ones) accept that in the autumn of 1919 (at the very least) Makhno's support was overwhelming and came from all sections of the population.

Even ignoring the fact there was a social revolution and the eye-witness Bolshevik accounts (including Trotsky's!) which contradict Trotsky's assertions, Trotsky can be faulted for other reasons.

The most important issue is simply that the Makhnovist movement could not have survived four years if (at best) 20 per cent of the population supported it. As Christopher Reed notes, when the Makhnovists were *"in retreat they would abandon their weapons and merge with the local population. The fact that they were able to succeed shows how closely they were linked with the ordinary peasants because such tactics made Makhno's men very vulnerable to informers. There were very few examples of betrayal."* [**Op. Cit.**, p. 260] If Makhno's social base was as weak as claimed there would have been no need for the Bolsheviks to enter into alliances with him, particularly in the autumn of 1920 when the Makhnovists held no significant liberated area. Even after the defeat of Wrangel and the subsequent Bolshevik betrayal and repression, Makhno's mass base allowed him to remain active for months. Indeed, it was only when the peasants themselves had become exhausted in 1921 due to worsening economic conditions and state repression, were the Makhnovists finally forced into exile.

In the attempt to *"eradicate his influence in the countryside"* the Bolsheviks *"by weight of numbers and consistent ruthlessness they achieved a partial success."* This was achieved by state terrorism:

> *"On the occupation of a village by the Red Army the **Cheka** would hunt out and hang all active Makhnovist supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants ... and three or four Red militia men left as armed support for the new village bosses."* [David Footman, **Op. Cit.**, p. 292]

Moreover, in these *"military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents. Red Army reports complain of poor morale ... The Reds used a number of Lettish and Chinese troops to decrease the risk of fraternisation."* [Footman, **Op. Cit.**, p. 293] If the Makhnovists were made up of kulaks, why would the Bolsheviks fear fraternisation? Equally, if the Makhnovists were "kulaks" then how could they have such an impact on Red Army troops (who were mostly poor peasants)? After all, Trotsky had been complaining that "Makhnovism" had been infecting nearby Red Army troops and in August 1919 was arguing that it was *"still a poison which has infected backward units in the Ukrainian army."* In December 1919, he noted that *"disintegration takes place in unstable*

units of our army when they came into contact with Makhno's forces." It seems unlikely that a movement made up of "kulaks" could have such an impact. Moreover, as Trotsky noted, not all Makhnovists were anarchists, *"some of them wrongly regard themselves as Communists."* Again, why would people who regarded themselves as Communists join a movement of "kulaks"? [**How the Revolution Armed**, vol. II, p. 367, p. 110 and p. 137]

In addition, it seems highly unlikely (to say the least!) that a movement which is alleged to be either made up of or supported by the kulaks could have had a land policy which emphasised and implemented an equal share for the poorest peasantry, not just of land but also of live and dead stock as well as opposing the hiring of labour. This fact is reinforced when we look at the peasant reaction to the Bolshevik (and, presumably, anti-kulak and pro-"downtrodden village poor") land policy. Simply put, their policies resulted in massive peasant unrest directed against the Bolsheviks.

The Bolshevik land decrees of the 5th and 11th of February, 1919, stated that large landlord holdings would become state farms and all stock was to be taken over by the Ministry of Agriculture, with only between one third and one half of the land being reserved for poor peasants. This was *"largely irrelevant, since the peasantry had expected, and in some cases already controlled, all of it. To them, the government was taking away their land, and not seizing it from the landlords, then keeping some of it and handing the rest over to its rightful owners."* [Malet, **Op. Cit.**, p. 134] Thus the land was to expropriated by the state, **not** by the peasants. The result of this policy soon became clear:

> *"The Bolsheviks expropriation policy was countervailed by the peasants' resistance based upon their assumption that 'the land belongs to nobody ... it can be used only by those who care about it, who cultivate it.' Thus the peasants maintained that all the property of the former landlords was now by right their own. This attitude was shared not only by the rich and middle peasants but also the poor and landless, for they all wished to be independent farmers. The poorer the areas, the more dissatisfied were the peasants with the Bolshevik decrees.*
>
> *"Thus Communist agricultural policy and terrorism brought about a strong reaction against the new Bolshevik regime. By the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks."* [Palij, **Op. Cit.**, p. 156]

The Bolshevik inspired Poor Peasant Committees were *"associated with this disastrous policy, were discredited, and their reintroduction would need the aid of troops."* [Malet, **Op. Cit.**, p. 135] The Makhnovists, in contrast, did not impose themselves onto the villages, nor did they attempt to tell the peasants what to do and how to divide the land. Rather they advocated the formation of Free Soviets through which these decisions could be made. This, along with their support for land reform, helped win them mass support.

After evacuating the Ukraine in mid-1919 due to the success of Denikin's counter-revolution, the Ukrainian Communists took time to mull over what had happened. The Central Committee's November 1919 resolution on the Ukraine *"gave top priority to the middle peasant — so often and so conveniently lumped in together with the kulak and dealt with accordingly — the transfer of landlord land to the poor peasants with only minimum exceptions for state farms."* These points were the basis of the new Ukrainian land law of 5th of February, 1920. [Malet, **Op. Cit.**, p. 135] This new law reflected long standing Makhnovist theory **and** practice. Therefore, the changing

nature of Bolshevik land policy in the Ukraine indicates that Trotsky's claims are false. The very fact that the Bolsheviks had to adjust their policies in line with Makhnovist theory indicates that the later appealed to the middle and poor peasants.

Equally, it seems strange that the *"kulaks"* who apparently dominated the movement should have let themselves be led by poor peasants and workers. Voline presents a list of some of the participants of the movement and the vast majority are either peasants or workers. [**Op. Cit.**, pp. 688–91] As historian Michael Palij notes, *"[a]lmost to a man, they [the Makhnovist leadership] were of poor peasant origin, with little formal education."* [**Op. Cit.**, p. 254] Exceptions to the general rule were usually workers. Most were Anarchists or Socialist-Revolutionaries. [Palij, **Op. Cit.**, pp. 254–62]

Of course, it can be argued that the leadership of a movement need not come from the class which it claims to lead. The leadership of the Bolsheviks, for example, had very few actual proletarians within it. However, it seems unlikely that a class would select as its leaders members of the population it oppressed! Equally, it seems as unlikely that poor peasants and workers would let themselves lead a movement of kulaks, whose aims would be alien to theirs. After all, poor peasants would seek land reform while kulaks would view this as a threat to their social position. As can be seen from the Makhnovist land policy, they argued for (and implemented) radical land reform, placing the land into the hands of peasants who worked the land without hiring labour (see section 7)

As regards Trotsky's argument that the Makhnovists had to be kulaks because they originally formed a cavalry unit, it is easy to refute. Makhno himself was the son of poor peasants, an agricultural labourer and a worker in a factory. He was able to ride a horse, so why could other poor peasants not do so? Ultimately, it simply shows that Trotsky knew very little of Ukrainian peasant life and society.

Given that the Bolshevik government was meant to be a "worker-peasant" power, it seems strange that Trotsky dismisses the concerns of the peasantry so. He should have remembered that peasant uprisings against the Bolshevik government occurred constantly under the Bolsheviks, forcing them (eventually) to, first, recognise the false nature of their peasant policies in 1919 and, second, to introduce the NEP in 1921. As such, it seems somewhat ironic for Trotsky to attack the Makhnovists for not following flawed Bolshevik ideology as regards the peasantry!

The Bolsheviks, as Marxists, saw the peasants as "petit bourgeoisie" and uninterested in the revolution except as a means to grab their own plot of land. Their idea of land collectivisation was limited to state ownership. The initial Bolshevik land strategy can be summed up as mobilising the poor peasantry against the rest on the one hand and mobilising the city worker against the peasants (through forced grain confiscation on the other). The lack of knowledge of peasant life was the basis of this policy, which was abandoned in 1919 when it was soon proven to be totally wrong. Rather than see wealth extremes rise, the 1917 revolution saw a general levelling.

As regards the peasantry, here as elsewhere the Bolsheviks claimed their strategy was the objectively necessary (only possible) one in the circumstances. And here again the Makhnovists demonstrate this to be false, as the Bolsheviks themselves acknowledged in practice by changing their agricultural policies and bringing them closer to the Makhnovist position.

Clearly, both factually and logically, Trotsky's arguments are false. Ultimately, like most Bolsheviks, Trotsky uses the term *"kulak"* as a meaningless term of abuse, with no relation to the actual class structure of peasant life. It simply means a peasant opposed to the Bolsheviks rather than an actual social strata. Essentially, he is using the standard Leninist technique of specifying

a person's class (or ideas) based on whether they subscribe to (or simply follow without question) Leninist ideology (see section H.2.12 for further discussion of this). This explains why the Makhnovists went from being heroic revolutionaries to kulak bandits (and back again!) depending on whether their activity coincided with the needs of Bolshevik power or not. Expediency is not a sound base to build a critique, particularly one based simply on assertions like Trotsky's.

9 Were the Makhnovists anti-Semitic and pogromists?

No, they were not. Anyone who claims that the Mahnovist movement was anti-Semitic or conducted pogroms against Jews simply shows ignorance or a desire to deceive. As we will show, the Makhnovists were both theoretically and practically opposed to anti-Semitism and progroms.

Unsurprisingly, many Leninists slander the Makhnovists on this score. Trotsky, for example, asserted in 1937 that Makhno's followers expressed *"a militant anti-Semitism."* [Lenin and Trotsky, **Kronstadt**, p. 80] Needless to say, the Trotskyist editors of the book in question did not indicate that Trotsky was wrong in the accusation. In this way a slander goes unchecked and becomes "accepted" as being true. As the charge of *"militant anti-Semitism"* is a serious one, so it is essential that we (unlike Trotsky) provide evidence to refute it.

To do so we will present a chronological overview of the evidence against it. This will, to some degree, result in some duplication as well as lengthy quotations, however it is unavoidable. We are sorry to labour this point, but this allegation is sadly commonplace and it is essential to refute it fully.

Unsurprisingly, Arshinov's 1923 account of the movement takes on the allegations that the Makhnovists were anti-Semitic. He presents extensive evidence to show that the Makhnovists opposed anti-Semitism and pogroms. It is worth quoting him at length:

> *"In the Russian press as well as abroad, the Makhnovshchina was often pictured as a very restricted guerrilla movement, foreign to ideas of brotherhood and international solidarity, and even tainted with anti-Semitism. Nothing could be more criminal than such slanders. In order to shed light on this question, we will cite here certain documented facts which relate to this subject.*
>
> *"An important role was played in the Makhnovist army by revolutionaries of Jewish origin, many of whom had been sentenced to forced labour for participation in the 1905 revolution, or else had been obliged to emigrate to Western Europe or America. Among others, we can mention:*
>
> *"**Kogan** — vice-president of the central organ of the movement, the Regional Revolutionary Military Council of Hulyai Pole. Kogan was a worker who, for reasons of principle, had left his factory well before the revolution of 1917, and had gone to do agricultural work in a poor Jewish agricultural colony. Wounded at the battle of Peregonovka, near Uman, against the Denikinists, he was seized by them at the hospital at Uman where he was being treated, and, according to witnesses, the Denikinists killed him with sabres.*
>
> *"**L. Zin'kovsky (Zadov)** — head of the army's counter espionage section, and later commander of a special cavalry regiment. A worker who before the 1917 revolution was condemned to ten years of forced labour for political activities. One of the most active militants of the revolutionary insurrection.*

*"**Elena Keller** — secretary of the army's cultural and educational section. A worker who took part in the syndicalist movement in America. One of the organisers of the 'Nabat' Confederation.*

*"**Iosif Emigrant (Gotman)** — Member of the army's cultural and educational section. A worker who took an active part in the Ukrainian anarchist movement. One of the organisers of the 'Nabat' Confederation, and later a member of its secretariat.*

*"**Ya. Alyi (Sukhovol'sky)** — worker, and member of the army's cultural and educational section. In the Tsarist period he was condemned to forced labor for political activity. One of the organisers of the 'Nabat' Confederation and a member of its secretariat.*

"We could add many more names to the long list of Jewish revolutionaries who took part in different areas of the Makhnovist movement, but we will not do this, because it would endanger their security.

"At the heart of the revolutionary insurrection, the Jewish working population was among brothers. The Jewish agricultural colonies scattered throughout the districts of Mariupol, Berdyansk, Aleksandrovsk and elsewhere, actively participated in the regional assemblies of peasants, workers and insurgents; they sent delegates there, and also to the regional Revolutionary Military Council.

"Following certain anti-Semitic incidents which occurred in the region in February, 1919, Makhno proposed to all the Jewish colonies that they organise their self-defence and he furnished the necessary guns and ammunition to all these colonies. At the same time Makhno organised a series of meetings in the region where he appealed to the masses to struggle against anti-Semitism.

"The Jewish working population, in turn, expressed profound solidarity and revolutionary brotherhood toward the revolutionary insurrection. In answer to the call made by the Revolutionary Military Council to furnish voluntary combatants to the Makhnovist insurgent army, the Jewish colonies sent from their midst a large number of volunteers.

"In the army of the Makhnovist insurgents there was an exclusively Jewish artillery battery which was covered by an infantry detachment, also made up of Jews. This battery, commanded by the Jewish insurgent Shneider, heroically defended Hulyai Pole from Denikin's troops in June, 1919, and the entire battery perished there, down to the last man and the last shell.

"In the extremely rapid succession of events after the uprising of 1918–19, there were obviously individuals who were hostile to Jews, but these individuals were not the products of the insurrection; they were products of Russian life. These individuals did not have any importance in the movement as a whole. If people of this type took part in acts directed against Jews, they were quickly and severely punished by the revolutionary insurgents.

"We described earlier the speed and determination with which the Makhnovists executed Hryhoriyiv and his staff, and we mentioned that one of the main reasons for this execution was their participation in pogroms of Jews.

"We can mention other events of this nature with which we are familiar.

"On May 12, 1919, several Jewish families — 20 people in all — were killed in the Jewish agricultural colony of Gor'kaya, near Aleksandrovsk. The Makhnovist staff immediately set up a special commission to investigate this event. This commission discovered that the murders had been committed by seven peasants of the neighbouring village of Uspenovka. These peasants were not part of the insurrectionary army. However, the Makhnovists felt it was impossible to leave this crime unpunished, and they shot the murderers. It was later established that this event and other attempts of this nature had been carried out at the instigation of Denikin's agents, who had managed to infiltrate the region and had sought by these means to prepare an atmosphere favourable for the entry of Denikin's troops into the Ukraine.

"On May 4th or 5th, 1919, Makhno and a few commanders hurriedly left the front and went to Hulyai Pole, where they were awaited by the Extraordinary Plenipotentiary of the Republic, L. Kamenev, who had arrived from Khar'kov with other representatives of the Soviet government. At the Verkhnii Tokmak station, Makhno saw a poster with the words: 'Death to Jews, Save the Revolution, Long Live Batko Makhno.'

"'Who put up that poster?' Makhno asked.

"He learned that the poster had been put up by an insurgent whom Makhno knew personally, a soldier who had taken part in the battle against Denikin's troops, a person who was in general decent. He presented himself immediately and was shot on the spot.

"Makhno continued the journey to Hulyai Pole. During the rest of the day and during his negotiations with the Plenipotentiary of the Republic, he could not free himself from the influence of this event. He realised that the insurgent had been cruelly dealt with, but he also knew that in conditions of war and in view of Denikin's advance, such posters could represent an enormous danger for the Jewish population and for the entire revolution if one did not oppose them quickly and resolutely.

"When the insurrectionary army retreated toward Uman in the summer of 1919, there were several cases when insurgents plundered Jewish homes. When the insurrectionary army examined these cases, it was learned that one group of four or five men was involved in all these incidents — men who had earlier belonged to Hryhoriyiv's detachments and who had been incorporated into the Makhnovist army after Hryhoriyiv was shot. This group was disarmed and discharged immediately. Following this, all the combatants who had served under Hryhoriyiv were discharged from the Makhnovist army as an unreliable element whose re-education was not possible in view of the unfavorable conditions and the lack of time. Thus we see how the Makhnovists viewed anti-Semitism. Outbursts of anti-Semitism in various parts of the Ukraine had no relation to the Makhnovshchina.

"Wherever the Jewish population was in contact with the Makhnovists, it found in them its best protectors against anti-Semitic incidents. The Jewish population of Hulyai Pole, Aleksandrovsk, Berdyansk, Mariupol, as well as all the Jewish agricultural colonies scattered throughout the Donets region, can themselves corroborate the fact that they always found the Makhnovists to be true revolutionary friends, and that due to the severe and decisive measures of the Makhno visits, the anti-Semitic leanings of the counter-revolutionary forces in this region were promptly squashed.

"Anti-Semitism exists in Russia as well as in many other countries. In Russia, and to some extent in the Ukraine, it is not a result of the revolutionary epoch or of the insurrectionary movement, but is on the contrary a vestige of the past. The Makhnovists always fought it resolutely in words as well as deeds. During the entire period of the movement, they issued numerous publications calling on the masses to struggle against this evil. It can firmly be stated that in the struggle against anti-Semitism in the Ukraine and beyond its borders, their accomplishment was enormous." [Arshinov, **Op. Cit.**, pp. 211–215]

Arshinov then goes on to quote an appeal published by Makhnovists together with anarchists referring to an anti-Semitic incident which took place in the spring of 1919. It is called **WORKERS, PEASANTS AND INSURGENTS FOR THE OPPRESSED, AGAINST THE OPPRESSORS — ALWAYS!**:

"During the painful days of reaction, when the situation of the Ukrainian peasants was especially difficult and seemed hopeless, you were the first to rise as fearless and unconquerable fighters for the great cause of the liberation of the working masses... This was the most beautiful and joyful moment in the history of our revolution. You marched against the enemy with weapons in your hands as conscious revolutionaries, guided by the great idea of freedom and equality... But harmful and criminal elements succeeded in insinuating themselves into your ranks. And the revolutionary songs, songs of brotherhood and of the approaching liberation of the workers, began to be disrupted by the harrowing cries of poor Jews who were being tormented to death... On the clear and splendid foundation of the revolution appeared indelible dark blots caused by the parched blood of poor Jewish martyrs who now, as before, continue to be innocent victims of the criminal reaction, of the class struggle ... Shameful acts are being carried out. Anti-Semitic pogroms are taking place.

"Peasants, workers and insurgents! You know that the workers of all nationalities — Russians, Jews, Poles, Germans, Armenians, etc. — are equally imprisoned in the abyss of poverty. You know that thousands of Jewish girls, daughters of the people, are sold and dishonoured by capital, the same as women of other nationalities. You know how many honest and valiant revolutionary Jewish fighters have given their lives for freedom in Russia during our whole liberation movement... The revolution and the honour of workers obliges all of us to declare as loudly as possible that we make war on the same enemies: on capital and authority, which oppress all workers equally, whether they be Russian, Polish, Jewish, etc. We must proclaim everywhere that our enemies are exploiters and oppressors of various nationalities: the Russian manufacturer, the German iron magnate, the Jewish banker, the Polish aristocrat .... The bourgeoisie of all countries and all nationalities is united in a bitter struggle against the revolution, against the labouring masses of the whole world and of all nationalities.

"Peasants, workers and insurgents! At this moment when the international enemy — the bourgeoisie of all countries — hurries to the Russian revolution to create nationalist hatred among the mass of workers in order to distort the revolution and to shake the very foundation of our class struggle — the solidarity and unity of all workers — you must move against conscious and unconscious counter-revolutionaries who endanger

> *the emancipation of the working people from capital and authority. Your revolutionary duty is to stifle all nationalist persecution by dealing ruthlessly with all instigators of anti-Semitic pogroms.*
>
> *"The path toward the emancipation of the workers can be reached by the union of all the workers of the world."* [quoted by Arshinov, **Op. Cit.**, 215–7]

Arshinov also quotes an order issued by Makhno to *"all revolutionary insurgents without exception"* which states, in part, that the *"goal of our revolutionary army, and of every insurgent participating in it, is an honourable struggle for the full liberation of the Ukrainian workers from all oppression."* This was *"why every insurgent should constantly keep in mind that there is no place among us for those who, under the cover of the revolutionary insurrection, seek to satisfy their desires for personal profit, violence and plunder at the expense of the peaceful Jewish population."* [quoted by Arshinov, **Op. Cit.**, pp. 217–8]

Unsurprisingly, as an anarchist, Makhno presents a class analysis of the problem of racism, arguing as follows:

> *"Every revolutionary insurgent should remember that his personal enemies as well as the enemies of all the people are the rich bourgeoisie, regardless of whether they be Russian, or Jewish, or Ukrainian. The enemies of the working people are also those who protect the unjust bourgeois regime, i.e., the Soviet Commissars, the members of repressive expeditionary corps, the Extraordinary Commissions which go through the cities and villages torturing the working people who refuse to submit to their arbitrary dictatorship. Every insurgent should arrest and send to the army staff all representatives of such expeditionary corps, Extraordinary Commissions and other institutions which oppress and subjugate the people; if they resist, they should be shot on the spot. As for any violence done to peaceful workers of whatever nationality — such acts are unworthy of any revolutionary insurgent, and the perpetrator of such acts will be punished by death."* [quoted by Arshinov, **Op. Cit.**, p. 218]

It should also be noted that the chairmen of three Makhnovist regional congresses were Jewish. The first and second congresses had a Jewish chairman [Palij, **Op. Cit.**, p. 293], while Voline was the chair for the fourth one held at Aleksandrovsk. Similarly, one of the heads of the army's counter-espionage section was Jewish. [Arshinov, **Op. Cit.**, p. 212] Little wonder both Arshinov and Voline stress that an important role was played by Jews within the movement.

The Jewish American anarchists Alexander Berkman and Emma Goldman were also in Russia and the Ukraine during the revolution. Between 1920 and 1921, they were in contact with anarchists involved with the Makhnovists and were concerned to verify what they had heard about the movement from Bolshevik and other sources. Berkman recounts meeting the Jewish anarchist Yossif the Emigrant (shot by the Bolsheviks in late 1920). Yossif stated that *"Nestor is merciless toward those guilty of Jew-baiting. Most of you have read his numerous proclamations against pogroms, and you know how severely he punishes such things."* He stressed that any stories of atrocities and pogroms committed by the Makhnovists were *"lies wilfully spread by the Bolsheviks"* who *"hate Nestor worse than they do Wrangel."* For Yossif, *"Makhno represents the real spirit of October."* [quoted by Berkman, **Op. Cit.**, pp. 187–9] He also notes that Gallina Makhno, Nestor's wife, would *"slightly raise her voice in indignation when reports of Jew-baiting*

*by **povstantsi** [partisans] were mentioned. These stories were deliberately spread by the Bolsheviki, she averred. No-one could be more severe in punishing such excesses than Nestor. Some of his best comrades are Jews; there are a number of them in the Revolutionary Soviet and in other branches of the army. Few men are so loved and respected by the **povstantsi** as Yossif the Emigrant, who is a Jew, and Makhno's best friend."* [Berkman, **Op. Cit.**, pp. 238–9] Both Goldman and Berkman became friends with Makhno during his exile in Paris.

After his exile, Makhno himself spent time refuting allegations of anti-Semitism. Two articles on this subject are contained in **The Struggle Against the State and other Essays**, a collection of Makhno's exile writings. In the article *"The Makhnovshchina and Anti-Semitism"* he recounts various examples of the *"uncompromising line on the anti-Semitism of pogromists"* which the Makhnovists took *"throughout its entire existence."* This was *"because it was a genuinely revolutionary toilers' movement in the Ukraine."* He stressed that *"[a]t no time did the movement make it its business to carry out pogroms against Jews nor did it ever encourage any."* [**The Struggle Against the State and Other Essays**, p. 38 and p. 34] He wrote another article (called *"To the Jews of All Countries"*):

> *"In my first 'Appeal to Jews, published in the French libertarian newspaper, **Le Libertaire**, I asked Jews in general, which is to say the bourgeois and the socialist ones as well as the 'anarchist' ones like Yanovsky, who have all spoken of me as a pogromist against Jews and labelled as anti-Semitic the liberation movement of the Ukrainian peasants and workers of which I was the leader, to detail to me the specific facts instead of blathering vacuously away: just where and just when did I or the aforementioned movement perpetrate such acts? ... Thus far, no such evidence advanced by Jews has come to my attention. The only thing that has appeared thus far in the press generally, certain Jewish anarchist organs included, regarding myself and the insurgent movement I led, has been the product of the most shameless lies and of the vulgarity of certain political mavericks and their hirelings."* [**Op. Cit.**, p. 28]

It should be noted that Yanovsky, editor of the Yiddish language anarchist paper **Freie Arbeiter Stimme** later admitted that Makhno was right. Yanovsky originally believed the charges of anti-Semitism made against Makhno, going so far as ignoring Makhno's appeal to him out of hand. However, by the time of Makhno's death in 1934, Yanovsky had learned the truth:

> *"So strongly biased was I against him [Makhno] at that time I did not think it necessary to find out whether my serious accusation was founded on any real facts during the period of his great fight for real freedom in Russia. Now I know that my accusations of anti-Semitism against Makhno were built entirely on the lies of the Bolsheviks and to the rest of their crimes must be added this great crime of killing his greatness and the purity of this fighter for freedom."*

Due to this, he could not forgive himself for *"so misjudg[ing] a man merely on the basis of calumny by his bitter enemies who more than once shamefully betrayed him, and against whom he fought so heroically."* He also notes that it had *"become known to me that a great many Jewish comrades were heart and soul with Makhno and the whole Makhno movement. Amongst them was one whom I knew well personally, Joseph Zutman of Detroit, and I know that he would not have*

had anything to do with persons, or a movement, which possessed the slightest leaning towards anti-Semitism." [*"appendix,"* **My Visit to the Kremlin**, pp. 36–7]

However, by far the best source to refute claims of anti-Semitism the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:

> *"We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population... One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabethgrad ...*
>
> *"We could cite a whole series of similar facts, but we do not find it necessary ... and will content ourselves with mentioning briefly the following essential facts:*
>
> *"1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.*
>
> *"2. Several members of the Education and Propaganda Commission were Jewish.*
>
> *"3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.*
>
> *"4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.*
>
> *"5. In general the Jewish population, which was very numerous in the Ukraine, took an active part in all the activities of the movement. The Jewish agricultural colonies which were scattered throughout the districts of Mariupol, Berdiansk, Alexandrovsk, etc., participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council.*
>
> *"6. Rich and reactionary Jews certainly had to suffer from the Makhnovist army, not as Jews, but just in the same way as non-Jewish counter-revolutionaries."* [**The Unknown Revolution**, pp. 967–8]

However, it could be claimed that these accounts are from anarchists and so are biased. Ignoring the question of why so many Jewish anarchists should defend Makhno if he was, in fact, a pogromist or anti-Semite, we can turn to non-anarchist sources for confirmation of the fact that Makhno and the Makhnovist movement were not anti-Semites.

First, we turn to Voline, who quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-Semitism. Tcherikover had, for a number of years, had specialised in research on the persecutions of the Jews in Russia. The Jewish historian states

"with certainty that, on the whole, the behaviour of Makhno's army cannot be compared with that of the other armies which were operating in Russian during the events 1917–21. Two facts I can certify absolutely explicitly.

"1. It is undeniable that, of all these armies, including the Red Army, the Makhnovists behaved best with regard the civil population in general and the Jewish population in particular. I have numerous testimonies to this. The proportion of **justified** complaints against the Makhnovist army, in comparison with the others, is negligible.

> *"2. Do not speak of pogroms alleged to have been organised by Makhno himself. That is a slander or an error. Nothing of the sort occurred. As for the Makhnovist Army, I have had hints and precise denunciations on this subject. But, up to the present, every time I have tried to check the facts, I have been obliged to declare that on the day in question no Makhnovist unit could have been at the place indicated, the whole army being far away from there. Upon examining the evidence closely, I established this fact, every time, with absolute certainty, at the place and on the date of the pogrom, no* ***Makhnovist*** *unit was operating or even located in the vicinity.* ***Not once*** *have I been able to prove the existence of a Makhnovist unit at the place a pogrom against the Jews took place. Consequently, the pogroms in question could not have been the work of the Makhnovists."* [quoted by Voline, **Op. Cit.**, p. 699]
>
> This conclusion is confirmed by later historians. Paul Avrich notes that *"[c]harges of Jew-baiting and of anti-Jewish pogroms have come from every quarter, left, right, and centre. Without exception, however, they are based on hearsay, rumour, or intentional slander, and remain undocumented and unproved."* He adds that the *"Soviet propaganda machine was at particular pains to malign Makhno as a bandit and pogromist."* Wishing to verify the conclusions of Tcherikover proved by Voline, Avrich examined several hundred photographs in the Tcherikover Collection, housed in the YIVO Library in New York and depicting anti-Jewish atrocities in the Ukraine during the Civil War. He found that *"only one [was] labelled as being the work of the Makhnovists, though even here neither Makhno himself nor any of his recognisable subordinates are to be seen, nor is there any indication that Makhno had authorised the raid or, indeed, that the band involved was in fact affiliated with his Insurgent Army."* Avrich then states that *"there is evidence that Makhno did all in his power to counteract anti-Semitic tendencies among his followers"* and that *"a considerable number of Jews took part in the Makhnovist movement."* He also points out that the Jewish anarchists Alexander Berkman, Emma Goldman, Sholem Schwartzbard, Voline, Senya Fleshin, and Mollie Steimer did not criticise Makhno as an anti-Semite, they also *"defended him against the campaign of slander that persisted from all sides."* [**Anarchist Portraits**, pp. 122–3] It should be noted that Schwartzbard assassinated the Nationalist leader Petliura in 1926 because he considered him responsible for pogroms conducted by Nationalist troops during the civil war. He shot Petliura the day after he, Makhno and Berkman had seen him at a Russian restaurant in Paris. [Malet, **Op. Cit.**, p. 189]
>
> Michael Malet, in his account of the Makhnovists, states that *"there is overwhelming evidence that Makhno himself was not anti-Semitic."* [**Op. Cit.**, p. 168] He indicates that in the period January to September 1919, the Central Committee of Zionist Organisations in Russia listed the Nationalists as creating 15,000 victims of pogroms, then the Denikinists with 9,500 followed by Hryhoriyiv, Sokolovsky, Struk, Yatsenko and Soviet troops (500 victims). Makhno is not mentioned. Of the pogroms listed,

almost all took place on the western Ukraine, where the local otamany (warlords) and the Nationalists were strong. Very few took place where Makhno's influence predominated, the nearest being in Katerinoslav town and Kherson province; none in the provinces of Katerinoslav or Tavria. It should also be noted that the period of January to June of that year was one of stability within the Makhnovist region, so allowing them the space to apply their ideas. Malet summarises:

> *"Even granted the lower level of Jewish involvement in left-bank trade, the almost total lack of anti-Semitic manifestations would show that Makhno's appeals, at a time when anti-Semitism was fast becoming fashionable, did not go unheeded by the population. There were a number of Jewish colonies in the south-east Ukraine."* [**Op. Cit.**, p. 169]

Unsurprisingly, Malet notes that apart from certain personal considerations (such as his friendship with a number of Jews, including Voline and Yossif the Emigrant), *"the basis of Makhno's hostility to anti-Semitism was his anarchism. Anarchism has always been an international creed, explicitly condemning all forms of racial hatred as incompatible with the freedom of individuals and the society of equals."* And like other serious historians, he points to *"the continual participation in the movement of both intellectual Jews from outside, and Jews from the local colonies"* as *"further proof ... of the low level of anti-Semitism within the Makhnovshchina."* [**Op. Cit.**, p. 171 and pp. 171–2]

Anarchist Serge Cipko summarises the literature by stating that the *"scholarly literature that discusses Makhno's relationships with the Jewish population is of the same opinion [that the Makhnovists were not anti-Semitic] and concur that unlike the Whites, Bolsheviks and other competing groups in Ukraine during the Revolution, the Makhnovists did not engage in pogroms."* [*"Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,"* pp. 57–75, **The Raven**, no. 13, p. 62]

Historian Christopher Reed concurs, noting that *"Makhno actively opposed anti-Semitism ... Not surprisingly, many Jews held prominent positions in the Insurgent movement and Jewish farmers and villagers staunchly supported Makhno in the face of the unrestrained anti-Semitism of Ukrainian nationalists like Grigoriev and of the Great Russian chauvinists like the Whites."* [**Op. Cit.**, pp. 263–4] Arthur E. Adams states that *"Makhno protected Jews and in fact had many serving on his own staff."* [**Bolsheviks in the Urkaine**, p. 402]

We apologise again for labouring this point, but the lie that Makhno and the Makhnovists were anti-Semitic is relatively commonplace and needs to be refuted. As noted, Trotskyists repeat Trotsky's false assertions without correction. Other repeat the lie from other sources. It was essential, therefore, to spend time making the facts available and to nail the lie of Makhnovist anti- Semitism once and for all!

10 Did the Makhnovists hate the city and city workers?

For some reason the Makhnovists have been portrayed as being against the city and even history as such. This assertion is false, although sometimes made. For example, historian Bruce Lincoln

states that Makhno *"had studied the anarchist writings of Bakunin, whose condemnation of cities and large-scale industries fit so well with the anti-urban, anti-industrial feelings of the Ukrainian peasants, and his program was precisely the sort that struck responsive chords in peasant hearts."* [**Red Victory**, p. 325] Lincoln fails to present any evidence for this claim. This is unsurprising as it is doubtful that Makhno read such condemnations in Bakunin as they do not, in fact, exist. Similarly, the Makhnovist *"program"* (like anarchism in general) was not *"anti-urban"* or *"anti-industrial."*

However, Lincoln's inventions are mild compared to Trotsky's. According to Trotsky, *"the followers of Makhno"* were marked by *"hatred for the city and the city worker."* He later gives some more concrete examples of this *"hostility to the city"* which, as with the general peasant revolt, also *"nourished the movement of Makhno, who seized and looted trains marked for the factories, the plants, and the Red Army; tore up railway tracks, shot Communists, etc."* [Lenin and Trotsky, **Kronstadt**, p. 80 and p. 89]

Unsurprisingly, Trotsky simply shows his ignorance of the Makhno movement by these statements. To refute Trotsky's claim we can simply point to how the Makhnovists acted once they occupied a city. As we discuss in section 7, the first thing the Makhnovists did was to call a conference of workers and urge them to organise their own affairs directly, using their own class organs of self-management (soviets, unions, etc.). Hardly the activity of a group of people who allegedly *"hated"* city workers!

We can also point to the fact that the Makhnovists arranged direct exchanges of goods between the towns and country. In early 1918, for example, corn was shipped directly to a Moscow factory in return for textiles (without state interference). In 1919, 1500 tons of grain (and a small amount of coal) was sent by train to Petrograd and Moscow where the commander of the train was to exchange it again for textiles. The initiative in both cases came from the Hulyai Pole peasants. Again, hardly the work of city-hating peasants.

Peter Arshinov indicates the underlying theory behind the Makhnovists as regards the relations between city and country:

> *"The Makhnovshchina ... understands that the victory and consolidation of the revolution ... cannot be realised without a close alliance between the working classes of the cities and those of the countryside. The peasants understand that without urban workers and powerful industrial enterprises they will be deprived of most of the benefits which the social revolution makes possible. Furthermore, they consider the urban workers to be their brothers, members of the same family of workers.*
>
> *"There can be no doubt that, at the moment of the victory of the social revolution, the peasants will give their entire support to the workers. This will be voluntary and truly revolutionary support given directly to the urban proletariat. In the present-day situation [under the Bolsheviks], the bread taken by force from the peasants nourishes mainly the enormous governmental machine. The peasants see and understand perfectly that this expensive bureaucratic machine is not in any way needed by them or by the workers, and that in relation to the workers it plays the same role as that of a prison administration toward the inmates. This is why the peasants do not have the slightest desire to give their bread voluntarily to the State. This is why they are so hostile in their relations with the contemporary tax collectors — the commissars and the various supply organs of the State.*

> *"But the peasants always try to enter into **direct** relations with the urban workers. The question was raised more than once at peasant congresses, and the peasants always resolved it in a revolutionary and positive manner."* [**Op. Cit.**, p. 258]

Simply put, Trotsky misinterprets hostility to the repressive policies of the Bolshevik dictatorship with hostility to the city.

Moreover, ignoring the **actual** relationships of the Makhnovists with the city workers, we can fault Trotsky's arguments without resource to such minor things as facts. This is because every one of his "examples" of *"hatred for the city and the city worker"* can be explained by more common sense arguments.

As regards the destruction of trains and railway tracks, a far simpler and more plausible explanation can be found than Trotsky's *"hostility to the city."* This is the fact that a civil war was taking place. Both the Reds and Whites used armoured trains to move troops and as bases of operations. To destroy the means by which your enemy attacks you is common sense! Equally, in the chaotic times of the war, resources were often in low supply and in order to survive the Makhnovists had to *"loot"* trains (needless to say, Trotsky does not explain how the Makhnovists knew the trains were *"marked for the factories."*). It should be noted that the Bolsheviks *"looted"* the countryside, can we surmise that the Bolsheviks simply expressed *"hostility to the village"*?

As regards the shooting of Communists, a far simpler and more plausible explanation also exists. Rather than show *"hostility to the city,"* it shows *"hostility"* to the Communist Party, its policies and its authoritarian ideas. Given that the Bolsheviks had betrayed the Makhnovists on ***three*** occasions (see section 13) and attacked them, *"hostility"* to Communists seems a sensible position to take! Equally, the first Bolshevik attack on the Makhnovists occurred in mid-1919, when the Bolsheviks began justifying their party dictatorship as essential for the success of the revolution. The other two occurred in 1920, when the Bolsheviks were announcing to the whole world at the Communist International (to quote Zinoviev) that *"the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress 1920**, vol. 1, p. 152] Given this, perhaps the fact that the Makhnovists shot Communists can be explained in terms of defence against Bolshevik betrayal and opposition to the dictatorship of the Communist Party rather than *"hostility to the city."* Needless to say, the Communists shot Makhnovists and anarchists. What does that suggest a *"hostility"* to by the Bolsheviks? Working-class autonomy and freedom?

Clearly, Trotsky was clutching at straws in his smearing of the Makhnovist movement as haters of the city worker. The *"hostility"* Trotsky speaks of can be far more easily explained in terms of the necessities imposed upon the Makhnovists by the civil war and the betrayals of the Bolsheviks. As such, it would be fairer to state that the Makhnovists showed *"hostility"* or *"hatred"* to the city or city workers only if you equate both with the Bolshevik party dictatorship. In other words, the Makhnovists showed *"hostility"* to the new ruling class of the Communist Party hierarchy.

All this does not mean that there were not misunderstandings between the Makhno movement, a predominantly rural movement, and the workers in the cities. Far from it. Equally, it can be said that the Makhnovists did not understand the workings of an urban economy and society as well as they understood their own. However, they made no attempt to **impose** their worldview on the city workers (unlike the Bolsheviks, who did so on both urban and rural workers).

However, ignorance of the city and its resulting misunderstandings do not constitute *"hostility"* or *"hatred."*

Moreover, where these misunderstandings developed show that the claims that the Makhnovists hated the city workers are simply false. Simply put, the misunderstanding occurred when the Makhnovists had liberated cities from the Whites. As we discussed in section 7, the first thing the Makhnovists did was to call a conference of workers' delegates to discuss the current situation and to urge them to form soviets, unions and co-operatives in order to manage their own affairs. This hardly shows *"hatred"* of the city worker. In contrast, the first thing the Bolsheviks did in taking a city was to form a *"revolutionary committee"* to govern the town and implement Bolshevik policy.

This, needless to say, shows a distinct *"hostility"* to the city workers on the part of the Bolsheviks. Equally, the Bolshevik advocacy of party dictatorship to overcome the *"wavering"* of the working class. In the words of Trotsky himself (in 1921):

> *"The Workers' Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers' right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers' democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party. which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy."* [quoted by Samuel Farber, **Before Stalinism**, p. 209]

Opposing workers' democracy because working people could make decisions that the party thought were wrong shows a deep *"hostility"* to the **real** city workers and their liberty and equality. Equally, Bolshevik repression of workers' strikes, freedom of speech, assembly, organisation and self-determination shows far more *"hostility"* to the city worker than a few Makhnovist misunderstandings!

All in all, any claim that the Makhnovists *"hated"* city workers is simply false. While some Makhnovists may not have liked the city nor really understood the complexities of an urban economy, they did recognise the importance of encouraging working-class autonomy and self-organisation within them and building links between the rural and urban toilers. While the lack of a large-scale anarcho-syndicalist movement hindered any positive construction, the Makhnovists at least tried to promote urban self-management. Given Bolshevik authoritarianism and its various rationalisations, it would be fairer to say that it was the Bolsheviks who expressed *"hostility"* to the city workers by imposing their dictatorship upon them rather than supporting working-class self-management as the Makhnovists did!

11 Were the Makhnovists nationalists?

Some books on the Makhnovist movement try to present the Makhnovists as being Ukrainian nationalists. A few discuss the matter in order, perhaps, to increase the respectability of the Makhnovist movement by associating it with a more *"serious"* and *"respectable"* political theory than anarchism, namely *"Nationalism."* Those who seriously investigate the issue come to the

same conclusion, namely that neither Makhno nor the Makhnovist movement was nationalist (see, for example, Frank Sysyn's essay **Nestor Makhno and the Ukrainian Revolution** which discusses this issue).

Therefore, any claims that the Makhnovists were nationalists are incorrect. The Makhnovist movement was first and foremost an internationalist movement of working people. This is to be expected as anarchists have long argued that nationalism is a cross-class movement which aims to maintain the existing class system but without foreign domination (see section D.6 for details). As such, the Makhnovists were well aware that nationalism could not solve the social question and would simply replace a Russian ruling class and state with a Ukrainian one.

This meant that the aims of the Makhnovists went further than simply national liberation or self-determination. Anarchists, rather, aim for working-class self-liberation and self-determination, both as individuals and as groups, as well as politically, economically and socially. To quote Makhno's wire to Lenin in December 1918, the Makhnovist *"aims are known and clear to all. They are fighting against the authority of all political governments and for liberty and independence of the working people."* [quoted by Palij, **Op. Cit.**, p. 80]

From this class and anti-hierarchical perspective, it is not unsurprising that the Makhnovists were not nationalists. They did not seek Ukrainian independence but rather working- class autonomy. This, of necessity, meant they opposed all those who aimed to govern and/or exploit the working class. Hence Arshinov:

> *"Composed of the poorest peasants, who were united by the fact that they all worked with their own hands, the Makhnovist movement was founded on the deep feeling of fraternity which characterises only the most oppressed. During its entire history it did not for an instant appeal to national sentiments. The whole struggle of the Makhnovists against the Bolsheviks was conducted solely in the name of the rights and interests of the workers. Denikin's troops, the Austro-Germans, Petliura, the French troops in Berdyansk, Wrangel — were all treated by the Makhnovists as enemies of the workers. Each one of these invasions represented for them essentially a threat to the workers, and the Makhnovists had no interest in the national flag under which they marched."* [**Op. Cit.**, p. 210]

He stressed that *"national prejudices had no place in the Makhnovshchina. There was also no place in the movement for religious prejudices ... Among modern social movements, the Makhnovshchina was one of the few in which an individual had absolutely no interest in his own or his neighbour's religion or nationality, in which he respected only the labour and the freedom of the worker."* [**Op. Cit.**, p. 211]

The Makhnovists made their position on nationalism clear in the 'Declaration' published by the Revolutionary Military Council of the army in October, 1919:

> *"When speaking of Ukrainian independence, we do not mean national independence in Petliura's sense but the social independence of workers and peasants. We declare that Ukrainian, and all other, working people have the right to self-determination not as an 'independent nation' but as 'independent workers'"* [quoted by Arshinov, **Op. Cit.**, p. 210]

In other words, the Makhnovists *"declared, that in their option **Petlurovtchina** [the Petliura movement, Petliura being the leader of the Nationalists] was a bourgeois nationalist movement whose road was entirely different from that of the revolutionary peasants, that the Ukraine should be organised on a basis of free labour and the independence of the peasants and the workers ... and that nothing but struggle was possible between the **Makhnovitchina** , the movement of the workers, and the **Petlurovtchina** , the movement of the bourgeoisie."* [Voline, **Op. Cit.**, p. 572]

This does not mean that anarchists are indifferent to cultural and national domination and oppression. Far from it! As we discussed in sections D.6 and D.7, anarchists are against foreign domination and cultural imperialism, believing that every community or national group has the right to be itself and develop as it sees fit. This means that anarchists seek to transform national liberation struggles into **human** liberation struggles, turning any struggle against foreign oppression and domination into a struggle against **all** forms of oppression and domination.

This means that the Makhnovists, like anarchists in general, seek to encourage local culture and language while opposed nationalism. As Frank Sysyn argues, it *"would be a mistake ... to label the Makhnivtsi as 'anti-Ukrainian.' Although they opposed the political goals of most 'svidomi ukraintsi' (nationally conscious Ukrainians), they accepted the existence of a Ukrainian nation and used the terms 'Ukraine' and 'Ukrainian.'"* [**Nestor Makhno and the Ukrainian Revolution**, p. 288] It should be noted that opponents of Ukrainian independence generally called it the *"south of Russia"* or *"Little Russia."*

Thus an opposition to nationalism did not imply a rejection or blindness to foreign domination and free cultural expression. On the question of the language to be taught in schools, the Cultural-Educational Section of the Makhnovist Insurgent Army wrote the following in October, 1919:

> "The cultural-educational section of the Makhnovist army constantly receives questions from school teachers asking about the language in which instruction should be given in the schools, now that Denikin's troops have been expelled.
>
> "The revolutionary insurgents, holding to the principles of true socialism, cannot in any field or by any measure do violence to the natural desires and needs of the Ukrainian people. This is why the question of the language to be taught in the schools cannot be solved by our army, but can only be decided by the people themselves, by parents, teachers and students
>
> "It goes without saying that all the orders of Denikin's so-called 'Special Bureau' as well as General Mai-Maevsky's order No. 22, which forbids the use of the mother tongue in the schools, are null and void, having been forcibly imposed on the schools.
>
> "In the interest of the greatest intellectual development of the people, the language of instruction should be that toward which the local population naturally tends, and this is why the population, the students, the teachers and the parents, and not authorities or the army, should freely and independently resolve this question." [quoted by Arshinov, **Op. Cit.**, pp. 210–1]

They also printed a Ukrainian version of their paper (*"The Road to Freedom"*).

Clearly their opposition to Ukrainian nationalism did not mean that the Makhnovists were indifferent to imperialism and foreign political or cultural domination. This explains why Makhno criticised his enemies for anti-Ukrainian actions and language. Michael Malet summarises, for

the Makhnovists *"Ukrainian culture was welcome, but political nationalism was highly suspect."* [**Op. Cit.**, p. 143]

Given anarchist support for federal organisation from below upwards, working-class self-determination and autonomy, plus a healthy respect for local culture, it is easy to see why some historians have fostered a nationalist perspective onto the Makhnovists where none existed. This means that when they agitated with the slogan *"All to whom freedom and independence are dear should stay in the Ukraine and fight the Denikinists,"* it should be noted that *"[n]owhere .... nationalism openly advocated, and the line of argument put forward can more easily be interpreted as libertarian and, above all, anti-White."* [Malet, **Op. Cit.**, p. 146]

In 1928, Makhno wrote a rebuttal to a Soviet historian's claim that Makhno became a Ukrainian Nationalist during the 1920–21 period. He *"totally dismissed the charges"* and argued that the historian *"distorted anarchism's espousal of local autonomy so as to create trumped-up charges of nationalism."* As Sysyn argues, while Makhno *"never became a nationalist, he did to a degree become a Ukrainian anarchist."* [**Op. Cit.**, p. 292 and p. 303]

Thus while neither Makhno nor the movement were nationalists, they were not blind to national and cultural oppression. They considered nationalism as too narrow a goal to satisfy the **social** aspirations of the working classes. As Makhno argued in exile, the Ukrainian toilers had *"asserted their rights to use their own language and their entitlement to their own culture, which had been regarded before the revolution as anathema. They also asserted their right to conform in their lives to their own way of life and specific customs."* However, *"[i]n the aim of building an independent Ukrainian State, certain statist gentlemen would dearly love to arrogate to themselves all natural manifestations of Ukrainian reality."* Yet the *"healthy instincts of the Ukrainian toilers and their baleful life under the Bolshevik yoke has not made them oblivious of the State danger in general"* and so they *"shun the chauvinist trend and do not mix it up with their social aspirations, rather seeking their own road to emancipation."* [**The Struggle Against the State and Other Essays**, pp. 24–5]

In summary, the Makhnovists were opposed to nationalism but supported culture diversity and self-determination within a free federation of toilers communes and councils. They did not limit their aims to national liberation, but rather sought the self-liberation of the working classes from every oppression — foreign or domestic, economic or political, cultural or social.

12 Did the Makhnovists support the Whites?

No, they did not. However, black propaganda by the Bolsheviks stated they did. Victor Serge wrote about the *"strenuous calumnies put out by the Communist Party"* against him *"which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them."* [**Memoirs of a Revolutionary**, p. 122]

According to Arshinov, *"Soviet newspapers spread the false news of an alliance between Makhno and Wrangel"* and in the summer of 1920, a representative of the Kharkov government *"declared at the Plenary Session of the Ekaterinoslav Soviet, that Soviet authorities had written proof of the alliance between Makhno and Wrangel. This was obviously an intentional lie."* Wrangel, perhaps believing these lies had some basis, sent a messenger to Makhno in July, 1920. *"Wrangel's messenger was immediately executed"* and the *"entire incident was reported in the Makhnovist press. All this was perfectly clear to the Bolsheviks. They nevertheless continued to trumpet the alliance between Makhno and Wrangel. It was only after a military-political agreement had been concluded*

between the Makhnovists and the Soviet power that the Soviet Commissariat of War announced that there had never been an alliance between Makhno and Wrangel, that earlier Soviet assertions to this effect were an error." [**Op. Cit.**, pp. 173–5]

Needless to say, while the Bolsheviks spread the rumour to discredit Makhno, the Whites spread it to win the confidence of the peasants. Thus when Trotsky stated that Wrangel had *"united with the Ukrainian partisan Makhno,"* he was aiding the efforts of Wrangel to learn from previous White mistakes and build some kind of popular base. [quoted by Palij, **Op. Cit.**, p. 220] By October, Trotsky had retracted this statement:

> *"Wrangel really tried to come into direct contact with Makhno's men and dispatched to Makhno's headquarters two representatives for negotiations ... [However] Makhno's men not only did not enter into negotiations with the representatives of Wrangel, but publicly hanged them as soon as they arrived at the headquarters."* [quoted by Palij, **Ibid.**]

Trotsky, of course, still tried to blacken the Makhnovists. In the same article he argued that *"[u]ndoubtedly Makhno actually co-operated with Wrangel, and also with the Polish* ***szlachta****, as he fought with them against the Red Army. However, there was no formal alliance between them. All the documents mentioning a formal alliance were fabricated by Wrangel ... All this fabrication was made to deceive the protectors of Makhno, the French, and other imperialists."* [quoted by Palij, **Op. Cit.**, p. 225]

It is hard to know where to start in this amazing piece of political story-telling. As we discuss in more detail in section 13, the Makhnovists were fighting the Red Army from January to September 1920 because the Bolsheviks had engineered their outlawing! As historian David Footman points out, the attempt by the Bolsheviks to transfer Makhno to Polish front was done for political reasons:

> *"it is admitted on the Soviet side that this order was primarily 'dictated by the necessity' of liquidating* ***Makhnovshchina*** *as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence"* [**Op. Cit.**, p. 291]

Indeed, it could be argued that by attacking Makhno in January helped the Whites to regroup under Wrangel and return later in the year. Equally, it seems like a bad joke for Trotsky to blame the victim of Bolshevik intrigues for defending themselves. And the idea that Makhno had *"protectors"* in any imperialist nation is a joke, which deserves only laughter as a response!

It should be noted that it is *"agreed that the initiative for joint action against Wrangel came from the Makhnovites."* This was ignored by the Bolsheviks until after *"Wrangel started his big offensive"* in September 1920 [Footman, **Op. Cit.**, p. 294 and p. 295]

So while the Bolsheviks claimed that the Makhnovists had made a pact with General Wrangel, the facts are that Makhnovists fought the Whites with all their energy. Indeed, they considered the Whites so great a threat to the revolution they even agreed to pursue a pact with the Bolsheviks, who had betrayed them twice already and had subjected both them and the peasantry to repression. As such, it could be argued that the Bolsheviks were the only counter-revolutionaries the Makhnovists can be accurately accused of collaborating with.

Every historian who has studied the movement has refuted claims that the Makhnovist movement made any alliance with the counter-revolutionary White forces. For example, Michael Palij notes that Denikin *"was the main enemy that Makhno fought, stubbornly and uncompromising, from the end of 1918 to the end of 1919. Its social and anti-Ukrainian policies greatly antagonised all segments of Ukrainian society. The result of this was an increased resistance to the Volunteer Army and its regime and a substantial strengthening of the Makhno movement."* He also notes that after several months of *"hard fighting"* Denikin's troops *"came to regard Makhno's army as their most formidable enemy."* Makhno's conflict with Wrangel was equally as fierce and *"[a]lthough Makhno had fought both the Bolsheviks and Wrangel, his contribution to the final defeat of the latter was essential, as is proved by the efforts of both sides to have him as an ally."* [**Op. Cit.**, p. 177, p. 202 and p. 228] According to Footman, Makhno *"remained to the end the implacable enemy of the Whites."* [**Op. Cit.**, p. 295] Malet just states the obvious: *"The Makhnovists were totally opposed to the Whites."* [**Op. Cit.**, p. 140]

We will leave the last word to the considered judgement of the White General Denikin who, in exile, stated that the Makhno movement was *"the most antagonistic to the idea of the White movement."* [quoted by Malet, **Op. Cit.**, p. 140]

In summary, the Makhnovists fought the White counter-revolution with all their might, playing a key role in the struggle and defeat of both Denikin and Wrangel. Anyone who claims that they worked with the Whites is either ignorant or a liar.

13 What was the relationship of the Bolsheviks to the movement?

The Makhnovists worked with the Bolsheviks in three periods. The first (and longest) was against Denikin after the Red Army had entered the Ukraine after the withdrawal of the Austro-Germans. The second was an informal agreement for a short period after Denikin had been defeated. The third was a formal political and military agreement between October and November 1920 in the struggle against Wrangel. Each period of co-operation ended with Bolshevik betrayal and conflict between the two forces.

As such, the relationship of the Bolsheviks to the Makhnovists was one of, at best, hostile co-operation against a common enemy. Usually, it was one of conflict. This was due, fundamentally, to two different concepts of social revolution. While the Makhnovists, as anarchists, believed in working-class self-management and autonomy, the Bolsheviks believed that only a centralised state structure (headed by themselves) could ensure the success of the revolution. By equating working-class power with Bolshevik party government (and from 1919 onwards, with the dictatorship of the Bolshevik party), they could not help viewing the Makhnovist movement as a threat to their power (see section 14 for a discussion of the political differences and the evolving nature of the Bolshevik's conception of party rule).

Such a perspective ensured that they could only co-operate during periods when the White threat seemed most dangerous. As soon as the threat was defeated or they felt strong enough, the Bolsheviks turned on their former allies instantly. This section discusses each of the Bolshevik betrayals and the subsequent conflicts. As such, it is naturally broken up into three parts, reflecting each of the betrayals and their aftermath.

Michael Malet sums up the usual Bolshevik-Makhnovist relationship by arguing that it *"will be apparent that the aim of the Soviet government from the spring of 1919 onwards was to destroy the Makhnovists as an independent force, preferably killing Makhno himself in the process .. . Given*

the disastrous nature of Bolshevik land policy ... this was not only unsurprisingly, it was inevitable." He also adds that the *"fact that Makhno had a socio-political philosophy to back up his arguments only made the Bolsheviks more determined to break his hold over the south-east Ukraine, as soon as they realised that Nestor would not surrender that hold voluntarily."* [**Op. Cit.**, p. 128 and p. 129]

The first betrayal occurred in June 1919. The Makhnovists had been integrated with the Red Army in late January 1919, retaining their internal organisation (including the election of commanders) and their black flags. With the Red Army they fought against Denikin's Volunteer Army. Before the arrival of Red forces in their region and the subsequent pact, the Makhnovists had organised a successful regional insurgent, peasant and worker congress which had agreed to call a second for February 12th. This second congress set up a Revolutionary Military Soviet to implement the decisions of this and following congresses. This congress (see section 7) passed an anti-Bolshevik resolution, which urged *"the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution."* Such actions included the monopolisation of the revolution, centralising power and overriding local soviets, repressing anarchists and Left Socialist Revolutionaries and *"stifling any manifestation of revolutionary expression."* [quoted by Palij, **Op. Cit.**, p. 154]

This change from the recent welcome was simply the behaviour of the Bolsheviks since their arrival. The (unelected) Ukrainian Bolshevik government had tried to apply the same tactics as its Russian equivalent, particularly as regards the peasants. In addition, the Bolshevik land policy (as indicated in section 8) was a complete disaster, alien to the ideas and needs of the peasants and, combined with grain requisitioning, alienating them.

The third congress was held on the 10th of April. By this time, Communist agricultural policy and terrorism had alienated all the peasantry, who *"rich and poor alike"* were *"united in their opposition"* to the Bolsheviks. [Footman, **Op. Cit.**, p. 269] Indeed, the *"poorer the areas, the more dissatisfied were the peasants with the Bolshevik decrees."* [Palij, **Op. Cit.**, p. 156] As we indicated in section 7, the third congress was informed that it was *"counter-revolutionary"* and banned by the Bolshevik commander Dybenko, provoking a famous reply which stressed the right of a revolutionary people to apply the gains of that revolution when they see fit. It is worth re-quoting the relevant section:

> *"Can there exist laws made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves? ...*
>
> *"Is it permissible, is it admissible, that they should come to the country to establish laws of violence, to subjugate a people who have just overthrown all lawmakers and all laws?*
>
> *"Does there exist a law according to which a revolutionary has the right to apply the most severe penalties to a revolutionary mass, of which he calls himself the defender, simply because this mass has taken the good things which the revolution promised them, freedom and equality, without his permission?*
>
> *"Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the freedom which they have just conquered?*
>
> *"Do the laws of the revolution order the shooting of a delegate because he believes he ought to carry out the mandate given him by the revolutionary mass which elected him?*

> *"Whose interests should the revolutionary defend; those of the Party or those of the people who set the revolution in motion with their blood?"* [quoted by Arshinov, **Op. Cit.**, p. 103]

After the 3rd congress, the Bolsheviks started to turn against Makhno:

> *"It was now that favourable mention of Makhno ceased to appear in the Soviet Press; an increasingly critical note became apparent. Supplies failed to get through to Makhnovite units and areas."* [Footman, **Op. Cit.**, p. 271]

Lenin himself advised local Bolshevik leaders on Makhno, stating in early May that *"temporarily, while Rostov is not yet captured, it is necessary to be diplomatic."* [quoted by Arthur E. Adams, **Bolsheviks in the Ukraine**, pp. 352–3] Thus, as long as the Bolsheviks needed cannon fodder, Makhno was to be tolerated. Things changed when Trotsky arrived. On May 17th he promised a *"radical and merciless liquidation of partisanshchina [the partisan movement], independence, hooliganism, and leftism."* [quoted by Adams, **Op. Cit.**, p. 360] According to one historian, Trotsky *"favoured a thorough-going annihilation of the partisan's ideological leaders as well as men like Hryhoriyov who wielded political power."* [Adams, **Op. Cit.**, p. 360] Unsurprisingly, given Trotsky's stated mission, Bolshevik hostility towards the Makhnovists became more than mere words. It took the form of both direct and indirect aggression. *"In the latter part of May,"* states Footman, *"the **Cheka** sent over two agents to assassinate Makhno."* Around the same time, the Red *"hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition."* [**Op. Cit.**, p. 271 and p. 272] This, obviously, had a negative impact the Makhnovists' ability to fight the Whites.

Due to the gravity of the military and political situations both at and behind the front, the Makhnovist Revolutionary Military Soviet decided to call an extraordinary congress of peasants, workers, insurgents and Red soldiers. This congress was to determine the immediate tasks and the practical measures to be taken by the workers to remedy the mortal danger represented by the Whites. On May 31st, a call was sent out which stated, in part, *"that only the working masses themselves can find a solution [to the current problem], and not individuals or parties."* The congress would be based as follows: *"elections of delegates of peasants and workers will take place at general assemblies of villages, towns, factories and workshops."* [quoted by Arshinov, **Op. Cit.**, p. 121]

The Bolshevik reply came quickly, with Trotsky issuing his infamous Order no. 1824 on June 4th:

> *"This Congress is directed squarely against the Soviet Power in the Ukraine and against the organisation of the southern front, where Makhno's brigade is stationed. This congress can have no other result then to excite some new disgraceful revolt like that of Grigor'ev, and to open the front to the Whites, before whom Makhno's brigade can only retreat incessantly on account of the incompetence, criminal designs and treason of its commanders.*
>
> *"1. By the present order this congress is forbidden, and will in no circumstances be allowed to take place.*
>
> *"2. All the peasant and working class population shall be warned. orally and in writing, that participation in the said congress will be considered an act of high treason against the Soviet Republic and the Soviet front.*

"3. All delegates to the said Congress shall be arrested immediately and bought before the Revolutionary Military Tribunal of the 14th, formerly 2nd, Army of the Ukraine.

"4. The persons spreading the call of Makhno and the Hulyai Pole Executive Committee to the Congress shall likewise be arrested.

"5. The present order shall have the force of law as soon as it is telegraphed. It should be widely distributed, displayed in all public places, and sent to the representatives of the executive committees of towns and villages, as well as to all the representatives of Soviet authority, and to commanders and commissars of military units." [quoted by Arshinov, **Op. Cit.**, pp. 122–3]

Arshinov argues that this *"document is truly classic"* and *"[w]hoever studies the Russian revolution should learn it by heart."* He compares Trotsky's order to the reply the Makhnovists had sent to the Bolsheviks' attempt to ban the third congress. Clearly, Order No. 1824 shows that laws did exist *"made by a a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves"*! Equally, the order shows that *"a revolutionary has the right to apply the most severe penalties to a revolutionary mass ... simply because this mass has taken the good things which the revolution has promised them, freedom and equality, without his permission"*! Little wonder Arshinov states that this order meant that the *"entire peasant and labouring population are declared guilty of high treason if they dare to participate in their own free congress."* [**Op. Cit.**, p. 123]

According to Voline, in Alexandrovsk *"all workers meetings planned for the purpose of discussing the call of the Council and the agenda of the Congress were forbidden under pain of death. Those which were organised in ignorance of the order were dispersed by armed force. In other cities and towns, the Bolsheviks acted in the same way. As for the peasants in the villages, they were treated with still less ceremony; in many places militants and even peasants 'suspected of acting in favour of the insurgents and the Congress' were seized and executed after a semblance of a trial. Many peasants carrying the call were arrested, 'tried' and shot, before they could even find out about Order No. 1824."* [**Op. Cit.**, pp. 599–600]

As Arshinov summarises:

"This entire document represents such a crying usurpation of the rights of the workers that it is pointless to comment further on it." [**Op. Cit.**, p. 124]

Trotsky continued his usurpation of the rights of the workers in a later order on the congress. In this, Trotsky called this openly announced workers, peasant and insurgent congress a *"conspiracy against Soviet power"* and a *"congress of Anarchist-kulaks delegates for struggle against the Red Army and the Soviet power"* (which explains why the congress organisers had asked that hotbed of kulakism, the Red Army troops, to send delegates!). Trotsky indicated the fate of those workers and peasants who dared participate in their own revolution: *"There can be only one penalty for these individuals: shooting."* [**How the Revolution Armed**, vol. II, p. 293]

Trotsky also ordered the arrest of Makhno, who escaped but who ordered his troops to remain under Bolshevik command to ensure that the front against Denikin was maintained. However, five members of his staff were shot for having distributed literature concerning the banned fourth congress. This order was the first step in the Bolshevik attempt to *"liquidate the Makhnovist movement."* This campaign saw Bolshevik regiments invade the insurgent area, shooting militants on

the spot and destroying the free communes and other Makhnovist organisations. [Arshinov, **Op. Cit.**, p. 121] It should be noted that during the Spanish Revolution, the Stalinists acted in the same way, attacking rural collectives while the anarchist troops fought against Franco at the front.

Thus the participating event for the break between the Makhnovists and Bolsheviks was Trotsky's banning of the fourth regional congress. However, this was preceded by an intense press campaign against the Makhnovists as well as holding back of essential supplies from the frontline troops. Clearly the Bolsheviks considered that the soviet system was threatened if soviet conferences were called and that the "dictatorship of the proletariat" was undermined if the proletariat took part in the revolutionary process!

With the Makhnovist front weakened, they could not hold against Denikin's attacks, particularly when Red Army troops retreated on their flank. Thus, the front which the Makhnovists themselves had formed and held for more than six months was finally broken. [Arshinov, **Op. Cit.**, p. 124] The Red Army was split into three and the Whites entered the Ukraine, which the Bolsheviks promptly abandoned to its fate. The Makhnovists, drawing stray Red Army and other forces to it, continued to fight the Whites, ultimately inflicting a decisive defeat on them at Peregonovka, subsequently destroying their supply lines and ensuring Denikin's defeat (see section 4).

The Red Army re-entered the Ukraine at the end of 1919. Bolshevik plans with regard to the Makhnovists had already been decided in a secret order written by Trotsky on December 11th. Red Army troops had to *"be protected against infection by guerrilla-ism and Makhnovism"* by various means, including *"extensive agitation"* which used *"examples from the past to show the treacherous role played by the Makhnovites."* A *"considerable number of agents"* would be sent *"ahead"* of the main forces to *"join the guerrilla detachments"* and would agitate against *"guerrilla-ism."* Once partisan forces meet with Red Army troops, the former *"ceases to be a military unit after it has appeared on our side of the line ... From that moment it becomes merely material for processing, and for that purpose is to be sent to our rear."* To *"secure complete subordination of the detachments,"* the Red forces *"must make use of the agents previously set to these detachments."* The aim, simply put, was to ensure that the partisans became *"fully subordinate to our command."* If the partisans who had been fighting for revolution and against the Whites opposed becoming *"material for processing"* (i.e cannon fodder), *"refuses to submit to orders, displays unruliness and self-will,"* then it *"must be subjected to ruthless punishment."* Recognising the organic links the partisans had with the peasants, Trotsky argues that *"in the Ukraine, guerrilla detachments appear and disappear with ease, dissolving themselves into the mass of the armed peasant population"* and so *"a fundamental condition for the success against guerrilla-ism is* ***unconditional disarmament of the rural population, without exception.****"* [Trotsky, **How the Revolution Armed**, vol. II, pp. 440–2] As events would show, the Bolsheviks implemented Trotsky's order to the letter.

On December 24th, Makhno's troops met with the Bolshevik 14th army and its commander *"admitted Makhno's service in defeating Denikin."* However, while *"the Bolsheviks fraternised with the Makhno troops ... they distrusted Makhno, fearing the popularity he had gained as a result of his successful fighting against Denikin."* The Bolsheviks had *"no intention of tolerating Makhno's independent policy, but hoped first to destroy his army by removing it from its own base. With this in mind, on January 8th, 1920, the Revolutionary Military Council of the Fourteenth Army ordered Makhno to move to the Polish Front ... The author of the order realised that there was no real war between the Poles and the Bolsheviks at the time and he also knew that Makhno would not abandon*

his region..... Uborevich [the author] explained that 'an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next steps' ... [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.'" [Palij, **Op. Cit.**, p. 209 and p. 210] As can be seen, these actions fit perfectly with Trotsky's secret order and with Bolshevik desire for a monopoly of power for itself (see next section).

As expected, the Makhnovists refused to leave their territory. They realised the political motivations behind the order. As Arshinov notes, *"[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this."* [**Op. Cit.**, p. 163] As well as political objections, the Makhnovists listed practical reasons for not going. Firstly, *"the Insurrectionary Army was subordinate neither to the 14th Corps nor to any other unit of the Red Army. The Red commander had no authority to give orders to the Insurrectionary Army."* Secondly, *"it was materially impossible to carry it out, since half the men, as well as nearly all the commanders and staff, and Makhno himself, were sick [with typhus]."* Thirdly, *"the fighting qualities and revolutionary usefulness of the Insurrectionary Army were certainly much greater on their own ground."* [Voline, **Op. Cit.**, pp. 650–1]

The Bolsheviks refused to discuss the issue and on the 14th of January, they declared the Makhnovists outlawed. They then *"made a great effort to destroy"* Makhno. [Palij, **Op. Cit.**, p. 210] In summary, the Bolsheviks **started** the conflict in order to eliminate opposition to their power. This led to nine months of bitter fighting between the Red Army and the Makhnovists. To prevent fraternisation, the Bolsheviks did not use local troops and instead imported Latvian, Estonian and Chinese troops. They also used other *"new tactics,"* and *"attacked not only Makhno's partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved."* They also set up *"Committees of the Poor"* as part of the Bolshevik administrative apparatus, which acted as *"informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans."* [Palij, **Op. Cit.**, pp. 212–3]

This conflict undoubtedly gave time for the Whites to reorganise themselves and encouraged the Poles to invade the Ukraine, so prolonging the Civil War. The Makhnovists were threatened by both the Bolsheviks **and** Wrangel. By mid-1920, Wrangel appeared to be gaining the upper hand and the Makhnovists *"could not remain indifferent to Wrangel's advance ... Everything done to destroy him would in the last analysis benefit the revolution."* This lead the Makhnovists to consider allying with the Bolsheviks as *"the difference between the Communists and Wrangel was that the Communists had the support of the masses with faith in the revolution. It is true that these masses were cynically misled by the Communists, who exploited the revolutionary enthusiasm of the workers in the interests of Bolshevik power."* With this in mind, the Makhnovists agreed at a mass assembly to make an alliance with the Bolsheviks against Wrangel as this would eliminate the White threat and end the civil war. [Arshinov, **Op. Cit.**, p. 176]

The Bolsheviks ignored the Makhnovist offer using mid-September, when *"Wrangel's success caused the Bolsheviks leaders to reconsider."* [Palij, **Op. Cit.**, p. 223] Sometime between the 10th and 15th of October the final agreement was signed:

> *"Part I — Political Agreement.*
>
> *"1. Immediate release of all Makhnovists and anarchists imprisoned or in exile in the territories of the Soviet Republic; cessation of all persecutions of Makhnovists or anarchists, except those who carry on armed conflict against the Soviet Government.*
>
> *"2. Complete freedom in all forms of public expression and propaganda for all Makhnovists and anarchists, for their principles and ideas, in speech and the press, with the exception of anything that might call for the violent overthrow of the Soviet Government, and on condition that the requirements of military censorship be respected. For all kinds of publications, the Makhnovists and anarchists, as revolutionary organisations recognised by the Soviet Government may make use of the technical apparatus of the Soviet State, while naturally submitting to the technical rules for publication.*
>
> *"3. Free participation in elections to the Soviets; and the right of Makhnovists and anarchists to be elected thereto. Free participation in the organisation of the forthcoming Fifth Pan-Ukrainian Congress of Soviets ...*
>
> *"Part II — Military Agreement.*
>
> *"1. The Ukrainian Revolutionary Insurrectionary Army (Makhnovist) will join the armed forces of the Republic as a partisan army, subordinate, in regard to operations, to the supreme command of the Red Army; it will retain its established internal structure, and does not have to adopt the bases and principles of the regular Red Army.*
>
> *"2. When crossing Soviet territory at the front, or going between fronts, the Insurrectionary Army will not accept into its ranks neither any detachments of, nor deserters from, the Red Army ...*
>
> *"3. For the purpose of destroying the common enemy — the White Army — the Ukrainian Revolutionary Insurrectionary Army (Makhnovists) will inform the working masses that collaborate with it the agreement that has been concluded; it will call upon the people to cease all military actions hostile to the Soviet power; and for its part, the Soviet power will immediately publish the clauses of the agreement.*
>
> *"4. The families of combatants of the Makhnovist Revolutionary Insurrectionary Army living in the territory of the Soviet Republic shall enjoy the same rights as those of soldiers of the Red Army ..."* [quoted by Arshinov, **Op. Cit.**, p. 178]

This agreement was agreed by both sides, although the Bolsheviks immediately broke it by publishing the military agreement first, followed by the political agreement a week later, so obscuring the real meaning of the pact. As it stands, the political clause simply gave anarchists and Makhnovists the rights they should have already had, according to the constitution of the Soviet state. This shows how far the Bolsheviks had applied that constitution.

The agreement is highly significant as in itself it disproves many of the Bolsheviks slanders about the Makhnovists and it proves the suppression of the anarchist press to have been on political grounds.

However, the Makhnovists desired to add a fourth clause to the Political Agreement:

> *"Since one of the essential principles of the Makhnovist movement is the struggle for the self-management of the workers, the Insurrectionary Army (Makhnovist) believes it should insist on the following fourth point of the political agreement: in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management; these institutions will be autonomous and joined in federation, by means of agreement, with the government organs of the Soviet Republic,"* [quoted by Arshinov, **Op. Cit.**, pp. 179–80]

Unsurprisingly, the Bolsheviks refused to ratify this clause. As one Bolshevik historian pointed out, the *"fourth point was fundamental to both sides, it meant the system of free Soviets, which was in total opposition to the idea of the dictatorship of the proletariat."* [quoted by Malet, **Op. Cit.**, p. 108] As we discuss in the next section, the Bolsheviks had equated the *"dictatorship of the proletariat"* with the dictatorship of their party and so working-class self-management could not be allowed. It should be noted that this fourth clause was the cause of Lenin and Trotsky's toying with the idea of allowing the Makhnovists south-eastern Ukraine as an anarchist experiment (as mentioned by both Victor Serge and Trotsky in later years).

Once Wrangel had been defeated by Makhnovist and Red Army units, the Bolsheviks turned on the movement. Makhno had *"assumed that the coming conflict with the Bolsheviks could be limited to the realm of ideas, feeling that the strong revolutionary ideas and feelings of the peasants, together with their distrust of the foreign invaders, were the best guarantees for the movement's territory. Moreover, Makhno believed that the Bolsheviks would not attack his movement immediately. A respite of some three months would have allowed him to consolidate his power [sic!] and to win over much of the Bolshevik rank and file."* [Palij, **Op. Cit.**, p. 231] From the wording of the second clause of the military agreement (namely, to refuse Red Army deserters or units), it is clear that the Bolsheviks were aware of the appeal of Makhnovist politics on the Red Army soldiers. As soon as Wrangel was defeated, the Red Army attacked. Makhnovist commanders were invited to meetings, arrested and then shot. The Red Army surrounded Makhnovist units and attacked them. At the same time, anarchists were arrested all across the Ukraine. Hulyai Pole itself was attacked (Makhno, despite overwhelming odds, broke out). [Malet, **Op. Cit.**, pp. 71–2]

In the words of Makhno:

> *"In this difficult and responsible revolutionary position the Makhno movement made one great mistake: alliance with the Bolsheviks against a common enemy, Wrangel and the Entente. In the period of this alliance that was morally right and of practical value for the revolution, the Makhno movement mistook Bolshevik revolutionism and failed to secure itself in advance against betrayal. The Bolsheviks and their experts treacherously circumvented it."* [quoted by Palij, **Op. Cit.**, p. 234]

While the Bolsheviks continuously proclaimed the final defeat of the Makhnovists, they held out for nearly a year before being forced to leave the Ukraine in August 1921. Indeed, by the end of 1920 his troops number ten to fifteen thousand men and the *"growing strength of the Makhno army and its successes caused serious concern in the Bolshevik regime."* More Red troops were deployed, *"stationing whole regiments, primarily cavalry, in the occupied villages to terrorise the*

peasants and prevent them from supporting Makhno... Cheka punitive units were constantly trailing the partisans, executing Makhno's sympathisers and the partisans' families." [Palij, **Op. Cit.**, p. 237 and p. 238] Combined with this state terrorism, economic conditions in the villages got worse. The countryside was exhausted and 1921 was a famine year. With his rural base itself barely surviving, the Makhnovists could not survive long.

It should be noted that during the periods after the Bolsheviks had turned on the Makhnovists, the latter appealed to rank-and-file Red Army troops not to attack them. As one of their leaflets put it: *"Down with fratricidal war among the working people!"* They urged the Red Army troops (with some success) to rebel against the commissars and appointed officers and join with the Makhnovists, who would *"greet [them] as our own brothers and together we will create a free and just life for workers and peasants and will struggle against all tyrants and oppressors of the working people."* [contained in Arshinov, **Op. Cit.**, p. 276 and p. 283]

Even after the defeat of the Makhnovists, the Bolsheviks did not stop their campaign of lies. For example, Trotsky reported to the Ninth Congress of Soviets on December 26th, 1921, that the Makhnovists were *"in Romania,"* where Makhno had *"received a friendly welcome"* and was *"liv[ing] comfortably in Bucharest."* The Makhnovists had picked Romania because it was, like Poland, *"a country where they ... felt secure"* due to the way they treated *"Russian counter-revolutionary bands."* [**How the Revolution Armed**, vol. IV, p. 404] In reality, the *"Romanian authorities put Makhno, his wife, and his followers in an internment camp."* The Bolsheviks were not unaware of this, as they *"sent a series of sharp diplomatic notes demanding Makhno's extradiction."* They expelled Makhno and his wife to Poland on April 11, 1922. The Poles also interned them and, again, the Bolsheviks demanded Makhno's extradition *"on the ground that he was a criminal and not entitled to political asylum."* [Palij, **Op. Cit.**, p. 242] Trotsky's lies come as no surprise, given his and his party's track record on slandering anarchists.

As can be seen, the relationship of the Makhnovists to the Bolsheviks was one of constant betrayal of the former by the latter. Moreover, the Bolsheviks took every opportunity to slander the Makhnovists, with Trotsky going so far as to report Makhno was living well while he was rotting in a capitalist prison. This is to be expected, as the aims of the two groups were at such odds. As we discuss in the next section, while the Makhnovists did whatever they could to encourage working-class self-management and freedom, the Bolsheviks had evolved from advocating the government of their party as the expression of "the dictatorship of the proletariat" to stating that only the dictatorship of their party could ensure the success of a social revolution and so **was** "the dictatorship of the proletariat." As the Makhnovist movement shows, if need be, the party would happily exercise its dictatorship **over** the proletariat (and peasantry) if that was needed to retain its power.

14 How did the Makhnovists and Bolsheviks differ?

Like chalk and cheese.

Whereas the Bolsheviks talked about soviet democracy while exercising a party dictatorship, the Makhnovists not only talked about *"free soviets,"* they also encouraged them with all their ability. Similarly, while Lenin stated that free speech was *"a bourgeois notion"* and that there could be *"no free speech in a revolutionary period,"* the Makhnovists proclaimed free speech for working people. [Lenin quoted by Goldman, **My Disillusionment in Russia**, p. 33] While the Bolsheviks ended up arguing for the necessity of party dictatorship during a revolution, the

Makhnovists introduced free soviets and organised peasant, worker and insurgent congresses to conduct the revolution.

We have discussed the Makhnovist ideas in both theory and practice in sections 5, 6 and 7. In spite of the chaos and difficulties imposed upon the movement by having to fight the counter-revolution, the Makhnovists applied their ideals constantly. The Makhnovists were a mass movement and its constructive efforts showed that there was an alternative route the Russian revolution could have followed other than the authoritarian dictatorship that Leninists, then and now, claimed was inevitable if the revolution was to be saved.

To see why, we must compare Bolshevik ideology and practice to that of the Makhnovists in three key areas. Firstly, on how a revolution should be defended. Secondly, on the role of the soviets and party in the revolution. Thirdly, on the question of working-class freedom.

Early in 1918, after the signing of the Brest-Litovsk Treaty the Bolsheviks re-introduced Tsarist officers into the army alongside bourgeois military discipline. As Maurice Brinton correctly summarises:

> *"Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with."* [**The Bolsheviks and Workers' Control**, p. 37]

Officers were appointed rather then elected. They argued this had to be done to win the war. The *"principle of election,"* stated Trotsky, *"is politically purposeless and technically inexpedient and has been, in practice, abolished by decree."* Thus the election of officers and the creation of soldiers' committees was abolished from the top, replaced by appointed officers. Trotsky's rationale for this was simply that *"political power is in the hands of the same working class from whose ranks the Army is recruited."* In other words, the Bolshevik Party held power as power was actually held by it, **not** the working class. Trotsky tried to answer the obvious objection:

> *"Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers', Peasants' and Soldiers' Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the* ***appointment*** *of members of the commanding staff by the organs of the Soviet Power."* [**Work, Discipline, Order**]

He repeated this argument in his 1919 diatribe against the Makhnovists:

> *"The Makhnovites shout raucously: 'Down with appointed commanders!' This they do only so as to delude the ignorant element among their own soldiers. One can speak of 'appointed' persons only under the bourgeois order, when Tsarist officials or bourgeois ministers appointed at their own discretion commanders who kept the soldier masses subject to the bourgeois classes. Today there is no authority in Russia but that which*

> *is elected by the whole working class and working peasantry. It follows that commanders appointed by the central Soviet Government are installed in their positions by the will of the working millions. But the Makhnovite commanders reflect the interests of a minute group of Anarchists who rely on the kulaks and the ignorant."* [**The Makhno Movement**]

Of course, most workers are well aware that the administration of a trade union usually works against them during periods of struggle. Indeed, so are most Trotskyists as they often denounce the betrayals by that administration. Thus Trotsky's own analogy indicates the fallacy of his argument. Equally, it was not *"the will of the working millions"* which appointed anyone, it was a handful of leaders of the Bolshevik party (which had manipulated the soviets to remain in power). Needless to say, this was a vast change from Lenin's comments in **State and Revolution** opposing appointment and calling for election of **all** officials!

Moreover, the explanation that *"the ignorant"* were to blame for Makhnovist opposition to appointed officers had a long legacy with Trotsky. In April 1918, when justifying Bolshevik introduction of appointed officers, he had argued that the *"Soviet government is the same as the committee of a trade union. It is elected by the workers and peasants and you can at the All-Russian Congress of Soviets, at any moment you like, dismiss that government and appoint another. But once you have appointed it, you must give it the right to choose the technical specialists."* He stressed that this applied *"in military affairs, in particular."* Using the trade union analogy, he argued that the workers had *"entrusted us [the Bolshevik leaders] with the direction of the union"* and this meant that the Bolshevik leaders, not the workers, should decide things as *"we are better able to judge in the matter"* than them! The workers role was stated clearly: *"if our way of conducting the business is bad, then throw us out and elect another committee!"* [**Leon Trotsky Speaks**, p. 113] In other words, like any bureaucrat, for Trotsky working-class participation in the affairs of the revolution was seen as irrelevant: the masses had voted and their role was now that of obeying those who *"are better able to judge."*

Using an argument the Tsar could have been proud of, Trotsky defended the elimination of soldier democracy:

> *"How could soldiers who have just entered the army choose the chiefs! Have they any vote to go by? They have none. And therefore elections are impossible."* [**Ibid.**]

Equally, how could workers and peasants who have just entered political or economic struggle in 1917 choose the chiefs? Had they any vote to go by? They had none. And therefore political and workplace elections are impossible. Unsurprisingly, Trotsky soon ended up applying this logic to politics as well, defending (like all the leaders of Bolshevism) the dictatorship of the party **over** working class. How could the *"ignorant"* workers be expected to elect the best *"chiefs"* never mind manage their own affairs!

Ironically, in 1936 the Stalinist Communist Party in Spain was to make very similar arguments about the need for a regular army and army discipline to win the war. As Aileen O'Carroll in her essay *"Freedom and Revolution"* argues:

> *"The conventional army structure evolved when feudal kings or capitalist governments required the working class to fight its wars for them. These had to be authoritarian*

> *institutions, because although propaganda and jingoism can play a part initially in encouraging enlistment, the horrors of war soon expose the futility of nationalism. A large part of military organisation is aimed at ensuring that soldiers remain fighting for causes they do not necessarily believe in. Military discipline attempts to create an unthinking, unquestioning body of soldiers, as fearful of their own side as of the other."* [**Red & Black Revolution**, no. 1]

In short in both Russia and Spain the Bolsheviks wanted an army that would obey them regardless of whether the individual soldiers felt they were doing the correct thing, indeed who would obey through fear of their officers even when they knew what they were doing was wrong. Such a body would be essential for enforcing minority rule over the wishes of the workers. Would a self-managed army be inclined to repress workers' and peasants' strikes and protests? Of course not.

The Makhnovists show that another kind of revolutionary army was possible in the Russian Revolution and that the *"ignorant"* masses could choose their own officers. In other words, the latter-day justifications of the followers of Bolshevism are wrong when they assert that the creation of the top-down, hierarchical Red Army was a result of the *"contradiction between the political consciousness and circumstantial coercion"* and *"a retreat"* because *"officers were appointed and not elected,"* it was a conscript army and *"severe military discipline."* [John Rees, *"In Defence of October"*, **International Socialism**, no. 52, pp. 3–82, p. 46] As can be seen, Trotsky did not consider it as a *"retreat"* or caused by *"circumstances."* Equally, the Makhnovists managed to organise themselves relatively democratically in the circumstances created by the same civil war.

As such, the differences between the Makhnovists and the Bolsheviks as regards the internal organisation of a revolutionary army are clear. The Bolsheviks applied top-down, bourgeois methods of internal organisation and discipline. The Makhnovists applied democratic internal organisation and discipline as far as possible.

From our discussion of the Bolshevik justifications for its system of appointed officers in the Red Army, it will come as no surprise that as regards the relationship of the soviets to the revolutionary organisation (party) the Makhnovists and Bolsheviks were (again) miles apart. While we discuss this in greater detail in section 14 of the appendix "What happened during the Russian Revolution?", we will give a flavour of Bolshevik ideology on this subject here.

From the start, Lenin identified soviet (or working class) power with the power of their own party. In October 1917, Lenin was equating party and class: *"the power of the Bolsheviks — that is, the power of the proletariat."* [**Will the Bolsheviks Maintain Power?**, p. 102] After the October Revolution, the Bolsheviks were clear that the soviets would not have *"all power."* Rather, the first act of soviet sovereignty was to alienate it into the hands of a Bolshevik government. In response to a few leading Bolsheviks who called for a coalition government, the Bolshevik Central Committee stated that it was *"impossible to refuse a purely Bolshevik government without treason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets ... handed power over to this government."* [quoted by Robery V. Daniels, **A Documentary History of Communism**, vol. 1, pp. 127–8] How can the *"power of the Soviets"* exist when said soviets immediately *"handed power"* over to another body? Thus the only *"power"* the soviets had was simply the *"power"* to determine who actually held political power.

The question of who held power, the soviets or the party, came into focus when the soviet elections resulted in non-Bolshevik majorities being elected. After the initial honeymoon period, soviet elections started to go badly for the Bolsheviks. Ever since taking power in 1917, the Bolsheviks had become increasingly alienated from the working class. The spring and summer of 1918 saw *"great Bolshevik losses in the soviet elections"* in all provincial city elections that data is available for. The Mensheviks were the main beneficiaries of these election swings (Socialist Revolutionaries also gained) The Bolsheviks forcibly disbanded such soviets. They continually postponed elections and *"pack[ed] local soviets once they could no longer count on an electoral majority"* by giving representation to the organisations they dominated which made workplace elections meaningless. [Samuel Farber, **Before Stalinism**, pp. 22–4 and p. 33] In Petrograd, such packing swamped the actual number of workplace delegates, transforming the soviets and making elections irrelevant. Of the 700-plus deputies to the "new" soviet, over half were elected by Bolshevik dominated organisations so ensuring a solid Bolshevik majority even before the factory voting began.

Thus, the regime remained "soviet" in name only. Faced with a defeat in the soviets, the Bolsheviks simply abolished them or changed them to ensure their position. This process, it should be noted, started **before** the outbreak of Civil War in late May 1918, implying that Bolshevik authoritarianism cannot be explained as reactions to difficult objective circumstances.

Unsurprisingly, Bolshevik ideology started to adjust to the position the party found itself in. As Samuel Farber argues, in the *"period of March to June 1918, Lenin began to make frequent distinctions* ***within*** *the working class, singling out workers who could still be trusted, denouncing workers whom he accused of abandoning the working class and deserting to the side of the bourgeoisie, and complaining about how the working class had become 'infected with the disease of petty-bourgeois disintegration.'"* [**Op. Cit.**, p. 25] Combined with the vision of "working-class" or "soviet" power expressed by the power of his party, this laid the foundations for what came next. In 1919 Lenin fully and explicitly argued that the "dictatorship of the proletariat" was, in fact, the dictatorship of the Bolshevik party:

> *"we are reproached with having established a dictatorship of one party ... we say, 'Yes, it is a dictatorship of one party! This is what we stand for and we shall not shift from that position ... '"* [**Collected Works**, vol. 29, p. 535]

This quickly become Bolshevik orthodoxy. Trotsky argued in his infamous work **Terrorism and Communism** that there was *"no substitution at all"* when *"the power of the party"* replaces *"the power of the working class."* Zinoviev argued this point at the Second Congress of the Communist International. As he put it:

> *"Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... [T]he dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress, 1920**, vol. 1, pp. 151–2]

Neither Lenin nor Trotsky disagreed. By the end of the civil war, Lenin was arguing that *"the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation."* [**Collected Works**, vol. 32, p. 21]

This places the Bolshevik betrayals of the Makhnovists in 1919 and 1920 into **political** context. It also explains the Bolshevik opposition to the proposed fourth clause of the 1920 political and military agreement (see last section). Simply put, at the time (and long afterwards) the Bolsheviks equated the revolution with their own power. As such, Makhnovist calls for soviet self-management threatened the "dictatorship of the proletariat" (i.e. dictatorship of the party) by encouraging working people to participate in the revolution and giving the radically false idea that working-class power could be exercised by working people and their own class organisations.

Lenin, Trotsky and Zinoviev held this position until their deaths. Trotsky, for example, was arguing in 1923 that *"[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work."* [**Leon Trotsky Speaks**, p. 158] Even after the rise of Stalinism, he was still arguing for the *"objective necessity"* of the *"revolutionary dictatorship of a proletarian party"* in 1937. He stressed that the *"revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution ... Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions."* [Trotsky, **Writings 1936–37**, pp. 513–4]

This suggests that the later Trotskyist argument that the Bolsheviks were forced by *"objective factors"* to replace the dictatorship of the proletariat by that of the party is false. At the time, and afterwards, the Bolsheviks did not argue in these terms. The end of soviet democracy was not considered a problem or a retreat for the revolution. The opposite was the case, with the elimination of democracy being raised to an ideological truism to be applied everywhere. Equally, the fact that the Makhnovists did all they could to promote soviet self-management and actually called regional congresses of workers, peasants and insurgents suggests that *"objective factors"* simply cannot explain Bolshevik actions. Simply put, like the Bolshevik betrayals of the Makhnovists, the Bolshevik elimination of soviet democracy by party dictatorship can only be fully understood by looking at Bolshevik ideology.

Little wonder the Makhnovists argued as followed:

> *"Since the arrival of the Bolsheviks the dictatorship of their party has been established here. As a party of statists, the Bolshevik Party everywhere has set up state organs for the purpose of governing the revolutionary people. Everything has to be submitted to their authority and take place under their vigilant eye. All opposition, protest, or even independent initiative has been stifled by their Extraordinary Commissions [the secret police, the Cheka]. Furthermore, all these institutions are composed of people who are removed from labour and from revolution. In other words, what has been created*

is a situation in which the labouring and revolutionary people have fallen under the surveillance and rule of people who are alien to the working classes, people who are inclined to exercise arbitrariness and violence over the workers. Such is the dictatorship of the Bolshevik-Communist Party .. .

"We again remind the working people that they will liberate themselves from oppression, misery and violence only through their own efforts. No change in power will help them in this. Only by means of their own free worker-peasant organisations can the workers reach the summit of the social revolution — complete freedom and real equality." [quoted by Arshinov, **Op. Cit.** pp. 116–7]

Which brings us to the next issue, namely working-class freedom. For anarchists, the key point of a revolution is to increase working-class freedom. It means the end of hierarchy and the direct participation in the revolution by the working classes themselves. As Bakunin put it, *"revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction."* [**Michael Bakunin: Selected Writings**, p. 237] For this reason, the Makhnovists (like Bakunin) argued for a revolutionary society based on free federations of worker and peasant organisations (free soviets).

This means that actions which consolidated rule by a few cannot be revolutionary, even if the few are made up of the most revolutionary of the revolutionaries. Thus working class power cannot be equated to the power of a political party, no matter how *"socialist"* or *"revolutionary"* its ideas or rhetoric. This means that Bolshevik restrictions on working class freedom (of speech, assembly, press, organisation) struck at the heart of the revolution. It did not signify the defence of the revolution, but rather its defeat. Ultimately, as Emma Goldman quickly recognised, what the Bolsheviks called *"defence of the Revolution"* was *"really only the defence of [the] party in power."* [**My Disillusionment in Russia**, p. 57]

Anarchists had long argued that, to quote Goldman again, there is *"no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical."* [**Op. Cit.**, p. 260] The evolution of Bolshevik practice and theory reinforces this argument. The means used had an impact on the course of events, which in turn shaped the next set of means and the ideology used to justify it.

This explains the Makhnovist and Bolshevik differences in relationship to working-class freedom. For anarchists, only freedom or the struggle for freedom can teach people to be free (and so is genuinely revolutionary). This explains why the Makhnovists not only proclaimed freedom of election, speech, press, assembly and organisation for working people, which was an essential revolutionary position, they also implemented it (see section 7). The Bolsheviks did the reverse, clamping down on the opposition at every occasion (including workers' strikes and protests). For the Makhnovists, working-class freedom was the key gain of the revolution, and so had to be introduced, practised and defended. Hence Makhno:

"I consider it an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs. That is why the

prohibitions of such congresses, and the declaration proclaiming them illegal ... , represent a direct and insolent violation of the rights of the workers." [quoted by Arshinov, **Op. Cit.**, p. 129]

For the Bolsheviks, working-class freedom was something to fear. Back in 1903, Lenin laid the groundwork for this by arguing that the *"**spontaneous** development of the labour movement leads to it being subordinated to bourgeois ideology."* He stressed that *"the working class, exclusively by their own effort, is able to develop only trade union consciousness ... the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia."* This meant that *"Social Democratic [i.e. socialist] consciousness ... could only be brought to them from without."* [**Essential Works of Lenin**, p. 82 and pp. 74–5] Clearly, if the workers turned against the party, then the workers were *"being subordinated to bourgeois ideology."* It was in their own interests, therefore, for the party to subordinate the workers and so soviet democracy became not an expression of working-class power but rather something which undermined it!

This perspective can be seen when the Makhnovists liberated cities. In Alexandrovsk and Katerinoslav, the Bolsheviks proposed to the Makhnovists spheres of action — their **Revkom** (Revolutionary Committee) would handle political affairs and the Makhnovists military ones. Makhno advised them *"to go and take up some honest trade instead of seeking to impose their will on the workers."* Instead, the Makhnovists called upon *"the working population to participate in a general conference .... and it was proposed that the workers organise the life of the city and the functioning of the factories with their own forced and their organisations."* [Arshinov **Op. Cit.**, p. 154 and p. 149] The differences between the Bolsheviks and Makhnovists could not be clearer.

Lastly, we should note that while Lenin and the leading Bolsheviks wholeheartedly opposed working-class economic self-management by factory committees and instead urged "efficient" top-down one-man management, the Makhnovists supported working-class self-management of production. Under the Bolsheviks, as Arshinov argued, the *"nationalisation of industry, [while] removing the workers from the hands of individual capitalists, delivered them to the yet more rapacious hands of a single, ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital, with the sole difference that the Communist boss, the State, not only exploits the workers, but also punishes them himself ... Wage labour has remained what it was before, except that it has taken on the character of an obligation to the State ... It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism."* [**Op. Cit.**, p. 71] The Makhnovist propaganda, in contrast, stressed the need for workers to socialise the means of production and place it under their direct management by their own class organs. In other words, the abolition of wage slavery by workers' self-management of production.

Unsurprisingly, the Makhnovists supported the Kronstadt rebellion (see the appendix "What was the Kronstadt uprising?" for more on Kronstadt). Indeed, there is significant overlap between the Kronstadt demands and the ideas of the Makhnovist movement. For example, the Makhnovist idea of free soviets is almost identical to the first three points of the Kronstadt programme and their land policy the same as point 11 of the Kronstadt demands. The Kronstadt rebels also raised the idea of *"free soviets"* and the *"third revolution,"* common Makhnovist slogans (see section 3 of the appendix "What was the Kronstadt uprising?" for details). As one Bolshevik writer notes, it is *"characteristic that the anarchist-Makhnovists in the Ukraine reprinted the appeal of the*

Kronstadters, and in general did not hide their sympathy for them." [quoted by Malet, **Op. Cit.**, p. 108] Voline also noted that the *"ideas and activities of the Makhnovist peasants were similar in all respects to those of the Kronstadt rebels in 1921."* [**Op. Cit.**, p. 575]

In summary, the major difference between the Makhnovists and the Bolsheviks is that the former stuck by and introduced their stated aims of *"soviet power"* and working-class freedom while the latter rejected them once they clashed with Bolshevik party policies.

15 How do the modern followers of Bolshevism slander the Makhnovists?

Many modern-day supporters of Bolshevism, on the rare occasions when they do mention the Makhnovist movement, simply repeat the old Bolshevik (and Stalinist) slanders against them.

For example, this is what Joseph Seymour of the U.S. **Spartacus League** did. Their newspaper **Workers Vanguard** ran a series entitled *"Marxism vs. Anarchism"* and in part 7, during his discussion of the Russian Revolution, Seymour claimed:

> *"The most significant counter-revolutionary force under the banner of anarchism was the Ukrainian peasant-based army of Nestor Makhno, which carried out pogroms against Jewish communities and collaborated with White armies against the Bolsheviks."* [**Workers Vanguard**, 8/30/1996, p. 7]

Seymour, needless to say, made these accusations without providing any documentation, and with good reason, for outside of Stalinist hagiographies, no evidence exists to support his claims. As we indicated in section 9, the Makhnovists opposed anti-Semitism and did **not** conduct pogroms. Equally, section 12 proves that the Makhnovists did **not** collaborate with the Whites in any way (although this did not stop the Bolshevik press deliberately spreading the lie that they had).

More recently, the UK Leninist **Revolutionary Communist Group** asserted in their paper that the Makhnovists *"joined with counter-revolutionary White and imperialist armies against socialist Russia. This band of brigands also carried out pogroms against Jewish communities in the Ukraine."* [**Fight Racism! Fight Imperialism!**, issue no. 174, p. 12] No evidence for such a claim was presented in the original review article. When an anarchist pointed out their assertion was *"falling back on a long tradition of Stalinist lies"* and asked for *"any historical references"* to support it, the paper replied by stating that while there were *"several"* references, it would give two: *"E.H. Carr refers to it in his history of the civil war. Also the anarchist historian Paul Avrich mentions it in his work* ***The anarchists in the Russian Revolution****."* [**Op. Cit.**, no. 175, p. 15]

In reality, neither work says any such thing. Looking at the first (unnamed) one, assuming it is E.H. Carr's **The Bolshevik Revolution** there is no reference to pogroms carried out by the Makhnovists (looking in the index for "Makhno"). Which, perhaps, explains why the paper refused to provide a book title and page number. As far as the second reference goes, Avrich made no such claim in **The Anarchists in the Russian Revolution**. He **did** address the issue in his **Anarchist Portraits**, concluding such charges are false.

And the name of the original article? Ironically, it was entitled *"The anarchist school of falsification"*!

However, more sophisticated slanders, lies and distortions have been levelled at the Makhnovists by the supporters of Bolshevism. This is to be expected, as the experience of the Makhnovists

effectively refute the claim that the Bolsheviks had no choice but to act as they did. It is hard to maintain a position that "objective conditions" made the Bolsheviks act as they did when another mass revolutionary army, operating in the same environment, did not act in the same way. This means that the Makhnovists are strong evidence that Bolshevik politics played a key role in the degeneration of the Russian Revolution. Clearly such a conclusion is dangerous to Bolshevism and so the Maknovist movement must be attacked, regardless of the facts.

A recent example of this is John Rees' essay *"In Defence of October"* (**International Socialism**, no. 52, pp. 3–82). Rees, a member of the UK Socialist Workers' Party (SWP) is at pains to downplay the role of Bolshevik ideology in the degeneration of the Russian Revolution. He argues that "objective factors" ensured that the Bolsheviks acted as they did. The *"subjective factor"* was simply a choice between defeat and defence against the Whites: *"Within these limits Bolshevik policy was decisive."* [**Op. Cit.**, p. 30] This explains his attack on the Makhnovist movement. Faced with the same *"objective factors"* as the Bolsheviks, the Makhnovists did not act in the same way. As such, the *"subjective factor"* amounts to more than Rees' stark choice and so objective conditions cannot explain everything.

Clearly, then, the Makhnovists undermine his basic thesis. As such, we would expect a less than honest account of the movement and Rees does not disappoint. He talks about the *"muddled anarchism"* of Makhno, dismissing the whole movement as offering no alternative to Bolshevism and being without *"an articulated political programme."* Ultimately, for Rees, Makhno's *"anarchism was a thin veneer on peasant rebellion"* and while *"on paper"* the Makhnovists *"appeared to have a more democratic programme"* there were *"frauds."* [p. 57, p. 58, p. 61 and p. 70]

The reality of the situation is totally different. Ignoring the obvious contradiction (i.e. how can the Makhnovists have the appearance of a *"democratic programme"* and, simultaneously, not articulate it?) we shall analyse his account of the Makhnovist movement in order to show exactly how low the supporters of Bolshevism will go to distort the historical record for their own aims (see the appendix "What was the Kronstadt uprising?" for Rees's distortions about the Kronstadt revolt). Once the selective and edited quotations provided by Rees are corrected, the picture that clearly emerges is that rather than the Makhnovists being *"frauds,"* it is Rees' account which is the fraud (along with the political tradition which inspired it).

Rees presents two aspects of his critique of the Makhnovists. The first is a history of the movement and its relationships (or lack of them) with the Bolsheviks. The second is a discussion of the ideas which the Makhnovists tried to put into practice. Both aspects of his critique are extremely flawed. Indeed, the errors in his history of the movement are so fundamental (and, indeed, so at odds with his references) that it suggests that ideology overcame objectivity (to be polite). The best that can be said of his account is that at least he does not raise the totally discredited accusation that the Makhnovists were anti-Semitic or *"kulaks."* However, he more than makes up for this by distorting the facts and references he uses (it would be no exaggeration to argue that the only information Rees gets correct about his sources is the page number).

Rees starts by setting the tone, stating that the *"methods used by Makhno and Antonov [a leader of the "Greens" in Tambov] in their fight against the Red Army often mirrored those used by the Whites."* [**Op. Cit.**, p. 57] Strangely enough, while he lists some for Antonov, he fails to specify any against Makhno. However, the scene is set. His strongest piece of evidence as regards Makhno's *"methods"* against the Red Army come from mid-1920 after, it should be noted, the Bolsheviks had engineered the outlawing of the Makhnovist movement and needlessly started

the very conflict Rees uses as evidence against Makhno. In other words, he is attacking the Makhnovists for defending themselves against Bolshevik aggression!

He quotes reports from the Ukrainian Front to blacken the Makhnovists, using them to confirm the picture he extracts from *"the diary of Makhno's wife."* These entries, from early 1920, he claims *"betray the nature of the movement"* (i.e. after, as we shall see, the Bolsheviks had engineered the outlawing of the Makhnovists). [**Op. Cit.**, p. 58] The major problem for Rees' case is the fact that this diary is a fake and has been known to be a fake since Arshinov wrote his classic account of the Makhnovists in 1923:

> *"After 1920, the Bolsheviks wrote a great deal about the personal defects of Makhno, basing their information on the diary of his so-called wife, a certain Fedora Gaenko .... But Makhno's wife is Galina Andreevna Kuz'menko. She has lived with him since 1918. She **never** kept, and therefore never lost, a diary. Thus the documentation of the Soviet authorities is based on a fabrication, and the picture these authorities draw from such a diary is an ordinary lie."* [Arshinov, **History of the Makhnovist Movement**, p. 226f]

Ironically enough, Rees implicitly acknowledges this by lamely admitting (in an end note) that *"Makhno seems to have had two 'wives'"* [**Op. Cit.**, p. 78] And we should note that the source Rees uses for the fake diary entries (W.H. Chamberlin's **The Russian Revolution**) uses as **his** source the very Bolshevik documentation that Arshinov quite correctly denounced over 70 years before Rees put pen to paper. Little wonder Michael Palij, in his detailed account of the movement (**The Anarchism of Nestor Makhno, 1918–1921**), fails to use it. So, in summary, a major part of his account is based on falsehoods, falsehoods exposed as such decades ago. This indicates well the quality of his case against the Makhnovist movement.

As regards the "evidence" he extracts from this fake diary and Red Army reports, it simply shows that Bolsheviks were shot by Makhno's troops and Red Army troops died in combat. This went both ways, of course. In *"military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents."* Equally, *"[o]n the occupation of a village by the Red Army the Cheka would hunt out and hang all active Makhnovite supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants ... and three or four Red militia men left as armed support for the new village bosses."* [David Footman, **Op. Cit.**, pp. 292–3] As such, Rees' account of Makhnovist "terror" against the Bolsheviks seems somewhat hypocritical. We can equally surmise that the methods used by the Bolsheviks against the Makhnovists also *"often mirrored those used by the Whites"*! And Rees lambastes socialist Samuel Farber for mentioning the *"Red Terror, but not the Green Terror"* in Farber's discussion of the Tambov revolt! All in all, pretty pathetic.

Rees' concern for the truth can be seen from the fact that he asserts that Makhno's *"rebellion"* was *"smaller"* than the Tambov uprising and distinguished from it *"only by the muddled anarchism of its leader."* [**Op. Cit.**, p. 58] In fact, the Makhnovist movement was the bigger of the two. As Michael Malet notes:

> *"The differences between them explain why the Makhnovshchina lasted over four years, the Antonovshchina less than one year. The initial area of the Makhno movement was*

larger, and later expanded, whereas the Antonov region was restricted to the southern half of one province throughout its existence. The Makhno movement became established earlier, and was well-known before its break with the soviet regime. A crucial factor was the period of peace between the Bolsheviks and Makhno during the first half of 1919, something Antonov never had. It allowed for political and social development as well as military build-up. It followed from this that Makhno attracted much more support, which was increased and deepened by the positive ideology of Makhno and the anarchists who came to help him. This was not a matter of being anti-State and anti-town — all the Greens, including Antonov, shared this view in a less sophisticated form — but a positive land policy and a realisation of the need to link up with the towns on a federal basis in the post-revolutionary society." [**Op. Cit.**, p. 155]

Even in terms of troops, the Makhno movement was larger. The Antonov rebellion had *"a peak of around 20,000"* troops. [Read, **Op. Cit.**, p. 268] Makhno, in comparison, had a peak of about 40,000 in late 1919 [Palij, **Op. Cit.**, p. 112] (Read states a peak of around 30,000 [**Op. Cit.**, p. 264]). Even by the end of 1920, a few months into the Tambov rebellion (it started in August of that year), the Makhnovists still had 10 to 15 thousand troops. [Palij, **Op. Cit.**, p. 237]

In summary, the movement which lasted longer, covered a larger area and involved more troops is classed by Rees as the smaller of the two! Incredible — but it does give a flavour of the scholarship involved in his essay. Perhaps by *"smaller"* Rees simply meant that Makhno was physically shorter than Antonov?

After getting such minor details as size wrong, Rees turns to the actual history of the movement. He looks at the relations between the Makhnovists and the Bolsheviks, accurately stating that they *"were chequered."* However, he is wrong when he tries to explain what happened by stating they *"reflect[ed] the fast changing military situation in the Ukraine throughout the civil war."* [**Op. Cit.**, p. 58] In fact, as we will prove, the relationships between the two forces reflected the military situation refracted through the ideology and needs of Bolshevik power. To ignore the ideological factor in the Makhnovist-Bolshevik relationships cannot be justified as the military situation does **not** fully explain what happened.

The Makhnovists co-operated with the Red Army three times. Only two of these periods were formal alliances (the first and last). Discussing the first two pacts, Rees alleges that the Makhnovists broke with the Bolsheviks. The truth is the opposite — the Bolsheviks turned on the Makhnovists and betrayed them in order to consolidate their power. These facts are hardly unknown to Rees as they are contained in the very books he quotes from as evidence for his rewritten history.

The first pact between the Makhnovists and the Red Army ended June 1918. According to Rees, *"[c]o-operation continued until June 1919 when the Insurgent Army broke from the Red Army"* and quotes Michael Palij's book **The Anarchism of Nestor Makhno** as follows: *"as soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks' rear, which subsequently attacked strongholds, troops, police, trains and food collectors."* [**Op. Cit.**, p. 58] Rees is clearly implying that Makhno attacked the Bolsheviks, apparently for no reason. The truth is totally different. It is easy to show this — all we need to do is look at the book he uses as evidence.

Rees quotes Palij on page 177. This page is from chapter 16, which is called *"The Bolsheviks Break with Makhno."* As this was not enough of a clue, Palij presents some necessary back-

ground for this Bolshevik break. He notes that before the break, *"the Bolsheviks renewed their anti-Makhno propaganda. Trotsky, in particular, led a violent campaign against the Makhno movement."* He also mentions that *"[a]t the same time, the supplies of arms and other war materials to Makhno were stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops."* In this context, the Makhnovists Revolutionary Military Council *"decided to call a fourth congress of peasants, workers, and partisans"* for June 15th, 1919, which Trotsky promptly banned, warning the population that *"participation in the Congress shall be considered an act of state treason against the Soviet Republic and the front."* [**Op. Cit.**, p. 175 and p. 176]

The Bolsheviks had, of course, tried to ban the third congress in April but had been ignored. This time, they made sure that they were not. Makhno and his staff were not informed of Trotsky's dictatorial order and learned of it three days later. On June 9th, Makhno sent a telegram informing the Bolsheviks that he was leaving his post as leader of the Makhnovists. He *"handed over his command and left the front with a few of his close associates and a cavalry detachment"* while calling upon the partisans to *"remain at the front to hold off Denikin's forces."* Trotsky ordered his arrest, but Makhno was warned in advance and escaped. On June 15-16th, members of Makhno's staff *"were captured and executed the next day."* **Now** Palij recounts how *"[a]s soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks' rear, which subsequently attacked strongholds, troops, police, trains and food collectors."* [**Op. Cit.**, p. 177]

Palij *"subsequently"* refers to Makhno after Denikin's breakthrough and his occupation of the Ukraine. *"The oppressive policy of the Denikin regime,"* he notes, *"convinced the population that it was as bad as the Bolshevik regime, and brought a strong reaction that led able young men ... to leave their homes and join Makhno and other partisan groups."* [**Op. Cit.**, p. 190] As Makhno put it, *"[w]hen the Red Army in south Ukraine began to retreat ... as if to straighten the front line, but in reality to evacuate Ukraine ... only then did my staff and I decide to act."* [quoted by Palij, **Op. Cit.**, p. 190] After trying to fight Denikin's troops, Makhno retreated and called upon his troops to leave the Red Army and rejoin the fight against Denikin. He *"sent agents amongst the Red troops"* to carry out propaganda urging them to stay and fight Denikin with the Makhnovists, which they did in large numbers. This propaganda was *"combined with sabotage."* Between these two events, Makhno had entered the territory of pogromist warlord Hryhoryiv (which did **not** contain Red troops as they were in conflict) and assassinated him. [**Op. Cit.**, p. 191 and p. 173]

It should also be noted that Palij states that it was the Whites who *"were the main enemy that Makhno fought, stubbornly and uncompromisingly, from the end of 1918 to the end of 1919."* [**Op. Cit.**, p. 177]

Clearly, Rees's summary leaves a lot to be desired! Rather than Makhno attacking the Bolsheviks, it was they who broke with him — as Palij, Rees's source, makes clear. Indeed, Makhno made no attempt to undermine the Red Army's campaign against Denikin (after all, that would have placed his troops and region in danger). Rather, he waited until the Bolsheviks showed that they would not defend the Ukraine against the Whites before he acted. As such, Rees misuses his source material and used Palij as evidence for a viewpoint which is the exact opposite of the one he recounts. The dishonesty is obvious. But, then again, it is understandable, as Trotsky banning a worker, peasant and partisan congress would hardly fit into Rees' attempt to portray the Bolsheviks as democratic socialists overcome by objective circumstances! Given that the Makhnovists had successfully held three such congresses to discuss the war against reaction, how could objective circumstances be blamed for the dictatorial actions of Trotsky and other

leading Red Army officers in the Ukraine? Better not to mention this and instead rewrite history by making Makhno break with the Bolsheviks and attack them for no reason!

Rees moves onto the period of co-operation between the insurgents and the Bolsheviks. His version of what happened is that *"Denikin's advance against Makhno's territory in autumn 1919 quickly forced a renewal of the treaty with the Bolsheviks. Makhno harassed Denikin's troops from the rear, making their advance more difficult."* [**Op. Cit.**, p. 58]

A more accurate account of what happened would be that Makhno reorganised his troops after the Bolsheviks had retreated and evacuated the Ukraine. These troops included those that had been left in the Red Army in June, who now left to rejoin him (and brought a few Red Army units along too). After conducting quick and demoralising raids against Denikin's forces, the Makhnovists were forced to retreat to the West (followed by White forces). In late September, near Peregonovka, Makhno inflicted a major defeat against the following Whites and allowed the Makhnovists to attack across Denikin's supply lines (which stopped his attack on Moscow thus, ironically, saving the Bolshevik regime). Makhno's swift attack on the rear of the Whites ensured their defeat. As the correspondent of **Le Temps** observed:

> *"There is no doubt that Denikin's defeat is explained more by the uprising of the peasants who brandished Makhno's black flag, then by the success of Trotsky's regular army. The partisan bands of 'Batko' tipped the scales in favour of the Reds."* [quoted by Palij, **Op. Cit.**, p. 208]

Palij argues that it was the *"rapidly changing military situation [which] soon caused a change in the Bolsheviks' attitude toward Makhno."* The two forces meet up on December 24th, 1919. However, *"[a]lthough the Bolsheviks fraternised with the Makhno troops and the commander even offered co-operation, they distrusted Makhno, fearing the popularity he had gained as a result of his successful fight against Denikin."* [**Op. Cit.**, p. 209] It should also be stressed that **no** formal treaty was signed.

Clearly, Rees' summary leaves a lot to be desired!

This is not the end of it. Rees even attempts to blame the Makhnovists for the attack of General Wrangel. He argues that *"by the end of 1919 the immediate White threat was removed. Makhno refused to move his troops to the Polish front to meet the imminent invasion and hostilities with the Red Army began again on an even more widespread scale."* [**Op. Cit.**, p. 58]

This, needless to say, is a total distortion of the facts. Firstly, it should be noted that the *"imminent"* invasion by Poland Rees mentions did not, in fact, occur until *"the end of April"* (the 26th, to be precise). The break with Makhno occurred as a result of an order issued in early January (the 8th, to be precise). [Michael Palij, **Op. Cit.**, p. 219 and p. 210] Clearly, the excuse of *"imminent"* invasion was a cover, as recognised by a source Rees himself uses, namely Palij's work:

> *"The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon his region .... Uborevich [the author] explained that 'an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next steps' ... [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.'"* [Palij, **Op. Cit.**, p. 210]

This is confirmed by Rees' other references. David Footman, whom Rees also uses for evidence against the Makhnovist movement, notes that while it was *"true there were military reasons for reinforcing"* the Polish frontier (although he also notes the significant fact that the war *"was not to break out for another four months"*), it was *"admitted on the Soviet side that this order was primarily 'dictated by the necessity' of liquidating* ***Makhnovshchina*** *as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence, and to split up and integrate his partisans into various Red Army formations."* He notes that there were *"other occasions (notably in Siberia) of the Soviet authorities solving the problem of difficult partisan leaders by sending them off to fight on distant fronts"* and, of course, that *"Makhno and his staff … were perfectly aware of the underlying Soviet motives."* Footman recounts how the Makhnovist staff sent a *"reasoned reply"* to the Bolsheviks, that there *"was no immediate response"* from them and in *"mid-January the Central Committee of the Ukrainian Communist Party declared Makhno and his force to be outside the law, and the Red Army attacked."* [**The Russian Civil War**, pp. 290–1]

In other words, according to the sources Rees himself selects, the Bolsheviks **started** the conflict in order to eliminate opposition to their power!

Needless to say, the Makhnovists **did** realise the political motivations behind the order. As Arshinov notes, *"[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this."* In addition, *"neither the 14th Corps nor any other unit of the Red Army had any ties with the Makhnovist army; least of all were they in a position to give orders to the insurrectionary army."* Nor does Rees mention that the Makhnovists considered the move *"physically impossible"* as *"half the men, the entire staff and the commander himself were in hospital with typhus."* [**Op. Cit.**, p. 163]

Consider what Rees is (distortedly) accounting. The beginning of 1920 was a time of peace. The Civil War looked like it was over. The White Generals had been defeated. Now the Bolsheviks turn on their allies after issuing an ultimatum which they knew would never be obeyed. Under the circumstances, a stupider decision cannot be easily found! Moreover, the very logic of the order was a joke. Would be it wise to leave the Ukraine undefended? Of course not and if Red Army units were to stay to defend the region, why not the Makhnovists who actually came from the area in question? Why provoke a conflict when it was possible to transfer Red Army units to the Polish front? Simply put, Rees presents a distorted picture of what was happening in the Ukraine at the time simply so he can whitewash the Bolshevik regime and blacken the Makhnovists. As he himself later notes, the Bolshevik-Makhnovist conflict gave the White General Wrangel the space required to restart the Civil War. Thus the Bolshevik decision to attack the Makhnovists helped prolong the Civil War — the very factor Rees blames the degeneration of the Russian Revolution and Bolshevik ideology and practice on!

It is **now** that Rees presents his evidence of Makhnovist violence against the Bolsheviks (the Red Army reports and entries from the fake diary of Makhno's wife). Arguing that the entries from the fake diary *"betray the nature of the movement in this period,"* he tries to link them with Makhnovist theory. *"These actions,"* he argues, *"were consistent with an earlier resolution of the Insurgent Army which declared that it was 'the actions of the Bolshevik regime which cause a real danger to the worker-peasant revolution."* [**Op. Cit.**, p. 59]

Firstly, given a true account of the second break between the Makhnovists and Bolsheviks, it would be fair to conclude that the resolution was, in fact, correct! However, such facts are not mentioned by Rees, so the reader is left in ignorance.

Secondly, to correct another of Rees' causal mistakes, it should be noted that this resolution was **not** passed by the Insurgent Army. Rather it was passed at the Second Regional Congress of Peasants, Workers and Insurgents held at Hulyai Pole on February 12th, 1919. This congress had 245 delegates, representing 350 districts and was one of four organised by the Makhnovists. Unsurprisingly, these regional congresses are not even mentioned by Rees in his account. This is for obvious reasons — if the Makhnovists could organise congresses of workers, peasants and insurgents to discuss the progress of the revolution, then why could the Bolsheviks not manage it? Equally, to mention them would also mean mentioning that the Bolsheviks tried to ban one and succeeded in banning another.

Thirdly, the tone of the congress was anti-Bolshevik simply because the Ukraine had had a taste of Bolshevik rule. As Rees himself acknowledges in a roundabout way, the Bolsheviks had managed to alienate the peasantry by their agricultural policies.

Fourthly, the Bolsheviks had engineered the outlawing of the Makhnovists. Thus the actions of the Makhnovists were **not** *"consistent"* with the earlier resolution. They were, in fact, *"consistent"* with self-defence against a repressive state which had attacked them first!

Looking at the congress where the resolution was passed, we find that the list of *"real dangers"* was, quite simply, sensible and, in fact, in line with Leninist rhetoric. The resolution acknowledged the fact that the Bolshevik party was *"demanding a monopoly of the Revolution."* As we discussed in section 14, it was during this period that the Bolsheviks explicitly started to argue that the "dictatorship of the party" **was** the "dictatorship of the proletariat." The resolution also stated:

> *"With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers' deputies of their freedom and autonomy."* [quoted by Footman, **Op. Cit.**, p. 267]

It also stated:

> *"the political commissars are watching each step of the local soviets and dealing ruthlessly with those friends of peasants and workers who act in defence of peoples' freedom from the agency of the central government ... The Bolshevik regime arrested left Socialist Revolutionaries and anarchists, closing their newspapers, stifling any manifestation of revolutionary expression."*

Delegates also complained that the Bolshevik government had not been elected, that it was *"imposing upon us its party dictatorship"* and *"attempting to introduce its Bolshevik monopoly over the soviets."* [quoted by Palij, [**Op. Cit.**, p. 154]

The resolution noted that the current situation was *"characterised by the seizure of power by the political party of Communists-Bolsheviks who do not balk at anything in order to preserve and*

consolidate their political power by armed force acting from the centre. The party is conducting a criminal policy in regard to the social revolution and in regard to the labouring masses." To top it off, point number three read:

> *"We protest against the reactionary habits of Bolshevik rulers, commissars, and agents of the Cheka, who are shooting workers, peasants, and rebels, inventing all kinds of excuses ... The Cheka which were supposed to struggle with counterrevolution ... have turned in the Bolsheviks' hands into an instrument for the suppression of the will of the people. They have grown in some cases into detachments of several hundred armed men with a variety of arms. We demand that all these forces be dispatched to the front."* [quoted by Vladimir N. Brovkin, **Behind the Front Lines of the Civil War**, pp. 109–10]

We should also point out that Rees selectively quotes the resolution to distort its meaning. The resolution, in fact, *"urges the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution."* [quoted by Palij, **Op. Cit.**, p. 154] We have listed some of the actions of the Bolsheviks that the congress considered as a *"real danger."* Considering the truth of these complaints, only someone blinded by Bolshevik ideology would consider it strange that worker and peasant delegates should agree to *"watch vigilantly"* those actions of the Bolsheviks which were a *"real danger"* to their revolution!

Lenin (before taking power, of course) had argued that elections and recall to soviets were essential to ensure that the workers control the "workers' state" and that socialism required the elimination of *"special bodies of armed men"* by an armed population. To this day, his followers parrot his claims (while, simultaneously, justifying the exact opposite in Lenin's Russia). Now, is Rees **really** arguing that the Bolshevik monopoly of power, the creation of a secret police and the clamping down on working people's freedom were **not** dangers to the Russian Revolution and should not be watched *"vigilantly"*? If so, then his conception of revolution includes the strange notion that dictatorship by a party does not threaten a revolution! Then again, neither did the Bolsheviks (indeed, they thought calling worker, peasant and partisan congresses to discuss the development of the revolution as the real danger to it!). If not, then he cannot fault the regional congress resolution for pointing out the obvious. As such, Rees' misquoting of the resolution backfires on him.

Significantly, Rees fails to mention that during this period (the first half of 1920), the Bolsheviks *"shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties, and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved."* The hypocrisy is clear. While Rees presents information (some of it, we stress, from a fake source) on Makhnovist attacks against the Bolshevik dictatorship, he remains silent on the Bolshevik tactics, violence and state terrorism. Given that the Bolsheviks had attacked the Makhnovists, it seems strange that that Rees ignores the *"merciless methods"* of the Bolsheviks (to use Palij's phrase) and concentrates instead on the acts of self-defence forced onto the Makhnovists. Perhaps this is because it would provide too strong a *"flavour"* of the Bolshevik regime? [**Op. Cit.**, pp. 212–3 and p. 213]

Rees makes great play of the fact that White forces took advantage of the conflict between the Makhnovists and the Bolsheviks, as would be expected. However, it seems like an act of

ideological faith to blame the victims of this conflict for it! In his attempts to demonise the Makhnovists, he argues that *"[i]n fact it was Makhno's actions against the Red Army which made 'a brief return of the Whites possible.'"* In defence of his claims, Rees quotes from W. Bruce Lincoln's **Red Victory**. However, looking at Lincoln's work we discover that Lincoln is well aware who is to blame for the return of the Whites. Unsurprisingly, it is **not** the Makhnovists:

> *"Once Trotsky's Red Army had crushed Iudenich and Kolchak and driven Deniken's forces back upon their bases in the Crimea and the Kuban, it turned upon Makhno's partisan forces with a vengeance ... [I]n mid-January 1920, after a typhus epidemic had decimated his forces, a re-established Central Committee of the Ukrainian Communist Party declared Makhno an outlaw. Yet the Bolsheviks could not free themselves from Makhno's grasp so easily, and it became one of the supreme ironies of the Russian Civil War that his attacks against the rear of the Red Army made it possible for the resurrected White armies ... to return briefly to the southern Ukraine in 1920."* [**Red Victory**, p. 327]

Ignoring the fact that Rees does not bother to give the correct quote (a problem that re-occurs frequently in his essay), it can be seen that he does paraphrase the last sentence of Lincoln's work correctly. Strange, then, that he ignores the rest of his account which clearly indicates that the Bolsheviks *"turned upon"* the Makhnovists and *"declared Makhno an outlaw."* Obviously such trivial facts as the initial Bolshevik attacks against the Makhnovists are unimportant to understanding what actually happened in this period. Informing his readers that it was the Bolsheviks' betrayal of the Makhnovists which provoked the resistance that *"made it possible for ... the White armies ... to return briefly"* would confuse them with facts and so it goes unmentioned.

Lincoln, it must be stressed, concurs with Rees's other main sources (Palij and Footman) on the fact that the Bolsheviks betrayed the Makhnovists! Clearly, Rees has rewritten history and distorted **all** of his main references on the Makhnovist movement. After reading the same fact in three different sources, you would think that the Bolshevik betrayal of the Makhnovists which provoked their resistance against them would warrant **some** mention, but no! In true Stalinist fashion, Rees managed to turn a Bolshevik betrayal of the Makhnovists into a stick with which to beat them with! Truly amazing.

Simply put, if the Bolsheviks had not wanted to impose their rule over the Ukraine, then the conflict with the Makhnovists need not have taken place and Wrangel would not have been in a position to invade the Ukraine. Why did the Bolsheviks act in this way? There was no *"objective factor"* for this action and so we must turn to Bolshevik ideology.

As we proved in section 14, Bolshevik ideology by this time identified Bolshevik party dictatorship as the only expression of "the dictatorship of the proletariat." Does Rees **really** believe that such perspectives had no impact on how the Bolsheviks acted during the Revolution? The betrayal of the Makhnovists can only be understood in terms of the *"subjective factor"* Rees seeks to ignore. If you think, as the Bolsheviks clearly did, that the dictatorship of the proletariat equalled the dictatorship of the party (and vice versa) then anything which threatened the rule of the party had to be destroyed. Whether this was soviet democracy or the Makhnovists did not matter. The Makhnovist idea of worker and peasant self-management, like soviet democracy, could not be reconciled with the Bolshevik ideology. As such, Bolshevik policy explains the betrayals of the Makhnovists.

Not satisfied with distorting his source material to present the Makhnovists as the guilty party in the return of Wrangel, he decides to blame the initial success of Wrangel on them as well. He quotes Michael Palij as follows: *"As Wrangel advanced ... Makhno retreated north .. . leaving behind small partisan units in the villages and towns to carry out covert destruction of the Bolshevik administrative apparatus and supply bases."* [**Op. Cit.**, p. 59] He again sources Palij's work on the *"effective"* nature of these groups, stating that White Colonel Noga reported to headquarters that Makhno was critical to Wrangel's advance.

As regards the claims that Makhno was *"critical"* to Wrangel's advance, Colonal Noga actually states that it was *"peasant uprisings under Makhno and many other partisan detachments"* which gave *"the Reds no rest."* [quoted by Palij, **Op. Cit.**, p. 214] However, what Rees fails to mention is that Palij argues that it was the Bolshevik *"policy of terror and exploitation"* which had *"turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region."* [Palij, **Op. Cit.**, p. 214] Again, Makhno is blamed for the inevitable results of Bolshevik policies and actions!

It should also be reported that Noga's comments are dated 25th March 1920, while Palij's summary of Makhno's activities retreating from Wrangel was about June 1920 — 2 months later! As regards this advance by Wrangel, Palij argues that it was the *"outbreak of the Polish-Bolshevik war at the end of April"* which *"benefited Wrangel"* and *"enabled him to launch an offensive against the Bolsheviks in Tavriia on June 6th."* Indeed, it was after a *"series of battles"* that Wrangel *"penetrated north, forcing a general Bolshevik retreat."* Now, *"[a]s Wrangel advanced deeper into the Left Bank, Makhno retreated north to the Kharkiv region, leaving behind small partisan units in the villages and towns to carry on covert destruction of the Bolshevik administrative apparatus and supply bases."* [**Op. Cit.**, p. 219] Again, Rees' account has little bearing to reality or the source material he uses.

Rees continues to re-write history by arguing that *"Makhno did not fight with the Reds again until October 1920 when Wrangel advanced on Makhno's base."* [**Op. Cit.**, p. 59] In fact, it was the **Makhnovists** who contacted the Bolsheviks in July and August in 1920 with a view to suspending hostilities and co-operating in the fight against Wrangel. This decision was made at a mass assembly of insurgents. Sadly, the Bolsheviks made no response. Only in September, after Wrangel had occupied many towns, did the Bolsheviks enter into negotiations. [Arshinov, **Op. Cit.**, pp. 176–7] This is confirmed by Footman, who states that it is *"agreed that the initiative for joint action against Wrangel came from the Makhnovists"* [**Op. Cit.**, p. 294], as well as by Palij, who notes that *"Makhno was compelled to seek an understanding with the Bolsheviks"* but *"no reply was received."* It was *"Wrangel's success [which] caused the Bolshevik leaders to reconsider Makhno's earlier proposal."* [**Op. Cit.**, pp. 222–3] Obviously indicating that the Makhnovists placed the struggle against the White counter-revolution above their own politics would place the Bolsheviks in a bad light, and so Rees fails to give the details behind the agreement of joint action against Wrangel.

As regards this third and final break, Rees states that it was (*"unsurprisingly"*) a *"treaty of convenience on the part of both sides and as soon as Wrangel was defeated at the end of the year the Red Army fought Makhno until he have up the struggle."* [**Op. Cit.**, p. 59] Which, as far as it goes, is true. Makhno, however, *"assumed [that] the forthcoming conflict with the Bolsheviks could be limited to the realm of ideas"* and that they *"would not attack his movement immediately."* [Palij, **Op. Cit.**, p. 231] He was wrong. Instead the Bolsheviks attacked the Makhnovists without

warning and, unlike the other breaks, without pretext (although leaflets handed out to the Red Army stated that **Makhno** had *"violat[ed] the agreement"*! [Palij, **Op. Cit.**, p. 236]).

It would be a good idea to reproduce the agreement which the Bolsheviks ripped up. There were two parts, a military and a political one. The military one is pretty straight forward (although the clause on the Makhnovists refusing to accept Red Army detachments or deserters suggests that the Makhnovists' democratic army was seen by many Red Army soldiers as a better alternative to Trotsky's autocratic structure). The political agreement was as follows:

> *"1. Immediate release, and an end to the persecution of all Makhno men and anarchists in the territories of the Soviet Republics, except those who carry on armed resistance against Soviet authorities.*
>
> *"2. Makhno men and anarchists were to have complete freedom of expression of their ideas and principles, by speech and the press, provided that nothing was expressed that tended to a violent overthrow of Soviet government, and on condition that military censorship be respected…*
>
> *"3. Makhno men and anarchists were to enjoy full rights of participation in elections to the soviets, including the right to be elected, and free participation in the organisation of the forthcoming Fifth All-Ukrainian Congress of Soviets …"* [cited by Palij, **Op. Cit.**, p. 224]

Needless to say, the Bolsheviks delayed the publication of the political agreement several until several days after the military one was published — *"thus blurring its real meaning."* [Palij, **Op. Cit.**, p. 225] Clearly, as it stands, the agreement just gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution! Little wonder the Bolsheviks ignored it — they also ignored their own constitution. However, it is the fourth point of the political agreement which gives the best insight into the nature of Bolshevism. This last point was never ratified by the Bolsheviks as it was *"absolutely unacceptable to the dictatorship of the proletariat."* [quoted by Palij, **Ibid.**] This clause was:

> *"One of the basic principles of the Makhno movement being the struggle for the self-administration of the toilers, the Partisan Army brings up a fourth point: in the region of the Makhno movement, the worker and peasant population is to organise and maintain its own free institutions for economic and political self-administration; this region is subsequently federated with Soviet republics by means of agreements freely negotiated with the appropriate Soviet governmental organ."* [quoted by Palij, **Op. Cit.**, p. 224]

Clearly, this idea of worker and peasant self-management, like soviet democracy, could not be reconciled with the Bolshevik support for party dictatorship as the expression of *"the dictatorship of the proletariat"* which had become a Bolshevik ideological truism by that time. Little wonder the Bolsheviks failed to ratify the fourth clause and violated the other agreements. Simply put, a libertarian alternative to Bolshevism would give the Russian and Ukrainian working masses hope of freedom and make them harder to control. It is unsurprising that Rees fails to discuss the treaty — it would, yet again, undermine his case that the Bolsheviks were forced by objective circumstances to be dictatorial.

And, of course, let us not forget the circumstances in which this betrayal took place. The country was, as Rees reminds us, in a state of economic disruption and collapse. Indeed, Rees blames the anti-working class and dictatorial actions and policies of the Bolsheviks on the chaos caused by the civil war. Yet here are the Bolsheviks prolonging this very Civil War by turning (yet again!) on their allies. After the defeat of the Whites, the Bolsheviks preferred to attack the Makhnovists rather than allow them the freedom they had been fighting for. Resources which could have been used to aid the economic rebuilding of Russia and the Ukraine were used to attack their former allies. The talents and energy of the Makhnovists were either killed or wasted in a pointless conflict. Should we be surprised? After all, the Bolsheviks had preferred to compound their foes during the Civil War (and, indirectly, aid the very Whites they were fighting) by betraying their Makhnovist allies on two previous occasions (once, because the Makhnovists had dared call a conference of working people to discuss the civil war being fought in their name). Clearly, Bolshevik politics and ideology played a key role in all these decisions. They were **not** driven by terrible objective circumstances (indeed, they made them worse).

Rees obviously distorted the truth about the first two agreements between the Makhnovists and the Bolsheviks. He portrayed the Makhnovists as the guilty party, "breaking" with the Bolsheviks when in fact it was (in both cases) the Bolsheviks who broke with and betrayed the Makhnovists. That explains why he fails to present any information on **why** the first break happened and why he distorts the events of the second. It cannot be said that he was unaware of these facts — they are in the very books he himself references! As such, we have a clear and intended desire to deceive the reader. As regards the third agreement, while he makes no pretence that the Makhnovists were the guilty party however, he implies that the Bolsheviks had to act as they did before the Makhnovists turned on them. Little wonder, then, that he does not provide the details of the agreement made between the Bolsheviks and Makhnovists — to do so would have been to expose the authoritarianism of the Bolsheviks. Simply put, Rees'distortions of the source material he uses comes as no surprise. It undermines his basic argument and so cannot be used in its original form. Hence the cherry-picking of quotations to support his case.

After distorting Makhnovist relations with the Bolsheviks, Rees moves on to distorting the socio-political ideas and practice of the Makhnovists. As would be expected from his hatchet-job on the military history of the movement, his account of its social ideas leaves much to be desired. However, both aspects of his critique have much in common. His account of its theoretical ideas and its attempts to apply them again abuse the source material in disgraceful ways.

For example, Rees states that under the Makhnovists *"[p]apers could be published, but the Bolshevik and Left Socialist Revolutionary press were not allowed to call for revolution"* and references Michael Palij's book. [**Op. Cit.**, p. 60] Looking at the page in question, we discover a somewhat different account. According to Palij's work, what the Makhnovists **actually** *"prohibited"* was that these parties should *"propagate armed uprisings against the Makhnovist movement."* A clear rewriting of the source material and an indication of how low Leninists will sink. Significantly, Palij also notes that this *"freedom of speech, press, assembly and association"* was implemented *"[i]n contrast to the Bolshevik regime"* and its policy of crushing such liberties. [**Op. Cit.** pp. 152–3] Ironically, the military-political agreement of late 1920 between the Reds and Makhnovists included a similar clause, banning expression that *"tended to a violent overthrow of the Soviet government."* [quoted by Palij, **OP. Cit.**, p. 224] Which means, to use Rees' distorted terminology, that the Bolsheviks banned calls for revolution!

However, this distortion of the source material **does** give us an insight into the mentality of Leninism. After all, according to Palij, when the Makhnovists entered a city or town they *"immediately announced to the population that the army did not intend to exercise political authority."* The workers and peasants were to set up soviets *"that would carry out the will and orders of their constituents"* as well as *"organis[e] their own self-defence force against counter-revolution and banditry."* These political changes were matched in the economic sphere as well, as the *"holdings of the landlords, the monasteries and the state, including all livestocks and goods, were to be transferred to the peasants"* and *"all factories, plants, mines, and other means of production were to become property of all the workers under control of their professional unions."* [**Op. Cit.**, p. 151]

In such an environment, a call for *"revolution"* (or, more correctly, *"armed uprisings against the Makhno movement"*) could only mean a Bolshevik coup to install a Bolshevik party dictatorship. As the Makhnovists were clearly defending working- class and peasant self-government, then a Bolshevik call for *"armed uprisings"* against them also meant the end of such free soviets and their replacement with party dictatorship. Little wonder Rees distorts his source! Arshinov makes the situation clear:

> *"The only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist Revolutionaries and other statists was a prohibition on the formation of those 'revolutionary committees' which sought to impose a dictatorship over the people. In Aleksandrovsk and Ekaterinoslav, right after the occupation of these cities by the Makhnovists, the Bolsheviks hastened to organise* ***Revkoms*** *(****Revolutionary Committees*** *) seeking to organise their political power and govern the population ... Makhno advised them to go and take up some honest trade instead of seeking to impose their will on the workers ... In this context the Makhnovists' attitude was completely justified and consistent. To protect the full freedom of speech, press, and organisation, they had to take measures against formations which sought to stifle this freedom, to suppress other organisations, and to impose their will and dictatorial authority on the workers."* [**Op. Cit.**, p. 154]

Little wonder Rees distorts the issues and transforms a policy to defend the **real** revolution into one which banned a *"call for revolution"*! We should be grateful that he distorted the Makhnovist message for it allows us to indicate the dictatorial nature of the regime and politics Rees is defending.

All of which disproves Rees' assertion that *"the movement never had any real support from the working class. Neither was it particularly interested in developing a programme which would appeal to the workers."* [**Op. Cit.**, p. 59] Now, Rees had obviously read Palij's summary of Makhnovist ideas. Is he claiming that workers' self-management and the socialisation of the means of production do not *"appeal"* to workers? After all, most Leninists pay lip-service to these ideas. Is Rees arguing that the Bolshevik policies of the time (namely one-man management and the militarisation of labour) *"appealed"* to the workers more than workers' self-management of production? Equally, the Makhnovists argued that the workers should form their own free soviets which would *"carry out the will and orders of their constituents."* [Palij, **Op. Cit.**, p. 151] Is Rees **really** arguing that the Bolshevik policy of party dictatorship *"appealed"* to the workers more than soviet democracy? If so, then heaven help us if the SWP ever get into power!

Luckily, as Jonathan Aves' book **Workers Against Lenin** proves, this was not the case. Working-class resistance to Bolshevik policies was extremely widespread and was expressed

by strikes. It should be noted that the wave of strikes all across Russia which preceded the Kronstadt revolt also raised the demand for soviet democracy. The call for *"free soviets"* was raised by the Kronstadt revolt itself and during the "mini-Kronstadt" in Katerinoslav in June 1921 where the demands of the workers *"were very similar in content with the resolutions of the Kronstadt rebels"* and telegraph operators sent *"messages throughout the Soviet Republic calling for 'free soviets.'"* [Jonathan Aves, **Workers Against Lenin**, p. 172 and p. 173]

Clearly, the Makhnovists **did** create a *"programme that would appeal to the workers."* However, it is true that the Makhnovists did fail win over more than a minority of workers. This may have been due to the fact that the Makhnovists only freed two cities, both for short periods of time. As Paul Avrich notes, "he found little time to implement his economic programs." [**Anarchist Portraits**, p. 121] Given how Rees bends over backwards to justify Bolshevik policies in terms of *"objective factors,"* it is significant that in his discussion of the Makhnovists such *"objective factors"* as time fail to get a mention!

Thus Rees's attempt to paint the Makhnovists as anti-working class fails. While this is the core of his dismissal of them as a possible *"libertarian alternative to the Bolsheviks,"* the facts do not support his assertions. He gives the example of Makhno's advice to railway workers in Aleksandrovsk *"who had not been paid for many weeks"* that they should *"simply charge passengers a fair price and so generate their own wages."* He states that this *"advice aimed at reproducing the petit-bourgeois patterns of the countryside."* [**Op. Cit.**, p. 59] Two points can be raised to this argument.

Firstly, we should highlight the Bolshevik (and so, presumably, *"proletarian"*) patterns imposed on the railway workers. Trotsky simply *"plac[ed] the railwaymen and the personnel of the repair workshops under martial law"* and *"summarily ousted"* the leaders of the railwaymen's trade union when they objected." The Central Administrative Body of Railways (Tsektran) he created was run by him *"along strictly military and bureaucratic lines."* In other words, he applied his ideas on the *"militarisation of labour"* in full. [M. Brinton, **The Bolsheviks and Workers' Control**, p. 67] Compared to the Bolshevik pattern, only an ideologue could suggest that Makhno's advice (and it was advice, not a decree imposed from above, as was Trotsky's) can be considered worse. Indeed, by being based on workers' self-management it was infinitely more socialist than the militarised Bolshevik state capitalist system.

Secondly, Rees fails to understand the nature of anarchism. Anarchism argues that it is up to working class people to organise their own activities. This meant that, ultimately, it was up to the railway workers **themselves** (in association with other workers) to organise their own work and industry. Rather than being imposed by a few leaders, **real** socialism can only come from below, built by working people, through their own efforts and own class organisations. Anarchists can suggest ideas and solutions, but ultimately its up to workers (and peasants) to organise their own affairs. Thus, rather than being a source of condemnation, Makhno's comments should be considered as praiseworthy as they were made in a spirit of equality and were based on encouraging workers' self-management.

Ultimately, the best reply to Rees is simply the fact that after holding a *"general conference of the workers of the city"* at which it was *"proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations"* based on *"the principles of self-management,"* the *"[r]ailroad workers took the first step in this direction"* by *"form[ing] a committee charged with organising the railway network of the region."* [Arshinov, **Op. Cit.**, p. 149]

Even more amazing (if that is possible) is Rees' account of the revolution in the countryside. Rees argues that the *"real basis of Makhno's support was not his anarchism, but his opposition to grain requisitioning and his determination not to disturb the peasant economy"* [**Op. Cit.**, p. 59] and quotes Palij as follows:

> *"Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts with the villages and to maintain a sort of united front of the entire peasantry."* [M. Palij, **Op. Cit.**, p. 214]

However, here is the actual context of the (corrected) quote:

> *"Peasants' economic conditions in the region of the Makhno movement were greatly improved at the expense of the estates of the landlords, the church, monasteries, and the richest peasants, but Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts within the villages and to maintain a sort of united front of the entire peasantry."* [M. Palij, **Op. Cit.**, p. 214]

Clearly, Rees has distorted the source material, conveniently missing out the information that Makhno had most definitely "disturbed" the peasant economy at the expense of the rich! And, we are sure that Rees would have a fit if it were suggested that the real basis of Bolshevik support was not their socialism, but their opposition to the war and the Whites!

Amazingly, Rees also somehow manages to forget to mention the peasant revolution which had started in 1917 in his attack against Makhno:

> *"Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported the expropriation of large estates ... On the eve of open conflict [in late 1917], Makhno assembled all the landowners and rich peasants (kulaks) of the area and took from them all official documents relating to their land, livestock, and equipment. Subsequently an inventory of this property was taken and reported to the people at the session of the local soviet, and then at the regional meeting, It was decided to allow the landlords to share the land, livestock, and tools equally with the peasants."* [Palij, **Op. Cit.**, p. 71]

Obviously, Rees considers the expropriating of the landlords and kulaks as an act which *"did not disturb the age-old class structure of the countryside"*!

Let us not forget that the official Makhnovist position was that the *"holdings of the landlords, the monasteries, and the state, including all livestock and goods, were to be transferred to the peasants."* [Palij, **Op. Cit.**, p. 151] At the second congress of workers, peasants and insurgents held in February, 1919, it was resolved that *"all land be transferred to the hands of toiling peasants ... according to the norm of equal distribution."* [quoted by Palij, **Op. Cit.**, p. 155] This meant that every peasant family had as much land as they could cultivate without the use of hired labour. The Makhnovists argued with regards to the kulaks:

> *"We are sure that ... the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak's surplus land for general use, then naturally drawing the kulak elements into the social organisation."* [cited by Michael Malet, **Op. Cit.**, pp. 118–9]

Thus, just to stress the point, the Makhnovists **did** *"disturb"* the *"age-old class structure of the countryside."*

Clearly, Rees is simply taking nonsense. When he states that Makhnovist land policies *"did not disturb the age-old class structure of the countryside,"* he is simply showing his utter and total disregard for the truth. As the Bolsheviks themselves found out, no mass movement could possibly exist among the peasants without having a positive and levelling land policy. The Makhnovists were no exception.

Rees then states that *"[i]n 1919 the local Bolshevik authorities made mistakes which played into Makhno's hands."* Unsurprisingly enough, he argues that this was because they *"tried to carry through the socialisation of the land, rather than handing it over to the peasants."* [**Op. Cit.**, p. 60] In fact, the Bolsheviks did **not** try to implement the *"socialisation"* of land. Rather, they tried to **nationalise** the land and place it under state control — a radically different concept. Indeed, it was the Makhnovists who argued that the *"land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised."* [contained in Arshinov, **Op. Cit.**, p. 273] The Bolsheviks, in contrast, initially *"decreed that all lands formerly belonging to the landlords should be expropriated and transformed into state farms."* [Palij, **Op. Cit.**, p. 156] The peasants quite rightly thought that this just replaced one set of landlords with another, stealing the land which rightfully belonged to them.

After distorting the source material by selective quoting, Rees does it again when he argues that *"by the spring of 1920 they [the Bolsheviks] had reversed the policy towards the peasants and instituted Committees of Poor Peasants, these 'hurt Makhno ... his heart hardened and he sometimes ordered executions.' This policy helped the Bolshevik ascendancy."* [**Op. Cit.**, p. 60]

Rees quotes Palij as evidence. To refute his argument we need simply quote the same pages:

> *"Although they [the Bolsheviks] modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the former landlords', state and church lands among the peasants, they did not succeed in placating them because of the requisitions, which the peasants considered outright robbery ... Subsequently the Bolsheviks decided to introduce class warfare into the villages. A decree was issued on May 19, 1920, establishing 'Committees of the Poor' ... Authority in the villages was delegated to the committees, which assisted the Bolsheviks in seizing the surplus grain ... The establishment of Committees of the Poor was painful to Makhno because they became not only part of the Bolshevik administrative apparatus the peasants opposed, but also informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans ... Consequently, Makhno's 'heart hardened and he sometimes ordered executions where some generosity would have bestowed more credit upon him and his movement. That the Bolsheviks preceded him with the bad example was no excuse. For he claimed to be fighting for a better cause.' Although the committees in time gave the Bolsheviks a hold on every village, their abuse of power disorganised and slowed down agricultural life ... This policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General*

Wrangel from the Crimea into South Ukraine, the Makhno region." [M. Palij, **Op. Cit.**, pp. 213–4]

Amazing what a *"..."* can hide, is it not! Rees turns an account which clearly shows the Bolshevik policy was based on informers, secret police and the murder of rebels as well as being a total disaster into a victory. Moreover, he also transforms it so that the victims are portrayed as the villains. Words cannot do this re-writing of history justice. Yes, indeed, an organisation of informers to the secret police in every village can aid the *"ascendancy"* of a one-party dictatorship (aided, of course, by overwhelming military force), but it cannot aid the ascendancy of freedom, equality and socialism.

Given the actual record of the Bolsheviks' attempts to break up what they considered the *"age-old class structure"* of the villages with the *"Committees of the Poor,"* it is clear why Rees distorts his source.

It does seem ironic that Rees attacks the Makhnovists for not pursuing Bolshevik peasant policies. Considering the absolute **failure** of those policies, the fact that Makhno did not follow them is hardly cause for condemnation! Indeed, given the numerous anti-Bolshevik uprisings and large-scale state repression they provoked, attacking the Makhnovists for not pursuing such insane policies is equally insane. After all, who, in the middle of a Civil War, makes matters worse for themselves by creating more enemies? Only the insane — or the Bolsheviks!

That Makhnovist land policy was correct and the Bolshevik one wrong can be seen from the fact that the latter changed their policies and brought them into line with the Makhnovist ones. As Palij notes, the Bolsheviks *"modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the formers landlords', state, and church lands among the peasants."* This, of course, was a vindication of Makhnovist policy (which dated from 1917!). Makhno *"initiated the peasants' movement, confiscating and distributing landlords' land and goods"* (and, unlike the Bolsheviks, *"encouraging the workers to take over factories and workshops"*). As regards the Bolsheviks attempts to break up what they considered the *"age- old class structure"* of the villages with the *"Committees of the Poor,"* it was, as noted above, a complete disaster and counter-productive. [**Op. Cit.**, p. 213 and p. 250] All in all, the Makhnovist policies were clearly the most successful as regards the peasantry. They broke up the class system in the countryside by expropriating the ruling class and did not create new conflicts by artificially imposing themselves onto the villages.

Lastly, we must also wonder just how sensible it is to *"disturb"* the economy that produces the food you eat. Given that Rees, in part, blames Bolshevik tyranny on the disruption of the economy, it seems incredible that he faults Makhno for not adding to the chaos by failing to *"disrupt the peasant economy"*! However, why let logic get in the way of a good rant!

As well as ignoring the wealth of information on Makhnovist land policy, Rees turns to their attempts to form free agrarian communes. He argues that Makhno's attempts *"to go beyond the traditional peasant economy were doomed"* and quotes Makhno's memoirs which state *"the mass of the people did not go over"* to his peasant communes, which only involved a few hundred families. [**Op. Cit.**, p. 59]

Looking at Makhno's memoirs a somewhat different picture appears. Firstly, Makhno states that there were *"four such agricultural communes within a three- or four-mile radius of Hulyai-Pole,"* but in the whole district *"there were many"* in 1918 (the period being discussed in his memoirs). Makhno recounts how each *"commune consisted of ten families of peasants and workers, totalling*

a hundred, two hundred or three hundred members" and the *"management of each commune was conducted by a general meeting of all its members."* He does state that *"the mass of people did not go over to it"* but, significantly, he argues that this was because of *"the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new 'revolutionary' and counter-revolutionary authorities. For this reason the toiling population of the district limited their real revolutionary activity to supporting in every way those bold spirits among them who had settled on the old estates [of the landlords] and organised their personal and economic life on free communal lines."* [quoted by Paul Avrich, **The Anarchists in the Russian Revolution**, pp. 130–2]

Of course, failing to mention the time period Makhno was recounting does distort the success of the communes. The Bolsheviks were evacuating the Ukraine as part of their treaty with German and Austrian Imperialism when the communes were being set up. This left them in a dangerous position, needless to say. By July, 1918, the area was occupied by Austrian troops and it was early 1919 before the situation was stable enough to allow their reintroduction. One commune was named *"Rosa Luxemburg"* (after the Marxist revolutionary martyr) and was mostly destroyed by the Bolsheviks in June 1919 and completely destroyed by the Whites a few days later. In such circumstances, can it be surprising that only a minority of peasants got involved in them? Rather than praise the Makhnovists for positive social experimentation in difficult circumstances, Rees shows his ignorance of the objective conditions facing the revolution. Perhaps if the peasants did not have to worry about the Bolsheviks as well as the Whites, they would have had more members?

All in all, Rees account of Makhnovist ideas on the peasant economy are, to put it mildly, incorrect. They paint a radically different picture of the reality of both Makhnovist ideas and practice as regards the peasantry. Ironically, the soundness of Makhnovist policy in this area can be seen from the fact that the Bolsheviks changed their land policy to bring it into line with it. Not, of course, that you would know that from Rees' account. Nor would you know what the facts of the Bolsheviks' land policy were either. Indeed, Rees uses Michael Palij's book to create a picture of events which is the exact opposite of that contained in it! Very impressive!

Intent on driving the final nail into the coffin, he tries to apply "class analysis" to the Makhnovists. Rees actually states that *"given this social base [i.e the Makhnovists' peasant base] ... much of Makhno's libertarianism amounted to little more than paper decrees."* [**Op. Cit.**, p. 60]

Ironically enough, the list of *"paper decrees"* Rees presents (when not false or distorted) are also failings associated with the Bolsheviks (and taken to even more extreme measures by the Bolsheviks)! As such, his lambasting of the Makhnovists seems deeply hypocritical. Moreover, his attempt to ground the few deviations that exist between Makhnovist practice and Makhnovist theory in the peasant base of the army seems an abuse of class analysis. After all, these deviations were also shared by the Bolsheviks. As such, how can Rees justify the Bolshevik deviations from socialist theory in terms of *"objective factors"* yet blame Makhnovist ones on their *"social base"*? Do *"objective factors"* only afflict Leninists?

Take for example his first *"paper"* decree, namely the election of commanders. He states that *"in practice the most senior commanders were appointed by Makhno."* In other words, the Makhnovists applied this principle extensively but not completely. The Bolsheviks abolished it by decree (and did not blame it on *"exceptional circumstances"* nor consider it as a *"retreat"*, as Rees asserts). Now, if Rees' "class analysis" of the limitations of the Makhnovists were true, does this mean

that an army of a regime with a proletarian base (as he considers the Bolshevik regime) cannot have elected commanders? This is the logical conclusion of his argument.

Equally, his attempt to *"give a flavour of the movement"* by quoting one of the resolutions adopted by a mass meeting of partisans also backfires (namely, *"to obey the orders of the commanders if the commanders are sober enough to give them"*). Firstly, it should be noted that this was, originally, from a Red Army source. Secondly, drunkenness was a big problem during the civil war (as in any war). It was one of the easiest ways of forgetting reality at a time when life was often unpleasant and sometimes short. As such, the *"objective factor"* of civil war explains this resolution rather than the social base of the movement! Thirdly, Rees himself quotes a Central Committee member's comment to the Eighth Party Congress that there were so many *"horrifying facts about drunkenness, debauchery, corruption, robbery and irresponsible behaviour of many party members that one's hair stands on end."* [**Op. Cit.**, p. 66] The Eighth Congress was in 1919. Does this comment give a *"flavour"* of the Bolshevik regime under Lenin? Obviously not, as Rees defends it and blames this list of horrors on the objective factors facing the Bolsheviks. Why does the drunkenness of the Makhnovists come from their *"social base"* while that of the Bolsheviks from *"objective factors"*? Simply put, Rees is insulting the intelligence of his readers.

The Makhnovist resolution was passed by a mass assembly of partisans, suggesting a fundamentally democratic organisation. Rees argues that the civil war resulted in the Bolshevik vices becoming institutionalised in the power of the bureaucracy. However, as can be seen, the Makhnovists practised democracy during the civil war, suggesting that the objective factors Rees tries to blame for the Bolshevik vices simply cannot explain everything. As such, his own example (yet again) backfires on his argument.

Rees claims that *"Makhno held elections, but no parties were allowed to participate in them."* [**Op. Cit.**, p. 60] This is probably derived from Palij's comment that the free soviets would *"carry out the will and orders of their constituents"* and *"[o]nly working people, not representatives of political parties, might join the soviets."* [**Op. Cit.**, p. 151] This, in turn, derives from a Makhnovist proclamation from January 1920 which stated:

> *"Only labourers who are contributing work necessary to the social economy should participate in the soviets. Representatives of political organisations have no place in worker-peasant soviets, since their participation in a workers' soviet will transform the latter into deputies of the party and can lead to the downfall of the soviet system."* [contained in Peter Arshinov's **History of the Makhnovist Movement**, p. 266]

Rees' comments indicate that he is not familiar with the make-up of the Russian Soviets of 1917. Unlike the soviets from the 1905 revolution, those in 1917 allowed *"various parties and other organisations to acquire voting representation in the soviet executive committees."* Indeed, this was *"often how high party leaders became voting delegates to"* such bodies. It should *"be underlined that these party delegates were selected by the leadership of each political organisation, and not by the soviet assembly itself. In other words, these executive committee members were not directly elected by the representatives of the producers"* (never mind by the producers themselves). [Samuel Farber, **Before Stalinism**, p. 31]

In addition, Russian Anarchists had often attacked the use of *"party lists"* in soviet elections, which turned the soviets from working-class organs into talking-shops. [Paul Avrich, **The Russian Anarchists**, p. 190] This use of party lists meant that soviet delegates could be anyone. For

example, the leading left-wing Menshevik Martov recounts that in early 1920 a chemical factory *"put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote)."* [quoted by Israel Getzler, **Martov**, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be "delegates" of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

Given that the people elected to the free soviets would be **delegates** and **not** representatives, this would mean that they would reflect the wishes of their workmates rather than the decisions of the party's central committee. As such, if a worker who was a member of a political party could convince their workmates of their ideas, the delegate would reflect the decisions of the mass assembly. As such, the input of political parties would not be undermined in any way (although their domination would be!).

As such, the Makhnovist ideas on soviets did not, in fact, mean that workers and peasants could **not** elect or send delegates who were members of political parties. They had no problems as such with delegates who happened to be working- class party members. They did have problems with delegates representing only political parties, delegates who were not workers and soviets being mere ciphers covering party rule.

That this was the case can be seen from a few facts. Firstly, the February 1919 congress resolution *"was written by the anarchists, left Socialist Revolutionaries, and the chairman."* [Palij, **Op. Cit.**, p. 155] Similarly, the Makhnovist Revolutionary Military Soviet created at the Aleksandrovsk congress in late 1919 had three Communists elected to it. There were 18 delegates from workers at that congress, six were Mensheviks and the remaining 12 included Communists [Malet, **Op. Cit.**, p. 111, p. 124] Clearly, members of political parties were elected to both the congresses and the Revolutionary Military Soviet. As such, the idea that free soviets excluded members of political parties is false — they simply were not dominated by them (for example, having executives made up of members of a single party or delegating their power to a government as per the national soviet in Russia). This could, of course, change. In the words of the Makhnovist reply to Bolshevik attempts to ban one of their congresses:

> *"The Revolutionary Military Council ... holds itself above the pressure and influence of all parties and only recognises the people who elected it. Its duty is to accomplish what the people have instructed it to do, and to create no obstacles to any left socialist party in the propagation of ideas. Consequently, if one day the Bolshevik idea succeeds among the workers, the Revolutionary Military Council ... will necessarily be replaced by another organisation, 'more revolutionary' and more Bolshevik."* [quoted by Arshinov, **Op. Cit.**, pp. 103–4]

As such, the Makhnovists supported the right of working- class self-determination, as expressed by one delegate to Hulyai Pole conference in February 1919:

> *"No party has a right to usurp governmental power into its hands ... We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers' wish."* [quoted by Palij, **Op. Cit.**, p. 154]

Thus, Rees fails to present an accurate account of Makhnovist theory and practice as regards *"free soviets."* Rather than oppose party participation within their soviets and congresses, the Makhnovists opposed the domination of soviets and congresses by political parties, a radically different concept. Like the Kronstadt rebels, they argued for all power to the soviets and not to parties.

Lastly, Rees attacks the Makhnovists for having two security forces, the Cheka-like **razvedka** and the Punitive Commission. How this is an expression of the Makhnovist *"social base"* is hard to explain, as both the Bolsheviks and Whites also had their security forces and counter-intelligence agencies.

While Rees quotes Footman's statement that *"we can safely assume [!] these services were responsible for frequent injustices and atrocities,"* he fails to mention that Footman does not provide any examples (hence his comment that we can *"assume"* they occurred!). Footman himself notes that *"[o]f the Makhnovite security services ... we know very little."* [David Footman, **Op. Cit.**, p. 288] Rees himself only lists one, namely the summary shooting of a Bolshevik cell discovered in the Army. Given the bloody record of the Bolshevik Cheka (which, again, Rees defends as necessary to defend against the Whites!), this suggests that the crimes of the Makhnovist counter-intelligence pale in comparison.

Rees also quotes the historian Chamberlin that *"Makhno's private Cheka ... quickly disposed of anyone who was suspected of plotting against his life."* [**Op. Cit.**, 60] Strangely enough, Rees fails to mention the Bolshevik attempts to assassinate Makhno, including the one in the latter part of May 1919 when, it should be noted, the Makhnovists and Bolsheviks were meant to be in alliance. Nor does he mention that the Cheka *"would hunt out and hang all active Makhnovites."* [David Footman, **Civil War in Russia**, p. 271 and p. 293]

As regards the last conflict with the Red Army, it should be noted that while *"generalised accusations of Makhnovist atrocities are common"* the facts are it was *"the Makhnovists who stood to gain by liberating prisoners, the Bolsheviks by shooting them."* This was because *"the Red Army soldiers had been conscripted from elsewhere to do work they neither liked nor understood"* and the *"insurgents had their own homes to defend."* [Malet, **Op. Cit.**, p. 130] Thus, while Rees quotes Footman's opinion that *"Makhno's later campaigns [were] among the most bloody and vindictive,"* these facts suggest that we **cannot** *"safely assume that these [security] services were responsible for frequent injustices and atrocities."* Clearly, if the Makhnovists were releasing Red Army prisoners (and many of whom were joining Makhno), the picture of an atrocity inflicting army can hardly be a valid picture.

And it should be stressed that Bolshevik terror and violence against the Makhnovists is strangely absent from Rees's account.

Rees presents just **one** concrete example of Makhnovist *"Cheka-like"* violence, namely, the execution of a Bolshevik cell in December, 1919. It should be noted that the Bolsheviks had been explicitly arguing for Party dictatorship for some time by then. The reason why the Bolsheviks had been *"denied an open trial"* was because they had already been shot. Unfortunately, Makhno gave two contradictory reasons why the Bolsheviks had been killed. This led to the Makhnovist Revolutionary Military Soviet setting up a commission of three to investigate the issue. Perhaps unsurprisingly, the commission exonerated Makhno although Voline, out of the members, seemed to have been genuinely embarrassed by the affair. [Malet, **Op. Cit.**, pp. 51–2] Needless to say, Rees fails to comment on the Bolshevik summary killing of Makhnovist staff in June 1919

or, indeed, any other summary executions conducted by the Bolsheviks against the Makhnovists (including the shooting of prisoners).

Given the summary justice handed out by the Bolshevik Cheka, it seems strange that Rees dismisses the Makhnovist movement on assumptions and one event, yet he does. Obviously, the large-scale and continuous Bolshevik killings of political enemies (including Makhnovists) is irrelevant compared to this one event.

All in all, Rees' attempts to blame the few deviations the Makhnovists had from anarchist theory on the *"social base"* of the movement are a joke. While justifying the far more extreme deviations of Bolshevik theory and practice in terms of *"objective factors,"* he refuses to consider this possibility for the Makhnovists. The hypocrisy is clear, if not unexpected.

One last point. Taking Rees' "class analysis" of the Makhnovists seriously, the logical conclusion of his argument is clear. For Rees, a movement which compromises slightly with its principles in the face of extreme *"objective factors"* is *"petty bourgeois."* However, a movement which compromises totally (indeed introduces and justifies the exact opposite of its original claims) in face of the same *"objective factors"* is *"proletarian."* As such, his pathetic attempt at "class analysis" of the Makhnovists simply shows up the dictatorial nature of the Bolsheviks. If trying to live up to libertarian/democratic ideals but not totally succeeding signifies being *"petty-bourgeois"* while dismissing those ideals totally in favour of top-down, autocratic hierarchies is *"proletarian"* then sane people would happily be labelled *"petty-bourgeois"*!

And Rees states that *"[n]either Makhno's social programme nor his political regime could provide an alternative to the Bolsheviks"*! [**Op. Cit.**, p. 60] Little wonder he distorts that social programme and political regime — an honest account of both would see that Rees is wrong. The Makhnovist movement clearly shows that not only did Bolshevik policies have a decisive impact on the development of the Russian Revolution, there was a clear alternative to Bolshevik authoritarianism and party dictatorship.

In summary, Rees' attack on the Makhnovists fails. It can be faulted on both factual and logical grounds. His article is so riddled with errors, selective quoting and downright lies that it is factually unreliable. Similarly, his attempt to attack the Makhnovist political theory and practice is equally factually incorrect. His attempt to explain the deviations of Makhnovist practice from its theory in terms of the *"social base"* is simply an insult to the intelligence of the reader and an abuse of class analysis.

A far more compelling analysis would recognise that the Makhnovists were not a perfect social movement but that the deviations of its practice from its theory can be explained by the objective factors it faced. Equally, the example of the Makhnovists shows the weakness of Rees' main argument, namely that the objective factors that Bolshevism faced can solely explain its authoritarian politics. That the Makhnovists, facing the same objective factors, did not act in the same manner as the Bolsheviks shows that Bolshevik ideology played a key role in the failure of the revolution. This explains Rees' clumsy attempts to rewrite the history and theory of the Makhnovshchina.

16 What lessons can be learned from the Makhnovists?

The Makhnovist movement was one of the most important events of the Russian Revolution. It was a mass movement of working people who tried and succeeded to implement libertarian ideas in extremely difficult circumstances.

As such, the most important lesson gained from the experience of the Makhno movement is simply that *"objective factors"* cannot and do not explain the degeneration of the Russian Revolution or Bolshevik authoritarianism. Here was a movement which faced the same terrible circumstances as the Bolsheviks faced (White counter-revolution, economic disruption, and so on) and yet did not act in the same manner as the Bolsheviks. Where the Bolsheviks completely abolished army democracy, the Makhnovists extensively applied it. Where the Bolsheviks implemented party dictatorship **over** the soviets, the Makhnovists encouraged and practised soviet self-management. While the Bolsheviks eliminated freedom of speech, press, assembly, the Makhnovists defended and implemented them. The list is endless (see section 14).

This means that one of the key defences of the Bolshevik Myth, namely that the Bolsheviks had no choice but to act as they did due to *"objective factors"* or *"circumstances"* is totally undermined. As such, it points to the obvious conclusion: Bolshevik ideology influenced the practice of the party, as did their position within the *"workers' state,"* and so influenced the outcome of the Revolution. This means that to play down Bolshevik ideology or practice in favour of *"objective factors"*, one fails to understand that the actions and ideas generated during the revolution were not "objectively" determined but were **themselves** important and sometimes decisive factors in the outcome.

Take, for example, the Bolshevik decision to betray the Makhnovists in 1920. Neither betrayal was "objectively determined" before- hand. However, it did make perfect sense from a perspective which equated the revolution with the *"dictatorship of the party."* That the first betrayal undoubtedly extended the length of the Civil War by allowing the Whites the space to reorganise under Wrangel also had its impact on Bolshevik theory and practice as well as the *"objective factors"* it had to face.

As such, the Makhnovists give a counter-example to the common pro-Bolshevik argument that the horrors of the Civil War were responsible for the degeneration of the Bolshevik Party and the revolution. In the words of one historian:

> *"[The] Insurgent Army ... was organised on a voluntary basis and respected the principle of election of commanders and staff. The regulations governing conduct were drawn up by commissions of soldiers and approved by general meetings of the units concerned. In other words, it embodied the principles of the soldiers' movement of 1917, principles rejected by the Bolsheviks when they set up the Red Army, supposedly because of their harmful effects on fighting efficiency, a characteristic of them discovered by the Bolsheviks only after they had come to power on the basis of promoting them. But the Insurgent Army, given its size and equipment, was very effective. Some have even credited it with greater responsibility than the Red Army for the defeat of Denikin. It took enormous efforts by the Bolsheviks, including the arrest or shooting of thousands of people, in order to pacify the region ... even after the Insurgent Army was militarily broken, it took six months to mop up the remnants... Within its area of operations, which consisted of only two to three per cent of the total population of European Russia, the Insurgent Army was undoubtedly highly effective. While one can never know how history might have turned out had things been different, the Insurgent Army gives plenty of grounds for thinking that a people's revolutionary war of the kind it represented might have been at least as effective on a national scale with nationwide resources at its disposal as Trotsky and the Red Army's ruthless centralisation. It would not, however, have been*

compatible with the imposition from above of the Bolshevik leadership's vision of revolution. When the Insurgent Army drove the enemy out of an area they encouraged the local population to solve their own problems. Where the Red Army took over, the Cheka quickly followed. The Bolsheviks themselves were energetically snuffing out the ideals of 1917.

"Given such considerations it may be, though it cannot be logically proven one way or the other, that the Bolsheviks' deeply rooted authoritarianism rather than the civil war itself led to the construction of a highly centralised system that aimed at 'complete control' over political and many other aspects of social life. It could even be argued, though it is equally unprovable, that the tendency to authoritarianism, far from ensuring victory, nearly led to catastrophe. For one thing, it helped alienate many workers who felt cheated by the outcome of the revolution, and support for the regime was ... far from even in this core group ... [It] may, indeed, have been becoming more alienated as a result of Bolshevik measures depriving it of the means of expression of its growing catalogue of grievances... Far from being 'necessary' or even functional, the Bolshevik leadership's obsession with externally imposed discipline and authority might even have made the task of victory in the war more difficult and more costly. If the counter-example of Makhno is anything to go by then it certainly did." [Christopher Read, **From Tsar to Soviets**, pp. 264–5]

As such, another key lesson to be learned from the Makhno movement is the importance of practising during a revolution the ideas you preach before it. Means and ends are linked, with the means shaping the ends and the ends inspiring the means. As such, if you argue for working-class power and freedom, you cannot dump these aims during a revolution without ensuring that they are never applied after it. As the Makhnovist movement showed, even the most difficult situations need not hinder the application of revolutionary ideas.

The importance of encouraging working-class autonomy also shines through the Makhnovist experience. The problems facing a social revolution are many, as are the problems involved in constructing a new society. The solutions to these problems cannot be found without the active and full participation of the working class. As the Makhnovist congresses and soviets show, free debate and meaningful meetings are the only means, firstly, to ensure that working-class people are *"the masters of their own lives,"* that *"they themselves are making the revolution,"* that they *"have gained freedom."* *"Take that faith away,"* stressed Alexander Berkman, *"deprive the people of power by setting up some authority over them, be it a political party or military organisation, and you have dealt a fatal blow to the revolution. You will have robbed it of its main source of strength, the masses."* [**ABC of Anarchism**, p. 82]

Secondly, it allows the participation of all in solving the problems of the revolution and of constructing the new society. Without this input, **real** socialism cannot be created and, at best, some form of oppressive state capitalist regime would be created (as Bolshevism shows). A new society needs the freedom of experimentation, to adapt freely to the problems it faces, to adjust to the needs and hopes of those making it. Without working-class freedom and autonomy, public life becomes impoverished, miserable and rigid as the affairs of all are handed over to a few leaders at the top of a social hierarchy, who cannot possibility understand, let alone solve, the problems affecting society. Freedom allows the working class to take an active part in the revolution. Restricting working-class freedom means the bureaucratisation of the revolution as

a few party leaders cannot hope to direct and rule the lives of millions without a strong state apparatus. Simply put, the emancipation of the working class is the task of the working class itself. Either working class people create socialism (and that needs workers' autonomy and freedom as its basis), or some clique will and the result will not be a socialist society.

As the experience of the Makhnovist movement shows, working- class freedom can be applied during a revolution and when it is faced with the danger of counter-revolution.

Another key lesson from the Makhnovist movement is that of the need for effective anarchist organisation. The Makhnovists did not become anarchist-influenced by chance. The hard effort by the local anarchists in Hulyai Pole before and during 1917 paid off in terms of political influence afterwards. Therefore, anarchists need to take a leading role in the struggles of working people (as we indicated in section I.8.2, this was how the Spanish anarchists gained influence as well). As Voline noted, one of the advantages the Makhnovist movement had was *"the activity of ... libertarian elements in the region ... [and the] rapidity with which the peasant masses and the insurgents, despite unfavourable circumstances, became acquainted with libertarian ideas and sought to apply them."* [**Op. Cit.**, p. 570]

Arshinov expands on this issue in a chapter of his history (*"The Makhnovshchina and Anarchism"*), arguing that many Russian anarchists *"suffered from the disease of disorganisation,"* which led to *"impoverished ideas and futile practice."* Moreover, most did not join the Makhnovist movement, *"remained in their circles and* ***slept through*** *a mass movement of paramount importance."* [**Op. Cit.**, p. 244 and p. 242]

Indeed, it was only in May 1919 that the *"Nabat"* Ukrainian anarchist confederation was organised. This federation worked closely with the Makhnovists and gained influence in the villages, towns and cities within and around the Makhnovist region. In such circumstances, the anarchists were at a disadvantage compared to the Bolsheviks, Mensheviks and Socialist-Revolutionaries, who had been organised far longer and so had more influence within the urban workers.

While many anarchists did participate effectively and organisationally within many areas of Russia and the Ukraine (gaining influence in Moscow and Petrograd, for example), they were much weaker than the Bolsheviks. This meant that the Bolshevik idea of revolution gained influence (by, it should be noted, appropriating anarchist slogans and tactics). Once in power, the Bolsheviks turned against their rivals, using state repression to effectively destroy the anarchist movement in Russia in April 1918 (see section 24 of the appendix "What happened during the Russian Revolution?" for details). This, incidentally, led to many anarchists coming to the Ukraine to escape repression and many joined the Makhnovists. As Arshinov notes, the Bolsheviks *"knew perfectly well that ... anarchism in Russia, lacking any contact with a mass movement as important as the Makhnovshchina, did not have a base and could not threaten nor endanger them."* [**Op. Cit.**, p. 248] Waiting till **after** a revolution starts to build such a base is a dangerous tactic, as the experience of the Russian anarchists shows. As the experience of the Moscow anarchists active in the bakers' union shows, organised working-class support can be an effective deterrent to state repression (the Moscow bakers' union continued to have anarchists active in it until 1921).

It should be noted that this lesson was recognised by the main anarchists associated with the Makhnovists. In exile, Voline argued for the need to build a *"synthesis"* anarchist federation (see section J.3.2) while Arshinov and Makhno both associated themselves with the Platform (see section J.3.3).

Another key lesson is the need to combine rural and urban organisation. As Voline argued, the *"absence of a vigorous organised workers' movement which could support that of the peasant*

insurgents" was a major disadvantage for the Makhno movement. [Voline, **Op. Cit.**, p. 571] If there had been a workers' movement influenced by anarchist or syndicalist ideas within the Ukrainian towns during the Russian Revolution, the possibilities of constructive work would have been increased immensely. Take the example of when the Makhnovists liberated Aleksandrovsk and organised two workers' conferences. It was only at the insurgents' insistence that the unions agreed to send delegates, but for information only. This was undoubtedly due to the fact that Mensheviks had some influence in the unions and Bolshevik influence was increasing. Both parties may have preferred the Makhnovists to the Whites, but neither accepted anarchist ideas of workers' self-management and so constructive work was limited to the railway workers. In contrast, when Katerinoslav was liberated, the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, **Op. Cit.**, p. 123 and p. 124]

As the Makhnovists themselves realised, their movement had to be complemented by urban working-class self-activity and self-organisations. While they did all they could to encourage it, they lacked a base within the workers' movement and so their ideas had to overcome the twin barriers of workers' unfamiliarity with both them and their ideas and Marxist influence. With a strong working- class movement influenced by anarchist ideas, the possibilities for constructive work between city and village would have been helped immensely (this can be seen from the example of the Spanish Revolution of 1936, where rural and urban collectives and unions made direct links with each other).

Lastly, there is the lesson to be gained from Makhnovist co-operation with the Bolsheviks. Simply put, the experience shows the importance of being wary towards Bolshevism. As Voline put it, another disadvantage of the Makhnovists was a *"certain casualness, a lack of necessary distrust, towards the Communists."* [**Op. Cit.**, p. 571] The Makhnovists were betrayed three times by the Bolsheviks, who continually placed maintaining their own power above the needs of the revolution. The anarchists were simply used as cannon fodder against the Whites and once their utility had ended, the Bolsheviks turned their guns on them.

Thus a lesson to be learned is that co-operation between anarchists and Bolsheviks is fraught with danger. As many activists are aware, modern-day supporters of Bolshevism constantly urge everyone to unite *"against the common enemy"* and not to be *"sectarian"* (although, somehow this appeal to non-sectarianism does not stop them printing lying accounts of anarchism!). The Makhnovists took them at their word in early 1919 and soon found out that *"unity"* meant *"follow our orders."* When the Makhnovists continued to apply their ideas of working-class self-management, the Bolsheviks turned on them. Similarly, in early 1920 the Bolsheviks outlawed the Makhnovists in order to break their influence in the Ukraine. The Makhnovist contribution to the defeat of Denikin (the common enemy) was ignored. Lastly, in mid-1920 the Makhnovists placed the need of the revolution first and suggested an alliance to defeat the common enemy of Wrangel. Once Wrangel had been defeated, the Bolsheviks ripped up the agreement they had signed and, yet again, turned on the Makhnovists. Simply put, the Bolsheviks continually placed their own interests before that of the revolution and their allies. This is to be expected from an ideology based on vanguardism (see section H.5 for further discussion).

This does not mean that anarchists and Leninists should not work together. In some circumstances and in some social movements, this may be essential. However, it would be wise to learn from history and not ignore it and, as such, modern activists should be wary when conducting

such co-operation. Ultimately, for Leninists, social movements are simply a means to their end (the seizing of state power by them on behalf of the working class) and anarchists should never forget it.

Thus the lessons of the Makhnovist movement are exceedingly rich. Simply put, the Makhnovshchina show that anarchism is a viable form of revolutionary ideas and can be applied successfully in extremely difficult circumstances. They show that social revolutions need not consist of changing one set of bosses for another. The Makhnovist movement clearly shows that libertarian ideas can be successfully applied in a revolutionary situation.

Appendix : Anarchism and "anarcho"-capitalism

This appendix exists for one reason, namely to explain why the idea of "anarcho"-capitalism is a bogus one. While we have covered this topic in section F, we thought that this appendix should be created in order to discuss in more detail why anarchists reject both "anarcho"-capitalism and its claims to being anarchist.

This appendix has three parts. The first two sections are our critique of Bryan Caplan's "anarcho"-capitalist "Anarchist Theory FAQ." Caplan's FAQ is the main on-line attempt to give the oxymoron of "anarcho"-capitalism some form of justification and so it is worthwhile explaining, using his FAQ as the base, why such an attempt fails. The last part of this appendix is the original version of section F,

As we will prove, Caplan's FAQ fails in its attempt to show that "anarcho" capitalism can be considered as part of the anarchist movement and in fact his account involves extensive rewriting of history. This appendix is in two parts, a reply to Caplan's most recent FAQ release (version 5.2) and an older reply to version 4.1.1 (which was originally section F.10 of the FAQ). The introduction to the reply to version 4.1.1 indicates what most anarchists think of Caplan's FAQ and its claims of "objectivity" as so we will not repeat ourselves here.

We decided to replace the original version of section F with an edited version simply because the original section was too long in respect to the rest of the FAQ. While this FAQ may have started out as a rebuttal to "anarcho"-capitalist claims of being anarchist, it no longer is. As such, in an ***anarchist*** FAQ section F became redundant as "anarcho"-capitalism is a fringe ideology even within the USA. If it were not for their presence on the web and some academics taking their claims to being anarchists at face value, we would only mention them in passing.

We have decided to include this appendix as it is really an addition to the main body of the FAQ. Parties interested in why "anarcho"-capitalist claims are false can explore this appendix, those who are interested in anarchist politics can read the FAQ without having to also read too many arguments between anarchists and capitalists. We should, perhaps, thank Caplan for allowing us an opportunity of explaining the ideas of such people as Proudhon and Tucker, allowing us to quote them and so bring their ideas to a wider audience and for indicating that anarchism, in all its forms, has always opposed capitalism and always will.

Replies to Some Errors and Distortions in Bryan Caplan's "Anarchist Theory FAQ" version 5.2

1 — Individualist Anarchists and the socialist movement.

Caplan, in his FAQ, attempts to rewrite anarchist history by trying to claim that the individualist anarchists were forerunners of the so-called "anarcho-capitalist" school. However, as is so often the case with Caplan's FAQ, nothing could be further from the truth.

In section 5 (What major subdivisions may be made among anarchists?) of his FAQ, Caplan writes that:

> *"A large segment of left-anarchists is extremely sceptical about the anarchist credentials of anarcho-capitalists, arguing that the anarchist movement has historically been clearly leftist. In my own view, it is necessary to re-write a great deal of history to maintain this claim."*

He quotes Carl Landauer's **European Socialism: A History of Ideas and Movements** as evidence:

> *"To be sure, there is a difference between individualistic anarchism and collectivistic or communistic anarchism; Bakunin called himself a communist anarchist. But the communist anarchists also do not acknowledge any right to society to force the individual. They differ from the anarchistic individualists in their belief that men, if freed from coercion, will enter into voluntary associations of a communistic type, while the other wing believes that the free person will prefer a high degree of isolation. The communist anarchists repudiate the right of private property which is maintained through the power of the state. The individualist anarchists are inclined to maintain private property as a necessary condition of individual independence, without fully answering the question of how property could be maintained without courts and police."*

Caplan goes on to state that *"the interesting point is that before the emergence of modern anarcho-capitalism Landauer found it necessary to distinguish two strands of anarchism, only one of which he considered to be within the broad socialist tradition."*

However, what Caplan seems to ignore is that both individualist and social anarchists agree that there **is** a difference between the two schools of anarchist thought! Some insight. Of course, Caplan tries to suggest that Landauer's non-discussion of the individualist anarchists is somehow "evidence" that their ideas are not socialistic. Firstly, Landauer's book is about **European** Socialism. Individualist anarchism was almost exclusively based in America and so hardly falls within the book's subject area. Secondly, from the index Kropotkin is mentioned on **two** pages (one of which a footnote). Does that mean Kropotkin was not a socialist? Of course not. It seems likely, therefore, that Landauer is using the common Marxist terminology of defining Marxism as Socialism, while calling other parts of the wider socialist movement by their self-proclaimed names of anarchism, syndicalism and so on. Hardly surprising that Kropotkin is hardly mentioned in a history of "Socialism" (i.e. Marxism).

As noted above, both schools of anarchism knew there was a difference between their ideas. Kropotkin and Tucker, for example, both distinguished between two types of anarchism as well

as two types of socialism. Thus Caplan's *"interesting point"* is just a banality, a common fact which anyone with a basic familiarity of anarchist history would know. Kropotkin in his justly famous essay on Anarchism for **The Encyclopaedia Britannica also** found it necessary to distinguish two strands of anarchism. As regards Caplan's claims that only one of these strands of anarchism is *"within the broad socialist tradition"* all we can say is that both Kropotkin **and** Tucker considered their ideas and movement to be part of the broader socialist tradition. According to an expert on Individualist Anarchism, Tucker *"looked upon anarchism as a branch of the general socialist movement"* [James J. Martin, **Men Against the State**, pp. 226–7]. Other writers on Individualist Anarchism have noted the same fact (for example, Tucker *"definitely thought of himself a socialist"* [William O. Reichart, **Partisans of Freedom: A Study in American Anarchism**, p. 156]). As evidence of the anti-socialist nature of individualist anarchism, Caplan's interpretation of Landauer's words is fundamentally nonsense. If you look at the writings of people like Tucker you will see that they called themselves socialists and considered themselves part of the wider socialist movement. No one familiar with Tucker's works could overlook this fact.

Interestingly, Landauer includes Proudhon in his history and states that he was *"the most profound thinker among pre-Marxian socialists."* [p. 67] Given that Caplan elsewhere in his FAQ tries to co-opt Proudhon into the "anarcho"-capitalist school as well as Tucker, his citing of Landauer seems particularly dishonest. Landauer presents Proudhon's ideas in some depth in his work within a chapter headed

"The three Anticapitalistic Movements." Indeed, he starts his discussion of Proudhon's ideas with the words *"In France, post-Utopian socialism begins with Peter Joseph Proudhon."* [p. 59] Given that both Kropotkin and Tucker indicated that Individualist Anarchism followed Proudhon's economic and political ideas the fact that Landauer states that Proudhon was a socialist implies that Individualist Anarchism is also socialist (or "Leftist" to use Caplan's term).

Tucker and the other individualist anarchists considered themselves as followers of Proudhon's ideas (as did Bakunin and Kropotkin). For example, Tucker stated that his journal **Liberty** was *"brought into existence as a direct consequence of the teachings of Proudhon"* and *"lives principally to spread them."* [cited by Paul Avrich in his *"Introduction"* to **Proudhon and his *"Bank of the People"*** by Charles A. Dana]

Obviously Landauer considered Proudhon a socialist and if Individualist Anarchism follows Proudhon's ideas then it, too, must be socialist.

Unsurprisingly, then, Tucker also considered himself a socialist. To state the obvious, Tucker and Bakunin both shared Proudhon's opposition to **private** property (in the capitalist sense of the word), although Tucker confused this opposition (and possibly the casual reader) by talking about possession as "property."

So, it appears that Caplan is the one trying to rewrite history. #app2

2 — Why is Caplan's definition of socialism wrong?

Perhaps the problem lies with Caplan's "definition" of socialism. In section 7 (Is anarchism the same thing as socialism?) he states:

> *"If we accept one traditional definition of socialism — 'advocacy of government ownership of the means of production' — it seems that anarchists are not socialists by def-*

> *inition. But if by socialism we mean something more inclusive, such as 'advocacy of the strong restriction or abolition of private property,' then the question becomes more complex."*

Which are hardly traditional definitions of socialism unless you are ignorant of socialist ideas! By definition one, Bakunin and Kropotkin are not socialists. As far as definition two goes, all anarchists were opposed to (capitalist) private property and argued for its abolition and its replacement with possession. The actual forms of possession differed from between anarchist schools of thought, but the common aim to end private property (capitalism) was still there. To quote Dana, in a pamphlet called *"a really intelligent, forceful, and sympathetic account of mutual banking"* by Tucker, individualist anarchists desire to *"destroy the tyranny of capital,- that is, of property"* by mutual credit. [Charles A. Dana, **Proudhon and his *"Bank of the People"***, p. 46]

Interestingly, this second definition of socialism brings to light a contradiction in Caplan's account. Elsewhere in the FAQ he notes that Proudhon had *"ideas on the desirability of a modified form of private property."* In fact, Proudhon did desire to restrict private property to that of possession, as Caplan himself seems aware. In other words, even taking his own definitions we find that Proudhon would be considered a socialist! Indeed, according to Proudhon, *"all accumulated capital is collective property, no one may be its exclusive owner."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 44] Thus Jeremy Jennings' summary of the anarchist position on private property:

> *"The point to stress is that all anarchists [including Spooner and Tucker], and not only those wedded to the predominant twentieth-century strain of anarchist communism have been critical of private property to the extent that it was a source of hierarchy and privilege."*

He goes on to state that anarchists like Tucker and Spooner *"agreed with the proposition that property was legitimate only insofar as it embraced no more than the total product of individual labour."* [*"Anarchism"*, **Contemporary Political Ideologies**, Roger Eatwell and Anthony Wright (eds.), p. 132]

The idea that socialism can be defined as state ownership or even opposition to, or "abolition" of, all forms of property is not one which is historically accurate for all forms of socialism. Obviously communist-anarchists and syndicalists would dismiss out of hand the identification of socialism as state ownership, as would Individualist Anarchists like Tucker and Joseph Labadie. As for opposition or abolition of all forms of "private property" as defining socialism, such a position would have surprised communist-anarchists like Kropotkin (and, obviously, such self-proclaimed socialists as Tucker and Labadie).

For example, in **Act for Yourselves** Kropotkin explicitly states that a peasant *"who is in possession of just the amount of land he can cultivate"* would not be expropriated in an anarchist revolution. Similarly for the family *"inhabiting a house which affords them just enough space ... considered necessary for that number of people"* and the artisan *"working with their own tools or handloom"* would be left alone [pp. 104–5]. He makes the same point in **The Conquest of Bread** [p. 61] Thus, like Proudhon, Kropotkin replaces **private property** with **possession** as the former is *"theft"* (i.e. it allows exploitation, which *"indicate[s] the scope of Expropriation"* namely *"to everything that enables any man [or woman]... to appropriate the product of other's toil"* [**The Conquest of Bread**, p. 61])

Even Marx and Engels did not define socialism in terms of the abolition of all forms of "private property." Like anarchists, they distinguished between that property which allows exploitation to occur and that which did not. Looking at the **Communist Manifesto** we find them arguing that the *"distinguishing feature of Communism is not the abolition of property generally, but the abolition of bourgeois property"* and that *"Communism deprives no man of the power to appropriate the products of society; all that it does is to deprive him of the power to subjugate the labour of others by means of such appropriation."* Moreover, they correctly note that "property" has meant different things at different times and that the *"abolition of existing property relations is not at all a distinctive feature of Communism"* as *"[a]ll property relations in the past have continually been subject to historical change consequent upon the change in historical conditions."* As an example, they argue that the French Revolution *"abolished feudal property in favour of bourgeois property."* [**The Manifesto of the Communist Party**, p.47, p. 49 and p. 47]

Which means that the idea that socialism means abolishing "private property" is **only** true for those kinds of property that are used to exploit the labour of others. Nicholas Walter sums up the anarchist position when he wrote that anarchists *"are in favour of the private property which cannot be used by one person to exploit another."* [**Reinventing Anarchy**, p. 49] In other words, property which is no longer truly **private** as it is used by those who do not own it. In effect, the key point of Proudhon's **What is Property?**, namely the difference between possession and property. Which means that rather than desire the abolition of all forms of "private property," socialists (of all kinds, libertarian and authoritarian) desire the abolition of a specific kind of property, namely that kind which allows the exploitation and domination of others. To ignore this distinction is to paint a very misleading picture of what socialism stands for.

This leaves the *"the strong restriction ... of private property"* definition of socialism. Here Caplan is on stronger ground. Unfortunately, by using that definition the Individualist Anarchists, like the Social Anarchists, are included in socialist camp, a conclusion he is trying to avoid. As **every** anarchist shares Proudhon's analysis that *"property is theft"* and that **possession** would be the basis of anarchism, it means that every anarchist is a socialist (as Labadie always claimed). This includes Tucker and the other Individualist Anarchists. For example, Joseph Labadie stated that *"the two great sub-divisions of Socialists"* (anarchists and State Socialists) both *"agree that the resources of nature — land, mines, and so forth — should not be held as private property and subject to being held by the individual for speculative purposes, that use of these things shall be the only valid title, and that each person has an equal right to the use of all these things. They all agree that the present social system is one composed of a class of slaves and a class of masters, and that justice is impossible under such conditions."* [**What is Socialism?**] Tucker himself argued that the anarchists' *"occupancy and use"* title to land and other scare material would involve a change (and, in effect, *"restriction"*) of current (i.e. capitalist) property rights:

> *"It will be seen from this definition that Anarchistic property concerns only products. But anything is a product upon which human labour has been expended. It should be stated, however, that in the case of land, or of any other material the supply of which is so limited that all cannot hold it in unlimited quantities, Anarchism undertakes to protect no titles except such as are based on actual occupancy and use."* [**Instead of a Book**, p. 61]

and so:

> *"no advocate of occupancy and use believes that it can be put in force until as a theory it has been accepted as generally ... seen and accepted as is the prevailing theory of ordinary private property."* [**Occupancy and Use versus the Single Tax**]

So, as can be seen, Individualist Anarchism rejected important aspects of capitalist property rights. Given that the Individualist Anarchists were writing at a time when agriculture was still the largest source of employment this position on land is much more significant than it first appears. In effect, Tucker and the other American Anarchists were advocating a **massive** and **fundamental** change in property-rights, in the social relationships they generated and in American society. This is, in other words, a very *"strong restriction"* in capitalist property rights (and it is **this** type of property Caplan is referring to, rather than "property" in the abstract).

However, such a "definition" of socialism as "restricting" private property is flawed as it does not really reflect anarchist ideas on the subject. Anarchists, in effect, reject the simplistic analysis that because a society (or thinker) accepts "property" that it (or he/she) is capitalistic. This is for two reasons. Firstly, the term "property" has been used to describe a wide range of situations and institutions. Thus Tucker used the term "property" to describe a society in which capitalist property rights were **not** enforced. Secondly, and far more importantly, concentrating on "property" rights in the abstract ignores the social relationships it generates. Freedom is product of social interaction, not one of isolation. This means that the social relationships generated in a given society are the key to evaluating it – not whether it has "property" or not. To look at "property" in the abstract is to ignore people and the relationships they create between each other. And it is these relationships which determine whether they are free or not (and so exploited or not). Caplan's use of the anti-property rights "definition" of socialism avoids the central issue of freedom, of whether a given society generates oppression and exploitation or not. By looking at "property" Caplan ignores liberty, a strange but unsurprising position for a self-proclaimed "libertarian" to take.

Thus both of Caplan's "definitions" of socialism are lacking. A *"traditional"* one of government ownership is hardly that and the one based on "property" rights avoids the key issue while, in its own way, includes **all** the anarchists in the socialist camp (something Caplan, we are sure, did not intend).

So what would be a useful definition of socialism? From our discussion on property we can instantly reject Caplan's biased and simplistic starting points. In fact, a definition of socialism which most socialists would agree with would be one that stated that *"the whole produce of labour ought to belong to the labourer"* (to use words Thomas Hodgskin, an early English socialist, from his essay **Labour Defended against the Claims of Capital**). Tucker stated that *"the bottom claim of Socialism"* was *"that labour should be put in possession of its own,"* that *"the natural wage of labour is its product"* (see his essay **State Socialism and Anarchism**). This definition also found favour with Kropotkin who stated that socialism *"in its wide, generic, and true sense"* was an *"effort to **abolish** the exploitation of labour by capital."* [**Kropotkin's Revolutionary Pamphlets**, p. 169]

From this position, socialists soon realised that (to again quote Kropotkin) *"the only guarantee not to by robbed of the fruits of your labour is to possess the instruments of labour."* [**The Conquest of Bread**, p. 145] Because of this socialism also could be defined as *"the workers shall own the means of production,"* as this automatically meant that the product would go to the producer, and, in fact, this could also be a definition of socialism most socialists would agree with. The

form of this ownership, however, differed from socialist tendency to socialist tendency (some, like Proudhon, proposed co-operative associations, others like Kropotkin communal ownership, others like the Social Democrats state ownership and so on). Moreover, as the economy changed in the 19th century, so did socialist ideas. Murray Bookchin gives a good summary of this process:

> *"Th[e] growing shift from artisanal to an industrial economy gave rise to a gradual but major shift in socialism itself. For the artisan, socialism meant producers' co-operatives composed of men who worked together in small shared collectivist associations ... For the industrial proletarian, by contrast, socialism came to mean the formation of a mass organisation that gave factory workers the collective power to expropriate a plant that no single worker could properly own... They advocated* ***public*** *ownership of the means of production, whether by the state or by the working class organised in trade unions."* [**The Third Revolution**, vol. 2, p. 262]

So, in this evolution of socialism we can place the various brands of anarchism. Individualist anarchism is clearly a form of artisanal socialism (which reflects its American roots) while communist anarchism and anarcho-syndicalism are forms of industrial (or proletarian) socialism (which reflects its roots in Europe). Proudhon's mutualism bridges these extremes, advocating as it does artisan socialism for small-scale industry and agriculture and co-operative associations for large-scale industry (which reflects the state of the French economy in the 1840s to 1860s). The common feature of all these forms of anarchism is opposition to usury and the notion that *"workers shall own the means of production."* Or, in Proudhon's words, *"abolition of the proletariat."* [**Op. Cit.**, p. 179] As one expert on Proudhon points out, Proudhon's support for *"association"* (or *"associative socialism"*) *"anticipated all those later movements"* which demanded *"that the economy be controlled neither by private enterprise nor by the state ... but by the producers"* such as *"the revolutionary syndicalists"* and *"the students of 1968."* [K. Steven Vincent, **Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 165] *"Industrial Democracy must... succeed Industrial Feudalism,"* to again quote Proudhon. [**Op. Cit.**, p. 167]

Thus the common agreement between all socialists was that capitalism was based upon exploitation and wage slavery, that workers did not have access to the means of production and so had to sell themselves to the class that did. Thus we find Individualist Anarchists arguing that the whole produce of labour ought to belong to the labourer and opposing the exploitation of labour by capital. To use Tucker's own words:

> *"the fact that one class of men are dependent for their living upon the sale of their labour, while another class of men are relieved of the necessity of labour by being legally privileged to sell something that is not labour... . And to such a state of things I am as much opposed as any one. But the minute you remove privilege ... every man will be a labourer exchanging with fellow-labourers ... What Anarchistic-Socialism aims to abolish is usury ... it wants to deprive capital of its reward."* [**Instead of a Book**, p. 404]

By ending wage labour, anarchist socialism would ensure *"The land to the cultivator. The mine to the miner. The tool to the labourer. The product to the producer"* and so *"everyone [would] be a proprietor"* and so there would be *"no more proletaires"* (in the words of Ernest Lesigne, quoted favourably by Tucker as part of what he called a *"summary exposition of Socialism from*

the standpoint of Anarchism" [**Op. Cit.**, p. 17, p. 16]). Wage labour, and so capitalism, would be no more and *"the product [would go] to the producer."* The Individualist Anarchists, as Wm. Gary Kline correctly points out, *"expected a society of largely self-employed workmen with no significant disparity of wealth between any of them."* [**The Individualist Anarchists**, p. 104] In other words, the *"abolition of the proletariat"* as desired by Proudhon.

Therefore, like all socialists, Tucker wanted to end usury, ensure the *"product to the producer"* and this meant workers owning and controlling the means of production they used (*"no more proletaires"*). He aimed to do this by reforming capitalism away by creating mutual banks and other co-operatives (he notes that Individualist Anarchists followed Proudhon, who *"would individualise and associate"* the productive and distributive forces in society [as quoted by James J. Martin, **Men Against the State**, p. 228]). Here is Kropotkin on Proudhon's reformist mutualist-socialism:

> *"When he proclaimed in his first memoir on property that 'Property is theft', he meant only property in its present, Roman-law, sense of 'right of use and abuse'; in property-rights, on the other hand, understood in the limited sense of* ***possession****, he saw the best protection against the encroachments of the state. At the same time he did not want violently to dispossess the present owners of land, dwelling-houses, mines, factories and so on. He preferred to* ***attain the same end*** *by rendering capital incapable of earning interest."* [**Kropotkin's Revolutionary Pamphlet's**, pp. 290–1 — emphasis added]

In other words, like all anarchists, Proudhon desired to see a society without capitalists and wage slaves (*"the same end"*) but achieved by different means. When Proudhon wrote to Karl Marx in 1846 he made the same point:

> *"through Political Economy we must turn the theory of Property against Property in such a way as to create what you German socialists call* ***community*** *and which for the moment I will only go so far as calling* ***liberty*** *or* ***equality.****"* [**Selected Writings of Pierre-Joseph Proudhon**, p. 151]

In other words, Proudhon shared the common aim of all socialists (namely to abolish capitalism, wage labour and exploitation) but disagreed with the means. As can be seen, Tucker placed himself squarely in this tradition and so could (and did) call himself a socialist. Little wonder Joseph Labadie often said that *"All anarchists are socialists, but not all socialists are anarchists."* That Caplan tries to ignore this aspect of Individualist Anarchism in an attempt to co-opt it into "anarcho"-capitalism indicates well that his FAQ is not an objective or neutral work.

Caplan states that the *"United States has been an even more fertile ground for individualist anarchism: during the 19th-century, such figures as Josiah Warren, Lysander Spooner, and Benjamin Tucker gained prominence for their vision of an anarchism based upon freedom of contract and private property."*

However, as indicated, Tucker and Spooner did **not** support private property in the capitalist sense of the word and Kropotkin and Bakunin, no less than Tucker and Spooner, supported free agreement between individuals and groups. What does that prove? That Caplan seems more interested in the words Tucker and Proudhon used rather than the meanings **they** attached to them. Hardly convincing.

Perhaps Caplan should consider Proudhon's words on the subject of socialism:

> *"Modern Socialism was not founded as a sect or church; it has seen a number of different schools."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 177]

If he did perhaps he would who see that the Individualist Anarchists were a school of socialism, given their opposition to exploitation and the desire to see its end via their political, economic and social ideas.

3 — Was Proudhon a socialist or a capitalist?

In section 8 (Who are the major anarchist thinkers?), Caplan tries his best to claim that Proudhon was not really a socialist at all. He states that *"Pierre[-Joseph] Proudhon is also often included [as a "left anarchist"] although his ideas on the desirability of a modified form of private property would lead some to exclude him from the leftist camp altogether."*

"Some" of which group? Other anarchists, like Bakunin and Kropotkin? Obviously not — Bakunin claimed that *"Proudhon was the master of us all."* According to George Woodcock Kropotkin was one of Proudhon's *"confessed disciples."* Perhaps that makes Bakunin and Kropotkin proto-capitalists? Obviously not. What about Tucker? He called Proudhon *"the father of the Anarchistic school of Socialism."* [**Instead of a Book**, p. 381] And, as we noted above, the socialist historian Carl Launder considered Proudhon a socialist, as did the noted British socialist G.D.H. Cole in his **History of Socialist Thought** (and in fact called him one of the *"major prophets of Socialism."*). What about Marx and Engels, surely they would be able to say if he was a socialist or not? According to Engels, Proudhon was *"the Socialist of the small peasant and master-craftsman."* [Marx and Engels, **Selected Works**, p. 260]

In fact, the only "left" (i.e. social) anarchist of note who seems to place Proudhon outside of the "leftist" (i.e. anarchist) camp is Murray Bookchin. In the second volume of **The Third Revolution** Bookchin argues that *"Proudhon was no socialist"* simply because he favoured *"private property."* [p. 39] However, he does note the *"one moral provision [that] distinguished the Proudhonist contract from the capitalist contract"* namely *"it abjured profit and exploitation."* [**Op. Cit.**, pp. 40–41] — which, of course, places him in the socialist tradition (see last section). Unfortunately, Bookchin fails to acknowledge this or that Proudhon was totally opposed to wage labour along with usury, which, again, instantly places him in ranks of socialism (see, for example, the **General Idea of the Revolution**, p. 98, pp. 215–6 and pp. 221–2, and his opposition to state control of capital as being *"more wage slavery"* and, instead, urging whatever capital required collective labour to be *"democratically organised workers' associations"* [**No Gods, No Masters**, vol. 1, p. 62]).

Bookchin (on page 78) quotes Proudhon as arguing that *"association"* was *"a protest against the wage system"* which suggests that Bookchin's claims that Proudhonian *"analysis minimised the social relations embodied in the capitalist market and industry"* [p. 180] is false. Given that wage labour is **the** unique social relationship within capitalism, it is clear from Proudhon's works that he did not "minimise" the social relations created by capitalism, rather the opposite. Proudhon's opposition to wage labour clearly shows that he focused on the **key** social relation which capitalism creates — namely the one of domination of the worker by the capitalist.

Bookchin **does** mention that Proudhon was *"obliged in 1851, in the wake of the associationist ferment of 1848 and after, to acknowledge that association of some sort was unavoidable for large-scale enterprises."* [p. 78] However, Proudhon's support of industrial democracy pre-dates 1851

by some 11 years. He stated in **What is Property?** that he *"preach[ed] emancipation to the proletaires; association to the labourers"* and that *"leaders"* within industry *"must be chosen from the labourers by the labourers themselves."* [p. 137 and p. 414] It is significant that the first work to call itself anarchist opposed property along with the state, exploitation along with oppression and supported self-management against hierarchical relationships within production ("anarcho"-capitalists take note!). Proudhon also called for *"democratically organised workers' associations"* to run large-scale industry in his 1848 Election Manifesto. [**No Gods, No Masters**, vol. 1, p. 62] Given that Bookchin considers as *"authentic artisanal socialists"* those who called for **collective** ownership of the means of production, but *"exempted from collectivisation the peasantry"* [p. 4] we have to conclude that Proudhon was such an "authentic" artisanal socialist! Indeed, at one point Bookchin mentions the *"individualistic artisanal socialism of Proudhon"* [p. 258] which suggests a somewhat confused approach to Proudhon's ideas!

In effect, Bookchin makes the same mistake as Caplan; but, unlike Caplan, he should know better. Rather than not being a socialist, Proudhon is obviously an example of what Bookchin himself calls *"artisanal socialism"* (as Marx and Engels recongised). Indeed, he notes that Proudhon was its *"most famous advocate"* and that *"nearly all so-called 'utopian' socialists, even [Robert] Owen — the most labour-orientated — as well as Proudhon — essentially sought the equitable distribution of property."* [p. 273] Given Proudhon's opposition to wage labour and capitalist property and his support for industrial democracy as an alternative, Bookchin's position is untenable – he confuses socialism with communism, rejecting as socialist all views which are not communism (a position he shares with right-libertarians).

He did not always hold this position, though. He writes in **The Spanish Anarchists** that:

> *"Proudhon envisions a free society as one in which small craftsmen, peasants, and collectively owned industrial enterprises negotiate and contract with each other to satisfy their material needs. Exploitation is brought to an end... Although these views involve a break with capitalism, by no means can they be regarded as communist ideas..."* [p. 18]

In contrast to some of Bookchin's comments (and Caplan) K. Steven Vincent is correct to argue that, for Proudhon, justice *"applied to the economy was associative socialism"* and so Proudhon is squarely in the socialist camp [**Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 228].

However, perhaps all these "leftists" are wrong (bar Bookchin, who **is** wrong, at least some of the time). Perhaps they just did not understand what socialism actually is (and as Proudhon stated *"I am socialist"* [**Selected Writing of Pierre-Joseph Proudhon**, p. 195] and described himself as a socialist many times this also applies to Proudhon himself!). So the question arises, did Proudhon support private property in the capitalist sense of the word? The answer is no. To quote George Woodcock summary of Proudhon's ideas on this subject we find:

> *"He [Proudhon] was denouncing the property of a man who uses it to exploit the labour of others, without an effort on his own part, property distinguished by interest and rent, by the impositions of the non-producer on the producer. Towards property regarded as 'possession,' the right of a man to control his dwelling and the land and tools he needs to live, Proudhon had no hostility; indeed he regarded it as the cornerstone of liberty."* [*"On Proudhon's 'What is Property?'"*, **The Raven** No. 31, pp. 208–9]

George Crowder makes the same point:

> *"The ownership he opposes is basically that which is unearned ... including such things as interest on loans and income from rent. This is contrasted with ownership rights in those goods either produced by the work of the owner or necessary for that work, for example his dwelling-house, land and tools. Proudhon initially refers to legitimate rights of ownership of these goods as 'possession,' and although in his latter work he calls* ***this*** *'property,' the conceptual distinction remains the same."* [**Classical Anarchism**, pp. 85–86]

Indeed, according to Proudhon himself, the *"accumulation of capital and instrument is what the capitalist owes to the producer, but he never pays him for it. It is this fraudulent deprivation which causes the poverty of the worker, the opulence of the idle and the inequality of their conditions. And it is this, above all, which has so aptly been called the exploitation of man by man."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 43]

He called his ideas on possession a *"third form of society, the synthesis of communism and property"* and calls it *"liberty."* [**The Anarchist Reader**, p. 68]. He even goes so far as to say that property *"by its despotism and encroachment, soon proves itself oppressive and anti-social."* [**Op. Cit.**, p. 67] Opposing private property he thought that *"all accumulated capital is collective property, no one may be its exclusive owner."* Indeed, he considered the aim of his economic reforms *"was to rescue the working masses from capitalist exploitation."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 44, p. 80]

In other words, Proudhon considered capitalist property to be the source of exploitation and oppression and he opposed it. He explicitly contrasts his ideas to that of capitalist property and **rejects** it as a means of ensuring liberty.

Caplan goes on to claim that *"[s]ome of Proudhon's other heterodoxies include his defence of the right of inheritance and his emphasis on the genuine antagonism between state power and property rights."*

However, this is a common anarchist position. Anarchists are well aware that possession is a source of independence within capitalism and so should be supported. As Albert Meltzer puts it:

> *"All present systems of ownership mean that some are deprived of the fruits of their labour. It is true that, in a competitive society, only the possession of independent means enables one to be free of the economy (that is what Proudhon meant when, addressing himself to the self-employed artisan, he said 'property is liberty', which seems at first sight a contradiction with his dictum that it was theft)"*[**Anarchism: Arguments For and Against**, pp. 12–13]

Malatesta makes the same point:

> *"Our opponents ... are in the habit of justifying the right to private property by stating that property is the condition and guarantee of liberty.*

"And we agree with them. Do we not say repeatedly that poverty is slavery?
"But then why do we oppose them?

"The reason is clear: in reality the property that they defend is capitalist property… which therefore depends on the existence of a class of the disinherited and dispossessed, forced to sell their labour to the property owners for a wage below its real value… This means that workers are subjected to a kind of slavery." [**The Anarchist Revolution**, p. 113]

As does Kropotkin:

> *"the only guarantee not to be robbed of the fruits of your labour is to possess the instruments of labour… man really produces most when he works in freedom, when he has a certain choice in his occupations, when he has no overseer to impede him, and lastly, when he sees his work bringing profit to him and to others who work like him, but bringing in little to idlers."* [**The Conquest of Bread**, p. 145]

Perhaps this makes these three well known anarcho-communists "really" proto-"anarcho"-capitalists as well? Obviously not. Instead of wondering if his ideas on what socialism is are wrong, he tries to rewrite history to fit the anarchist movement into his capitalist ideas of what anarchism, socialism and whatever are actually like.

In addition, we must point out that Proudhon's *"emphasis on the genuine antagonism between state power and property rights"* came from his later writings, in which he argued that property rights were required to control state power. In other words, this *"heterodoxy"* came from a period in which Proudhon did not think that state could be abolished and so *"property is the only power that can act as a counterweight to the State."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 140] Of course, this "later" Proudhon also acknowledged that property was *"an absolutism within an absolutism," "by nature autocratic"* and that its *"politics could be summed up in a single word,"* namely *"exploitation."* [p. 141, p. 140, p. 134]

Moreover, Proudhon argues that *"spread[ing] it more equally and establish[ing] it more firmly in society"* is the means by which "property" *"becomes a guarantee of liberty and keeps the State on an even keel."* [p. 133, p. 140] In other words, rather than "property" **as such** limiting the state, it is "property" divided equally through society which is the key, without concentrations of economic power and inequality which would result in exploitation and oppression. Therefore, *"[s]imple justice… requires that equal division of land shall not only operate at the outset. If there is to be no abuse, it must be maintained from generation to generation."* [**Op. Cit.**, p. 141, p. 133, p. 130].

Interestingly, one of Proudhon's *"other heterodoxies"* Caplan does not mention is his belief that "property" was required not only to defend people against the state, but also capitalism. He saw society dividing into *"two classes, one of employed workers, the other of property-owners, capitalists, entrepreneurs."* He thus recognised that capitalism was just as oppressive as the state and that it assured *"the victory of the strong over the weak, of those who property over those who own nothing."* [as quoted by Alan Ritter, **The Political Thought of Pierre-Joseph Proudhon**, p. 121] Thus Proudhon's argument that *"property is liberty"* is directed not only against the state, but also against social inequality and concentrations of economic power and wealth.

Indeed, he considered that *"companies of capitalists"* were the *"exploiters of the bodies and souls of their wage earners"* and an outrage on *"human dignity and personality."* Instead of wage labour he thought that the *"industry to be operated, the work to be done, are the common and indivisible property of all the participant workers."* In other words, self-management and workers' control. In this way there would be *"no more government of man by man, by means of accumulation of capital"* and the *"social republic"* established. Hence his support for co-operatives:

> *"The importance of their work lies not in their petty union interests, but in their denial of the rule of capitalists, usurers, and governments, which the first [French] revolution left undisturbed. Afterwards, when they have conquered the political lie... the groups of workers should take over the great departments of industry which are their natural inheritance."* [cited in **Pierre-Joseph Proudhon**, E. Hymans, pp. 190–1, and **Anarchism**, George Woodcock, p. 110, 112]

In other words, a **socialist** society as workers would no longer be separated from the means of production and they would control their own work (the *"abolition of the proletariat,"* to use Proudhon's expression). This would mean recognising that *"the right to products is exclusive — jus in re; the right to means is common — jus ad rem"* [cited by Woodcock, **Anarchism**, p. 96] which would lead to self-management:

> *"In democratising us, revolution has launched us on the path of industrial democracy."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 63]

As Woodcock points out, in Proudhon's *"picture of the ideal society of the ideal society it is this predominance of the small proprietor, the peasant or artisan, that immediately impresses one"* with *"the creation of co-operative associations for the running of factories and railways."* [*"On Proudhon's 'What is Property?'"*, **Op. Cit.**, p. 209, p. 210]

All of which hardly supports Caplan's attempts to portray Proudhon as "really" a capitalist all along. Indeed, the "later" Proudhon's support for protectionism [**Selected Writings of Pierre-Joseph Proudhon**, p. 187], the *"fixing after amicable discussion of a **maximum** and **minimum** profit margin," "the organising of regulating societies"* and that mutualism would *"regulate the market"* [**Op. Cit.**, p. 70] and his obvious awareness of economic power and that capitalism exploited and oppressed the wage-worker suggests that rather than leading some to exclude Proudhon from the "leftist camp" altogether, it is a case of excluding him utterly from the "rightist camp" (i.e. "anarcho"-capitalism). Therefore Caplan's attempt to claim (co-opt would be better) Proudhon for "anarcho"-capitalism indicates how far Caplan will twist (or ignore) the evidence. As would quickly become obvious when reading his work, Proudhon would (to use Caplan's words) *"normally classify government, property, hierarchical organisations ... as 'rulership.'"*

To summarise, Proudhon was a socialist and Caplan's attempts to rewrite anarchist and socialist history fails. Proudhon was the fountainhead for both wings of the anarchist movement and **What is Property?** *"embraces the core of nineteenth century anarchism... [bar support for revolution] all the rest of later anarchism is there, spoken or implied: the conception of a free society united by association, of workers controlling the means of production... [this book] remains the foundation on which the whole edifice of nineteenth century anarchist theory was to be constructed."* [**Op. Cit.**, p. 210]

Little wonder Bakunin stated that his ideas were Proudhonism *"widely developed and pushed to these, its final consequences."* [**Michael Bakunin: Selected Writings**, p. 198]

4 — Tucker on Property, Communism and Socialism.

That Tucker called himself a socialist is quickly seen from **Instead of A Book** or any of the books written about Tucker and his ideas. That Caplan seeks to deny this means that either Caplan has not looked at either **Instead of a Book** or the secondary literature (with obvious implications

for the accuracy of his FAQ) or he decided to ignore these facts in favour of his own ideologically tainted version of history (again with obvious implications for the accuracy and objectivity of his FAQ).

Caplan, in an attempt to deny the obvious, quotes Tucker from 1887 as follows in section 14 (What are the major debates between anarchists? What are the recurring arguments?):

> *"It will probably surprise many who know nothing of Proudhon save his declaration that 'property is robbery' to learn that he was perhaps the most vigorous hater of Communism that ever lived on this planet. But the apparent inconsistency vanishes when you read his book and find that by property he means simply legally privileged wealth or the power of usury, and not at all the possession by the labourer of his products."*

You will instantly notice that Proudhon does not mean by property *"the possession of the labourer of his products."* However, Proudhon did include in his definition of "property" the possession of the capital to steal profits from the work of the labourers. As is clear from the quote, Tucker and Proudhon was opposed to capitalist property (*"the power of usury"*). From Caplan's own evidence he proves that Tucker was not a capitalist!

But lets quote Tucker on what he meant by *"usury"*:

> *"There are three forms of usury, interest on money, rent on land and houses, and profit in exchange. Whoever is in receipt of any of these is a usurer."* [cited in **Men against the State** by James J. Martin, p. 208]

Which can hardly be claimed as being the words of a person who supports capitalism!

And we should note that Tucker considered both government and capital oppressive. He argued that anarchism meant *"the restriction of power to self and the abolition of power over others. Government makes itself felt alike in country and in city, capital has its usurious grip on the farm as surely as on the workshop and the oppressions and exactions of neither government nor capital can be avoided by migration."* [**Instead of a Book**, p. 114]

And, we may add, since when was socialism identical to communism? Perhaps Caplan should actually read Proudhon and the anarchist critique of private property before writing such nonsense? We have indicated Proudhon's ideas above and will not repeat ourselves. However, it is interesting that this passes as "evidence" of "anti-socialism" for Caplan, indicating that he does not know what socialism or anarchism actually is. To state the obvious, you can be a hater of "communism" and still be a socialist!

So this, his one attempt to prove that Tucker, Spooner and even Proudhon were really capitalists by quoting the actual people involved is a failure.

He asserts that for any claim that "anarcho"-capitalism is not anarchist is wrong because *"the factual supporting arguments are often incorrect. For example, despite a popular claim that socialism and anarchism have been inextricably linked since the inception of the anarchist movement, many 19th-century anarchists, not only Americans such as Tucker and Spooner, but even Europeans like Proudhon, were ardently in favour of private property (merely believing that some existing sorts of property were illegitimate, without opposing private property as such)."*

The facts supporting the claim of anarchists being socialists, however, are not "incorrect." It is Caplan's assumption that socialism is against all forms of "property" which is wrong. To state the

obvious, socialism does not equal communism (and anarcho-communists support the rights of workers to own their own means of production if they do not wish to join communist communes — see above). Thus Proudhon was renown as the leading French Socialist theorist when he was alive. His ideas were widely known in the socialist movement and in many ways his economic theories were similar to the ideas of such well known early socialists as Robert Owen and William Thompson. As Kropotkin notes:

> *"It is worth noticing that French mutualism had its precursor in England, in William Thompson, who began by mutualism before he became a communist, and in his followers John Gray (A Lecture on Human Happiness, 1825; The Social System, 1831) and J. F. Bray (Labour's Wrongs and Labour's Remedy, 1839)."* [**Kropotkin's Revolutionary Pamphlets**, p. 291]

Perhaps Caplan will now claim Robert Owen and William Thompson as capitalists?

Tucker called himself a socialist on many different occasions and stated that there were *"two schools of Socialistic thought ... State Socialism and Anarchism."* And stated in very clear terms that:

> *"liberty insists on Socialism... — true Socialism, Anarchistic Socialism: the prevalence on earth of Liberty, Equality, and Solidarity."* [**Instead of a Book**, p. 363]

And like all socialists, he opposed capitalism (i.e. usury and wage slavery) and wished that *"there should be no more proletaires."* [see the essay *"State Socialism and Anarchism"* in **Instead of a Book**, p. 17]

Caplan, of course, is well aware of Tucker's opinions on the subject of capitalism and private property. In section 13 (What moral justifications have been offered for anarchism?) he writes:

> *"Still other anarchists, such as Lysander Spooner and Benjamin Tucker as well as Proudhon, have argued that anarchism would abolish the exploitation inherent in interest and rent simply by means of free competition. In their view, only labour income is legitimate, and an important piece of the case for anarchism is that without government-imposed monopolies, non-labour income would be driven to zero by market forces. It is unclear, however, if they regard this as merely a desirable side effect, or if they would reject anarchism if they learned that the predicted economic effect thereof would not actually occur."*

Firstly, we must point that Proudhon, Tucker and Spooner considered **profits** to be exploitative as well as interest and rent. Hence we find Tucker arguing that a *"just distribution of the products of labour is to be obtained by destroying all sources of income except labour. These sources may be summed up in one word, — usury; and the three principle forms of usury are interest, rent and profit."* [**Instead of a Book**, p. 474] To ignore the fact that Tucker also considered profit as exploitative seems strange, to say the least, when presenting an account of his ideas.

Secondly, rather than it being *"unclear"* whether the end of usury was *"merely a desirable side effect"* of anarchism, the opposite is the case. Anyone reading Tucker (or Proudhon) would quickly see that their politics were formulated with the express aim of ending usury. Just one example from hundreds:

> *"Liberty will abolish interest; it will abolish profit; it will abolish monopolistic rent; it will abolish taxation; it will abolish the exploitation of labour; it will abolish all means whereby any labourer can be deprived of any of his product."* [**Instead of a Book**, p. 347]

While it is fair to wonder whether these economic effects would result from the application of Tucker's ideas, it **is** distinctly incorrect to claim that the end of usury was considered in any way as a *"desirable side effect"* of them. Rather, in **their** eyes, the end of usury was one of **the** aims of Individualist Anarchism, as can be clearly seen. As Wm. Gary Kline points out in his excellent account of Individualist Anarchism:

> *"the American anarchists exposed the tension existing in liberal thought between private property and the ideal of equal access. The Individualist Anarchists were, at least, aware that existing conditions were far from ideal, that the system itself worked against the majority of individuals in their efforts to attain its promises. Lack of capital, the means to creation and accumulation of wealth, usually doomed a labourer to a life of exploitation. This the anarchists knew and they abhorred such a system."* [**The Individualist Anarchists**, p. 102]

This is part of the reason why they considered themselves socialists and, equally as important, they were considered socialists by **other** socialists such as Kropotkin and Rocker. The Individualist Anarchists, as can be seen, fit very easily into Kropotkin's comments that *"the anarchists, in common with all socialists... maintain that the now prevailing system of private ownership in land, and our capitalist production for the sake of profits, represent a monopoly which runs against both the principles of justice and the dictates of utility."* [**Kropotkin's Revolutionary Pamphlets**, p. 285] Given that they considered profits as usury and proposed *"occupancy and use"* in place of the prevailing land ownership rights they are obviously socialists.

That the end of usury was considered a clear aim of his politics explains Tucker's 1911 postscript to his famous essay *"State Socialism and Anarchism"* in which he argues that *"concentrated capital"* **itself** was a barrier towards anarchy. He argued that the *"trust is now a monster which... even the freest competition, could it be instituted, would be unable to destroy."* While, in an earlier period, big business *"needed the money monopoly for its sustenance and its growth"* its size now ensured that it *"sees in the money monopoly a convenience, to be sure, but no longer a necessity. It can do without it."* This meant that the way was now *"not so clear."* Indeed, he argued that the problem of the trusts *"must be grappled with for a time solely by forces political or revolutionary"* as the trust had moved beyond the reach of *"economic forces"* simply due to the concentration of resources in its hands. [*"Postscript"* to **State Socialism and Anarchism**]

If the end of *"usury"* **was** considered a *"side-effect"* rather than an objective, then the problems of the trusts and economic inequality/power (*"enormous concentration of wealth"*) would not have been an issue. That the fact of economic power **was** obviously considered a hindrance to anarchy suggests the end of usury was a key aim, an aim which "free competition" in the abstract could not achieve. Rather than take the "anarcho"-capitalist position that massive inequality did not affect "free competition" or individual liberty, Tucker obviously thought it did and, therefore, "free competition" (and so the abolition of the public state) in conditions of massive inequality would not create an anarchist society.

By trying to relegate an aim to a *"side-effect,"* Caplan distorts the ideas of Tucker. Indeed, his comments on trusts, *"concentrated capital"* and the *"enormous concentration of wealth"* indicates how far Individualist Anarchism is from "anarcho"-capitalism (which dismisses the question of economic power Tucker raises out of hand). It also indicates the unity of political and economic ideas, with Tucker being aware that without a suitable economic basis individual freedom was meaningless. That an economy (like capitalism) with massive inequalities in wealth and so power was not such a basis is obvious from Tucker's comments.

Thirdly, what did Tucker consider as a government-imposed monopoly? Private property, particularly in land! As he states *"Anarchism undertakes to protect no titles except such as are based upon actual occupancy and use"* and that anarchism *"means the abolition of landlordism and the annihilation of rent."* [**Instead of a Book**, p. 61, p. 300] This, to state the obvious, is a restriction on "private property" (in the capitalist sense), which, if we use Caplan's definition of socialism, means that Tucker was obviously part of the "Leftist camp" (i.e. socialist camp). In other words, Tucker considered capitalism as the product of statism while socialism (libertarian of course) would be the product of anarchy.

So, Caplan's historical argument to support his notion that anarchism is simply anti-government fails. Anarchism, in all its many forms, have distinct economic as well as political ideas and these cannot be parted without loosing what makes anarchism unique. In particular, Caplan's attempt to portray Proudhon as an example of a "pure" anti-government anarchism also fails, and so his attempt to co-opt Tucker and Spooner also fails (as noted, Tucker cannot be classed as a "pure" anti-government anarchist either). If Proudhon was a socialist, then it follows that his self-proclaimed followers will also be socialists — and, unsurprisingly, Tucker called himself a socialist and considered anarchism as part of the wider socialist movement.

> *"Like Proudhon, Tucker was an 'un-marxian socialist'"* [William O. Reichart, **Partisans of Freedom: A Study in American Anarchism**, p. 157]

5 — Anarchism and "anarcho"-capitalism

Caplan tries to build upon the non-existent foundation of Tucker's and Proudhon's "capitalism" by stating that:

> *"Nor did an ardent anarcho-communist like Kropotkin deny Proudhon or even Tucker the title of 'anarchist.' In his Modern Science and Anarchism, Kropotkin discusses not only Proudhon but 'the American anarchist individualists who were represented in the fifties by S.P. Andrews and W. Greene, later on by Lysander Spooner, and now are represented by Benjamin Tucker, the well-known editor of the New York Liberty.' Similarly in his article on anarchism for the 1910 edition of the Encyclopedia Britannica, Kropotkin again freely mentions the American individualist anarchists, including 'Benjamin Tucker, whose journal Liberty was started in 1881 and whose conceptions are a combination of those of Proudhon with those of Herbert Spencer.'"*

There is a nice historical irony in Caplan's attempts to use Kropotkin to prove the historical validity of "anarcho"-capitalism. This is because while Kropotkin was happy to include Tucker into the anarchist movement, Tucker often claimed that an anarchist could not be a communist! In **State Socialism and Anarchism** he stated that anarchism was *"an ideal utterly inconsistent*

with that of those Communists who falsely call themselves Anarchists while at the same time advocating a regime of Archism fully as despotic as that of the State Socialists themselves." [*"State Socialism and Anarchism"*, **Instead of a Book**, pp. 15–16]

While modern social anarchists follow Kropotkin in not denying Proudhon or Tucker as anarchists, we do deny the anarchist title to supporters of capitalism. Why? Simply because anarchism as a **political** movement (as opposed to a dictionary definition) has always been anti-capitalist and against capitalist wage slavery, exploitation and oppression. In other words, anarchism (in all its forms) has always been associated with specific political **and** economic ideas. Both Tucker and Kropotkin defined their anarchism as an opposition to both state and capitalism. To quote Tucker on the subject:

> *"Liberty insists... [on] the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man."* [cited in **Native American Anarchism — A Study of Left-Wing American Individualism** by Eunice Schuster, p. 140]

Kropotkin defined anarchism as *"the no-government system of socialism."* [**Kropotkin's Revolutionary Pamphlets**, p. 46] Malatesta argued that *"when [people] sought to overthrow both State and property – then it was anarchy was born"* and, like Tucker, aimed for *"the complete destruction of the domination and exploitation of man by man."* [**Life and Ideas**, p. 19, pp. 22–28] Indeed **every** leading anarchist theorist defined anarchism as opposition to government **and** exploitation. Thus Brain Morris' excellent summary:

> *"Another criticism of anarchism is that it has a narrow view of politics: that it sees the state as the fount of all evil, ignoring other aspects of social and economic life. This is a misrepresentation of anarchism. It partly derives from the way anarchism has been defined [in dictionaries, for example], and partly because Marxist historians have tried to exclude anarchism from the broader socialist movement. But when one examines the writings of classical anarchists... as well as the character of anarchist movements... it is clearly evident that it has never had this limited vision. It has always challenged all forms of authority and exploitation, and has been equally critical of capitalism and religion as it has been of the state."* [*"Anthropology and Anarchism,"* **Anarchy: A Journal of Desire Armed** no. 45, p. 40]

Therefore anarchism was never purely a political concept, but always combined an opposition to oppression with an opposition to exploitation. Little wonder, then, that both strands of anarchism have declared themselves "socialist" and so it is *"conceptually and historically misleading"* to *"create a dichotomy between socialism and anarchism."* [Brian Morris, **Op. Cit.**, p. 39] Needless to say, anarchists oppose **state** socialism just as much as they oppose capitalism. All of which means that anarchism and capitalism are two **different** political ideas with specific (and opposed) meanings — to deny these meanings by uniting the two terms creates an oxymoron, one that denies the history and the development of ideas as well as the whole history of the anarchist movement itself.

As Kropotkin knew Proudhon to be an anti-capitalist, a socialist (but not a communist) it is hardly surprising that he mentions him. Again, Caplan's attempt to provide historical evidence

for a "right-wing" anarchism fails. Funny that the followers of Kropotkin are now defending individualist anarchism from the attempted "adoption" by supporters of capitalism! That in itself should be enough to indicate Caplan's attempt to use Kropotkin to give credence to "anarcho"-capitalist co-option of Proudhon, Tucker and Spooner fails.

Interestingly, Caplan admits that "anarcho"-capitalism has recent origins. In section 8 (Who are the major anarchist thinkers?) he states:

> *"Anarcho-capitalism has a much more recent origin in the latter half of the 20th century. The two most famous advocates of anarcho-capitalism are probably Murray Rothbard and David Friedman. There were however some interesting earlier precursors, notably the Belgian economist Gustave de Molinari. Two other 19th-century anarchists who have been adopted by modern anarcho-capitalists with a few caveats are Benjamin Tucker and Lysander Spooner. (Some left-anarchists contest the adoption, but overall Tucker and Spooner probably have much more in common with anarcho-capitalists than with left-anarchists.)"*

Firstly, as he states, Tucker and Spooner have been *"adopted"* by the "anarcho"-capitalist school. Being dead they have little chance to protest such an adoption, but it is clear that they considered themselves as socialists, against capitalism (it may be claimed that Spooner never called himself a socialist, but then again he never called himself an anarchist either; it is his strong opposition to wage labour that places him in the socialist camp). Secondly, Caplan lets the cat out the bag by noting that this "adoption" involved a few warnings — more specifically, the attempt to rubbish or ignore the underlying socio-economic ideas of Tucker and Spooner and the obvious anti-capitalist nature of their vision of a free society.

Individualist anarchists are, indeed, more similar to classical liberals than social anarchists. Similarly, social anarchists are more similar to Marxists than Individualist anarchists. But neither statement means that Individualist anarchists are capitalists, or social anarchists are state socialists. It just means some of their ideas overlap — and we must point out that Individualist anarchist ideas overlap with Marxist ones, and social anarchist ones with liberal ones (indeed, one interesting overlap between Marxism and Individualist Anarchism can be seen from Marx's comment that abolishing interest and interest-bearing capital *"means the abolition of capital and of capitalist production itself."* [**Theories of Surplus Value**, vol. 3, p. 472] Given that Individualist Anarchism aimed to abolish interest (along with rent and profit) it would suggest, from a Marxist position, that it is a socialist theory).

So, if we accept Kropotkin's summary that Individualist Anarchism ideas are *"partly those of Proudhon, but party those of Herbert Spencer"* [**Kropotkins' Revolutionary Pamphlets**, p. 173], what the "anarcho"-capitalist school is trying to is to ignore the Proudhonian (i.e. socialist) aspect of their theories. However, that just leaves Spencer and Spencer was not an anarchist, but a right-wing Libertarian, a supporter of capitalism (a *"champion of the capitalistic class"* as Tucker put it). In other words, to ignore the socialist aspect of Individualist Anarchism (or anarchism in general) is to reduce it to liberalism, an extreme version of liberalism, but liberalism nevertheless — and liberalism is not anarchism. To reduce anarchism so is to destroy what makes anarchism a unique political theory and movement:

> *"anarchism does derive from liberalism and socialism both historically and ideologically ... In a sense, anarchists always remain liberals and socialists, and whenever they reject*

> *what is good in either they betray anarchism itself ... We are liberals but more so, and socialists but more so."* [Nicholas Walter, **Reinventing Anarchy**, p. 44]

In other words, "anarcho"-capitalism is a development of ideas which have little in common with anarchism. Jeremy Jennings, in his overview of anarchist theory and history, agrees:

> *"It is hard not to conclude that these ideas ["anarcho"-capitalism] — with roots deep in classical liberalism — are described as anarchist only on the basis of a misunderstanding of what anarchism is."* [**Contemporary Political Ideologies**, Roger Eatwell and Anthony Wright (eds.), p. 142]

Barbara Goodwin also agrees that the "anarcho"-capitalists' *"true place is in the group of right-wing libertarians"* not in anarchism [**Using Political Ideas**, p. 148]. Indeed, that "anarcho"-capitalism is an off-shoot of classical liberalism is a position Murray Rothbard would agree with, as he states that right-wing Libertarians constitute *"the vanguard of classical liberalism."* [quoted by Ulrike Heider, **Anarchism: Left, Right and Green**, p. 95] Unfortunately for this perspective anarchism is not liberalism and liberalism is not anarchism. And equally as unfortunate (this time for the anarchist movement!) "anarcho"-capitalism *"is judged to be anarchism largely because some anarcho-capitalists **say** they are 'anarchists' and because they criticise the State."* [Peter Sabatini, **Social Anarchism**, no. 23, p. 100] However, being opposed to the state is a necessary but not sufficient condition for being an anarchist (as can be seen from the history of the anarchist movement). Brian Morris puts it well when he writes:

> *"The term anarchy comes from the Greek, and essentially means 'no ruler.' Anarchists are people who reject all forms of government or coercive authority, all forms of hierarchy and domination. They are therefore opposed to what the Mexican anarchist Flores Magon called the 'sombre trinity' — state, capital and the church. Anarchists are thus opposed to both capitalism and to the state, as well as to all forms of religious authority. But anarchists also seek to establish or bring about by varying means, a condition of anarchy, that is, a decentralised society without coercive institutions, a society organised through a federation of voluntary associations. Contemporary 'right-wing' libertarians ... who are often described as 'anarchocapitalists' and who fervently defend capitalism, are not in any real sense anarchists."* [**Op. Cit.**, p. 38]

Rather than call themselves by a name which reflects their origins in liberalism (and **not** anarchism), the "anarcho"-capitalists have instead seen fit to try and appropriate the name of anarchism and, in order to do so, ignore key aspects of anarchist theory in the process. Little wonder, then, they try and prove their anarchist credentials via dictionary definitions rather than from the anarchist movement itself (see next section).

Caplan's attempt in his FAQ is an example to ignore individualist anarchist theory and history. Ignored is any attempt to understand their ideas on property and instead Caplan just concentrates on the fact they use the word. Caplan also ignores:

> their many statements on being socialists and part of the wider socialist movement. their opposition to capitalist property-rights in land and other scarce resources. their recognition that capitalism was based on usury and that it was exploitation. their

> attacks on government **and** capital, rather than just government. their support for strikes and other forms of direct action by workers to secure the full product of their labour.

In fact, the only things considered useful seems to be the individualist anarchist's support for free agreement (something Kropotkin also agreed with) and their use of the word "property." But even a cursory investigation indicates the non-capitalist nature of their ideas on property and the socialistic nature of their theories.

Perhaps Caplan should ponder these words of Kropotkin supporters of the *"individualist anarchism of the American Proudhonians ... soon realise that the individualisation they so highly praise is not attainable by individual efforts, and ... abandon the ranks of the anarchists, and are driven into the liberal individualism of the classical economist."* [**Kropotkin's Revolutionary Pamphlets**, p. 297]

Caplan seems to confuse the end of the ending place of ex-anarchists with their starting point. As can be seen from his attempt to co-opt Proudhon, Spooner and Tucker he has to ignore their ideas and rewrite history.

6 — Appendix: Defining Anarchism

In his Appendix *"Defining Anarchism"* we find that Caplan attempts to defend his dictionary definition of anarchism. He does this by attempting to refute two arguments, The Philological Argument and the Historical Argument.

Taking each in turn we find:

Caplan's definition of *"The Philological Argument"* is as follows:

> *"Several critics have noted the origin of the term 'anarchy,' which derives from the Greek 'arkhos,' meaning 'ruler,' and the prefix an-,' meaning 'without.' It is therefore suggested that in my definition the word 'government' should be replaced with the word 'domination' or 'rulership'; thus re-written, it would then read: 'The theory or doctrine that all forms of rulership are unnecessary, oppressive, and undesirable and should be abolished.'"*

Caplan replies by stating that:

> *"This is all good and well, so long as we realise that various groups of anarchists will radically disagree about what is or is not an instance of 'rulership.'"*

However, in order to refute this argument by this method, he has to ignore his own methodology. A dictionary definition of ruler is *"a person who rules by authority."* and *"rule"* is defined as *"to have authoritative control over people"* or *"to keep (a person or feeling etc.) under control, to dominate"* [**The Oxford Study Dictionary**]

Hierarchy by its very nature is a form of rulership (hier-***archy***) and is so opposed by anarchists. Capitalism is based upon wage labour, in which a worker follows the rules of their boss. This is obviously a form of hierarchy, of domination. Almost all people (excluding die-hard supporters of capitalism) would agree that being told what to do, when to do and how to do by a boss is a form of rulership. Anarchists, therefore, argue that *"economic exploitation and political domination . ..*

[are] two continually interacting aspects of the same thing — the subjection of man by man." [Errico Malatesta, **Life and Ideas**, p. 147] Rocker made the same point, arguing that the *"exploitation of man by man and the domination of man over man are inseparable, and each is the condition of the other."* [**Anarcho-Syndicalism**, p. 18]

Thus Caplan is ignoring the meaning of words to state that *"on its own terms this argument fails to exclude anarcho-capitalists"* because they define rulership to exclude most forms of archy! Hardly convincing.

Strangely enough, "anarcho"-capitalist icon Murray Rothbard actually provides evidence that the anarchist position **is** correct. He argues that the state *"arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area."* [**The Ethics of Liberty**, p. 170] This is obviously a form of rulership. However, he also argues that *"[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc."* [**Op. Cit.**, p. 173] Which, to state the obvious, means that **both** the state and property is marked by an *"ultimate decision-making power"* over a given territory. The only "difference" is that Rothbard claims the former is "just" (i.e. "justly" acquired) and the latter is "unjust" (i.e. acquired by force). In reality of course, the modern distribution of property is just as much a product of past force as is the modern state. In other words, the current property owners have acquired their property in the same unjust fashion as the state has its. If one is valid, so is the other. Rothbard (and "anarcho"-capitalists in general) are trying to have it both ways.

Rothbard goes on to show why statism and private property are essentially the same thing:

> *"If the State may be said too properly own its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there is no private property in its area, because it really owns the entire land surface. So long as the State permits its subjects to leave its territory, then, it can be said to act as does any other owner who sets down rules for people living on his property."* [**Op. Cit.**, p. 170]

Of course Rothbard does not draw the obvious conclusion. He wants to maintain that the state is bad and property is good while drawing attention to their obvious similarities! Ultimately Rothbard is exposing the bankruptcy of his own politics and analysis. According to Rothbard, something can look like a state (i.e. have the *"ultimate decision-making power"* over an area) and act like a state (i.e. *"make rules for everyone"* who lives in an area, i.e. govern them) but not be a state. This not a viable position for obvious reasons.

Thus to claim, as Caplan does, that property does not generate "rulership" is obviously nonsense. Not only does it ignore the dictionary definition of rulership (which, let us not forget, is Caplan's **own** methodology) as well as commonsense, it obviously ignores what the two institutions have in common. **If** the state is to be condemned as "rulership" then so must property — for reasons, ironically enough, Rothbard makes clear!

Caplan's critique of the *"Philological Argument"* fails because he tries to deny that the social relationship between worker and capitalist and tenant and landlord is based upon **archy,** when it obviously is. To quote Proudhon, considered by Tucker as *"the Anarchist **par excellence,**"* the employee *"is subordinated, exploited: his permanent condition is one of obedience."* Without *"association"* (i.e. co-operative workplaces, workers' self-management) there would be *"two industrial castes of masters and wage-workers which is repugnant to a free and democratic society,"* castes *"related as subordinates and superiors."* [**The General Idea of the Revolution**, p. 216]

Moving on, Caplan defines the Historical Argument as:

> *"A second popular argument states that historically, the term 'anarchism' has been clearly linked with anarcho-socialists, anarcho-communists, anarcho-syndicalists, and other enemies of the capitalist system. Hence, the term 'anarcho-capitalism' is a strange oxymoron which only demonstrates ignorance of the anarchist tradition."*

He argues that *"even if we were to accept the premise of this argument – to wit, that the meaning of a word is somehow determined by its historical usage — the conclusion would not follow because the minor premise is wrong. It is simply not true that from its earliest history, all anarchists were opponents of private property, free markets, and so on."*

Firstly, anarchism is not just a word, but a political idea and movement and so the word used in a political context is associated with a given body of ideas. You cannot use the word to describe something which has little or nothing in common with that body of ideas. You cannot call Marxism "anarchism" simply because they share the anarchist opposition to capitalist exploitation and aim for a stateless society, for example.

Secondly, it is true that anarchists like Tucker were not against the free market, but they did not consider capitalism to be defined by the free market but by exploitation and wage labour (as do all socialists). In this they share a common ground with Market Socialists who, like Tucker and Proudhon, do not equate socialism with opposition to the market or capitalism with the "free market." The idea that socialists oppose *"private property, free markets, and so on"* is just an assumption by Caplan. Proudhon, for example, was not opposed to competition, "property" (in the sense of possession) and markets but during his lifetime and up to the present date he is acknowledged as a socialist, indeed one of the greatest in French (if not European) history. Similarly we find Rudolf Rocker writing that the Individualist Anarchists *"all agree on the point that man be given the full reward of his labour and recognised in this right the economic basis of all personal liberty. They regard free competition ... as something inherent in human nature ... They answered the* ***socialists of other schools*** *[emphasis added] who saw in* ***free competition*** *one of the destructive elements of capitalistic society that the evil lies in the fact that today we have too little rather than too much competition."* [quoted by Herbert Read, **A One-Man Manifesto**, p. 147] Rocker obviously considered support for free markets as compatible with socialism. In other words, Caplan's assumption that all socialists oppose free markets, competition and so on is simply false — as can be seen from the history of the socialist movement. What socialists **do** oppose is capitalist exploitation — socialism *"in its wide, generic, and true sense"* was an *"effort to* ***abolish*** *the exploitation of labour by capital."* [Peter Kropotkin, **Kropotkin's Revolutionary Pamphlets**, p. 169] In this sense the Individualist Anarchists are obviously socialists, as Tucker and Labadie constantly pointed out.

In addition, as we have proved elsewhere, Tucker was opposed to capitalist private property just as much as Kropotkin was. Moreover, it is clear from Tucker's works that he considered himself an enemy of the capitalist system and called himself a socialist. Thus Caplan's attempt to judge the historical argument on its own merits fails because he has to rewrite history to do so.

Caplan is right to state that the meaning of words change over time, but this does not mean we should run to use dictionary definitions. Dictionaries rarely express political ideas well — for example, most dictionaries define the word "anarchy" as "chaos" and "disorder." Does that mean

anarchists aim to create chaos? Of course not. Therefore, Caplan's attempt to use dictionary definitions is selective and ultimately useless — anarchism as a political movement cannot be expressed by dictionary definitions and any attempt to do so means to ignore history.

The problems in using dictionary definitions to describe political ideas can best be seen from the definition of the word "Socialism." According to the **Oxford Study Dictionary** Socialism is *"a political and economic theory advocating that land, resources, and the chief industries should be owned and managed by the State."* The **Webster's Ninth New Collegiate Dictionary**, conversely, defines socialism as *"any of various economic and political theories advocating collective or government ownership and administration of the means of production and distribution of goods."*

Clearly the latter source has a more accurate definition of socialism than the former, by allowing for "collective" versus solely "State" control of productive means. Which definition would be better? It depends on the person involved. A Marxist, for example, could prefer the first one simply to exclude anarchism from the socialist movement, something they have continually tried to do. A right-libertarian could, again, prefer the first, for obvious reasons. Anarchists would prefer the second, again for obvious reasons. However neither definition does justice to the wide range of ideas that have described themselves as socialist.

Using dictionaries as the basis of defining political movements ensures that one's views depend on **which** dictionary one uses, and **when** it was written, and so on. This is why they are not the best means of resolving disputes — if resolution of disputes is, in fact, your goal.

Both Kropotkin and Tucker stated that they were socialists and that anarchism was socialistic. If we take the common modern meaning of the word as state ownership as the valid one then Tucker and Kropotkin are **not** socialists and no form of anarchism is socialist. This is obviously nonsense and it shows the limitations of using dictionary definitions on political theories.

Therefore Caplan's attempt to justify using the dictionary definition fails. Firstly, because the definitions used would depend which dictionary you use. Secondly, dictionary definitions cannot capture the ins and outs of a **political** theory or its ideas on wider subjects.

Ironically enough, Caplan is repeating an attempt made by State Socialists to deny Individualist Anarchism its socialist title (see *"Socialism and the Lexicographers"* in **Instead of a Book**). In reply to this attempt, Tucker noted that:

> *"The makers of dictionaries are dependent upon specialists for their definitions. A specialist's definition may be true or it may be erroneous. But its truth cannot be increased or its error diminished by its acceptance by the lexicographer. Each definition must stand on its own merits."* [**Instead of a Book**, p. 369]

And Tucker provided many quotes from **other** dictionaries to refute the attempt by the State Socialists to define Individualist Anarchism outside the Socialist movement. He also notes that any person trying such a method will *"find that the Anarchistic Socialists are not to be stripped of one half of their title by the mere dictum of the last lexicographer."* [**Op. Cit.**, p. 365]

Caplan should take note. His technique been tried before and it failed then and it will fail again for the same reasons.

As far as his case against the Historical Argument goes, this is equally as flawed. Caplan states that:

> *"Before the Protestant Reformation, the word 'Christian,' had referred almost entirely to Catholics (as well as adherents of the Orthodox Church) for about one thousand years.*

Does this reveal any linguistic confusion on the part of Lutherans, Calvinists, and so on, when they called themselves 'Christians'? Of course not. It merely reveals that a word's historical usage does not determine its meaning."

However, as analogies go this is pretty pathetic. Both the Protestants and Catholics followed the teachings of Christ but had different interpretations of it. As such they could both be considered Christians — followers of the Bible. In the case of anarchism, there are two main groupings — individualist and social. Both Tucker and Bakunin claimed to follow, apply and develop Proudhon's ideas (and share his opposition to both state and capitalism) and so are part of the anarchist tradition.

The anarchist movement was based upon applying the core ideas of Proudhon (his anti-statism and socialism) and developing them in the same spirit, and these ideas find their roots in **socialist** history and theory. For example, William Godwin was claimed as an anarchist after his death by the movement because of his opposition to both state and private property, something all anarchists oppose. Similarly, Max Stirner's opposition to both state and capitalist property places him within the anarchist tradition.

Given that we find fascists and Nazis calling themselves "republicans," "democrats," even "liberals" it is worthwhile remembering that the names of political theories are defined not by who use them, but by the ideas associated with the name. In other words, a fascist cannot call themselves a "liberal" any more than a capitalist can call themselves an "anarchist." To state, as Caplan does, that the historical usage of a word does not determine its meaning results in utter confusion and the end of meaningful political debate. If the historical usage of a name is meaningless will we soon see fascists as well as capitalists calling themselves anarchists? In other words, the label "anarcho-capitalism" is a misnomer, pure and simple, as **all** anarchists have opposed capitalism as an authoritarian system based upon exploitation and wage slavery.

To ignore the historical usage of a word means to ignore what the movement that used that word stood for. Thus, if Caplan is correct, an organisation calling itself the "Libertarian National Socialist Party," for example, can rightly call itself libertarian for *"a word's historical usage does not determine its meaning."* Given that right-libertarians in the USA have tried to steal the name "libertarian" from anarchists and anarchist influenced socialists, such a perspective on Caplan's part makes perfect sense. How ironic that a movement that defends private property so strongly continually tries to steal names from other political tendencies.

Perhaps a better analogy for the conflict between anarchism and "anarcho"- capitalism would be between Satanists and Christians. Would we consider as Christian a Satanist grouping claiming to be Christian? A grouping that rejects everything that Christians believe but who like the name? Of course not. Neither would we consider as a right-libertarian someone who is against the free market or someone as a Marxist who supports capitalism. However, that is what Caplan and other "anarcho"-capitalists want us to do with anarchism.

Both social and individualist anarchists defined their ideas in terms of both political (abolition of the state) **and** economic (abolition of exploitation) ideas. Kropotkin defined anarchism as *"the no-government form of socialism"* while Tucker insisted that anarchism was *"the abolition of the State and the abolition of usury."* In this they followed Proudhon who stated that *"[w]e do not admit the government of man by man any more than the exploitation of man by man."* [quoted by Peter Marshall, **Demanding the Impossible**, p. 245]

In other words, a political movement's economic ideas are just as much a part of its theories as their political ideas. Any attempt to consider one in isolation from the other kills what defines the theory and makes it unique. And, ultimately, any such attempt, is a lie:

> *"[classical liberalism] is in theory a kind of anarchy without socialism, and therefore simply a lie, for freedom is impossible without equality, and real anarchy cannot exist without solidarity, without socialism."* [Errico Malatesta, **Anarchy**, p. 46]

Therefore Caplan's case against the Historical Argument also fails — "anarcho-capitalism" is a misnomer because anarchism has always, in all its forms, opposed capitalism. Denying and re-writing history is hardly a means of refuting the historical argument.

Caplan ends by stating:

> *"Let us designate anarchism (1) anarchism as you define it. Let us designate anarchism (2) anarchism as I and the American Heritage College Dictionary define it. This is a FAQ about anarchism (2)."*

Note that here we see again how the dictionary is a very poor foundation upon to base an argument. Again using **Webster's Ninth New Collegiate Dictionary**, we find under "anarchist" — *"one who rebels against any authority, established order, or ruling power."* This definition is very close to that which "traditional" anarchists have — which is the basis for our own opposition to the notion that anarchism is merely rebellion against **State** authority.

Clearly this definition is at odds with Caplan's own view; is Webster's then wrong, and Caplan's view right? Which view is backed by the theory and history of the movement? Surely that should be the basis of who is part of the anarchist tradition and movement and who is not? Rather than do this, Caplan and other "anarcho"-capitalists rush to the dictionary (well, those that do not define anarchy as "disorder"). This is for a reason as anarchism as a political movement as always been explicitly anti-capitalist and so the term "anarcho"-capitalism is an oxymoron.

What Caplan fails to even comprehend is that his choices are false. Anarchism can be designated in two ways:

> (1). Anarchism as you define it
> (2). Anarchism as the anarchist movement defines it and finds expression in the theories developed by that movement.

Caplan chooses anarchism (1) and so denies the whole history of the anarchist movement. Anarchism is not a word, it is a political theory with a long history which dictionaries cannot cover. Therefore any attempt to define anarchism by such means is deeply flawed and ultimately fails.

That Caplan's position is ultimately false can be seen from the "anarcho"-capitalists themselves. In many dictionaries anarchy is defined as *"disorder," "a state of lawlessness"* and so on. Strangely enough, no "anarcho"-capitalist ever uses **these** dictionary definitions of "anarchy"! Thus appeals to dictionaries are just as much a case of defining anarchism as you desire as not using dictionaries. Far better to look at the history and traditions of the anarchist movement itself, seek out its common features and apply **those** as criteria to those seeking to include themselves in the movement. As can be seen, "anarcho"-capitalism fails this test and, therefore, are not part

of the anarchist movement. Far better for us all if they pick a new label to call themselves rather than steal our name.

Although most anarchists disagree on many things, the denial of our history is not one of them.

Replies to Some Errors and Distortions in Bryan Caplan's "Anarchist Theory FAQ" version 4.1.1.

There have been a few "anarchist" FAQ's produced before. Bryan Caplan's anarchism FAQ is one of the more recent. While appearing to be a "neutral" statement of anarchist ideas, it is actually in large part an "anarcho"-capitalist FAQ. This can be seen by the fact that anarchist ideas (which he calls "left-anarchist") are given less than half the available space while "anarcho"-capitalist dogma makes up the majority of it. Considering that anarchism has been around far longer than "anarcho"-capitalism and is the bigger and better established movement, this is surprising. Even his use of the term "left anarchist" is strange as it is never used by anarchists and ignores the fact that Individualist Anarchists like Tucker called themselves "socialists" and considered themselves part of the wider socialist movement. For anarchists, the expression "left anarchist" is meaningless as all anarchists are anti-capitalist. Thus the terms used to describe each "school" in his FAQ are biased (those whom Caplan calls "Left anarchists" do not use that term, usually preferring "social anarchist" to distinguish themselves from individualist anarchists like Tucker).

Caplan also frames the debate only around issues which he is comfortable with. For example, when discussing "left anarchist" ideas he states that *"A key value in this line of anarchist thought is egalitarianism, the view that inequalities, especially of wealth and power, are undesirable, immoral, and socially contingent."* This, however, is **not** why anarchists are egalitarians. Anarchists oppose inequalities because they undermine and restrict individual and social freedom.

Taking another example, under the question, *"How would left-anarchy work?"*, Caplan fails to spell out some of the really obvious forms of anarchist thought. For example, the works of Bookchin, Kropotkin, Bakunin and Proudhon are not discussed in any detail. His vague and confusing prose would seem to reflect the amount of thought that he has put into it. Being an "anarcho"-capitalist, Caplan concentrates on the economic aspect of anarchism and ignores its communal side. The economic aspect of anarchism he discusses is anarcho-syndicalism and tries to contrast the confederated economic system explained by one anarcho-syndicalist with Bakunin's opposition to Marxism. Unfortunately for Caplan, Bakunin is the source of anarcho-syndicalism's ideas on a confederation of self-managed workplaces running the economy. Therefore, to state that *"many"* anarchists *"have been very sceptical of setting up any overall political structure, even a democratic one, and focused instead on direct worker control at the factory level"* is simply **false**. The idea of direct local control within a confederated whole is a common thread through anarchist theory and activity, as any anarchist could tell you.

Lastly, we must note that after Caplan posted his FAQ to the "anarchy-list," many of the anarchists on that list presented numerous critiques of the "anarcho"-capitalist theories and of the ideas (falsely) attributed to social anarchists in the FAQ, which he chose to ignore (that he was aware of these postings is asserted by the fact he e-mailed one of the authors of this FAQ on the issue that anarchists never used or use the term "left-anarchist" to describe social anarchism. He replied by arguing that the term "left-anarchist" had been used by Michel Foucault, who never

claimed to be an anarchist, in one of his private letters! Strangely, he never posted his FAQ to the list again).

Therefore, as can be seen from these few examples, Caplan's "FAQ" is blatantly biased towards "anarcho-capitalism" and based on the mis-characterisations and the dis-emphasis on some of the most important issues between "anarcho-capitalists" and anarchists. It is clear that his viewpoint is anything but impartial.

This section will highlight some of the many errors and distortions in that FAQ. Numbers in square brackets refer to the corresponding sections Caplan's FAQ.

1 Is anarchism purely negative?

[1]. Caplan, consulting his **American Heritage Dictionary**, claims: *"Anarchism is a negative; it holds that one thing, namely government, is bad and should be abolished. Aside from this defining tenet, it would be difficult to list any belief that all anarchists hold."*

The last sentence is ridiculous. If we look at the works of Tucker, Kropotkin, Proudhon and Bakunin (for example) we discover that we can, indeed list one more *"belief that all anarchists hold."* This is opposition to exploitation, to usury (i.e. profits, interest and rent). For example, Tucker argued that *"Liberty insists... [on] the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man."* [cited in **Native American Anarchism — A Study of Left-Wing American Individualism** by Eunice Schuster, p. 140] Such a position is one that Proudhon, Bakunin and Kropotkin would agree with.

In other words, anarchists hold two beliefs — opposition to government **and** opposition to exploitation. Any person which rejects either of these positions cannot be part of the anarchist movement. In other words, an anarchist must be against capitalism in order to be a true anarchist.

Moreover it is not at all difficult to find a more fundamental *"defining tenet"* of anarchism. We can do so merely by analysing the term *"an-archy,"* which is composed of the Greek words **an**, meaning *"no"* or *"without,"* and **arche**, meaning literally *"a ruler,"* but more generally referring to the **principle** of rulership, i.e. hierarchical authority. Hence an anarchist is someone who advocates abolishing the principle of hierarchical authority — not just in government but in all institutions and social relations.

Anarchists oppose the principle of hierarchical authority because it is the basis of domination, which is not only degrading in itself but generally leads to exploitation and all the social evils which follow from exploitation, from poverty, hunger and homelessness to class struggle and armed conflict.

Because anarchists oppose hierarchical authority, domination, and exploitation, they naturally seek to eliminate all hierarchies, as the very purpose of hierarchy is to facilitate the domination and (usually) exploitation of subordinates.

The reason anarchists oppose government, then, is because government is **one manifestation** of the evils of hierarchical authority, domination, and exploitation. But the capitalist workplace is another. In fact, the capitalist workplace is where most people have their most frequent and unpleasant encounters with these evils. Hence workers' control — the elimination of the hierarchical workplace through democratic self-management — has been central to the agenda of classical and contemporary anarchism from the 19th century to the present. Indeed, anarchism was born out of the struggle of workers against capitalist exploitation.

To accept Caplan's definition of anarchism, however, would mean that anarchists' historical struggle for workers' self-management has never been a "genuine" anarchist activity. This is clearly a **reductio ad absurdum** of that definition.

Caplan has confused a necessary condition with a sufficient condition. Opposition to government is a necessary condition of anarchism, but not a sufficient one. To put it differently, all anarchists oppose government, but opposition to government does not automatically make one an anarchist. To be an anarchist one must oppose government for anarchist reasons and be opposed to all other forms of hierarchical structure.

To understand why let use look to capitalist property. Murray Rothbard argues that *"[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc."* [**The Ethics of Liberty**, p. 173] Defence firms would be employed to enforce those decisions (i.e. laws and rules). No real disagreement there. What **is** illuminating is Rothbard's comments that the state *"arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area"* [**Op. Cit.** , p. 170] Which, to state the obvious, means that both the state and property is marked by an *"ultimate decision-making power"* over their territory. The only "difference" is that Rothbard claims the former is "just" (i.e. "justly" acquired) and the latter is "unjust" (i.e. acquired by force). In reality of course, the modern distribution of property is just as much a product of past force as is the modern state. In other words, the current property owners have acquired their property in the same unjust fashion as the state has its. If one is valid, so is the other. Rothbard (and "anarcho"-capitalists in general) are trying to have it both ways.

Rothbard goes on to show why statism and private property are essentially the same thing:

> *"**If** the State may be said too properly **own** its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there **is** no private property in its area, because it really owns the entire land surface. **So long** as the State permits its subjects to leave its territory, then, it can be said to act as does any other owner who sets down rules for people living on his property."* [**Op. Cit.**, p. 170]

Of course Rothbard does not draw the obvious conclusion. He wants to maintain that the state is bad and property is good while drawing attention to their obvious similarities! Ultimately Rothbard is exposing the bankruptcy of his own politics and analysis. According to Rothbard, something can look like a state (i.e. have the *"ultimate decision-making power"* over an area) and act like a state (i.e. *"make rules for everyone"* who lives in an area, i.e. govern them) but not be a state. This not a viable position for obvious reasons.

In capitalism, property and possession are opposites — as Proudhon argued in **What is Property?**. Under possession, the "property" owner exercises *"ultimate decision-making power"* over themselves as no-one else uses the resource in question. This is non-hierarchical. Under capitalism, however, use and ownership are divided. Landlords and capitalists give others access to their property while retaining power over it and so the people who use it. This is by nature hierarchical. Little wonder Noam Chomsky argued that a *"consistent anarchist must oppose private ownership of the means of production and the wage slavery which is a component of this system as incompatible with the principle that labour must be freely undertaken and under the control of the producer."* [*"Notes on Anarchism"*, **For Reasons of State**, p. 158]

Thus a true anarchist must oppose both state and capitalism as they generate the same hierarchical social relationships (as recognised by Rothbard but apparently subjected to "doublethink"). As "anarcho"-capitalists do not oppose capitalist property they cannot be anarchists — they support a very specific form of **archy,** that of the capitalist/landlord over working class people.

Self-styled "anarcho"-capitalists do not oppose government for anarchist reasons. That is, they oppose it not because it is a manifestation of hierarchical authority, but because government authority often **conflicts** with capitalists' authority over the enterprises they control. By getting rid of government with its minimum wage laws, health and safety requirements, union rights laws, environmental standards, child labour laws, and other inconveniences, capitalists would have even more power to exploit workers than they already do. These consequences of "anarcho"-capitalism are diametrically opposed to the historically central objective of the anarchist movement, which is to eliminate capitalist exploitation.

We must conclude, then, that "anarcho"-capitalists are not anarchists at all. In reality they are capitalists **posing** as anarchists in order to attract support for their laissez-faire economic project from those who are angry at government. This scam is only possible on the basis of the misunderstanding perpetrated by Caplan: that anarchism means nothing more than opposition to government.

Better definitions of anarchism can be found in other reference works. For example, in **Grollier's Online Encyclopedia** we read: *"Anarchism rejects all forms of hierarchical authority, social and economic as well as political."* According to this more historically and etymologically accurate definition, "anarcho"-capitalism is not a form of anarchism, since it does not reject hierarchical authority in the economic sphere (which has been the area of prime concern to anarchists since day one). Hence it is **bogus** anarchism.

2 Anarchism and Equality

[5.] On the question "What major subdivisions may be made among anarchists?" Caplan writes:

> *"Unlike the left-anarchists, anarcho-capitalists generally place little or no value on equality, believing that inequalities along all dimensions — including income and wealth — are not only perfectly legitimate so long as they 'come about in the right way,' but are the natural consequence of human freedom."*

This statement is not inaccurate as a characterisation of "anarcho"-capitalist ideas, but its implications need to be made clear. "Anarcho"-capitalists generally place little or no value on equality — particularly economic equality — because they know that under their system, where capitalists would be completely free to exploit workers to the hilt, wealth and income inequalities would become even greater than they are now. Thus their references to "human freedom" as the way in which such inequalities would allegedly come about means "freedom of capitalists to exploit workers;" it does not mean "freedom of workers **from** capitalist exploitation."

But "freedom to exploit workers" has historically been the objective only of capitalists, not anarchists. Therefore, "anarcho"-capitalism again shows itself to be nothing more than capitalism attempting to pass itself off as part of the anarchist movement — a movement that has been dedicated since its inception to the destruction of capitalism! One would have to look hard to find a more audacious fraud.

As we argue in section 2.1 of the appendix "Is 'anarcho'-capitalism a type of anarchism?" the claim that inequalities are irrelevant if they *"come about the right way"* ignores the reality of freedom and what is required to be free. To see way we have to repeat part of our argument from that section and look at Murray Rothbard's (a leading "anarcho"-capitalist icon) analysis of the situation after the abolition of serfdom in Russia and slavery in America. He writes:

> *"The **bodies** of the oppressed were freed, but the property which they had worked and eminently deserved to own, remained in the hands of their former oppressors. With economic power thus remaining in their hands, the former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits."* [**The Ethics of Liberty**, p. 74]

However, contrast this with Rothbard's (and Caplan's) claims that if market forces ("voluntary exchanges") result in the creation of free tenants or wage-labourers then these labourers and tenants are free (see, for example, **The Ethics of Liberty**, pp. 221–2 on why "economic power" within capitalism does not, in fact, exist). But the labourers dispossessed by market forces are in **exactly** the same situation as the former serfs and slaves. Rothbard sees the obvious "economic power" in the later case, but denies it in the former. But the **conditions** of the people in question are identical and it is these conditions that horrify us and create social relationships because on subordination, authority and oppression rather than freedom. It is only ideology that stops Rothbard and Caplan drawing the obvious conclusion — identical conditions produce identical social relationships and so if the formally "free" ex-serfs are subject to "economic power" and "masters" then so are the formally "free" labourers within capitalism! Both sets of workers may be formally free, but their circumstances are such that they are "free" to "consent" to sell their freedom to others (i.e. economic power produces relationships of domination and unfreedom between formally free individuals).

Thus inequalities that *"come about in the right way"* restrict freedom just as much as inequalities that do not. If the latter restricts liberty and generate oppressive and exploitative social relationships then so do the former. Thus, if we are serious about individuality liberty (rather than property) we must look at inequalities and what generate them.

One last thing. Caplan states that inequalities in capitalism are *"the natural consequence of human freedom."* They are not, unless you subscribe to the idea that capitalist property rights are the basis of human freedom. However, the assumption that capitalist property rights are the best means to defend individual liberty can be easily seen to be flawed just from the example of the ex-slaves and ex-serfs we have just described. Inequalities resulting from "voluntary exchanges" in the capitalist market can and do result in the denial of freedom, thus suggesting that "property" and liberty are not natural consequences of each other.

To state the obvious, private property (rather than possession) means that the non-property owner can gain access to the resource in question only when they agree to submit to the property owner's authority (and pay tribute for the privilege of being bossed about). This aspect of property (rightly called *"despotism"* by Proudhon) is one which right-libertarians continually fail to highlight when they defend it as the paradigm of liberty.

3 Is anarchism the same thing as socialism?

[7.] In this section ("Is anarchism the same thing as socialism?") Caplan writes:

> *"Outside of the Anglo-American political culture, there has been a long and close historical relationship between the more orthodox socialists who advocate a socialist government, and the anarchist socialists who desire some sort of decentralised, voluntary socialism. The two groups both want to severely limit or abolish private property..."*

For Caplan to claim that anarchism is not the same thing as socialism, he has to ignore anarchist history. For example, the Individualist anarchists called themselves *"socialists,"* as did social anarchists. Indeed, Individualist Anarchists like Joseph Labadie stated that *"Anarchism is voluntary socialism"* [**Anarchism: What it is and What it is Not**) and wanted to limit private property in many ways (for example, *"the resources of nature — land, mines, and so forth — should not be held as private property and subject to being held by the individual for speculative purposes, that use of these things shall be the only valid title, and that each person has an equal right to the use of all these things."* [**What is Socialism?**]). Therefore, **within** the *"Anglo-American political culture,"* **all** types of anarchists considered themselves part of the socialist movement. This can be seen not only from Kropotkin's or Bakunin's work, but also in Tucker's (see **Instead of a Book**). So to claim that the *"Anglo-American"* anarchists did not have *"a long and close historical relationship"* with the wider socialist movement is simply **false.**

The statement that anarchists want to severely limit or abolish "private property" is misleading if it is not further explained. For the way it stands, it sounds like anarchism is just another form of coercive "state" (i.e. a political entity that forcibly prevents people from owning private property), whereas this is far from the case.

Firstly, anarchists are **not** against "private property" in the sense personal belongings. *"Anarchists,"* points out Nicholas Walter, *"are in favour of the private property which cannot be used by one person to exploit another — those personal possessions which we accumulate from childhood and which become part of ours."* [*"About Anarchism"*, in **Reinventing Anarchy**, p. 49] Kropotkin makes the anarchist position clear when he wrote that we *"do not want to rob any one of his coat"* but expropriation *"must apply to everything that enables any man [or woman] — by he financier, mill owner, or landlord — to appropriate the product of others' toil."* [**The Conquest of Bread**, p. 61]

In effect, Caplan is confusing two very different kinds of "private property", of which one rests on usefulness to an individual, the other on the employment (and so exploitation) of the labour of others. The latter produces social relations of domination between individuals, while the former is a relationship between people and things. As Proudhon argued, possession becomes property only when it also serves as means of exploitation and subjection of other people. But failing to distinguish these radically different forms of "private property" Caplan distorts the anarchist position.

Secondly, it is not that anarchists want to pass laws making private property (in the second, exploitative, sense) illegal. Rather they want to restructure society in such a way that the means of production are freely available for workers to use. This does not mean "anarchist police" standing around with guns to prohibit people from owning private property. Rather, it means dismantling the coercive state agencies that make private property possible, i.e., the departments of real police who now stand around with guns protecting private property.

Once that occurs, anarchists maintain that capitalism would be impossible, since capitalism is essentially a monopoly of the means of production, which can only be maintained by organised coercion. For suppose that in an anarchist society someone (call him Bob) somehow acquires certain machinery needed to produce widgets (a doubtful supposition if widget-making machines are very expensive, as there will be little wealth disparity in an anarchist society). And suppose Bob offers to let workers with widget-making skills use his machines if they will pay him "rent," i.e. allow him to appropriate a certain amount of the value embodied in the widgets they produce. The workers will simply refuse, choosing instead to join a widget-making collective where they have free access to widget-making machinery, thus preventing Bob from living parasitically on their labour. Thus Kropotkin:

> *"Everywhere you will find that the wealth of the wealthy springs from the poverty of the poor. That is why an anarchist society need not fear the advent of a Rothschild [or any other millionaire] who would settle in its midst. If every member of the community knows that after a few hours of productive toil he [or she] will have a right to all the pleasures that civilisation procures, and to those deeper sources of enjoyment which art and science offer to all who seek them, he [or she] will not sell his strength... No one will volunteer to work for the enrichment of your Rothschild."* [**Op. Cit.**, p. 61]

In this scenario, private property was "abolished," but not through coercion. Indeed, it was precisely the abolition of organised coercion that allowed private property to be abolished.

4 Anarchism and dissidents

[9.] On the question "How would left-anarchy work?" Caplan writes:

> *"Some other crucial features of the left-anarchist society are quite unclear. Whether dissidents who despised all forms of communal living would be permitted to set up their own inegalitarian separatist societies is rarely touched upon. Occasionally left-anarchists have insisted that small farmers and the like would not be forcibly collectivised, but the limits of the right to refuse to adopt an egalitarian way of life are rarely specified."*

This is a straw man. "Left" (i.e. real) anarchist theory clearly implies and **explicitly states** the answer to these questions.

Firstly, on the issue of "separatist" societies. Anarchist thinkers have always acknowledged that there would be multitude of different communities after a revolution (and not just Caplan's "inegalitarian" ones). Marx, for example, mocked Bakunin for arguing that only revolutionary communes would federate together and that this would not claim any right to govern others (see Bakunin's *"Letter to Albert Richards"*, **Michael Bakunin: Selected Writings**, p. 179] Kropotkin stated that *"the point attained in the socialisation of wealth will not be everywhere the same"* and *"[s]ide by side with the revolutionised communes ... places would remain in an expectant attitude, and would go on living on the Individualist system."* [**The Conquest of Bread**, p. 81] While he was hopeful that *"everywhere [would be] more or less Socialism"* he recognised that the revolution would not conform to *"any particular rule"* and would differ in different areas — *"in one country State Socialist, in another Federation"* and so on. [**Op. Cit.**, p. 82] Malatesta made the same

point, arguing that *"after the revolution"* there would be *"relations between anarchist groupings and those living under some kind of authority, between communist collectives and those living in an individualistic way."* This is because anarchism *"cannot be imposed"*. [**Life and Ideas**, p. 173, p. 21]

Needless to say, these "separatist societies" (which may or may not be "inegalitarian") would not be anarchist societies. If a group of people wanted to set up a capitalist, Marxist, Georgist or whatever kind of community then their right would be respected (although, of course, anarchists would seek to convince those who live in such a regime of the benefits of anarchism!). As Malatesta pointed out, *"free and voluntary communism is ironical if one has not the right and the possibility to live in a different regime, collectivist, mutualist, individualist — as one wishes, always on condition that there is no oppression or exploitation of other"* as *"it is clear that all, and only, those ways of life which respect freedom, and recognise that each individual has an equal right to the means of production and to the full enjoyment of the product of his own labour, have anything in common with anarchism."* [**Op. Cit.**, p. 103 and p. 33]

Ultimately, *"it is not a question of right and wrong; it is a question of freedom for everybody... None can judge with certainty who is right and who is wrong, who is nearest to the truth, or which is the best way to achieve the greatest good for each and everyone. Freedom coupled with experience, is the only way of discovering the truth and what is best; and there can be no freedom if there is the denial of the freedom to err."* [**Op. Cit.**, p. 49]

Secondly, regarding *"dissidents"* who wanted to set up their own *"inegalitarian separatist societies,"* if the term "inegalitarian" implies economic inequalities due to private property, the answer is that private property requires some kind of state, if not a public state then private security forces ("private-state capitalism"), as advocated by "anarcho"-capitalists, in order to protect private property. Therefore, "anarcho"-capitalists are asking if an anarchist society will allow the existence of states. Of course, in the territory that used to be claimed by a nation state a whole host of communities and societies will spring up — but that does not make the non-anarchist ones anarchist!

Thus suppose that in a hypothetical libertarian socialist society, Bob tries to set up private security forces to protect certain means of production, e.g. farmland. By the hypothesis, if Bob merely wanted to work the land himself, there would be no reason for him go to the trouble of creating a private state to guard it, because use-rights guarantee that he has free access to the productive assets he needs to make a living. Thus, the only plausible reason Bob could have for claiming and guarding more farmland than he could use himself would be a desire to create a monopoly of land in order to exact tribute from others for the privilege of using it. But this would be an attempt to set up a system of feudal exploitation in the midst of a free community. Thus the community is justified in disarming this would-be parasite and ignoring his claims to "own" more land than he can use himself.

In other words, there is no "right" to adopt an "inegalitarian way of life" within a libertarian community, since such a right would have to be enforced by the creation of a coercive system of enslavement, which would mean the end of the "libertarian" community. To the contrary, the members of such a community have a right, guaranteed by "the people in arms," to resist such attempts to enslave them.

The statement that "left" anarchists have *"occasionally"* insisted that small farmers and the like would not be forcibly collectivised is a distortion of the facts. No responsible left libertarian advocates forced collectivisation, i.e. compelling others to join collectives. Self-employment is

always an option. This can be seen from Bakunin's works [**Bakunin on Anarchism**, p. 200], Kropotkin's [**The Conquest of Bread**, p. 61 and **Act for Yourselves**, pp. 104–5] and Malatesta's [**Life and Ideas**, p. 99, p. 103]. So the anarchist opposition to forced collectivisation has always existed and, for anyone familiar with the ideas of social anarchism, very well know. Thus during the Spanish Revolution, small farmers who did not wish to join collective farms were allowed to keep as much land as they could work themselves. After perceiving the advantages of collectives, however, many joined them voluntarily (see Sam Dolgoff, ed., **The Anarchist Collectives**).

To claim that social anarchists *"occasionally"* oppose forced collectivisation is a smear, pure and simple, with little basis in anarchist activity and even less in anarchist theory. Anyone remotely familiar with the literature could not make such a mistake.

Finally, we should point out that under "anarcho"-capitalism there would be, according to Murray Rothbard, a *"basic libertarian law code."* Which means that under "anarcho"-capitalism, "egalitarian" communities could only come about within a "inegalitarian" legal framework! Thus, given that everything would be privatised, dissenters could only experiment if they could afford it **and** accepted the legal system based on capitalist property rights (and, of course, survive the competition of capitalist companies within the capitalist framework). As we have argued in sections B.4 and F.3 the capitalist market is not a level playing field — which hinders experimentation. In other words, "anarcho"-capitalists has the abstract right to experiment (within the capitalist laws) but hinders the possibility to live under other regimes. And, we must point out, **why** should we have to **pay** the stealers of the earth for the privilege to life our own lives? Caplan, in effect, ignores the barriers to experimentation in his system while distorting the anarchist position.

5 How would anarcho-capitalism work?

[10.] This section (How would anarcho-capitalism work?) contains Caplan's summary of arguments for "anarcho"-capitalism, which he describes as an offshoot of Libertarianism. Thus:

> *"So-called 'minarchist' libertarians such as Nozick have argued that the largest justified government was one which was limited to the protection of individuals and their private property against physical invasion; accordingly, they favour a government limited to supplying police, courts, a legal code, and national defence."*

The first thing to note about this argument is that it is stated in such a way as to prejudice the reader against the left-libertarian critique of private property. The minarchist right-"libertarian," it is said, only wants to protect individuals and their private property against "physical invasion." But, because of the loose way in which the term "property" is generally used, the "private property" of most "individuals" is commonly thought of as **personal possessions,** i.e. cars, houses, clothing, etc. (For the left-libertarian distinction between private property and possessions, see section B.3.1.) Therefore the argument makes it appear that right libertarians are in favour of protecting personal possessions whereas left-libertarians are not, thus conjuring up a world where, for example, there would be no protection against one's house being "physically invaded" by an intruder or a stranger stealing the shirt off one's back!

By lumping the protection of "individuals" together with the protection of their "private property," the argument implies that right libertarians are concerned with the welfare of the vast majority of the population, whereas in reality, the vast majority of "individuals" **do not own**

any private property (i.e. means of production) — only a handful of capitalists do. Moreover, these capitalists use their private property to exploit the working class, leading to impoverishment, alienation, etc., and thus **damaging** most individuals rather than "protecting" them.

Caplan goes on:

> *"This normative theory is closely linked to laissez-faire economic theory, according to which private property and unregulated competition generally lead to both an efficient allocation of resources and (more importantly) a high rate of economic progress."*

Caplan does not mention the obvious problems with this "theory," e.g. that during the heyday of laissez-faire capitalism in the US there was vast wealth disparity, with an enormous mass of impoverished people living in slums in the major cities — hardly an "efficient" allocation of resources or an example of "progress." Of course, if one defines "efficiency" as "the most effective means of exploiting the working class" and "progress" as "a high rate of profit for investors," then the conclusion of the "theory" does indeed follow.

And let us not forget that it is general equilibrium theory which predicts that unregulated competition will produce an efficient allocation of resources. However, as we noted in section C.1, such a model has little to do with any real economy. This means that there is no real reason to assume an efficient outcome of capitalist economies. Concentrations of economic power and wealth can easily skew outcomes to favour the haves over the have-nots (as history again and again shows).

Moreover, the capitalism can easily lead to resources being allocated to the most profitable uses rather than those which are most needed by individuals. A classic example is in the case of famines. Amartya Sen (who won the 1998 Nobel Prize for economics) developed an

"entitlement" approach to the study of famine. This approach starts with the insight that having food available in a country or region does not mean everyone living there is "entitled" to it. In market economies, people are entitled to food according to their ability to produce it for themselves or to pay or swap for it. In capitalist economies, most people are entitled to food only if they can sell their labour/liberty to those who own the means of life (which increases the economic insecurity of wage workers).

If some group loses its entitlement to food, whether there is a decline in the available supply or not, a famine can occur. This may seem obvious, yet before — and after — Sen, famine studies have remained fixated on the drop in food available instead of whether specific social groups are entitled to it. Thus even a relatively success economy can price workers out of the food market (a depressed economy brings the contradiction between need and profit — use value and exchange value — even more to the forefront). This *"pricing out"* can occur especially if food can get higher prices (and so profits) elsewhere — for example the Irish famine of 1848 and sub-Saharan famines of the 1980s saw food being exported from famine areas to areas where it could fetch a higher price. In other words, market forces can skew resource allocation away from where it is most needed to where it can generate a profit. As anarchist George Barret noted decades before Sen:

> *"Today the scramble is to compete for the greatest profits. If there is more profit to be made in satisfying my lady's passing whim than there is in feeding hungry children, then competition brings us in feverish haste to supply the former, whilst cold charity or the poor law can supply the latter, or leave it unsupplied, just as it feels disposed. That is how it works out."* [**Objectives to Anarchism**]

In other words, inequality skews resource allocation towards the wealthy. While such a situation may be *"efficient allocation of resources"* from the perspective of the capitalist, it is hardly so from a social perspective (i.e. one that considers **all** individual needs rather than "effective demand").

Furthermore, if we look at the stock market (a key aspect of any capitalist system) we discover a strong tendencies **against** the efficient allocation of resources. The stock market often experiences "bubbles" and becomes significantly over-valued. An inflated stock market badly distorts investment decisions. For example, if Internet companies are wildly over-valued then the sale of shares of new Internet companies or the providing of start-up capital will drain away savings that could be more productively used elsewhere. The real economy will pay a heavy price from such misdirected investment and, more importantly, resources are **not** efficiency allocated as the stock market skews resources into the apparently more profitable areas and away from where they could be used to satisfy other needs.

The stock market is also a source of other inefficiencies. Supporters of "free-market" capitalism always argued that the Stalinist system of central planning created a perverse set of incentives to managers. In effect, the system penalised honest managers and encouraged the flow of **dis**-information. This lead to information being distorted and resources inefficiently allocated and wasted. Unfortunately the stock market also creates its own set of perverse responses and mis-information. Doug Henwood argues that *"something like a prisoners' dilemma prevails in relations between managers and the stock market. Even if participants are aware of an upward bias to earnings estimates, and even if they correct for it, managers still have an incentive to try and fool the market. If you tell the truth, your accurate estimates will be marked down by a sceptical market. So its entirely rational for managers to boost profits in the short term, either through accounting gimmickry or by making only investments with quick paybacks."* He goes on to note that *"[i]f the markets see high costs as bad, and low costs as good, then firms may shun expensive investments because they will be taken as signs of managerial incompetence. Throughout the late 1980s and early 1990s, the stock market rewarded firms announcing write-offs and mass firings — a bulimic strategy of management — since the cost cutting was seen as contributing rather quickly to profits. Firms and economies can't get richer by starving themselves, but stock market investors can get richer when the companies they own go hungry. As for the long term, well, that's someone else's problem."* [**Wall Street**, p. 171]

This means that resources are allocated to short term projects, those that enrich the investors now rather than produce long term growth and benefits later. This results in slower and more unstable investment than less market centred economies, as well as greater instability over the business cycle [**Op. Cit.**, pp. 174–5] Thus the claim that capitalism results in the "efficient" allocation of resources is only true if we assume "efficient" equals highest profits for capitalists. As Henwood summarises, *"the US financial system performs dismally at its advertised task, that of efficiently directing society's savings towards their optimal investment pursuits. The system is stupefyingly expensive, gives terrible signals, and has surprisingly little to do with real investment."* [**Op. Cit.**, p. 3]

Moreover, the claim that laissez-faire economies produce a high rate of economic progress can be questioned on the empirical evidence available. For example, from the 1970s onwards there has been a strong tendency towards economic deregulation. However, this tendency has been associated with a **slow down** of economic growth. For example, *"[g]rowth rates, investment rates and productivity rates are all lower now than in the [Keynesian post-war] Golden Age, and*

there is evidence that the trend rate of growth — the underlying growth rate — has also decreased." Before the Thatcher pro-market reforms, the British economy grew by 2.4% in the 1970s. After Thatcher's election in 1979, growth decreased to 2% in the 1980s and to 1.2% in the 1990s. In the USA, we find a similar pattern. Growth was 4.4% in the 1960s, 3.2% in the 1970s, 2.8% in the 1980s and 1.9% in the first half of the 1990s [Larry Elliot and Dan Atkinson, **The Age of Insecurity**, p. 236]. Moreover, in terms of inflation-adjusted GDP per capita and productivity, the US had the worse performance out of the US, UK, Japan, Italy, France, Canada and Australia between 1970 and 1995 [Marc-Anfre Pigeon and L. Randall Wray, **Demand Constraints and Economic Growth**]. Given that the US is usually considered the most laissez-faire out of these 7 countries, Caplan's claim of high progress for deregulated systems seems at odds with this evidence.

As far as technological innovation goes, it is also not clear that deregulation has aided that process. Much of our modern technology owns its origins to the US Pentagon system, in which public money is provided to companies for military R&D purposes. Once the technology has been proven viable, the companies involved can sell their public subsidised products for private profit. The computer industry (as we point out in section J.4.7) is a classic example of this — indeed it is unlikely whether we would have computers or the internet if we had waited for capitalists to development them. So whether a totally deregulated capitalism would have as high a rate of technological progress is a moot point.

So, it seems likely that it is only the **assumption** that the free capitalist market will generate *"an efficient allocation of resources and (more importantly) a high rate of economic progress."* Empirical evidence points the other way — namely, that state aided capitalism provides an approximation of these claims. Indeed, if we look at the example of the British Empire (which pursued a strong free trade and laissez-faire policy over the areas it had invaded) we can suggest that the opposite may be true. After 25 prosperous years of fast growth (3.5 per cent), after 1873 Britain had 40 years of slow growth (1.5 per cent), the last 14 years of which were the worse — with productivity declining, GDP stagnant and home investment halved. [Nicholas Kaldor, **Further Essays on Applied Economics**, p. 239] In comparison, those countries which embraced protectionism (such as Germany and the USA) industrialised successfully and become competitors with the UK. Indeed, these new competitors grew in time to be efficient competitors of Britain not only in foreign markets but also in Britain's home market. The result was that *"for fifty years Britain's GDP grew very slowly relative to the more successful of the newer industrialised countries, who overtook her, one after another, in the volume of manufacturing production and in exports and finally in real income per head."* [**Op. Cit.**, p. xxvi] Indeed, *"America's growth and productivity rates were higher when tariffs were steep than when they came down."* [Larry Elliot and Dan Atkinson, **Op. Cit.**, p. 277]

It is possible to explain almost everything that has ever happened in the world economy as evidence not of the failure of markets but rather of what happens when markets are not able to operate freely. Indeed, this is the right-libertarian position in a nut shell. However, it does seem strange that movements towards increased freedom for markets produce worse results than the old, more regulated, way. Similarly it seems strange that the country that embraced laissez-faire and free trade (Britain) did **worse** than those which embraced protectionism (USA, Germany, etc.).

It could always be argued that the protectionist countries had embraced free trade their economies would have done even better. This is, of course, a possibility — if somewhat unlikely. After all, the argument for laissez-faire and free trade is that it benefits all parties, even if it is

embraced unilaterally. That Britain obviously did not benefit suggests a flaw in the theory (and that no country **has** industrialised without protectionism suggests likewise). Unfortunately, free-market capitalist economics lends itself to a mind frame that ensures that nothing could happen in the real world that would could ever change its supporters minds about anything.

Free trade, it could be argued, benefits only those who have established themselves in the market — that is, have market power. Thus Britain could initially benefit from free trade as it was the only industrialised nation (and even **its** early industrialisation cannot be divorced from its initial mercantilist policies). This position of strength allowed them to dominate and destroy possible competitors (as Kaldor points out, *"[w]here the British succeeded in gaining free entry for its goods... it had disastrous effects on local manufactures and employment."* [**Op. Cit.**, p. xxvi]). This would revert the other country back towards agriculture, an industry with diminishing returns to scale (manufacturing, in contrast, has increasing returns) and ensure Britain's position of power.

The use of protection, however, sheltered the home industries of other countries and gave them the foothold required to compete with Britain. In addition, Britains continual adherence to free trade meant that a lot of **new** industries (such as chemical and electrical ones) could not be properly established. This combination contributed to free trade leading to stunted growth, in stark contrast to the arguments of neo-classical economics.

Of course, we will be accused of supporting protectionism by recounting these facts. That is not the case, as protectionism is used as a means of "proletarianising" a nation (as we discuss in section F.8). Rather we are presenting evidence to refute a claim that deregulated capitalism will lead to higher growth. Thus, we suggest, the history of "actually existing" capitalism indicates that Caplan's claim that deregulated capitalism will result *"a high rate of economic progress"* may be little more than an assumption. True, it is an assumption of neo-classical economics, but empirical evidence suggests that assumption is as unfounded as the rest of that theory.

Next we get to the meat of the defence of "anarcho"-capitalism:

> *"Now the anarcho-capitalist essentially turns the minarchist's own logic against him, and asks why the remaining functions of the state could not be turned over to the free market. And so, the anarcho-capitalist imagines that police services could be sold by freely competitive firms; that a court system would emerge to peacefully arbitrate disputes between firms; and that a sensible legal code could be developed through custom, precedent, and contract."*

Indeed, the functions in question could certainly be turned over to the "free" market, as was done in certain areas of the US during the 19th century, e.g. the coal towns that were virtually owned by private coal companies. We have already discussed the negative impact of that experiment on the working class in section F.6.2. Our objection is not that such privatisation cannot be done, but that it is an error to call it a form of anarchism. In reality it is an extreme form of laissez-faire capitalism, which is the exact opposite of anarchism. The defence of private power by private police is hardly a move towards the end of authority, nor are collections of private states an example of anarchism.

Indeed, that "anarcho"-capitalism does not desire the end of the state, just a change in its form, can be seen from Caplan's own arguments. He states that *"the remaining functions of the state"* should be *"turned over to the free market."* Thus the state (and its functions, primarily the defence

of capitalist property rights) is **privatised** and not, in fact, abolished. In effect, the "anarcho"-capitalist seeks to abolish the state by calling it something else.

Caplan:

> *"The anarcho-capitalist typically hails modern society's increasing reliance on private security guards, gated communities, arbitration and mediation, and other demonstrations of the free market's ability to supply the defensive and legal services normally assumed to be of necessity a government monopoly."*

It is questionable that *"modern society"* **as such** has increased its reliance on *"private security guards, gated communities"* and so on. Rather, it is the **wealthy** who have increased their reliance on these forms of private defence. Indeed it is strange to hear a right-libertarian even use the term "society" as, according to that ideology, society does not exist! Perhaps the term "society" is used to hide the class nature of these developments? As for "gated communities" it is clear that their inhabitants would object if the rest of society gated themselves from them! But such is the logic of such developments – but the gated communities want it both ways. They seek to exclude the rest of society from their communities while expected to be given access to that society. Needless to say, Caplan fails to see that liberty for the rich can mean oppression for the working class — *"we who belong to the proletaire class, property excommunicates us!"* [Proudhon, **What is Property?**, p. 105]

That the law code of the state is being defended by private companies is hardly a step towards anarchy. This indicates exactly why an "anarcho"- capitalist system will be a collection of private states united around a common, capitalistic, and hierarchical law code. In addition, this system does not abolish the monopoly of government over society represented by the *"general libertarian law code,"* nor the monopoly of power that owners have over their property and those who use it. The difference between public and private statism is that the boss can select which law enforcement agents will enforce his or her power.

The threat to freedom and justice for the working class is clear. The thug-like nature of many private security guards enforcing private power is well documented. For example, the beating of protesters by "private cops" is a common sight in anti-motorway campaigns or when animal right activists attempt to disrupt fox hunts. The shooting of strikers during strikes occurred during the peak period of American laissez-faire capitalism. However, as most forms of protest involve the violation of "absolute" property rights, the "justice" system under "anarcho"-capitalism would undoubtedly fine the victims of such attacks by private cops.

It is also interesting that the "anarcho"-capitalist "hails" what are actually symptoms of social breakdown under capitalism. With increasing wealth disparity, poverty, and chronic high unemployment, society is becoming polarised into those who can afford to live in secure, gated communities and those who cannot. The latter are increasingly marginalised in ghettos and poor neighbourhoods where drug-dealing, prostitution, and theft become main forms of livelihood, with gangs offering a feudalistic type of "protection" to those who join or pay tribute to them. Under "anarcho"-capitalism, the only change would be that drug-dealing and prostitution would be legalised and gangs could start calling themselves "defence companies."

Caplan:

> *"In his ideal society, these market alternatives to government services would take over* ***all*** *legitimate security services. One plausible market structure would involve individ-*

uals subscribing to one of a large number of competing police services; these police services would then set up contracts or networks for peacefully handling disputes between members of each others' agencies. Alternately, police services might be 'bundled' with housing services, just as landlords often bundle water and power with rental housing, and gardening and security are today provided to residents in gated communities and apartment complexes."

This is a scenario designed with the upper classes in mind and a few working class people, i.e. those with **some** property (for example, a house) — sometimes labelled the "middle class". But under capitalism, the tendency toward capital concentration leads to increasing wealth polarisation, which means a shrinking "middle class" (i.e. working class with decent jobs and their own homes) and a growing "underclass" (i.e. working class people without a decent job). Ironically enough, America (with one of the most laissez-faire capitalist systems) is also the Western nation with the **smallest** "middle class" and wealth concentration has steadily increased since the 1970s. Thus the number of people who could afford to buy protection and "justice" from the best companies would continually decrease. For this reason there would be a growing number of people at the mercy of the rich and powerful, particularly when it comes to matters concerning employment, which is the main way in which the poor would be victimised by the rich and powerful (as is indeed the case now).

Of course, if landlords **do** "bundle" police services in their contracts this means that they are determining the monopoly of force over the property in question. Tenants would "consent" to the police force and the laws of the landlord in exactly the same way emigrants "consent" to the laws and government of, say, the USA when they move there. Rather than show the difference between statism and capitalism, Caplan has indicated their essential commonality. For the proletarian, property is but another form of state. For this reason anarchists would agree with Rousseau when he wrote that:

"That a rich and powerful man, having acquired immense possessions in lands, should impose laws on those who want to establish themselves there, and that he should only allow them to do so on condition that they accept his supreme authority and obey all his wishes; that, I can still conceive. But how can I conceive such a treaty, which presupposes anterior rights, could be the first foundation of law? Would not this tyrannical act contain a double usurpation: that on the ownership of the land and that on the liberty of the inhabitants?" [**The Social Contract and Discourses**, p. 316]

Caplan:

"The underlying idea is that contrary to popular belief, private police would have strong incentives to be peaceful and respect individual rights. For first of all, failure to peacefully arbitrate will yield to jointly destructive warfare, which will be bad for profits. Second, firms will want to develop long-term business relationships, and hence be willing to negotiate in good faith to insure their long-term profitability. And third, aggressive firms would be likely to attract only high-risk clients and thus suffer from extraordinarily high costs (a problem parallel to the well-known 'adverse selection problem' in e.g. medical insurance — the problem being that high-risk people are especially likely

to seek insurance, which drives up the price when riskiness is hard for the insurer to discern or if regulation requires a uniform price regardless of risk).”

The theory that *“failure to peacefully arbitrate will yield to jointly destructive warfare, which will be bad for profits”* can be faulted in two ways. Firstly, if warfare would be bad for profits, what is to stop a large “defence association” from ignoring a smaller one’s claim? If warfare were “bad for business,” it would be even worse for a small company without the capital to survive a conflict, which could give big “defence associations” the leverage to force compliance with their business interests. Price wars are often bad for business, but companies sometimes start them if they think they can win. Needless to say, demand would exist for such a service (unless you assume a transformation in the “human nature” generated by capitalism — an unlikely situation and one “anarcho”-capitalists usually deny is required for their system to work). Secondly — and this is equally, if not more, likely — a “balance of power” method to stop warfare has little to recommend it from history. This can be seen from the First World War and feudal society.

What the “anarcho”-capitalist is describing is essentially a system of “industrial feudalism” wherein people contract for “protection” with armed gangs of their choice. Feudal societies have never been known to be peaceful, even though war is always “unprofitable” for one side or the other or both. The argument fails to consider that “defence companies,” whether they be called police forces, paramilitaries or full-blown armies, tend to attract the “martial” type of authoritarian personality, and that this type of “macho” personality thrives on and finds its reason for existence in armed conflict and other forms of interpersonal violence and intimidation. Hence feudal society is continually wracked by battles between the forces of opposing warlords, because such conflicts allow the combatants a chance to “prove their manhood,” vent their aggression, obtain honours and titles, advance in the ranks, obtain spoils, etc. The “anarcho” capitalist has given no reason why warfare among legalised gangs would not continue under industrial feudalism, except the extremely lame reason that it would not be profitable — a reason that has never prevented war in any known feudal society.

It should be noted that the above is not an argument from “original sin.” Feudal societies are characterised by conflict between opposing “protection agencies” not because of the innate depravity of human beings but because of a social structure based on private property and hierarchy, which brings out the latent capacities for violence, domination, greed, etc. that humans have by creating a financial incentive to be so. But this is not to say that a different social structure would not bring out latent capacities for much different qualities like sharing, peaceableness, and co-operation, which human beings also have. In fact, as Kropotkin argued in **Mutual Aid** and as recent anthropologists have confirmed in greater detail, ancient societies based on communal ownership of productive assets and little social hierarchy were basically peaceful, with no signs of warfare for thousands of years.

However, let us assume that such a competitive system does actually work as described. Caplan, in effect, argues that competition will generate co-operation. This is due to the nature of the market in question — defence (and so peace) is dependent on firms workingtogether as the commodity “peace” cannot be supplied by one firm. However, this co-operation does not, for some reason, become **collusion** between the firms in question. According to “anarcho”-capitalists this competitive system not only produces co-operation, it excludes “defence” firms making agreements to fix monopoly profits (i.e. co-operation that benefits the firms in question). Why does the market produce beneficial co-operation to everyone but not collusion for the firms

in question? Collusion is when firms have "business relationships" and "negotiate in good faith" to insure their profitability by agreeing not to compete aggressively against each other in order to exploit the market. Obviously in "anarcho"-capitalism the firms in question only use their powers for good!

Needless to say, the "anarcho"-capitalist will object and argue that competition will ensure that collusion will not occur. However, given that co-operation is required between all firms in order to provide the commodity "peace" this places the "anarcho"-capitalist in a bind. As Caplan notes, "aggressive" firms are *"likely to attract only high-risk clients and thus suffer from extraordinarily high costs."* From the perspective of the colluding firms, a new entry into their market is, by definition, aggressive. If the colluding firms do not co-operate with the new competitor, then it will suffer from *"extraordinarily high costs"* and either go out of business or join the co-operators. If the new entry could survive in the face of the colluding firms hostility then so could "bad" defence firms, ones that ignored the market standards.

So the "anarcho"-capitalist faces two options. Either an "aggressive" firm cannot survive or it can. If it cannot then the very reason why it cannot ensures that collusion is built into the market and while the system is peaceful it is based on an effective monopoly of colluding firms who charge monopoly profits. This, in effect, is a state under the "anarcho"-capitalist's definition as a property owner cannot freely select their own "protection" — they are limited to the firms (and laws) provided by the co-operating firms. Or an "aggressive" firm can survive, violence is commonplace and chaos ensures.

Caplan's passing reference to the *"adverse selection problem"* in medical insurance suggests another problem with "anarcho"-capitalism. The problem is that high-risk people are especially likely to seek protection, which drives up the price for, as "anarcho"-capitalists themselves note, areas with high crime levels "will be bad for profits," as hardware and personnel costs will be correspondingly higher. This means that the price for "protection" in areas which need it most will be far higher than for areas which do not need it. As poor areas are generally more crime afflicted than rich areas, "anarcho"-capitalism may see vast sections of the population not able to afford "protection" (just as they may not be about to afford health care and other essential services). Indeed, "protection services" which try to provide cheap services to "high-risk" areas will be at an competitive disadvantage in relation to those who do not, as the "high-risk" areas will hurt profits and companies without "high-risk" "customers" could undercut those that have.

Caplan:

> *"Anarcho-capitalists generally give little credence to the view that their 'private police agencies' would be equivalent to today's Mafia — the cost advantages of open, legitimate business would make 'criminal police' uncompetitive. (Moreover, they argue, the Mafia can only thrive in the artificial market niche created by the prohibition of alcohol, drugs, prostitution, gambling, and other victimless crimes. Mafia gangs might kill each other over turf, but liquor-store owners generally do not.)"*

As we have pointed out in section F.6, the "Mafia" objection to "anarcho"-capitalist defence companies is a red herring. The biggest problem would not be "criminal police" but the fact that working people and tenants would subject to the rules, power and laws of the property owners, the rich would be able to buy better police protection and "justice" than the poor and that the "general" law code these companies would defend would be slanted towards the interests

and power of the capitalist class (defending capitalist property rights and the proprietors power). And as we also noted, such a system has already been tried in 19th-century and early 20th America, with the result that the rich reduced the working class to a serf-like existence, capitalist production undermined independent producers (to the annoyance of individualist anarchists at the time), and the result was the emergence of the corporate America that "anarcho"-capitalists say they oppose.

Caplan argues that "liquor-store owners" do not generally kill each other over turf. This is true (but then again they do not have access to their own private cops currently so perhaps this could change). But the company owners who created their own private police forces and armies in America's past **did** allow their goons to attack and murder union organisers and strikers. Let us look at Henry Ford's Service Department (private police force) in action:

> *"In 1932 a hunger march of the unemployed was planned to march up to the gates of the Ford plant at Dearborn... The machine guns of the Dearborn police and the Ford Motor Company's Service Department killed [four] and wounded over a score of others... Ford was fundamentally and entirely opposed to trade unions. The idea of working men questioning his prerogatives as an owner was outrageous... [T]he River Rouge plant... was dominated by the autocratic regime of Bennett's service men. Bennett .. organise[d] and train[ed] the three and a half thousand private policemen employed by Ford. His task was to maintain discipline amongst the work force, protect Ford's property [and power], and prevent unionisation... Frank Murphy, the mayor of Detroit, claimed that 'Henry Ford employs some of the worst gangsters in our city.' The claim was well based. Ford's Service Department policed the gates of his plants, infiltrated emergent groups of union activists, posed as workers to spy on men on the line... Under this tyranny the Ford worker had no security, no rights. So much so that any information about the state of things within the plant could only be freely obtained from ex-Ford workers."* [Huw Beynon, **Working for Ford**, pp. 29–30]

The private police attacked women workers handing out pro-union handbills and gave them *"a serve beating."* At Kansas and Dallas *"similar beatings were handed out to the union men."* [**Op. Cit.**, p. 34] This use of private police to control the work force was not unique. General Motors *"spent one million dollars on espionage, employing fourteen detective agencies and two hundred spies at one time [between 1933 and 1936]. The Pinkerton Detective Agency found anti-unionism its most lucrative activity."* [**Op. Cit.**, p. 32] We must also note that the Pinkerton's had been selling their private police services for decades before the 1930s. In the 1870s, they had infiltrated and destroyed the Molly Maguires (a secret organisation Irish miners had developed to fight the coal bosses). For over 60 years the Pinkerton Detective Agency had *"specialised in providing spies, agent provocateurs, and private armed forces for employers combating labour organisations."* By 1892 it *"had provided its services for management in seventy major labour disputes, and its 2 000 active agents and 30 000 reserves totalled more than the standing army of the nation."* [Jeremy Brecher, **Strike!**, p. 9 and p. 55] With this force available, little wonder unions found it so hard to survive in the USA. Given that unions could be considered as "defence" agencies for workers, this suggests a picture of how "anarcho"-capitalism may work in practice.

It could be argued that, in the end, the union was recognised by the Ford company. However, this occurred after the New Deal was in place (which helped the process), after yearsof illegal

activity (by definition union activism on Ford property was an illegal act) and extremely militant strikes. Given that the union agreement occurred nearly 40 years after Ford was formed **and** in a legal situation violently at odds with "anarcho"-capitalism (or even minimal statist capitalism), we would be justified in wondering if unionisation would ever have occurred at Ford and if Ford's private police state would ever have been reformed.

Of course, from an "anarcho"-capitalist perspective the only limitation in the Ford workers' liberty was the fact they had to pay taxes to the US government. The regime at Ford could **not** restrict their liberty as no one forced them to work for the company. Needless to say, an "anarcho"-capitalist would reject out of hand the argument that no-one forced the citizen to entry or remain in the USA and so they consented to taxation, the government's laws and so on.

This is more than a history lesson. Such private police forces are on the rise again (see *"Armed and Dangerous: Private Police on the March"* by Mike Zielinski, **Covert Action Quarterly**, no. 54, Fall, 1995 for example). This system of private police (as demonstrated by Ford) is just one of the hidden aspects of Caplan's comment that the "anarcho"-capitalist *"typically hails modern society's increasing reliance on private security guards... and other demonstrations of the free market's ability to supply the defensive and legal services normally assumed to be of necessity a government monopoly."*

Needless to say, private police states are not a step forward in anarchist eyes.

Caplan:

> *"Unlike some left-anarchists, the anarcho-capitalist has no objection to punishing criminals; and he finds the former's claim that punishment does not deter crime to be the height of naivete. Traditional punishment might be meted out after a conviction by a neutral arbitrator; or a system of monetary restitution (probably in conjunction with a prison factory system) might exist instead."*

Let us note first that in disputes between the capitalist class and the working class, there would be no *"neutral arbitrator,"* because the rich would either own the arbitration company or influence/control it through the power of the purse (see section F.6). In addition, "successful" arbitrators would also be wealthy, therefore making neutrality even more unlikely. Moreover, given that the laws the "neutral arbitrator" would be using are based on capitalist property rights, the powers and privileges of the owner are built into the system from the start.

Second, the left-libertarian critique of punishment does not rest, as "anarcho"-capitalists claim, on the naive view that intimidation and coercion aren't effective in controlling behaviour. Rather, it rests on the premise that capitalist societies produce large numbers of criminals, whereas societies based on equality and community ownership of productive assets do not.

The argument for this is that societies based on private property and hierarchy inevitably lead to a huge gap between the haves and the have-nots, with the latter sunk in poverty, alienation, resentment, anger, and hopelessness, while at the same time such societies promote greed, ambition, ruthlessness, deceit, and other aspects of competitive individualism that destroy communal values like sharing, co-operation, and mutual aid. Thus in capitalist societies, the vast majority of "crime" turns out to be so-called "crimes against property," which can be traced to poverty and the grossly unfair distribution of wealth. Where the top one percent of the population controls more wealth than the bottom 90 percent combined, it is no wonder that a considerable number of those on the bottom should try to recoup illegally some of the mal-distributed wealth they

cannot obtain legally. (In this they are encouraged by the bad example of the ruling class, whose parasitic ways of making a living would be classified as criminal if the mechanisms for defining "criminal behaviour" were not controlled by the ruling class itself.) And most of the remaining "crimes against persons" can be traced to the alienation, dehumanisation, frustration, rage, and other negative emotions produced by the inhumane and unjust economic system.

Thus it is only in our societies like ours, with their wholesale manufacture of many different kinds of criminals, that punishment appears to be the only possible way to discourage "crime." From the left-libertarian perspective, however, the punitive approach is a band-aid measure that does not get to the real root of the problem — a problem that lies in the structure of the system itself. The real solution is the creation of a non-hierarchical society based on communal ownership of productive assets, which, by eliminating poverty and the other negative effects of capitalism, would greatly reduce the incidence of criminal behaviour and so the need for punitive countermeasures.

Finally, two more points on private prisons. Firstly, as to the desirability of a "prison factory system," we will merely note that, given the capitalist principle of "grow-or-die," if punishing crime becomes a business, one can be sure that those who profit from it will find ways to ensure that the "criminal" population keeps expanding at a rate sufficient to maintain a high rate of profit and growth. After all, the logic of a "prison factory system" is self-defeating. If the aim of prison is to deter crime (as some claim) and if a private prison system will meet that aim, then a successful private prison system will stop crime, which, in turn, will put them out of business! Thus a "prison factory system" cannot aim to be efficient (i.e. stop crime).

Secondly, Caplan does not mention the effect of prison labour on the wages, job conditions and market position of workers. Having a sizeable proportion of the working population labouring in prison would have a serious impact on the bargaining power of workers. How could workers outside of prison compete with such a regime of labour discipline without submitting to prison-like conditions themselves? Unsurprisingly, US history again presents some insight into this. As Noam Chomsky notes, the *"rapid industrial development in the southeastern region [of America] a century ago was based on (Black) convict labour, leased to the highest bidder."* Chomsky quotes expert Alex Lichtenstein comments that Southern Industrialists pointed out that convict labour was *"more reliable and productive than free labour"* and that it overcomes the problem of labour turnover and instability. It also *"remove[d] all danger and cost of strikes"* and that it lowers wages for *"free labour"* (i.e. wage labour). The US Bureau of Labor reported that *"mine owners [in Alabama] say they could not work at a profit without the lowering effect in wages of convict-labour competition."* [**The Umbrella of US Power**, p. 32]

Needless to say, Caplan fails to mention this aspect of "anarcho"-capitalism (just as he fails to mention the example of Ford's private police state). Perhaps an "anarcho"-capitalist will say that prison labour will be less productive than wage labour and so workers have little to fear, but this makes little sense. If wage labour is more productive then prison labour will not find a market (and then what for the prisoners? Will profit-maximising companies **really** invest in an industry with such high over-heads as maintaining prisoners for free?). Thus it seems more than likely that any "prison-factory system" will be as productive as the surrounding wage-labour ones, thus forcing down their wages and the conditions of labour. For capitalists this would be ideal, however for the vast majority a different conclusion must be drawn.

Caplan:

"Probably the main division between the anarcho-capitalists stems from the apparent differences between Rothbard's natural-law anarchism, and David Friedman's more economistic approach. Rothbard puts more emphasis on the need for a generally recognised libertarian legal code (which he thinks could be developed fairly easily by purification of the Anglo-American common law), whereas Friedman focuses more intently on the possibility of plural legal systems co-existing and responding to the consumer demands of different elements of the population. The difference, however, is probably overstated. Rothbard believes that it is legitimate for consumer demand to determine the philosophically neutral content of the law, such as legal procedure, as well as technical issues of property right definition such as water law, mining law, etc. And Friedman admits that 'focal points' including prevalent norms are likely to circumscribe and somewhat standardise the menu of available legal codes."

The argument that "consumer demand" would determine a "philosophically neutral" content of the law cannot be sustained. Any law code will reflect the philosophy of those who create it. Under "anarcho"-capitalism, as we have noted (see section F.6), the values of the capitalist rich will be dominant and will shape the law code and justice system, as they do now, only more so. The law code will therefore continue to give priority to the protection of private property over human values; those who have the most money will continue being able to hire the best lawyers; and the best (i.e. most highly paid) judges will be inclined to side with the wealthy and to rule in their interests, out of class loyalty (and personal interests).

Moreover, given that the law code exists to protect capitalist property rights, how can it be "philosophically neutral" with that basis? How would "competing" property frameworks coexist? If a defence agency allowed squatting and another (hired by the property owner) did not, there is no way (bar force) a conflict could be resolved. Then the firm with the most resources would win. "Anarcho"-capitalism, in effect, smuggles into the foundation of their system a distinctly **non**-neutral philosophy, namely capitalism. Those who reject such a basis may end up sharing the fate of tribal peoples who rejected that system of property rights, for example, the Native Americans.

In other words, in terms of outcome the whole system would favour **capitalist** values and so not be "philosophically neutral." The law would be favourable to employers rather than workers, manufacturers rather than consumers, and landlords rather than tenants. Indeed, from the "anarcho"-capitalist perspective the rules that benefit employers, landlords and manufacturers (as passed by progressive legislatures or enforced by direct action) simply define liberty and property rights whereas the rules that benefit workers, tenants and consumers are simply an interference with liberty. The rules one likes, in other words, are the foundations of sacred property rights (and so "liberty," as least for the capitalist and landlord), those one does not like are meddlesome regulation. This is a very handy trick and would not be worth mentioning if it was not so commonplace in right-libertarian theory.

We should leave aside the fantasy that the law under "anarcho"-capitalism is a politically neutral set of universal rules deduced from particular cases and free from a particular instrumental or class agenda.

Caplan:

"Critics of anarcho-capitalism sometimes assume that communal or worker-owned firms would be penalised or prohibited in an anarcho-capitalist society. It would

be more accurate to state that while individuals would be free to voluntarily form communitarian organisations, the anarcho-capitalist simply doubts that they would be widespread or prevalent."

There is good reason for this doubt. Worker co-operatives would not be widespread or prevalent in an "anarcho"-capitalist society for the same reason that they are not widespread or prevalent now: namely, that the socio-economic, legal, and political systems would be structured in such as way as to automatically discourage their growth (in addition, capitalist firms and the rich would also have an advantage in that they would still own and control the wealth they currently have which are a result of previous "initiations of force". This would give them an obvious advantage on the "free-market" — an advantage which would be insurmountable).

As we explain in more detail in section J.5.11, the reason why there are not more producer co-operatives is partly structural, based on the fact that co-operatives have a tendency to grow at a slower rate than capitalist firms. This is a good thing if one's primary concern is, say, protecting the environment, but fatal if one is trying to survive in a competitive capitalist environment.

Under capitalism, successful competition for profits is the fundamental fact of economic survival. This means that banks and private investors seeking the highest returns on their investments will favour those companies that grow the fastest. Moreover, in co-operatives returns to capital are less than in capitalist firms. Under such conditions, capitalist firms will attract more investment capital, allowing them to buy more productivity-enhancing technology and thus to sell their products more cheaply than co-operatives. Even though co-operatives are at least as efficient (usually more so) than their equivalent capitalist firms, the effect of market forces (particularly those associated with capital markets) will select against them. This bias against co-operatives under capitalism is enough to ensure that, despite their often higher efficiency, they cannot prosper under capitalism (i.e. capitalism selects the **least efficient** way of producing). Hence Caplan's comments hide how the effect of inequalities in wealth and power under capitalism determine which alternatives are "widespread" in the "free market"

Moreover, co-operatives within capitalism have a tendency to adapt to the dominant market conditions rather than undermining them. There will be pressure on the co-operatives to compete more effectively by adopting the same cost-cutting and profit-enhancing measures as capitalist firms. Such measures will include the deskilling of workers; squeezing as much "productivity" as is humanly possible from them; and a system of pay differentials in which the majority of workers receive low wages while the bulk of profits are reinvested in technology upgrades and other capital expansion that keeps pace with capitalist firms. But this means that in a capitalist environment, there tend to be few practical advantages for workers in collective ownership of the firms in which they work.

This problem can only be solved by eliminating private property and the coercive statist mechanisms required to protect it (including private states masquerading as "protection companies"), because this is the only way to eliminate competition for profits as the driving force of economic activity. In a libertarian socialist environment, federated associations of workers in co-operative enterprises would co-ordinate production for **use** rather than profit, thus eliminating the competitive basis of the economy and so also the "grow-or-die" principle which now puts co-operatives at a fatal economic disadvantage. (For more on how such an economy would be organised and operated, as well as answers to objections, see section I.)

And let us not forget what is implied by Caplan's statement that the "anarcho"-capitalist does not think that co-operative holding of "property" "would be widespread or prevalent." It means that the vast majority would be subject to the power, authority and laws of the property owner and so would not govern themselves. In other words, it would a system of private statism rather than anarchy.

Caplan:

> *"However, in theory an 'anarcho-capitalist' society might be filled with nothing but communes or worker-owned firms, so long as these associations were formed voluntarily (i.e., individuals joined voluntarily and capital was obtained with the consent of the owners) and individuals retained the right to exit and set up corporations or other profit-making, individualistic firms."*

It's interesting that the "anarcho"-capitalists are willing to allow workers to set up "voluntary" co-operatives so long as the conditions are retained which ensure that such co-operatives will have difficulty surviving (i.e. private property and private states), but they are unwilling to allow workers to set up co-operatives under conditions that would ensure their success (i.e. the absence of private property and private states). This reflects the usual vacuousness of the right-libertarian concepts of "freedom" and "voluntarism."

In other words, these worker-owned firms would exist in and be subject to the same capitalist *"general libertarian law code"* and work in the same capitalist market as the rest of society. So, not only are these co-operatives subject to capitalist market forces, they exist and operate in a society defined by capitalist laws. As discussed in section F.2, such disregard for the social context of human action shows up the "anarcho" capitalist's disregard for meaningful liberty.

All Caplan is arguing here is that as long as people remain within the (capitalist) "law code," they can do whatever they like. However, what determines the amount of coercion required in a society is the extent to which people are willing to accept the rules imposed on them. This is as true of an "anarcho"-capitalist society as it is of any other. In other words, if more and more people reject the basic assumptions of capitalism, the more coercion against anarchistic tendencies will be required. Saying that people would be free to experiment under "anarcho"-capitalist law (if they can afford it, of course) does not address the issue of changes in social awareness (caused, by example, by class struggle) which can make such "laws" redundant. So, when all is said and done, "anarcho"-capitalism just states that as long as you accept their rules, you are free to do what you like.

How generous of them!

Thus, while we would be allowed to be collective capitalists or property owners under "anarcho"-capitalists we would have no choice about living under laws based on the most rigid and extreme interpretation of property rights available. In other words, "anarcho"-capitalists recognise (at least implicitly) that there exists one collective need that needs collective support — a law system to define and protects people's rights. Ultimately, as C.B. Macpherson argues, "Individualism" implies "collectivism" for the *"notion that individualism and 'collectivism' are the opposite ends of a scale along which states and theories of the state can be arranged ... is superficial and misleading... . [I]ndividualism ... does not exclude but on the contrary demands the supremacy of the state [or law] over the individual. It is not a question of the more individualism, the less collectivism; rather, the more through-going the individualism, the more complete the*

collectivism. Of this the supreme illustration is Hobbes's theory." [**The Political Theory of Possessive Individualism**, p.256] Under "anarcho"-capitalism the individual is subject to the laws regarding private property, laws decided in advance by a small group of ideological leaders. Then real individuals are expected to live with the consequences as best they can, with the law being placed ahead of these consequences for flesh and blood people. The abstraction of the law dominates and devours real individuals, who are considered below it and incapable of changing it (except for the worse). This, from one angle, shares a lot with theocracy and very little with liberty.

Needless to say, Caplan like most (if not all) "anarcho"-capitalists assume that the current property owners are entitled to their property. However, as John Stuart Mill pointed out over 100 years ago, the *"social arrangements"* existing today *"commenced from a distribution of property which was the result, not of a just partition, or acquisition by industry, but of conquest and violence ... [and] the system still retains many and large traces of its origin."* [**Principles of Political Economy**, p. 15] Given that (as we point out in section F.1) Murray Rothbard argues that the state cannot be claimed to own its territory simply because it did not acquire its property in a "just" manner, this suggests that "anarcho"-capitalism cannot actually argue against the state. After all, property owners today cannot be said to have received their property "justly" and **if** they are entitled to it so is the state to **its** "property"!

But as is so often the case, property owners are exempt from the analysis the state is subjected to by "anarcho"-capitalists. The state and property owners may do the same thing (such as ban freedom of speech and association or regulate individual behaviour) but only the state is condemned by "anarcho"-capitalism.

Caplan:

> *"On other issues, the anarcho-capitalist differs little if at all from the more moderate libertarian. Services should be privatised and opened to free competition; regulation of personal AND economic behaviour should be done away with."*

The "anarcho"-capitalist's professed desire to "do away" with the "regulation" of economic behaviour is entirely disingenuous. For, by giving capitalists the ability to protect their exploitative monopolies of social capital by the use of coercive private states, one is thereby "regulating" the economy in the strongest possible way, i.e. ensuring that it will be channelled in certain directions rather than others. For example, one is guaranteeing that production will be for profit rather than use; that there will consequently be runaway growth and an endless devouring of nature based on the principle of "grow or die;" and that the alienation and deskilling of the workforce will continue. What the "anarcho"-capitalist really means by "doing away with the regulation of economic behaviour" is that ordinary people will have even lessopportunity than now to democratically control the rapacious behaviour of capitalists. Needless to say, the "regulation of personal" behaviour would **not** be done away with in the workplace, where the authority of the bosses would still exist and you would have follow their petty rules and regulations.

Moreover, regardless of "anarcho"-capitalist claims, they do not, in fact, support civil liberties or oppose "regulation" of personal behaviour as such. Rather, they **support** property owners suppressing civil liberties on their property and the regulation of personal behaviour by employers and landlords. This they argue is a valid expression of property rights. Indeed, any attempts to allow workers civil liberties or restrict employers demands on workers by state or union action

is denounced as a violation of "liberty" (i.e. the power of the property owner). Those subject to the denial of civil liberties or the regulation of their personal behaviour by landlords or employees can "love it or leave it." Of course, the same can be said to any objector to state oppression — and frequently is. This is an artificial double standard, which labels a restraint by one group or person in a completely different way than the same restraint by others simply because one is called "the government" and the other is not.

This denial of civil liberties can be seen from these words by Murray Rothbard:

> *"[I]n the profoundest sense there are no rights but property rights .. . Freedom of speech is supposed to mean the right of everyone to say whatever he likes. But the neglected question is: Where? Where does a man have this right? He certainly does not have it on property on which he is trespassing. In short, he has this right only either on his own property or on the property of someone who has agreed, as a gift or in a rental contract, to allow him in the premises. In fact, then, there is no such thing as a separate 'right to free speech'; there is only a man's property right: the right to do as he wills with his own or to make voluntary agreements with other property owners."* [Murray Rothbard, **Power and Market**, p. 176]

Of course, Rothbard fails to see that for the property-less such a regime implies **no** rights whatsoever. It also means the effective end of free speech and free association as the property owner can censor those on their property (such as workers or tenants) and ban their organisations (such as unions). Of course, in his example Rothbard looks at the "trespasser," **not** the wage worker or the tenant (two far more common examples in any modern society). Rothbard is proposing the dictatorship of the property owner and the end of civil liberties and equal rights (as property is unequally distributed). He gives this utter denial of liberty an Orwellian twist by proclaiming the end of civil liberties by property rights as "a new liberty." Perhaps for the property-owner, but not the wage worker — *"We who belong to the proletaire class, property excommunicates us!"* [Proudhon, **What is Property?**, p. 137]

In effect, right-Libertarians do not care how many restrictions are placed on you as long as it is not the government doing it. Of course it will be claimed that workers and tenants "consent" to these controls (although they reject the notion that citizens "consent" to government controls by not leaving their state). Here the libertarian case is so disingenuous as to be offensive. There is no symmetry in the situations facing workers and firms. To the worker, the loss of a job is often far more of a threat than the loss of one worker is to the firm. The reality of economic power leads people to contract into situations that, although they are indeed the "best" arrangements of those available, are nonetheless miserable. In any real economy — and, remember, the right-libertarian economy lacks any social safety net, making workers' positions more insecure than now — the right-libertarian denial of economic power is a delusion.

Unlike anarchist theory, right-libertarian theory provides **no** rationale to protest private power (or even state power if we accept the notion that the state owns its territory). Relations of domination and subjection are valid expressions of liberty in their system and, perversely, attempts to resist authority (by strikes, unions, resistance) are deemed "initiations of force" upon the oppressor! In contrast, anarchist theory provides a strong rationale for resisting private and public domination. Such domination violates freedom and any free association which dominates any within it violates the basis of that association in self-assumed obligation (see section A.2.11). Thus Proudhon:

> *"The social contract should increase the well-being and liberty of every citizen. — If any one-sided conditions should slip in; if one part of the citizens should find themselves, by the contract, subordinated and exploited by others, it would no longer be a contract; it would be a fraud, against which annulment might at any time by invoked justly."* [**The General Idea of the Revolution**, p. 114]

Caplan's claim that right libertarians oppose regulation of individual behaviour is simply not true. They just oppose state regulation while supporting private regulation wholeheartedly. Anarchists, in contrast, reject both public and private domination.

Caplan:

> *"Poverty would be handled by work and responsibility for those able to care for themselves, and voluntary charity for those who cannot. (Libertarians hasten to add that a deregulated economy would greatly increase the economic opportunities of the poor, and elimination of taxation would lead to a large increase in charitable giving.)"*

Notice the implication that poverty is now caused by laziness and irresponsibility rather than by the inevitable workings of an economic system that **requires** a large *"reserve army of the unemployed"* as a condition of profitability. The continuous "boom" economy of "anarcho"-capitalist fantasies is simply incompatible with the fundamental principles of capitalism. To re-quote Michael Kalecki (from section B.4.4), *"[l]asting full employment is not at all to [the] liking [of business leaders]. The workers would 'get out of hand' and the 'captains of industry' would be anxious 'to teach them a lesson'"* as *"'discipline in the factories' and 'political stability' are more appreciated by business leaders than profits. Their class interest tells them that lasting full employment is unsound from their point of view and that unemployment is an integral part of the 'normal' capitalist system."*. See section C.7 ("What causes the capitalist business cycle?") for a fuller discussion of this point.

In addition, the claims that a "deregulated economy" would benefit the poor do not have much empirical evidence to back them up. If we look at the last quarter of the twentieth century we discover that a more deregulated economy has lead to massive increases in inequality and poverty. If a movement towards a deregulated economy has had the opposite effect than that predicted by Caplan, why should a totally deregulated economy have the opposite effect. It is a bit like claiming that while adding black paint to grey makes it more black, adding the whole tin will make it white!

The reason for increased inequality and poverty as a result of increased deregulation is simple. A "free exchange" between two people will benefit the stronger party. This is obvious as the economy is marked by power, regardless of "anarcho"-capitalist claims, and any "free exchange" will reflect difference in power. Moreover, a series of such exchanges will have an accumulative effect, with the results of previous exchanges bolstering the position of the stronger party in the current exchange.

Moreover, the claim that removing taxation will **increase** donations to charity is someone strange. We doubt that the rich who object to money being taken from them to pay for welfare will **increase** the amount of money they give to others if taxation **was** abolished. As Peter Sabatini points out, "anarcho"-capitalists *"constantly rant and shriek about how the government, or the rabble, hinders their Lockean right to amass capital."* [**Social Anarchism**, no. 23, p.101] Caplan seems to expect them to turn over a new leaf and give **more** to that same rabble!

Appendix — Is "anarcho"-capitalism a type of anarchism?

Anyone who has followed political discussion on the net has probably come across people calling themselves libertarians but arguing from a right-wing, pro-capitalist perspective. For most Europeans this is weird, as in Europe the term *"libertarian"* is almost always used in conjunction with *"socialist"* or *"communist."* In the US, though, the Right has partially succeeded in appropriating this term for itself. Even stranger, however, is that a few of these right-wingers have started calling themselves "anarchists" in what must be one of the finest examples of an oxymoron in the English language: 'Anarcho-capitalist'!!

Arguing with fools is seldom rewarded, but to allow their foolishness to go unchallenged risks allowing them to deceive those who are new to anarchism. That's what this section of the anarchist FAQ is for, to show why the claims of these "anarchist" capitalists are false. Anarchism has always been anti-capitalist and any "anarchism" that claims otherwise cannot be part of the anarchist tradition. So this section of the FAQ does not reflect some kind of debate within anarchism, as many of these types like to pretend, but a debate between anarchism and its old enemy, capitalism. In many ways this debate mirrors the one between Peter Kropotkin and Herbert Spencer, an English pro-capitalist, minimal statist, at the turn the 19th century and, as such, it is hardly new.

The "anarcho"-capitalist argument hinges on using the dictionary definition of "anarchism" and/or "anarchy" — they try to define anarchism as being "opposition to government," and nothing else. However, dictionaries are hardly politically sophisticated and their definitions rarely reflect the wide range of ideas associated with political theories and their history. Thus the dictionary "definition" is anarchism will tend to ignore its consistent views on authority, exploitation, property and capitalism (ideas easily discovered if actual anarchist texts are read). And, of course, many dictionaries "define" anarchy as "chaos" or "disorder" but we never see "anarcho"-capitalists use that particular definition!

And for this strategy to work, a lot of "inconvenient" history and ideas from all branches of anarchism must be ignored. From individualists like Spooner and Tucker to communists like Kropotkin and Malatesta, anarchists have always been anti-capitalist (see section G for more on the anti-capitalist nature of individualist anarchism). Therefore "anarcho"-capitalists are not anarchists in the same sense that rain is not dry.

Of course, we cannot stop the "anarcho"-capitalists using the words "anarcho", "anarchism" and "anarchy" to describe their ideas. The democracies of the west could not stop the Chinese Stalinist state calling itself the People's Republic of China. Nor could the social democrats stop the fascists in Germany calling themselves "National Socialists". Nor could the Italian anarcho-syndicalists stop the fascists using the expression "National Syndicalism". This does not mean that any of these movements actual name reflected their content — China is a dictatorship, not a democracy, the Nazi's were not socialists (capitalists made fortunes in Nazi Germany because it

crushed the labour movement), and the Italian fascist state had nothing in common with anarcho-syndicalists ideas of decentralised, "from the bottom up" unions and the abolition of the state and capitalism.

Therefore, just because someone uses a label it does not mean that they support the ideas associated with that label. And this is the case with "anarcho"-capitalism — its ideas are at odds with the key ideas associated with all forms of traditional anarchism (even individualist anarchism which is often claimed as being a forefather of the ideology).

All we can do is indicate **why** "anarcho"-capitalism is not part of the anarchist tradition and so has falsely appropriated the name. This section of the FAQ aims to do just that — present the case why "anarcho"-capitalists are not anarchists. We do this, in part, by indicating where they differ from genuine anarchists (on such essential issues as private property, equality, exploitation and opposition to hierarchy) In addition, we take the opportunity to present a general critique of right-libertarian claims from an anarchist perspective. In this way we show up why anarchists reject that theory as being opposed to liberty and anarchist ideals.

We are covering this topic in an anarchist FAQ for three reasons. Firstly, the number of "libertarian" and "anarcho"-capitalists on the net means that those seeking to find out about anarchism may conclude that they are "anarchists" as well. Secondly, unfortunately, some academics and writers have taken their claims of being anarchists at face value and have included their ideology into general accounts of anarchism. These two reasons are obviously related and hence the need to show the facts of the matter. As we have extensively documented in earlier sections, anarchist theory has always been anti-capitalist. There is no relationship between anarchism and capitalism, in any form. Therefore, there is a need for this section in order to indicate exactly why "anarcho"-capitalism is not anarchist. As will be quickly seen from our discussion, almost all anarchists who become aware of "anarcho"-capitalism quickly reject it as a form of anarchism (the better academic accounts do note that anarchists generally reject the claim, though). The last reason is to provide other anarchists with arguments and evidence to use against "anarcho"-capitalism and its claims of being a new form of "anarchism."

So this section of the FAQ does not, as we noted above, represent some kind of "debate" within anarchism. It reflects the attempt by anarchists to reclaim the history and meaning of anarchism from those who are attempting to steal its name (just as right-wingers in America have attempted to appropriate the name "libertarian" for their pro-capitalist views, and by so doing ignore over 100 years of anti-capitalist usage). However, this section also serves two other purposes. Firstly, critiquing right-libertarian and "anarcho"-capitalist theories allows us to explain anarchist ones at the same time and indicate why they are better. Secondly, and more importantly, the "ideas" and "ideals" that underlie "anarcho"-capitalism are usually identical (or, at the very least, similar) to those of neo-liberalism. This was noted by Bob Black in the early 1980s, when a *"wing of the Reaganist Right has obviously appropriated, with suspect selectivity, such libertarian themes as deregulation and voluntarism. Ideologues indignant that Reagan has travestied their principles. Tough shit! I notice that it's their principles, not mine, that he found suitable to travesty."* [**The Libertarian As Conservative**] This was echoed by Noam Chomsky two decades later when while *"nobody takes [right-wing libertarianism] seriously"* as *"everybody knows that a society that worked by ... [its] principles would self-destruct in three seconds"* the *"only reason"* why some people *"pretend to take it seriously is because you can use it as a weapon."* [**Understanding Power**, p. 200] As neo-liberalism is being used as the ideological basis of the current attack on the working

class, critiquing "anarcho"-capitalism and right-libertarianism also allows use to build theoretical weapons to use to resist this attack and aid the class struggle.

A few more points before beginning. When debating with "libertarian" or "anarchist" capitalists it's necessary to remember that while they claim "real capitalism" does not exist (because all existing forms of capitalism are statist), they will claim that all the good things we have — advanced medical technology, consumer choice of products, etc. – are nevertheless due to "capitalism." Yet if you point out any problems in modern life, these will be blamed on "statism." Since there has never been and never will be a capitalist system without some sort of state, it's hard to argue against this "logic." Many actually use the example of the Internet as proof of the power of "capitalism," ignoring the fact that the state paid for its development before turning it over to companies to make a profit from it. Similar points can be made about numerous other products of "capitalism" and the world we live in. To artificially separate one aspect of a complex evolution fails to understand the nature and history of the capitalist system.

In addition to this ability to be selective about the history and results of capitalism, their theory has a great "escape clause." If wealthy employers abuse their power or the rights of the working class (as they have always done), then they have (according to "libertarian" ideology) ceased to be capitalists! This is based upon the misperception that an economic system that relies on force **cannot** be capitalistic. This is **very** handy as it can absolve the ideology from blame for any (excessive) oppression which results from its practice. Thus individuals are always to blame, **not** the system that generated the opportunities for abuse they freely used.

Anarchism has always been aware of the existence of "free market" capitalism, particularly its extreme (minimal state) wing, and has always rejected it. As we discuss in section 7, anarchists from Proudhon onwards have rejected the idea of any similar aims and goals (and, significantly, vice versa). As academic Alan Carter notes, anarchist concern for equality as a necessary precondition for genuine freedom means *"that is one very good reason for not confusing anarchists with liberals or economic 'libertarians' — in other words, for not lumping together everyone who is in some way or another critical of the state. It is why calling the likes of Nozick 'anarchists' is highly misleading."* [*"Some notes on 'Anarchism'"*, pp. 141–5, **Anarchist Studies**, vol. 1, no. 2, p. 143] So anarchists have evaluated "free market" capitalism and rejected it as non-anarchist for over 150 years. Attempts by "anarcho"-capitalism to say that their system is "anarchist" flies in the face of this long history of anarchist analysis. That some academics fall for their attempts to appropriate the anarchist label for their ideology is down to a false premise: it *"is judged to be anarchism largely because some anarcho-capitalists **say** they are 'anarchists' and because they criticise the State."* [Peter Sabatini, **Social Anarchism**, no. 23, p. 100]

More generally, we must stress that most (if not all) anarchists do not want to live in a society **just like this one** but without state coercion and (the initiation of) force. Anarchists do not confuse "freedom" with the "right" to govern and exploit others nor with being able to change masters. It is not enough to say we can start our own (co-operative) business in such a society. We want the abolition of the capitalist system of authoritarian relationships, not just a change of bosses or the possibility of little islands of liberty within a sea of capitalism (islands which are always in danger of being flooded and our activity destroyed). Thus, in this section of the FAQ, we analysis many "anarcho"-capitalist claims on their own terms (for example, the importance of equality in the market or why capitalism cannot be reformed away by exchanges on the capitalist market) but that does not mean we desire a society nearly identical to the current one. Far from it, we want to transform this society into one more suited for developing and enriching individuality

and freedom. But before we can achieve that we must critically evaluate the current society and point out its basic limitations.

Finally, we dedicate this section of the FAQ to those who have seen the real face of "free market" capitalism at work: the working men and women (anarchist or not) murdered in the jails and concentration camps or on the streets by the hired assassins of capitalism.

1 Are "anarcho"-capitalists really anarchists?

In a word, no. While "anarcho"-capitalists obviously try to associate themselves with the anarchist tradition by using the word "anarcho" or by calling themselves "anarchists", their ideas are distinctly at odds with those associated with anarchism. As a result, any claims that their ideas are anarchist or that they are part of the anarchist tradition or movement are false.

"Anarcho"-capitalists claim to be anarchists because they say that they oppose government. As such, as noted in the last section, they use a dictionary definition of anarchism. However, this fails to appreciate that anarchism is a **political theory**, not a dictionary definition. As dictionaries are rarely politically sophisticated things, this means that they fail to recognise that anarchism is more than just opposition to government, it is also marked a opposition to capitalism (i.e. exploitation and private property). Thus, opposition to government is a necessary but not sufficient condition for being an anarchist — you also need to be opposed to exploitation and capitalist private property. As "anarcho"-capitalists do not consider interest, rent and profits (i.e. capitalism) to be exploitative nor oppose capitalist property rights, they are not anarchists.

Moreover, "anarcho"-capitalism is inherently self-refuting. This can be seen from leading "anarcho"-capitalist Murray Rothbard. he thundered against the evil of the state, arguing that it *"arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area."* In and of itself, this definition is unremarkable. That a few people (an elite of rulers) claim the right to rule others must be part of any sensible definition of the state or government. However, the problems begin for Rothbard when he notes that *"[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc."* [**The Ethics of Liberty**, p. 170 and p. 173] The logical contradiction in this position should be obvious, but not to Rothbard. It shows the power of ideology, the ability of means words (the expression *"private property"*) to turn the bad (*"ultimate decision-making power over a given area"*) into the good (*"ultimate decision-making power over a given area"*).

Now, this contradiction can be solved in only **one** way — the owners of the *"given area"* are also its users. In other words, a system of possession (or "occupancy and use") as favoured by anarchists. However, Rothbard is a capitalist and supports private property. In other words, wage labour and landlords. This means that he supports a divergence between ownership and use and this means that this *"ultimate decision-making power"* extends to those who **use,** but do not own, such property (i.e. tenants and workers). The statist nature of private property is clearly indicated by Rothbard's words — the property owner in an "anarcho"-capitalist society possesses the *"ultimate decision-making power"* over a given area, which is also what the state has currently. Rothbard has, ironically, proved by his own definition that "anarcho"-capitalism is not anarchist.

Rothbard does try to solve this obvious contradiction, but utterly fails. He simply ignores the crux of the matter, that capitalism is based on hierarchy and, therefore, cannot be anarchist. He

does this by arguing that the hierarchy associated with capitalism is fine as long as the private property that produced it was acquired in a "just" manner. In so doing he yet again draws attention to the identical authority structures and social relationships of the state and property. As he puts it:

> *"**If** the State may be said too properly **own** its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there **is** no private property in its area, because it really owns the entire land surface. **So long** as the State permits its subjects to leave its territory, then, it can be said to act as does any other owner who sets down rules for people living on his property."* [**Op. Cit.**, p. 170]

Obviously Rothbard argues that the state does not "justly" own its territory — but given that the current distribution of property is just as much the result of violence and coercion as the state, his argument is seriously flawed. It amounts, as we note in section 4, to little more than an ***"immaculate conception of property"*** unrelated to reality. Even assuming that private property was produced by the means Rothbard assumes, it does not justify the hierarchy associated with it as the current and future generations of humanity have, effectively, been excommunicated from liberty by previous ones. If, as Rothbard argues, property is a natural right and the basis of liberty then why should the many be excluded from their birthright by a minority? In other words, Rothbard denies that liberty should be universal. He chooses property over liberty while anarchists choose liberty over property.

Even worse, the possibility that private property can result in **worse** violations of individual freedom (at least of workers) than the state of its citizens was implicitly acknowledged by Rothbard. He uses as a hypothetical example a country whose King is threatened by a rising "libertarian" movement. The King responses by *"employ[ing] a cunning stratagem,"* namely he *"proclaims his government to be dissolved, but just before doing so he arbitrarily parcels out the entire land area of his kingdom to the 'ownership' of himself and his relatives."* Rather than taxes, his subjects now pay rent and he can *"regulate to regulate the lives of all the people who presume to live on"* his property as he sees fit. Rothbard then asks:

> *"Now what should be the reply of the libertarian rebels to this pert challenge? If they are consistent utilitarians, they must bow to this subterfuge, and resign themselves to living under a regime no less despotic than the one they had been battling for so long. Perhaps, indeed, **more** despotic, for now the king and his relatives can claim for themselves the libertarians' very principle of the absolute right of private property, an absoluteness which they might not have dared to claim before."* [**Op. Cit.**, pp. 54–5]

So not only does the property owner have the same monopoly of power over a given area as the state, it is **more** despotic as it is based on the *"absolute right of private property"*! And remember, Rothbard is arguing **in favour** of "anarcho"-capitalismAnd remember, Rothbard is arguing **in favour** of "anarcho"-capitalism (*"if you have unbridled capitalism, you will have all kinds of authority: you will have **extreme** authority."* [Chomksy, **Understanding Power**, p. 200]). So in practice, private property is a major source of oppression and authoritarianism within society — there is little or no freedom within capitalist production (as Bakunin noted, *"the worker*

sells his person and his liberty for a given time"). So, in stark contrast to anarchists, "anarcho"-capitalists have no problem with factory fascism (i.e. wage labour), a position which seems highly illogical for a theory calling itself libertarian. If it were truly libertarian, it would oppose all forms of domination, not just statism. This position flows from the "anarcho"-capitalist definition of freedom as the absence of coercion and will be discussed in section 2 in more detail.

Of course, Rothbard has yet another means to escape the obvious, namely that the market will limit the abuses of the property owners. If workers do not like their ruler then they can seek another. However, this reply completely ignores the reality of economic and social power. Thus the "consent" argument fails because it ignores the social circumstances of capitalism which limit the choice of the many. Anarchists have long argued that, as a class, workers have little choice but to "consent" to capitalist hierarchy. The alternative is either dire poverty or starvation.

"Anarcho"-capitalists dismiss such claims by denying that there is such a thing as economic power. Rather, it is simply freedom of contract. Anarchists consider such claims as a joke. To show why, we need only quote (yet again) Rothbard on the abolition of slavery and serfdom in the 19th century. He argued, correctly, that the *"**bodies** of the oppressed were freed, but the property which they had worked and eminently deserved to own, remained in the hands of their former oppressors. With economic power thus remaining in their hands, the former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits."* [**Op. Cit.**, p. 74]

To say the least, anarchists fail to see the logic in this position. Contrast this with the standard "anarcho"-capitalist claim that if market forces ("voluntary exchanges") result in the creation of *"free tenants or farm labourers"* then they are free. Yet labourers dispossessed by market forces are in exactly the same social and economic situation as the ex-serfs and ex-slaves. If the latter do not have the fruits of freedom, neither do the former. Rothbard sees the obvious *"economic power"* in the latter case, but denies it in the former. It is only Rothbard's ideology that stops him from drawing the obvious conclusion — identical economic conditions produce identical social relationships and so capitalism is marked by *"economic power"* and *"virtual masters."* The only solution is for "anarcho"-capitalists to simply say the ex-serfs and ex-slaves were actually free to choose and, consequently, Rothbard was wrong. It might be inhuman, but at least it would be consistent!

Rothbard's perspective is alien to anarchism. For example, as individualist anarchist William Bailie noted, under capitalism there is a class system marked by *"a dependent industrial class of wage-workers"* and *"a privileged class of wealth-monopolisers, each becoming more and more distinct from the other as capitalism advances."* This has turned property into *"a social power, an economic force destructive of rights, a fertile source of injustice, a means of enslaving the dispossessed."* He concludes: *"Under this system equal liberty cannot obtain."* Bailie notes that the modern *"industrial world under capitalistic conditions"* have *"arisen under the **regime** of status"* (and so *"law-made privileges"*) however, it seems unlikely that he would have concluded that such a class system would be fine if it had developed naturally or the current state was abolished while leaving the class structure intact (as we note in section G.4, Tucker recognised that even the *"freest competition"* was powerless against the *"enormous concentration of wealth"* associated with modern capitalism). [**The Individualist Anarchists**, p. 121]

Therefore anarchists recognise that "free exchange" or "consent" in unequal circumstances will reduce freedom as well as increasing inequality between individuals and classes. In other

words, as we discuss in section 3, inequality will produce social relationships which are based on hierarchy and domination, **not** freedom. As Noam Chomsky put it:

> *"Anarcho-capitalism, in my opinion, is a doctrinal system which, if ever implemented, would lead to forms of tyranny and oppression that have few counterparts in human history. There isn't the slightest possibility that its (in my view, horrendous) ideas would be implemented, because they would quickly destroy any society that made this colossal error. The idea of 'free contract' between the potentate and his starving subject is a sick joke, perhaps worth some moments in an academic seminar exploring the consequences of (in my view, absurd) ideas, but nowhere else."* [**Noam Chomsky on Anarchism**, interview with Tom Lane, December 23, 1996]

Clearly, then, by its own arguments "anarcho"-capitalism is not anarchist. This should come as no surprise to anarchists. Anarchism, as a political theory, was born when Proudhon wrote **What is Property?** specifically to refute the notion that workers are free when capitalist property forces them to seek employment by landlords and capitalists. He was well aware that in such circumstances property *"violates equality by the rights of exclusion and increase, and freedom by despotism ... [and has] perfect identity with robbery."* He, unsurprisingly, talks of the *"proprietor, to whom [the worker] has sold and surrendered his liberty."* For Proudhon, anarchy was *"the absence of a master, of a sovereign"* while *"proprietor"* was *"synonymous"* with *"sovereign"* for he *"imposes his will as law, and suffers neither contradiction nor control."* This meant that *"property engenders despotism,"* as *"each proprietor is sovereign lord within the sphere of his property."* [**What is Property**, p. 251, p. 130, p. 264 and pp. 266–7] It must also be stressed that Proudhon's classic work is a lengthy critique of the kind of apologetics for private property Rothbard espouses to salvage his ideology from its obvious contradictions.

Ironically, Rothbard repeats the same analysis as Proudhon but draws the **opposite** conclusions and expects to be considered an anarchist! Moreover, it seems equally ironic that "anarcho"-capitalism calls itself "anarchist" while basing itself on the arguments that anarchism was created in opposition to. As shown, "anarcho"-capitalism makes as much sense as "anarcho-statism" — an oxymoron, a contradiction in terms. The idea that "anarcho"-capitalism warrants the name "anarchist" is simply false. Only someone ignorant of anarchism could maintain such a thing. While you expect anarchist theory to show this to be the case, the wonderful thing is that "anarcho"-capitalism itself does the same.

Little wonder Bob Black argues that *"[t]o demonise state authoritarianism while ignoring identical albeit contract-consecrated subservient arrangements in the large-scale corporations which control the world economy is fetishism at its worst."* [**Libertarian as Conservative**] The similarities between capitalism and statism are clear — and so why "anarcho"-capitalism cannot be anarchist. To reject the authority (the *"ultimate decision-making power"*) of the state and embrace that of the property owner indicates not only a highly illogical stance but one at odds with the basic principles of anarchism. This whole-hearted support for wage labour and capitalist property rights indicates that "anarcho"-capitalists are not anarchists because they do not reject all forms of **archy.** They obviously support the hierarchy between boss and worker (wage labour) and landlord and tenant. Anarchism, by definition, is against all forms of archy, including the hierarchy generated by capitalist property. To ignore the obvious archy associated with capitalist property is highly illogical.

In addition, we must note that such inequalities in power and wealth will need "defending" from those subject to them ("anarcho"-capitalists recognise the need for private police and courts to defend property from theft — and, anarchists add, to defend the theft and despotism associated with property!). Due to its support of private property (and thus authority), "anarcho"-capitalism ends up retaining a state in its "anarchy"; namely a **private** state whose existence its proponents attempt to deny simply by refusing to call it a state, like an ostrich hiding its head in the sand (see section 6 for more on this and why "anarcho"-capitalism is better described as "private state" capitalism). As Albert Meltzer put it:

> *"Common-sense shows that any capitalist society might dispense with a 'State' ... but it could not dispense with organised government, or a privatised form of it, if there were people amassing money and others working to amass it for them. The philosophy of 'anarcho-capitalism' dreamed up by the 'libertarian' New Right, has nothing to do with Anarchism as known by the Anarchist movement proper. It is a lie ... Patently unbridled capitalism ... needs some force at its disposal to maintain class privileges, either form the State itself or from private armies. What they believe in is in fact a limited State — that us, one in which the State has one function, to protect the ruling class, does not interfere with exploitation, and comes as cheap as possible for the ruling class. The idea also serves another purpose ... a moral justification for bourgeois consciences in avoiding taxes without feeling guilty about it."* [**Anarchism: Arguments For and Against**, p. 50]

For anarchists, this need of capitalism for some kind of state is unsurprising. For *"Anarchy without socialism seems equally as impossible to us [as socialism without anarchy], for in such a case it could not be other than the domination of the strongest, and would therefore set in motion right away the organisation and consolidation of this domination; that is to the constitution of government."* [Errico Malatesta, **Life and Ideas**, p. 148] Because of this, the "anarcho"-capitalist rejection of anarchist ideas on capitalist property economics and the need for equality, they cannot be considered anarchists or part of the anarchist tradition.

Thus anarchism is far more than the common dictionary definition of "no government" — it also entails being against all forms of **archy**, including those generated by capitalist property. This is clear from the roots of the word "anarchy." As we noted in section A.1, the word anarchy means "no rulers" or "contrary to authority." As Rothbard himself acknowledges, the property owner is the ruler of their property and, therefore, those who use it. For this reason "anarcho"-capitalism cannot be considered as a form of anarchism — a real anarchist must logically oppose the authority of the property owner along with that of the state. As "anarcho"-capitalism does not explicitly (or implicitly, for that matter) call for economic arrangements that will end wage labour and usury it cannot be considered anarchist or part of the anarchist tradition.

Political theories should be identified by their actual features and history rather than labels. Once we recognise that, we soon find out that "anarcho"-capitalism is an oxymoron. Anarchists and "anarcho"-capitalists are not part of the same movement or tradition. Their ideas and aims are in direct opposition to those of all kinds of anarchists.

While anarchists have always opposed capitalism, "anarcho"-capitalists have embraced it. And due to this embrace their "anarchy" will be marked by extensive differences in wealth and power, differences that will show themselves up in relationships based upon subordination and hierarchy (such as wage labour), **not** freedom (little wonder that Proudhon argued that *"property is*

despotism" — it creates authoritarian and hierarchical relationships between people in a similar way to statism).

Their support for "free market" capitalism ignores the impact of wealth and power on the nature and outcome of individual decisions within the market (see sections 2 and 3 for further discussion). For example, as we indicate in sections J.5.10, J.5.11 and J.5.12, wage labour is less efficient than self-management in production but due to the structure and dynamics of the capitalist market, "market forces" will actively discourage self-management due to its empowering nature for workers. In other words, a developed capitalist market will promote hierarchy and unfreedom in production in spite of its effects on individual workers and their wants (see also section 10.2). Thus "free market" capitalism tends to re-enforce inequalities of wealth and power, **not** eliminate them.

Furthermore, any such system of (economic and social) power will require extensive force to maintain it and the "anarcho"-capitalist system of competing "defence firms" will simply be a new state, enforcing capitalist power, property rights and law.

Overall, the lack of concern for meaningful freedom within production and the effects of vast differences in power and wealth within society as a whole makes "anarcho"-capitalism little better than "anarchism for the rich." Emma Goldman recognised this when she argued that *"'Rugged individualism' has meant all the 'individualism' for the masters ... in whose name political tyranny and social oppression are defended and held up as virtues while every aspiration and attempt of man to gain freedom ... is denounced as ... evil in the name of that same individualism."* [**Red Emma Speaks**, p. 112] And, as such, is no anarchism at all.

So, unlike anarchists, "anarcho"-capitalists do not seek the *"abolition of the proletariat"* (to use Proudhon's expression) via changing capitalist property rights and institutions. Thus the "anarcho"-capitalist and the anarchist have different starting positions and opposite ends in mind and so they cannot be considered part of the same (anarchist) tradition. As we discuss further in later sections, the "anarcho"-capitalist claims to being anarchists are bogus simply because they reject so much of the anarchist tradition as to make what they do accept non-anarchist in theory and practice. Little wonder Peter Marshall said that *"few anarchists would accept the 'anarcho-capitalists' into the anarchist camp since they do not share a concern for economic equality and social justice."* [**Demanding the Impossible**, p. 565] #secf11

1.1 Why is the failure to renounce hierarchy the Achilles Heel of right-wing libertarianism

Any capitalist system will produce vast differences in economic (and social) wealth and power. As we argue in section 3.1, such differences will reflect themselves in the market and any "free" contracts agreed there will create hierarchical relationships. Thus capitalism is marked by hierarchy (see section B.1.2) and, unsurprisingly, right-libertarians and "anarcho"-capitalists fail to oppose such "free market" generated hierarchy.

Both groups approve of it in the capitalist workplace or rented accommodation and the right-Libertarians also approve of it in a 'minimal' state to protect private property ("anarcho"-capitalists, in contrast, approve of the use of private defence firms to protect property). But the failure of these two movements to renounce hierarchy is their weakest point. For anti-authoritarianism has sunk deep roots into the modern psyche, as a legacy of the sixties.

Many people who do not even know what anarchism is have been profoundly affected by the personal liberation and counterculture movements of the past thirty years, epitomised by the popular bumper sticker, *"Question Authority."* As a result, society now tolerates much more choice than ever before in matters of religion, sexuality, art, music, clothing, and other components of lifestyle. We need only recall the conservatism that reigned in such areas during the fifties to see that the idea of liberty has made tremendous advances in just a few decades.

Although this liberatory impulse has so far been confined almost entirely to the personal and cultural realms, it may yet be capable of spilling over and affecting economic and political institutions, provided it continues to grow. The Right is well aware of this, as seen in its ongoing campaigns for "family values," school prayer, suppression of women's rights, fundamentalist Christianity, sexual abstinence before marriage, and other attempts to revive the Ozzie-and-Harriet mindset of the Good Old Days. This is where the efforts of "cultural anarchists" — artists, musicians, poets, and others — are important in keeping alive the ideal of personal freedom and resistance to authority as a necessary foundation for economic and political restructuring.

Indeed, the libertarian right (as a whole) support restrictions on freedom **as long as its not the state that is doing it**! Their support for capitalism means that they have no problem with bosses dictating what workers do during working hours (nor outside working hours, if the job requires employees to take drug tests or not be gay in order to keep it). If a private landlord or company decrees a mandatory rule or mode of living, workers/tenets must "love it or leave it!" Of course, that the same argument also applies to state laws is one hotly denied by right-Libertarians — a definite case of not seeing the wood for the trees (see section 2.3).

Of course, the "anarcho"-capitalist will argue, workers and tenants can find a more liberal boss or landlord. This, however, ignores two key facts. Firstly, being able to move to a more liberal state hardly makes state laws less offensive (as they themselves will be the first to point out). Secondly, looking for a new job or home is not that easy. Just a moving to a new state can involve drastic upheavals, so change changing jobs and homes. Moreover, the job market is usually a buyers market (it has to be in capitalism, otherwise profits are squeezed — see sections C.7 and 10.2) and this means that workers are not usually in a position (unless they organise) to demand increased liberties at work.

It seems somewhat ironic, to say the least, that right-libertarians place rights of property over the rights of self-ownership, even though (according to their ideology) self-ownership is the foundational right from which property rights are derived. Thus in right-libertarianism the rights of property owners to discriminate and govern the property-less are more important than the freedom from discrimination (i.e. to be yourself) or the freedom to govern oneself at all times.

So, when it boils down to it, right-libertarians are not really bothered about restrictions on liberty and, indeed, they will defend private restrictions on liberty with all their might. This may seem a strange position for self-proclaimed "libertarians" to take, but it flows naturally from their definition of freedom (see section 2 for a full discussion of this). but by not attacking hierarchy beyond certain forms of statism, the 'libertarian' right fundamentally undermines its claim to be libertarian. Freedom cannot be compartmentalised, but is holistic. The denial of liberty in, say, the workplace, quickly results in its being denied elsewhere in society (due to the impact of the inequalities it would produce) , just as the degrading effects of wage labour and the hierarchies with which is it bound up are felt by the worker outside work.

Neither the Libertarian Party nor so-called "anarcho"-capitalism is **genuinely** anti-authoritarian, as those who are truly dedicated to liberty must be. #secf12

1.2 How libertarian is right-Libertarian theory?

The short answer is, not very. Liberty not only implies but also requires independent, critical thought (indeed, anarchists would argue that critical thought requires free development and evolution and that it is precisely **this** which capitalist hierarchy crushes). For anarchists a libertarian theory, if it is to be worthy of the name, must be based upon critical thought and reflect the key aspect that characterises life — change and the ability to evolve. To hold up dogma and base "theory" upon assumptions (as opposed to facts) is the opposite of a libertarian frame of mind. A libertarian theory must be based upon reality and recognise the need for change and the existence of change. Unfortunately, right-Libertarianism is marked more by ideology than critical analysis.

Right-Libertarianism is characterised by a strong tendency of creating theories based upon assumptions and deductions from these axioms (for a discussion on the pre-scientific nature of this methodology and of its dangers, see the next section). Robert Nozick, for example, in **Anarchy, State, and Utopia** makes no attempt to provide a justification of the property rights his whole theory is based upon. His main assumption is that *"[i]ndividuals have rights, and there are certain things no person or group may do to them (without violating their rights)."* [**Anarchy, State and Utopia**, p. ix] While this does have its intuitive appeal, it is not much to base a political ideology upon. After all, what rights people consider as valid can be pretty subjective and have constantly evolved during history. To say that "individuals have rights" is to open up the question "what rights?" Indeed, as we argue in greater length in section 2, such a rights based system as Nozick desires can and does lead to situations developing in which people "consent" to be exploited and oppressed and that, intuitively, many people consider supporting the "violation" of these "certain rights" (by creating other ones) simply because of their evil consequences.

In other words, starting from the assumption "people have [certain] rights" Nozick constructs a theory which, when faced with the reality of unfreedom and domination it would create for the many, justifies this unfreedom as an expression of liberty. In other words, regardless of the outcome, the initial assumptions are what matter. Nozick's intuitive rights system can lead to some very non-intuitive outcomes.

And does Nozick prove the theory of property rights he assumes? He states that *"we shall not formulate [it] here."* [**Op. Cit.**, p. 150] Moreover, it is not formulated anywhere else in his book. And if it is not formulated, what is there to defend? Surely this means that his Libertarianism is without foundations? As Jonathan Wolff notes, Nozick's *"Libertarian property rights remain substantially undefended."* [**Robert Nozick: Property, Justice and the Minimal State**, p. 117] Given that the right to acquire property is critical to his whole theory you would think it important enough to go into in some detail (or at least document). After all, unless he provides us with a firm basis for property rights then his entitlement theory is nonsense as no one has the right to (private) property.

It could be argued that Nozick **does** present enough information to allow us to piece together a possible argument in favour of property rights based on his modification of the *"Lockean Proviso"* (although he does not point us to these arguments). However, assuming this is the case, such a defence actually fails (see section B.3.4 for more on this). If individuals **do** have rights, these rights do not include property rights in the form Nozick assumes (but does not prove). Nozick appears initially convincing because what he assumes with regards to property is a normal feature of

the society we are in (we would be forgiven when we note here that feeble arguments pass for convincing when they are on the same side as the prevailing sentiment).

Similarly, both Murray Rothbard and Ayn Rand (who is infamous for repeating *"A is A"* ad infinitum) do the same — base their ideologies on assumptions (see section 11 for more on this).

Therefore, we see that most of the leading right-Libertarian ideologues base themselves on assumptions about what "Man" is or the rights they should have (usually in the form that people have (certain) rights because they are people). From these theorems and assumptions they build their respective ideologies, using logic to deduce the conclusions that their assumptions imply. Such a methodology is unscientific and, indeed, a relic of religious (pre-scientific) society (see next section) but, more importantly, can have negative effects on maximising liberty. This is because this "methodology" has distinct problems. Murray Bookchin argues:

> *"Conventional reason rests on identity, not change; its fundamental principle is that* ***A equals A,*** *the famous 'principle of identity,' which means that any given phenomenon can be only itself and cannot be other than what we immediately perceive it to be at a given moment in time. It does not address the problem of change. A human being is an infant at one time, a child at another, an adolescent at still another, and finally a youth and an adult. When we analyse an infant by means of conventional reason, we are not exploring what it is* ***becoming*** *in the process of developing into a child."* [*"A Philosophical Naturalism"*, **Society and Nature** No.2, p. 64]

In other words, right-Libertarian theory is based upon ignoring the fundamental aspect of life — namely **change** and **evolution.** Perhaps it will be argued that identity also accounts for change by including potentiality — which means, that we have the strange situation that A can **potentially** be A! If A is not actually A, but only has the potential to be A, then A is not A. Thus to include change is to acknowledge that A does not equal A — that individuals and humanity evolves and so what constitutes A also changes. To maintain identity and then to deny it seems strange.

That change is far from the "A is A" mentality can be seen from Murray Rothbard who goes so far as to state that *"one of the notable attributes of natural law"* is *"its applicability to all men [sic!], regardless of time or place. Thus ethical law takes its place alongside physical or 'scientific' natural laws."* [**The Ethics of Liberty**, p. 42] Apparently the "nature of man" is the only living thing in nature that does not evolve or change! Of course, it could be argued that by "natural law" Rothbard is only referring to his method of deducing his (and, we stress, they are just his — not natural) "ethical laws" — but his methodology starts by assuming certain things about "man." Whether these assumptions seem far or not is besides the point, by using the term "natural law" Rothbard is arguing that any actions that violate **his** ethical laws are somehow "against nature" (but if they were against nature, they could not occur — see section 11 for more on this). Deductions from assumptions is a Procrustean bed for humanity (as Rothbard's ideology shows).

So, as can be seen, many leading right-Libertarians place great store by the axiom "A is A" or that "man" has certain rights simply because "he" is a "man". And as Bookchin points out, such conventional reason *"doubtless plays an indispensable role in mathematical thinking and mathematical sciences ... and in the nuts-and-bolts of dealing with everyday life"* and so is essential to *"understand or design mechanical entities."* [**Ibid.**, p.67] But the question arises, is such reason useful when considering people and other forms of life?

Mechanical entities are but one (small) aspect of human life. Unfortunately for right-Libertarians (and fortunately for the rest of humanity), human beings are **not** mechanical entities but instead are living, breathing, feeling, hoping, dreaming, **changing** living organisms. They are not mechanical entities and any theory that uses reason based on such (non-living) entities will flounder when faced with living ones. In other words, right-Libertarian theory treats people as the capitalist system tries to — namely as commodities, as things. Instead of human beings, whose ideas, ideals and ethics change, develop and grow, capitalism and capitalist ideologues try to reduce human life to the level of corn or iron (by emphasising the unchanging "nature" of man and their starting assumptions/rights).

This can be seen from their support for wage labour, the reduction of human activity to a commodity on the market. While paying lip service to liberty and life, right-libertarianism justifies the commodification of labour and life, which within a system of capitalist property rights can result in the treating of people as means to an end as opposed to an end in themselves (see sections 2 and 3.1).

And as Bookchin points out, *"in an age of sharply conflicting values and emotionally charges ideals, such a way of reasoning is often repellent. Dogmatism, authoritarianism, and fear seem all-pervasive."* [**Ibid.**, p. 68] Right-Libertarianism provides more than enough evidence for Bookchin's summary with its support for authoritarian social relationships, hierarchy and even slavery (see section 2).

This mechanical viewpoint is also reflected in their lack of appreciation that social institutions and relationships evolve over time and, sometimes, fundamentally change. This can best be seen from property. Right-libertarians fail to see that over time (in the words of Proudhon) property *"changed its nature."* Originally, *"the word **property** was synonymous with ... **individual possession**"* but it became more *"complex"* and turned into **private property** — *"the right to use it by his neighbour's labour."* The changing of use-rights to (capitalist) property rights created relations of domination and exploitation between people absent before. For the right-Libertarian, both the tools of the self-employed artisan and the capital of a transnational corporation are both forms of "property" and (so) basically identical. In practice, of course, the social relations they create and the impact they have on society are totally different. Thus the mechanical mindset of right-Libertarianism fails to understand how institutions, like property, evolve and come to replace whatever freedom enhancing features they had with oppression (indeed, von Mises argued that *"[t]here may possibly be a difference of opinion about whether a particular institution is socially beneficial or harmful. But once it has been judged [by whom, we ask] beneficial, one can no longer contend that, for some inexplicable reason, it must be condemned as immoral"* [**Liberalism**, p. 34] So much for evolution and change!).

Anarchism, in contrast, is based upon the importance of critical thought informed by an awareness that life is in a constant process of change. This means that our ideas on human society must be informed by the facts, not by what we wish was true. For Bookchin, an evaluation of conventional wisdom (as expressed in *"the law of identity"*) is essential and its conclusions have *"enormous importance for how we behave as ethical beings, the nature of nature, and our place in the natural world. Moreover... these issues directly affect the kind of society, sensibility, and lifeways we wish to foster."* [Bookchin, **Op. Cit.**, p. 69–70]

Bookchin is correct. While anarchists oppose hierarchy in the name of liberty, right-libertarians support authority and hierarchy, all of which deny freedom and restrict individual development. This is unsurprising because the right-libertarian ideology rejects change and

critical thought based upon the scientific method and so is fundamentally **anti-life** in its assumptions and **anti-human** in its method. Far from being a libertarian set of ideas, right-Libertarianism is a mechanical set of dogmas that deny the fundamental nature of life (namely change) and of individuality (namely critical thought and freedom). Moreover, in practice their system of (capitalist) rights would soon result in extensive restrictions on liberty and authoritarian social relationships (see sections 2 and 3) — a strange result of a theory proclaiming itself "libertarian" but one consistent with its methodology.

From a wider viewpoint, such a rejection of liberty by right-libertarians is unsurprising. They do, after all, support capitalism. Capitalism produces an inverted set of ethics, one in which capital (dead labour) is more important that people (living labour). After all, workers are usually easier to replace than investments in capital and the person who owns capital commands the person who "only" owns his life and productive abilities. And as Oscar Wilde once noted, crimes against property *"are the crimes that the English law, valuing what a man has more than what a man is, punishes with the harshest and most horrible severity."* [**The Soul of Man Under Socialism**]

This mentality is reflected in right-libertarianism when it claims that stealing food is a crime while starving to death (due to the action of market forces/power and property rights) is no infringement of your rights (see section 4.2 for a similar argument with regards to water). It can also be seen when right-libertarian's claim that the taxation *"of earnings from labour"* (e.g. of one dollar from a millionaire) is ***"on a par with** forced labour"* [Nozick, **Op. Cit.**, p. 169] while working in a sweatshop for 14 hours a day (enriching said millionaire) does not affect your liberty as you "consent" to it due to market forces (although, of course, many rich people have earned their money **without** labouring themselves — their earnings derive from the wage labour of others so would taxing those, non-labour, earnings be "forced labour"?) Interestingly, the Individualist Anarchist Ben Tucker argued that an income tax was *"a recognition of the fact that industrial freedom and equality of opportunity no longer exist here [in the USA in the 1890s] even in the imperfect state in which they once did exist"* [quoted by James Martin, **Men Against the State**, p. 263] which suggests a somewhat different viewpoint on this matter than Nozick or Rothbard.

That capitalism produces an inverted set of ethics can be seen when the Ford produced the Pinto. The Pinto had a flaw in it which meant that if it was hit in a certain way in a crash the fuel tank exploded. The Ford company decided it was more "economically viable" to produce that car and pay damages to those who were injured or the relatives of those who died than pay to change the invested capital. The needs for the owners of capital to make a profit came before the needs of the living. Similarly, bosses often hire people to perform unsafe work in dangerous conditions and fire them if they protest. Right-libertarian ideology is the philosophical equivalent. Its dogma is "capital" and it comes before life (i.e. "labour").

As Bakunin once put it, *"you will always find the idealists in the very act of practical materialism, while you will see the materialists pursuing and realising the most grandly ideal aspirations and thoughts."* [**God and the State**, p. 49] Hence we see right "libertarians" supporting sweat shops and opposing taxation — for, in the end, money (and the power that goes with it) counts far more in that ideology than ideals such as liberty, individual dignity, empowering, creative and productive work and so forth for all. The central flaw of right-libertarianism is that it does not recognise that the workings of the capitalist market can easily ensure that the majority end up becoming a resource for others in ways far worse than that associated with taxation. The

legal rights of self-ownership supported by right-libertarians does not mean that people have the ability to avoid what is in effect enslavement to another (see sections 2 and 3).

Right-Libertarian theory is not based upon a libertarian methodology or perspective and so it is hardly surprising it results in support for authoritarian social relationships and, indeed, slavery (see section 2.6). #secf13

1.3 Is right-Libertarian theory scientific in nature?

Usually, no. The scientific approach is **inductive,** much of the right-libertarian approach is **deductive.** The first draws generalisations from the data, the second applies preconceived generalisations to the data. A completely deductive approach is pre-scientific, however, which is why many right-Libertarians cannot legitimately claim to use a scientific method. Deduction does occur in science, but the generalisations are primarily based on other data, not *a priori* assumptions, and are checked against data to see if they are accurate. Anarchists tend to fall into the inductive camp, as Kropotkin put it:

> *"Precisely this natural-scientific method applied to economic facts, enables us to prove that the so-called 'laws' of middle-class sociology, including also their political economy, are not laws at all, but simply guesses, or mere assertions which have never been verified at all."* [**Kropotkin's Revolutionary Pamphlets**, p. 153]

The idea that natural-scientific methods can be applied to economic and social life is one that many right-libertarians reject. Instead they favour the deductive (pre-scientific) approach (this we must note is not limited purely to Austrian economists, many more mainstream capitalist economists also embrace deduction over induction).

The tendency for right-Libertarianism to fall into dogmatism (or *a priori* theorems, as they call it) and its implications can best be seen from the work of Ludwig von Mises and other economists from the right-Libertarian "Austrian school." Of course, not all right-libertarians necessarily subscribe to this approach (Murray Rothbard for one did) but its use by so many leading lights of both schools of thought is significant and worthy of comment. And as we are concentrating on **methodology** it is not essential to discuss the starting assumptions. The assumptions (such as, to use Rothbard's words, the Austrian's *"fundamental axiom that individual human beings act"*) may be correct, incorrect or incomplete — but the method of using them advocated by von Mises ensures that such considerations are irrelevant.

Von Mises (a leading member of the Austrian school of economics) begins by noting that social and economic theory *"is not derived from experience; it is prior to experience..."* Which is back to front. It is obvious that experience of capitalism is necessary in order to develop a viable theory about how it works. Without the experience, any theory is just a flight of fantasy. The actual specific theory we develop is therefore derived from experience, informed by it and will have to get checked against reality to see if it is viable. This is the scientific method — any theory must be checked against the facts. However, von Mises goes on to argue at length that *"no kind of experience can ever force us to discard or modify* ***a priori*** *theorems; they are logically prior to it and cannot be either proved by corroborative experience or disproved by experience to the contrary ..."*

And if this does not do justice to a full exposition of the phantasmagoria of von Mises' *a priorism*, the reader may take some joy (or horror) from the following statement:

> *"If a contradiction appears between a theory and experience,* ***we must always assume*** *that a condition pre-supposed by the theory was not present, or else there is some error in our observation. The disagreement between the theory and the facts of experience frequently forces us to think through the problems of the theory again.* ***But so long as a rethinking of the theory uncovers no errors in our thinking, we are not entitled to doubt its truth****"* [emphasis added — the quotes presented here are cited in **Ideology and Method in Economics** by Homa Katouzian, pp. 39–40]

In other words, if reality is in conflict with your ideas, do not adjust your views because reality must be at fault! The scientific method would be to revise the theory in light of the facts. It is not scientific to reject the facts in light of the theory! This anti-scientific perspective is at the heart of his economics as experience *"can never . .. prove or disprove any particular theorem"*:

> *"What assigns economics to its peculiar and unique position in the orbit of pure knowledge and of the practical utilisation of knowledge is the fact that its particular theorems are not open to any verification or falsification on the grounds of experience ..... The ultimate yardstick of an economic theorem's correctness or incorrectness is solely reason unaided by experience."* [**Human Action**, p. 858]

Von Mises rejects the scientific approach as do all Austrian Economists. Murray Rothbard states approvingly that *"Mises indeed held not only that economic theory does not need to be 'tested' by historical fact but also that it* ***cannot*** *be so tested."* [*"Praxeology: The Methodology of Austrian Economics"* in **The Foundation of Modern Austrian Economics**, p. 32] Similarly, von Hayek wrote that economic theories can *"never be verified or falsified by reference to facts. All that we can and must verify is the presence of our assumptions in the particular case."* [**Individualism and Economic Order**, p. 73]

This may seen somewhat strange to non-Austrians. How can we ignore reality when deciding whether a theory is a good one or not? If we cannot evaluate our ideas, how can we consider them anything bar dogma? The Austrian's maintain that we cannot use historical evidence because every historical situation is unique. Thus we cannot use *"complex heterogeneous historical facts as if they were repeatable homogeneous facts"* like those in a scientist's experiment [Rothbard, **Op. Cit.**, p. 33]. While such a position **does** have an element of truth about it, the extreme *a priorism* that is drawn from this element is radically false (just as extreme empiricism is also false, but for different reasons).

Those who hold such a position ensure that their ideas cannot be evaluated beyond logical analysis. As Rothbard makes clear, *"since praxeology begins with a true axiom, A, all that can be deduced from this axiom must also be true. For if A implies be, and A is true, then B must also be true."* [**Op. Cit.**, pp. 19–20] But such an approach makes the search for truth a game without rules. The Austrian economists (and other right-libertarians) who use this method are free to theorise anything they want, without such irritating constrictions as facts, statistics, data, history or experimental confirmation. Their only guide is logic. But this is no different from what religions do when they assert the logical existence of God. Theories ungrounded in facts and data are easily spun into any belief a person wants. Starting assumptions and trains of logic may contain inaccuracies so small as to be undetectable, yet will yield entirely false conclusions.

In addition, trains of logic may miss things which are only brought to light by actual experiences (after all, the human mind is not all knowing or all seeing). To ignore actual experience

is to loose that input when evaluating a theory. Hence our comments on the irrelevance of the assumptions used — the methodology is such that incomplete or incorrect assumptions or steps cannot be identified in light of experience. This is because one way of discovering if a given chain of logic requires checking is to test its conclusions against available evidence (although von Mises did argue that the *"ultimate yardstick"* was *"solely reason unaided by experience"*). If we **do** take experience into account and rethink a given theory in the light of contradictory evidence, the problem remains that a given logical chain may be correct, but incomplete or concentrate on or stress inappropriate factors. In other words, our logical deductions may be correct but our starting place or steps wrong and as the facts are to be rejected in the light of the deductive method, we cannot revise our ideas.

Indeed, this approach could result in discarding (certain forms of) human behaviour as irrelevant (which the Austrian system claims using empirical evidence does). For there are too many variables that can have an influence upon individual acts to yield conclusive results explaining human behaviour. Indeed, the deductive approach may ignore as irrelevant certain human motivations which have a decisive impact on an outcome. There could be a strong tendency to project "right-libertarian person" onto the rest of society and history, for example, and draw inappropriate insights into the way human society works or has worked. This can be seen, for example, in attempts to claim pre-capitalist societies as examples of "anarcho"-capitalism in action.

Moreover, deductive reasoning cannot indicate the relative significance of assumptions or theoretical factors. That requires empirical study. It could be that a factor considered important in the theory actually turns out to have little effect in practice and so the derived axioms are so weak as to be seriously misleading.

In such a purely ideal realm, observation and experience are distrusted (when not ignored) and instead theory is the lodestone. Given the bias of most theorists in this tradition, it is unsurprising that this style of economics can always be trusted to produce results proving free markets to be the finest principle of social organisation. And, as an added bonus, reality can be ignored as it is **never** "pure" enough according to the assumptions required by the theory. It could be argued, because of this, that many right-libertarians insulate their theories from criticism by refusing to test them or acknowledge the results of such testing (indeed, it could also be argued that much of right-libertarianism is more a religion than a political theory as it is set-up in such a way that it is either true or false, with this being determined not by evaluating facts but by whether you accept the assumptions and logical chains presented with them).

Strangely enough, while dismissing the "testability" of theories many right-Libertarians (including Murray Rothbard) **do** investigate historical situations and claim them as examples of how well their ideas work in practice. But why does historical fact suddenly become useful when it can be used to bolster the right-Libertarian argument? Any such example is just as "complex" as any other and the good results indicated may not be accountable to the assumptions and steps of the theory but to other factors totally ignored by it. If economic (or other) theory is untestable then **no** conclusions can be drawn from history, including claims for the superiority of laissez-faire capitalism. You cannot have it both ways — although we doubt that right-libertarians will stop using history as evidence that their ideas work.

Perhaps the Austrian desire to investigate history is not so strange after all. Clashes with reality make a-priori deductive systems implode as the falsifications run back up the deductive changes to shatter the structure built upon the original axioms. Thus the desire to find **some** example which proves their ideology must be tremendous. However, the deductive a-priori

methodology makes them unwilling to admit to being mistaken — hence their attempts to downplay examples which refute their dogmas. Thus we have the desire for historical examples while at the same time they have extensive ideological justifications that ensure reality only enters their world-view when it agrees with them. In practice, the latter wins as real-life refuses to be boxed into their dogmas and deductions.

Of course it is sometimes argued that it is **complex** data that is the problem. Let use assume that this is the case. It is argued that when dealing with complex information it is impossible to use aggregate data without first having more simple assumptions (i.e. that "humans act"). Due to the complexity of the situation, it is argued, it is impossible to aggregate data because this hides the individual activities that creates it. Thus "complex" data cannot be used to invalidate assumptions or theories. Hence, according to Austrians, the axioms derived from the "simple fact" that "humans act" are the only basis for thinking about the economy.

Such a position is false in two ways.

Firstly, the aggregation of data **does** allow us to understand complex systems. If we look at a chair, we cannot find out whether it is comfortable, its colour, whether it is soft or hard by looking at the atoms that make it up. To suggest that you can is to imply the existence of green, soft, comfortable atoms. Similarly with gases. They are composed to countless individual atoms but scientists do not study them by looking at those atoms and their actions. Within limits, this is also valid for human action. For example, it would be crazy to maintain from historical data that interest rates will be a certain percentage a week but it is valid to maintain that interest rates are known to be related to certain variables in certain ways. Or that certain experiences will tend to result in certain forms of psychological damage. General tendencies and "rules of thumb" can be evolved from such study and these can be used to **guide** current practice and theory. By aggregating data you can produce valid information, rules of thumb, theories and evidence which would be lost if you concentrated on "simple data" (such as "humans act"). Therefore, empirical study produces facts which vary across time and place, and yet underlying and important patterns can be generated (patterns which can be evaluated against **new** data and improved upon).

Secondly, the simple actions themselves influence and are influenced in turn by overall (complex) facts. People act in different ways in different circumstances (something we can agree with Austrians about, although we refuse to take it to their extreme position of rejecting empirical evidence as such). To use simple acts to understand complex systems means to miss the fact that these acts are not independent of their circumstances. For example, to claim that the capitalist market is "just" the resultant of bilateral exchanges ignores the fact that the market activity shapes the nature and form of these bilateral exchanges. The "simple" data is dependent on the "complex" system — and so the complex system **cannot** be understood by looking at the simple actions in isolation. To do so would be to draw incomplete and misleading conclusions (and it is due to these interrelations that we argue that aggregate data should be used critically). This is particularly important when looking at capitalism, where the "simple" acts of exchange in the labour market are dependent upon and shaped by circumstances outside these acts.

So to claim that (complex) data cannot be used to evaluate a theory is false. Data can be useful when seeing whether a theory is confirmed by reality. This is the nature of the scientific method — you compare the results expected by your theory to the facts and if they do not match you check your facts **and** check your theory. This may involve revising the assumptions, methodology and theories you use if the evidence is such as to bring them into question. For example, if you claim that capitalism is based on freedom but that the net result of capitalism is to produce relations

of domination between people then it would be valid to revise, for example, your definition of freedom rather than deny that domination restricts freedom (see section 2 on this). But if actual experience is to be distrusted when evaluating theory, we effectively place ideology above people — after all, how the ideology affects people in **practice** is irrelevant as experiences cannot be used to evaluate the (logically sound but actually deeply flawed) theory.

Moreover, there is a slight arrogance in the "Austrian" dismissal of empirical evidence. If, as they argue, the economy is just too complex to allow us to generalise from experience then how can one person comprehend it sufficiently to create an economic ideology as the Austrian's suggest? Surely no one mind (or series of minds) can produce a model which accurately reflects such a complex system? To suggest that one can deduce a theory for an exceedingly complex social system from the theoretical work based on an analysis technique which deliberately ignores that reality as being unreliable seems to require a deliberate suspension of one's reasoning faculties. Of course, it may be argued that such a task is possible, given a small enough subset of economic activity. However, such a process is sure to lead its practitioners astray as the subset is not independent of the whole and, consequently, can be influenced in ways the ideologist does not (indeed, cannot) take into account. Simply put, even the greatest mind cannot comprehend the complexities of real life and so empirical evidence needs to inform any theory seeking to describe and explain it. To reject it is simply to retreat into dogmatism and ideology, which is precisely what right-wing libertarians generally do.

Ultimately, this dismissal of empirical evidence seems little more than self-serving. It's utility to the ideologist is obvious. It allows them to speculate to their hearts content, building models of the economy with no bearing to reality. Their models and the conclusions it generates need never be bothered with reality — nor the effects of their dogma. Which shows its utility to the powerful. It allows them to spout comments like "the free market benefits all" while the rich get richer and allows them to brush aside any one who points out such troublesome facts.

That this position is self-serving can be seen from the fact that most right libertarians are very selective about applying von Mises' argument. As a rule of thumb, it is only applied when the empirical evidence goes against capitalism. In such circumstances the fact that the current system is not a free market will also be mentioned. However, if the evidence seems to bolster the case for propertarianism then empirical evidence becomes all the rage. Needless to say, the fact that we do not have a free market will be conveniently forgotten. Depending on the needs of the moment, fundamental facts are dropped and retrieved to bolster the ideology.

As we indicated above (in section 1.2) and will discuss in more depth later (in section 11) most of the leading right-Libertarian theorists base themselves on such deductive methodologies, starting from assumptions and "logically" drawing conclusions from them. The religious undertones of such methodology can best be seen from the roots of right-Libertarian "Natural law" theory.

Carole Pateman, in her analysis of Liberal contract theory, indicates the religious nature of the "Natural Law" argument so loved by the theorists of the "Radical Right." She notes that for Locke (the main source of the Libertarian Right's Natural Law cult) *"natural law"* was equivalent of *"God's Law"* and that *"God's law exists externally to and independently of individuals."* [**The Problem of Political Obligation**, p. 154] No role for critical thought there, only obedience. Most modern day "Natural Law" supporters forget to mention this religious undercurrent and instead talk of about "Nature" (or "the market") as the deity that creates Law, not God, in order to appear "rational." So much for science.

Such a basis in dogma and religion can hardly be a firm foundation for liberty and indeed "Natural Law" is marked by a deep authoritarianism:

> *"Locke's traditional view of natural law provided individual's with an external standard which they could recognise, but which they did not voluntarily choose to order their political life."* [Pateman, **Op. Cit.**, p. 79]

In section 11 we discuss the authoritarian nature of "Natural Law" and will not do so here. However, here we must point out the political conclusions Locke draws from his ideas. In Pateman's words, Locke believed that *"obedience lasts only as long as protection. His individuals are able to take action themselves to remedy their political lot... but this does not mean, as is often assumed, that Locke's theory gives direct support to present-day arguments for a right of civil disobedience... His theory allows for two alternatives only: either people go peacefully about their daily affairs under the protection of a liberal, constitutional government, or they are in revolt against a government which has ceased to be 'liberal' and has become arbitrary and tyrannical, so forfeiting its right to obedience."* [**Op. Cit.**, p. 77]

Locke's "rebellion" exists purely to reform a **new** 'liberal' government, not to change the existing socio-economic structure which the 'liberal' government exists to protect. His theory, therefore, indicates the results of a priorism, namely a denial of any form of social dissent which may change the "natural law" as defined by Locke. This perspective can be found in Rothbard who lambasted the individualist anarchists for arguing that juries should judge the law as well as the facts. For Rothbard, the law would be drawn up by jurists and lawyers, not ordinary people (see section 1.4 for details). The idea that those subject to laws should have a say in forming them is rejected in favour of elite rule. As von Mises put it:

> *"The flowering of human society depends on two factors: the intellectual power of outstanding men to conceive sound social and economic theories, and the ability of these or other men to make these ideologies palatable to the majority."* [**Human Action**, p. 864]

Yet such a task would require massive propaganda work and would only, ultimately, succeed by removing the majority from any say in the running of society. Once that is done then we have to believe that the ruling elite will be altruistic in the extreme and not abuse their position to create laws and processes which defended what **they** thought was "legitimate" property, property rights and what constitutes "aggression." Which, ironically, contradicts the key capitalist notion that people are driven by self-gain. The obvious conclusion from such argument is that any right-libertarian regime would have to exclude change. If people can change the regime they are under they may change it in ways that right libertarian's do not support. The provision for ending amendments to the regime or the law would effectively ban most opposition groups or parties as, by definition, they could do nothing once in office (for minimal state "libertarians") or in the market for "defence" agencies (for "anarcho"-capitalists). How this differs from a dictatorship is hard to say — after all, most dictatorships have parliamentary bodies which have no power but which can talk a lot. Perhaps the knowledge that it is **private** police enforcing **private** power will make those subject to the regime maximise their utility by keeping quiet and not protesting. Given this, von Mises' praise for fascism in the 1920s may be less contradictory than it first

appears (see section 6.5) as it successfully "deterred democracy" by crushing the labour, socialist and anarchist movements across the world.

So, von Mises, von Hayek and most right-libertarians reject the scientific method in favour of ideological correctness — if the facts contradict your theory then they can be dismissed as too "complex" or "unique". Facts, however, should inform theory and any theory's methodology should take this into account. To dismiss facts out of hand is to promote dogma. This is not to suggest that a theory should be modified very time new data comes along — that would be crazy as unique situations **do** exist, data can be wrong and so forth — but it does suggest that if your theory **continually** comes into conflict with reality, its time to rethink the theory and not assume that facts cannot invalidate it. A true libertarian would approach a contradiction between reality and theory by evaluating the facts available and changing the theory is this is required, not by ignoring reality or dismissing it as "complex".

Thus, much of right-Libertarian theory is neither libertarian nor scientific. Much of right-libertarian thought is highly axiomatic, being logically deduced from such starting axioms as *"self-ownership"* or *"no one should initiate force against another"*. Hence the importance of our discussion of von Mises as this indicates the dangers of this approach, namely the tendency to ignore/dismiss the consequences of these logical chains and, indeed, to justify them in terms of these axioms rather than from the facts. In addition, the methodology used is such as that it would be fair to argue that right-libertarians get to critique reality but reality can never be used to critique right-libertarianism — for any empirical data presented as evidence as be dismissed as "too complex" or "unique" and so irrelevant (unless it can be used to support their claims, of course).

Hence W. Duncan Reekie's argument (quoting leading Austrian economist Israel Kirzner) that *"empirical work 'has the function of establishing the **applicability** of particular theorems, and thus **illustrating** their operation' ... Confirmation of theory is not possible because there is no constants in human action, nor is it necessary because theorems themselves describe relationships logically developed from hypothesised conditions. Failure of a logically derived axiom to fit the facts does not render it invalid, rather it 'might merely indicate inapplicability' to the circumstances of the case.'"* [**Markets, Entrepreneurs and Liberty**, p. 31]

So, if facts confirm your theory, your theory is right. If facts do not confirm your theory, it is still right but just not applicable in this case! Which has the handy side effect of ensuring that facts can **only** be used to support the ideology, **never** to refute it (which is, according to this perspective, impossible anyway). As Karl Popper argued, a *"theory which is not refutable by any conceivable event is non-scientific."* [**Conjectures and Refutations**, p. 36] In other words (as we noted above), if reality contradicts your theory, ignore reality!

Kropotkin hoped *"that those who believe in [current economic doctrines] will themselves become convinced of their error as soon as they come to see the necessity of verifying their quantitative deductions by quantitative investigation."* [**Op. Cit.**, p. 178] However, the Austrian approach builds so many barriers to this that it is doubtful that this will occur. Indeed, right-libertarianism, with its focus on exchange rather than its consequences, seems to be based upon justifying domination in terms of their deductions than analysing what freedom actually means in terms of human existence (see section 2 for a fuller discussion).

The real question is why are such theories taken seriously and arouse such interest. Why are they not simply dismissed out of hand, given their methodology and the authoritarian conclusions they produce? The answer is, in part, that feeble arguments can easily pass for convincing

when they are on the same side as the prevailing sentiment and social system. And, of course, there is the utility of such theories for ruling elites — *"[a]n ideological defence of privileges, exploitation, and private power will be welcomed, regardless of its merits."* [Noam Chomsky, **The Chomsky Reader**, p. 188] #secf14

1.4 Is "anarcho"-capitalism a new form of individualist anarchism?

Some "anarcho"-capitalists shy away from the term, preferring such expressions as "market anarchist" or "individualist anarchist." This suggests that there is some link between their ideology and that of Tucker. However, the founder of "anarcho"-capitalism, Murray Rothbard, refused that label for, while *"strongly tempted,"* he could not do so because *"Spooner and Tucker have in a sense pre-empted that name for their doctrine and that from that doctrine I have certain differences."* Somewhat incredibly Rothbard argued that on the whole politically *"these differences are minor,"* economically *"the differences are substantial, and this means that my view of the consequences of putting our more of less common system into practice is very far from theirs."* [*"The Spooner-Tucker Doctrine: An Economist's View"*, **Journal of Libertarian Studies**, vol. 20, no. 1, p. 7]

What an understatement! Individualist anarchists advocated an economic system in which there would have been very little inequality of wealth and so of power (and the accumulation of capital would have been minimal without profit, interest and rent). Removing this social and economic basis would result in **substantially** different political regimes. This can be seen from the fate of Viking Iceland, where a substantially communal and anarchistic system was destroyed from within by increasing inequality and the rise of tenant farming (see section 9 for details). In other words, politics is not isolated from economics. As David Wieck put it, Rothbard *"writes of society as though some part of it (government) can be extracted and replaced by another arrangement while other things go on before, and he constructs a system of police and judicial power without any consideration of the influence of historical and economic context."* [*"Anarchist Justice,"* in **Nomos XIX**, Pennock and Chapman, eds., p. 227]

Unsurprisingly, the political differences he highlights **are** significant, namely *"the role of law and the jury system"* and *"the land question."* The former difference relates to the fact that the individualist anarchists *"allow[ed] each individual free-market court, and more specifically, each free-market jury, totally free rein over judicial decision."* This horrified Rothbard. The reason is obvious, as it allows real people to judge the law as well as the facts, modifying the former as society changes and evolves. For Rothbard, the idea that ordinary people should have a say in the law is dismissed. Rather, *"it would not be a very difficult task for Libertarian lawyers and jurists to arrive at a rational and objective code of libertarian legal principles and procedures."* [**Op. Cit.**, p. 7–8] Of course, the fact that *"lawyers"* and *"jurists"* may have a radically different idea of what is just than those subject to their laws is not raised by Rothbard, never mind answered. While Rothbard notes that juries may defend the people against the state, the notion that they may defend the people against the authority and power of the rich is not even raised. That is why the rich have tended to oppose juries as well as popular assemblies.

Unsurprisingly, the few individualist anarchists that remained pointed this out. Laurance Labadie, the son of Tucker associate Joseph Labadie, argued in response to Rothbard as follows:

> "Mere common sense would suggest that any court would be influenced by experience; and any free-market court or judge would in the very nature of things have

> some precedents guiding them in their instructions to a jury. But since no case is exactly the same, a jury would have considerable say about the heinousness of the offence in each case, realising that circumstances alter cases, and prescribing penalty accordingly. This appeared to Spooner and Tucker to be a more flexible and equitable administration of justice possible or feasible, human beings being what they are....
>
> "But when Mr. Rothbard quibbles about the jurisprudential ideas of Spooner and Tucker, and at the same time upholds **presumably in his courts** the very economic evils which are at bottom the very reason for human contention and conflict, he would seem to be a man who chokes at a gnat while swallowing a camel." [quoted by Mildred J. Loomis and Mark A. Sullivan, *"Laurance Labadie: Keeper Of The Flame"*, pp. 116–30, **Benjamin R. Tucker and the Champions of Liberty**, Coughlin, Hamilton and Sullivan (eds.), p. 124]

In other words, to exclude the general population from any say in the law and how it changes is hardly a *"minor"* difference! Particularly if you are proposing an economic system which is based on inequalities of wealth, power and influence and the means of accumulating more. It is like a supporter of the state saying that it is a *"minor"* difference if you favour a dictatorship rather than a democratically elected government. As Tucker argued, *"it is precisely in the tempering of the rigidity of enforcement that one of the chief excellences of Anarchism consists ... under Anarchism all rules and laws will be little more than suggestions for the guidance of juries, and that all disputes ... will be submitted to juries which will judge not only the facts but the law, the justice of the law, its applicability to the given circumstances, and the penalty or damage to be inflicted because of its infraction ... under Anarchism the law ... will be regarded as **just** in proportion to its flexibility, instead of now in proportion to its rigidity."* [**The Individualist Anarchists**, pp. 160–1] In others, the law will evolve to take into account changing social circumstances and, as a consequence, public opinion on specific events and rights. Tucker's position is fundamentally **democratic** and evolutionary while Rothbard's is autocratic and fossilised.

On the land question, Rothbard opposed the individualist position of "occupancy and use" as it *"would automatically abolish all rent payments for land."* Which was **precisely** why the individualist anarchists advocated it! In a predominantly rural economy, this would result in a significant levelling of income and social power as well as bolstering the bargaining position of non-land workers by reducing unemployment. He bemoans that landlords cannot charge rent on their *"justly-acquired private property"* without noticing that is begging the question as anarchists deny that this is *"justly-acquired"* land. Unsurprising, Rothbard considers *"the property theory"* of land ownership as John Locke's, ignoring the fact that the first self-proclaimed anarchist book was written to refute that kind of theory. His argument simply shows how far from anarchism his ideology is. For Rothbard, it goes without saying that the landlord's *"freedom of contract"* tops the worker's freedom to control their own work and live and, of course, their right to life. [**Op. Cit.**, p. 8 and p. 9] However, for anarchists, *"the land is indispensable to our existence, consequently a common thing, consequently insusceptible of appropriation."* [Proudhon, **What is Property?**, p. 107]

The reason question is why Rothbard considers this a **political** difference rather than an economic one. Unfortunately, he does not explain. Perhaps because of the underlying **socialist** perspective behind the anarchist position? Or perhaps the fact that feudalism and monarchism

was based on the owner of the land being its ruler suggests a political aspect to the ideology best left unexplored? Given that the idea of grounding rulership on land ownership receded during the Middle Ages, it may be unwise to note that under "anarcho"-capitalism the landlord and capitalist would, likewise, be sovereign over the land **and** those who used it? As we noted in section 1, this is the conclusion that Rothbard does draw. As such, there **is** a political aspect to this difference.

Moreover. *"the expropriation of the mass of the people from the soil forms the basis of the capitalist mode of production."* [Marx, **Capital**, vol. 1, p. 934] For there are *"two ways of oppressing men: either directly by brute force, by physical violence; or indirectly by denying them the means of life and this reducing them to a state of surrender."* In the second case, government is *"an organised instrument to ensure that dominion and privilege will be in the hands of those who ... have cornered all the means of life, first and foremost the land, which they make use of to keep the people in bondage and to make them work for their benefit."* [Malatesta, **Anarchy**, p. 21] Privatising the coercive functions of said government hardly makes much difference.

Of course, Rothbard is simply skimming the surface. There are two main ways "anarcho"-capitalists differ from individualist anarchists. The first one is the fact that the individualist anarchists are socialists. The second is on whether equality is essential or not to anarchism. Each will be discussed in turn.

Unlike both Individualist (and social) anarchists, "anarcho"-capitalists support capitalism (a "pure" free market type, which has never existed although it has been approximated occasionally). This means that they reject totally the ideas of anarchists with regards to property and economic analysis. For example, like all supporters of capitalists they consider rent, profit and interest as valid incomes. In contrast, all Anarchists consider these as exploitation and agree with the Individualist Anarchist Benjamin Tucker when he argued that *"[w]**hoever** contributes to production is alone entitled. **What** has no rights that **who** is bound to respect. **What** is a thing. **Who** is a person. Things have no claims; they exist only to be claimed. The possession of a right cannot be predicted of dead material, but only a living person."*[quoted by Wm. Gary Kline, **The Individualist Anarchists**, p. 73]

This, we must note, is the fundamental critique of the capitalist theory that capital is productive. In and of themselves, fixed costs do not create value. Rather value is creation depends on how investments are developed and used once in place. Because of this the Individualist Anarchists, like other anarchists, considered non-labour derived income as usury, unlike "anarcho"-capitalists. Similarly, anarchists reject the notion of capitalist property rights in favour of possession (including the full fruits of one's labour). For example, anarchists reject private ownership of land in favour of a "occupancy and use" regime. In this we follow Proudhon's **What is Property?** and argue that *"property is theft"*. Rothbard, as noted, rejected this perspective.

As these ideas are an **essential** part of anarchist politics, they cannot be removed without seriously damaging the rest of the theory. This can be seen from Tucker's comments that *"**Liberty** insists... [on] the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man."* [cited by Eunice Schuster in **Native American Anarchism**, p. 140]. He indicates that anarchism has specific economic **and** political ideas, that it opposes capitalism along with the state. Therefore anarchism was never purely a "political" concept, but always combined an opposition to oppression with an opposition to exploitation. The social anarchists made exactly the same point. Which means that when Tucker argued that *"**Liberty** insists on Socialism... — true Socialism, Anarchistic Socialism: the prevalence*

on earth of Liberty, Equality, and Solidarity" he knew exactly what he was saying and meant it wholeheartedly. [**Instead of a Book**, p. 363]

So because "anarcho"-capitalists embrace capitalism and reject socialism, they cannot be considered anarchists or part of the anarchist tradition.

Which brings us nicely to the second point, namely a lack of concern for equality. In stark contrast to anarchists of all schools, inequality is not seen to be a problem with "anarcho"-capitalists (see section 3). However, it is a truism that not all "traders" are equally subject to the market (i.e. have the same market power). In many cases, a few have sufficient control of resources to influence or determine price and in such cases, all others must submit to those terms or not buy the commodity. When the commodity is labour power, even this option is lacking — workers have to accept a job in order to live. As we argue in section 10.2, workers are usually at a disadvantage on the labour market when compared to capitalists, and this forces them to sell their liberty in return for making profits for others. These profits increase inequality in society as the property owners receive the surplus value their workers produce. This increases inequality further, consolidating market power and so weakens the bargaining position of workers further, ensuring that even the freest competition possible could not eliminate class power and society (something B. Tucker recognised as occurring with the development of trusts within capitalism — see section G.4).

By removing the underlying commitment to abolish non-labour income, any "anarchist" capitalist society would have vast differences in wealth and so power. Instead of a government imposed monopolies in land, money and so on, the economic power flowing from private property and capital would ensure that the majority remained in (to use Spooner's words) *"the condition of servants"* (see sections 2 and 3.1 for more on this). The Individualist Anarchists were aware of this danger and so supported economic ideas that opposed usury (i.e. rent, profit and interest) and ensured the worker the full value of her labour. While not all of them called these ideas "socialist" it is clear that these ideas **are** socialist in nature and in aim (similarly, not all the Individualist Anarchists called themselves anarchists but their ideas are clearly anarchist in nature and in aim).

This combination of the political and economic is essential as they mutually reinforce each other. Without the economic ideas, the political ideas would be meaningless as inequality would make a mockery of them. As Kline notes, the Individualist Anarchists' *"proposals were designed to establish true equality of opportunity ... and they expected this would result in a society without great wealth or poverty. In the absence of monopolistic factors which would distort competition, they expected a society largely of self-employed workmen with no significant disparity of wealth between any of them since all would be required to live at their own expense and not at the expense of exploited fellow human beings."* [**Op. Cit.**, pp. 103–4]

Because of the evil effects of inequality on freedom, both social and individualist anarchists desired to create an environment in which circumstances would not drive people to sell their liberty to others at a disadvantage. In other words, they desired an equalisation of market power by opposing interest, rent and profit and capitalist definitions of private property. Kline summarises this by saying *"the American [individualist] anarchists exposed the tension existing in liberal thought between private property and the ideal of equal access. The Individual Anarchists were, at least, aware that existing conditions were far from ideal, that the system itself working against the majority of individuals in their efforts to attain its promises. Lack of capital, the means to creation*

and accumulation of wealth, usually doomed a labourer to a life of exploitation. This the anarchists knew and they abhorred such a system." [**Op. Cit.**, p. 102]

And this desire for bargaining equality is reflected in their economic ideas and by removing these underlying economic ideas of the individualist anarchists, "anarcho"-capitalism makes a mockery of any ideas they do appropriate. Essentially, the Individualist Anarchists agreed with Rousseau that in order to prevent extreme inequality of fortunes you deprive people of the means to accumulate in the first place and **not** take away wealth from the rich. An important point which "anarcho"-capitalism fails to understand or appreciate.

There are, of course, overlaps between individualist anarchism and "anarcho"-capitalism, just as there are overlaps between it and Marxism (and social anarchism, of course). However, just as a similar analysis of capitalism does not make individualist anarchists Marxists, so apparent similarities between individualist anarchism does not make it a forerunner of "anarcho"-capitalism. For example, both schools support the idea of "free markets." Yet the question of markets is fundamentally second to the issue of property rights for what is exchanged on the market is dependent on what is considered legitimate property. In this, as Rothbard notes, individualist anarchists and "anarcho"-capitalists differ and different property rights produce different market structures and dynamics. This means that capitalism is not the only economy with markets and so support for markets cannot be equated with support for capitalism. Equally, opposition to markets is **not** the defining characteristic of socialism (as we note in section G.2.1). As such, it **is** possible to be a market socialist (and many socialist are). This is because "markets" and "property" do not equate to capitalism:

> "Political economy confuses, on principle, two very different kinds of private property, one of which rests on the labour of the producers himself, and the other on the exploitation of the labour of others. It forgets that the latter is not only the direct antithesis of the former, but grows on the former's tomb and nowhere else.
>
> "In Western Europe, the homeland of political economy, the process of primitive accumulation is more of less accomplished... .
>
> "It is otherwise in the colonies. There the capitalist regime constantly comes up against the obstacle presented by the producer, who, as owner of his own conditions of labour, employs that labour to enrich himself instead of the capitalist. The contradiction of these two diametrically opposed economic systems has its practical manifestation here in the struggle between them." [Karl Marx, **Capital**, vol. 1, p. 931]

Individualist anarchism is obviously an aspect of this struggle between the system of peasant and artisan production of early America and the state encouraged system of private property and wage labour. "Anarcho"-capitalists, in contrast, assume that generalised wage labour would remain under their system (while paying lip-service to the possibilities of co-operatives — and if an "anarcho"-capitalist thinks that co-operative will become the dominant form of workplace organisation, then they are some kind of market socialist, **not** a capitalist). It is clear that their end point (a pure capitalism, i.e. generalised wage labour) is directly the opposite of that desired by anarchists. This was the case of the Individualist Anarchists who embraced the ideal of (non-capitalist) laissez faire competition — they did so, as noted, to **end** exploitation, **not** to maintain it. Indeed, their analysis of the change in American society from one of mainly independent

producers into one based mainly upon wage labour has many parallels with, of all people, Karl Marx's presented in chapter 33 of **Capital**. Marx, correctly, argues that *"the capitalist mode of production and accumulation, and therefore capitalist private property, have for their fundamental condition the annihilation of that private property which rests on the labour of the individual himself; in other words, the expropriation of the worker."* [**Op. Cit.**, p. 940] He notes that to achieve this, the state is used:

> *"How then can the anti-capitalistic cancer of the colonies be healed? . .. Let the Government set an artificial price on the virgin soil, a price independent of the law of supply and demand, a price that compels the immigrant to work a long time for wages before he can earn enough money to buy land, and turn himself into an independent farmer."* [**Op. Cit.**, p. 938]

Moreover, tariffs are introduced with *"the objective of manufacturing capitalists artificially"* for the *"system of protection was an artificial means of manufacturing manufacturers, or expropriating independent workers, of capitalising the national means of production and subsistence, and of forcibly cutting short the transition ... to the modern mode of production,"* to capitalism [**Op. Cit.**, p. 932 and pp. 921–2]

It is this process which Individualist Anarchism protested against, the use of the state to favour the rising capitalist class. However, unlike social anarchists, many individualist anarchists were not consistently against wage labour. This is the other significant overlap between "anarcho"-capitalism and individualist anarchism. However, they were opposed to exploitation and argued (unlike "anarcho"-capitalism) that in their system workers bargaining powers would be raised to such a level that their wages would equal the full product of their labour. However, as we discuss in section G.1.1 the social context the individualist anarchists lived in must be remembered. America at the times was a predominantly rural society and industry was not as developed as it is now wage labour would have been minimised (Spooner, for example, explicitly envisioned a society made up mostly entirely of self-employed workers). As Kline argues:

> *"Committed as they were to equality in the pursuit of property, the objective for the anarchist became the construction of a society providing equal access to those things necessary for creating wealth. The goal of the anarchists who extolled mutualism and the abolition of all monopolies was, then, a society where everyone willing to work would have the tools and raw materials necessary for production in a non-exploitative system ... the dominant vision of the future society ... [was] underpinned by individual, self-employed workers."* [**Op. Cit.**, p. 95]

As such, a limited amount of wage labour within a predominantly self-employed economy does not make a given society capitalist any more than a small amount of governmental communities within an predominantly anarchist world would make it statist. As Marx argued. when *"the separation of the worker from the conditions of labour and from the soil ... does not yet exist, or only sporadically, or on too limited a scale ... Where, amongst such curious characters, is the 'field of abstinence' for the capitalists? ... Today's wage-labourer is tomorrow's independent peasant or artisan, working for himself. He vanishes from the labour-market — but not into the workhouse."* There is a *"constant transformation of wage-labourers into independent producers, who work for themselves instead of for capital"* and so *"the degree of exploitation of the wage-labourer remain[s]*

indecently low." In addition, the *"wage-labourer also loses, along with the relation of dependence, the feeling of dependence on the abstemious capitalist."* [**Op. Cit.**, pp. 935–6]

Saying that, as we discuss in section G.4, individualist anarchist support for wage labour is at odds with the ideas of Proudhon and, far more importantly, in contradiction to many of the stated principles of the individualist anarchists themselves. In particular, wage labour violates "occupancy and use" as well as having more than a passing similarity to the state. However, these problems can be solved by consistently applying the principles of individualist anarchism, unlike "anarcho"-capitalism, and that is why it is a real school of anarchism. In other words, a system of **generalised** wage labour would not be anarchist nor would it be non-exploitative. Moreover, the social context these ideas were developed in and would have been applied ensure that these contradictions would have been minimised. If they had been applied, a genuine anarchist society of self-employed workers would, in all likelihood, have been created (at least at first, whether the market would increase inequalities is a moot point — see section G.4).

We must stress that the social situation is important as it shows how apparently superficially similar arguments can have radically different aims and results depending on who suggests them and in what circumstances. As noted, during the rise of capitalism the bourgeoisie were not shy in urging state intervention against the masses. Unsurprisingly, working class people generally took an anti-state position during this period. The individualist anarchists were part of that tradition, opposing what Marx termed *"primitive accumulation"* in favour of the pre-capitalist forms of property and society it was destroying.

However, when capitalism found its feet and could do without such obvious intervention, the possibility of an "anti-state" capitalism could arise. Such a possibility became a definite once the state started to intervene in ways which, while benefiting the system as a whole, came into conflict with the property and power of individual members of the capitalist and landlord class. Thus social legislation which attempted to restrict the negative effects of unbridled exploitation and oppression on workers and the environment were having on the economy were the source of much outrage in certain bourgeois circles:

> *"Quite independently of these tendencies [of individualist anarchism] . .. the anti-state bourgeoisie (which is also anti-statist, being hostile to any social intervention on the part of the State to protect the victims of exploitation — in the matter of working hours, hygienic working conditions and so on), and the greed of unlimited exploitation, had stirred up in England a certain agitation in favour of pseudo-individualism, an unrestrained exploitation. To this end, they enlisted the services of a mercenary pseudo-literature ... which played with doctrinaire and fanatical ideas in order to project a species of 'individualism' that was absolutely sterile, and a species of 'non-interventionism' that would let a man die of hunger rather than offend his dignity."* [Max Nettlau, **A Short History of Anarchism**, p. 39]

This perspective can be seen when Tucker denounced Herbert Spencer as a champion of the capitalistic class for his vocal attacks on social legislation which claimed to benefit working class people but stays strangely silent on the laws passed to benefit (usually indirectly) capital and the rich. "Anarcho"-capitalism is part of that tradition, the tradition associated with a capitalism which no longer needs obvious state intervention as enough wealth as been accumulated to keep workers under control by means of market power.

As with the original nineteenth century British "anti-state" capitalists like Spencer and Herbert, Rothbard *"completely overlooks the role of the state in building and maintaining a capitalist economy in the West. Privileged to live in the twentieth century, long after the battles to establish capitalism have been fought and won, Rothbard sees the state solely as a burden on the market and a vehicle for imposing the still greater burden of socialism. He manifests a kind of historical nearsightedness that allows him to collapse many centuries of human experience into one long night of tyranny that ended only with the invention of the free market and its 'spontaneous' triumph over the past. It is pointless to argue, as Rothbard seems ready to do, that capitalism would have succeeded without the bourgeois state; the fact is that all capitalist nations have relied on the machinery of government to create and preserve the political and legal environments required by their economic system."* That, of course, has not stopped him *"critis[ing] others for being unhistorical."* [Stephen L Newman, **Liberalism at Wit's End**, pp. 77–8 and p. 79]

In other words, there is substantial differences between the victims of a thief trying to stop being robbed and be left alone to enjoy their property and the successful thief doing the same! Individualist Anarchist's were aware of this. For example, Victor Yarros stressed this key difference between individualist anarchism and the proto-"libertarian" capitalists of "voluntaryism":

> "[Auberon Herbert] believes in allowing people to retain all their possessions, no matter how unjustly and basely acquired, while getting them, so to speak, to swear off stealing and usurping and to promise to behave well in the future. We, on the other hand, while insisting on the principle of private property, in wealth honestly obtained under the reign of liberty, do not think it either unjust or unwise to dispossess the landlords who have monopolised natural wealth by force and fraud. We hold that the poor and disinherited toilers would be justified in expropriating, not alone the landlords, who notoriously have no equitable titles to their lands, but **all** the financial lords and rulers, all the millionaires and very wealthy individuals… . Almost all possessors of great wealth enjoy neither what they nor their ancestors rightfully acquired (and if Mr. Herbert wishes to challenge the correctness of this statement, we are ready to go with him into a full discussion of the subject)… .
>
> "If he holds that the landlords are justly entitled to their lands, let him make a defence of the landlords or an attack on our unjust proposal." [quoted by Carl Watner, *"The English Individualists As They Appear In Liberty,"* pp. 191–211, **Benjamin R. Tucker and the Champions of Liberty**, Coughlin, Hamilton and Sullivan (eds.), pp. 199–200]

Significantly, Tucker and other individualist anarchists saw state intervention has a result of capital manipulating legislation to gain an advantage on the so-called free market which allowed them to exploit labour and, as such, it benefited the **whole** capitalist class. Rothbard, at best, acknowledges that **some** sections of big business benefit from the current system and so fails to have the comprehensive understanding of the dynamics of capitalism as a **system** (rather as an ideology). This lack of understanding of capitalism as a historic and dynamic system rooted in class rule and economic power is important in evaluating "anarcho"-capitalist claims to anarchism. Marxists are not considered anarchists as they support the state as a means of transition to an anarchist society. Much the same logic can be applied to right-wing libertarians (even if they do call themselves "anarcho"-capitalists). This is because they do not seek to correct the

inequalities produced by previous state action before ending it nor do they seek to change the definitions of "private property" imposed by the state. In effect, they argue that the "dictatorship of the bourgeoisie" should "wither away" and be limited to defending the property accumulated in a few hands. Needless to say, starting from the current (coercively produced) distribution of property and then eliminating "force" simply means defending the power and privilege of ruling minorities:

> *"The modern Individualism initiated by Herbert Spencer is, like the critical theory of Proudhon, a powerful indictment against the dangers and wrongs of government, but its practical solution of the social problem is miserable — so miserable as to lead us to inquire if the talk of 'No force' be merely an excuse for supporting landlord and capitalist domination."* [**Act For Yourselves**, p. 98]

><h1>2 What do

For "anarcho"-capitalists, the concept of freedom is limited to the idea of *"freedom from."* For them, freedom means simply freedom from the *"initiation of force,"* or the *"non-aggression against anyone's person and property."* [Murray Rothbard, **For a New Liberty**, p. 23] The notion that real freedom must combine both freedom *"to"* **and** freedom *"from"* is missing in their ideology, as is the social context of the so-called freedom they defend.

Before starting, it is useful to quote Alan Haworth when he notes that *"[i]n fact, it is surprising how **little** close attention the concept of freedom receives from libertarian writers. Once again **Anarchy, State, and Utopia** is a case in point. The word 'freedom' doesn't even appear in the index. The word 'liberty' appears, but only to refer the reader to the 'Wilt Chamberlain' passage. In a supposedly 'libertarian' work, this is more than surprising. It is truly remarkable."* [**Anti-Libertarianism**, p. 95]

Why this is the case can be seen from how the "anarcho"-capitalist defines freedom.

In a right-libertarian or "anarcho"-capitalist society, freedom is considered to be a product of property. As Murray Rothbard puts it, *"the libertarian defines the concept of 'freedom' or 'liberty'...[as a] condition in which a person's ownership rights in his body and his legitimate material property rights are not invaded, are not aggressed against... . Freedom and unrestricted property rights go hand in hand."* [**Op. Cit.**, p.41]

This definition has some problems, however. In such a society, one cannot (legitimately) do anything with or on another's property if the owner prohibits it. This means that an individual's only **guaranteed** freedom is determined by the amount of property that he or she owns. This has the consequence that someone with no property has no guaranteed freedom at all (beyond, of course, the freedom not to be murdered or otherwise harmed by the deliberate acts of others). In other words, a distribution of property is a distribution of freedom, as the right-libertarians themselves define it. It strikes anarchists as strange that an ideology that claims to be committed to promoting freedom entails the conclusion that some people should be more free than others. However, this is the logical implication of their view, which raises a serious doubt as to whether "anarcho"-capitalists are actually interested in freedom.

Looking at Rothbard's definition of "liberty" quoted above, we can see that freedom is actually no longer considered to be a fundamental, independent concept. Instead, freedom is a derivative of something more fundamental, namely the *"legitimate rights"* of an individual, which are identified as property rights. In other words, given that "anarcho"-capitalists and right libertarians in general consider the right to property as "absolute," it follows that freedom and property

become one and the same. This suggests an alternative name for the right Libertarian, namely ***"Propertarian."*** And, needless to say, if we do not accept the right-libertarians' view of what constitutes "legitimate" "rights," then their claim to be defenders of liberty is weak.

Another important implication of this "liberty as property" concept is that it produces a strangely alienated concept of freedom. Liberty, as we noted, is no longer considered absolute, but a derivative of property – which has the important consequence that you can "sell" your liberty and still be considered free by the ideology. This concept of liberty (namely "liberty as property") is usually termed "self-ownership." But, to state the obvious, I do not "own" myself, as if were an object somehow separable from my subjectivity — I **am** myself. However, the concept of "self-ownership" is handy for justifying various forms of domination and oppression — for by agreeing (usually under the force of circumstances, we must note) to certain contracts, an individual can "sell" (or rent out) themselves to others (for example, when workers sell their labour power to capitalists on the "free market"). In effect, "self-ownership" becomes the means of justifying treating people as objects — ironically, the very thing the concept was created to stop! As L. Susan Brown notes, *"[a]t the moment an individual 'sells' labour power to another, he/she loses self-determination and instead is treated as a subjectless instrument for the fulfilment of another's will."* [**The Politics of Individualism**, p. 4]

Given that workers are paid to obey, you really have to wonder which planet Murray Rothbard is on when he argues that a person's *"labour service is alienable, but his **will** is not"* and that he [sic!] *"cannot alienate his **will**, more particularly his control over his own mind and body."* [**The Ethics of Liberty**, p. 40, p. 135] He contrasts private property and self-ownership by arguing that *"[a]ll physical property owned by a person is alienable ... I can give away or sell to another person my shoes, my house, my car, my money, etc. But there are certain vital things which, in natural fact and in the nature of man, are **in**alienable ... [his] will and control over his own person are inalienable."* [**Op. Cit.**, pp. 134–5]

But *"labour services"* are unlike the private possessions Rothbard lists as being alienable. As we argued in section B.1 ("Why do anarchists oppose hierarchy") a person's *"labour services"* and *"will"* cannot be divided — if you sell your labour services, you also have to give control of your body and mind to another person! If a worker does not obey the commands of her employer, she is fired. That Rothbard denies this indicates a total lack of common-sense. Perhaps Rothbard will argue that as the worker can quit at any time she does not alienate their will (this seems to be his case against slave contracts — see section 2.6). But this ignores the fact that between the signing and breaking of the contract and during work hours (and perhaps outside work hours, if the boss has mandatory drug testing or will fire workers who attend union or anarchist meetings or those who have an "unnatural" sexuality and so on) the worker **does** alienate his will and body. In the words of Rudolf Rocker, *"under the realities of the capitalist economic form ... there can be no talk of a 'right over one's own person,' for that ends when one is compelled to submit to the economic dictation of another if he does not want to starve."* [**Anarcho-Syndicalism**, p. 17]

Ironically, the rights of property (which are said to flow from an individual's self-ownership of themselves) becomes the means, under capitalism, by which self-ownership of non-property owners is denied. The foundational right (self-ownership) becomes denied by the derivative right (ownership of things). Under capitalism, a lack of property can be just as oppressive as a lack of legal rights because of the relationships of domination and subjection this situation creates.

So Rothbard's argument (as well as being contradictory) misses the point (and the reality of capitalism). Yes, **if** we define freedom as *"the absence of coercion"* then the idea that wage labour

does not restrict liberty is unavoidable, but such a definition is useless. This is because it hides structures of power and relations of domination and subordination. As Carole Pateman argues, *"the contract in which the worker allegedly sells his labour power is a contract in which, since he cannot be separated from his capacities, he sells command over the use of his body and himself... To sell command over the use of oneself for a specified period ... is to be an unfree labourer."* [**The Sexual Contract**, p. 151]

In other words, contracts about property in the person inevitably create subordination. "Anarcho"-capitalism defines this source of unfreedom away, but it still exists and has a major impact on people's liberty. Therefore freedom is better described as "self-government" or "self-management" — to be able to govern ones own actions (if alone) or to participate in the determination of join activity (if part of a group). Freedom, to put it another way, is not an abstract legal concept, but the vital concrete possibility for every human being to bring to full development all their powers, capacities, and talents which nature has endowed them. A key aspect of this is to govern one own actions when within associations (self-management). If we look at freedom this way, we see that coercion is condemned but so is hierarchy (and so is capitalism for during working hours, people are not free to make their own plans and have a say in what affects them. They are order takers, **not** free individuals).

It is because anarchists have recognised the authoritarian nature of capitalist firms that they have opposed wage labour and capitalist property rights along with the state. They have desired to replace institutions structured by subordination with institutions constituted by free relationships (based, in other words, on self-management) in **all** areas of life, including economic organisations. Hence Proudhon's argument that the *"workmen's associations ... are full of hope both as a protest against the wage system, and as an affirmation of* ***reciprocity****"* and that their importance lies *"in their denial of the rule of capitalists, money lenders and governments."* [**The General Idea of the Revolution**, pp. 98–99]

Unlike anarchists, the "anarcho"-capitalist account of freedom allows an individual's freedom to be rented out to another while maintaining that the person is still free. It may seem strange that an ideology proclaiming its support for liberty sees nothing wrong with the alienation and denial of liberty but, in actual fact, it is unsurprising. After all, contract theory is a *"theoretical strategy that justifies subjection by presenting it as freedom"* and nothing more. Little wonder, then, that contract *"creates a relation of subordination"* and not of freedom [Carole Pateman, **Op. Cit.**, p. 39, p. 59]

Any attempt to build an ethical framework starting from the abstract individual (as Rothbard does with his *"legitimate rights"* method) will result in domination and oppression between people, **not** freedom. Indeed, Rothbard provides an example of the dangers of idealist philosophy that Bakunin warned about when he argued that while *"[m]aterialism denies free will and ends in the establishment of liberty; idealism, in the name of human dignity, proclaims free will, and on the ruins of every liberty founds authority."* [**God and the State**, p. 48] This is the case with "anarcho"-capitalism can be seen from Rothbard's wholehearted support for wage labour and the rules imposed by property owners on those who use, but do not own, their property. Rothbard, basing himself on abstract individualism, cannot help but justify authority over liberty.

Overall, we can see that the logic of the right-libertarian definition of "freedom" ends up negating itself, because it results in the creation and encouragement of **authority,** which is an **opposite** of freedom. For example, as Ayn Rand points out, *"man has to sustain his life by his own effort, the man who has no right to the product of his effort has no means to sustain his life. The man who*

produces while others dispose of his product, is a slave." [**The Ayn Rand Lexicon: Objectivism from A to Z**, pp. 388–9] But, as was shown in section C, capitalism is based on, as Proudhon put it, workers working *"for an entrepreneur who pays them and keeps their products,"* and so is a form of **theft.** Thus, by "libertarian" capitalism's **own** logic, capitalism is based not on freedom, but on (wage) slavery; for interest, profit and rent are derived from a worker's **unpaid** labour, i.e. *"others dispose of his [sic] product."*

And if a society **is** run on the wage- and profit-based system suggested by the "anarcho" and "libertarian" capitalists, freedom becomes a commodity. The more money you have, the more freedom you get. Then, since money is only available to those who earn it, Libertarianism is based on that classic saying *"work makes one free!"* (***Arbeit macht frei!***), which the Nazis placed on the gates of their concentration camps. Of course, since it is capitalism, this motto is somewhat different for those at the top. In this case it is *"other people's work makes one free!"* — a truism in any society based on private property and the authority that stems from it.

Thus it is debatable that a libertarian or "anarcho" capitalist society would have less unfreedom or coercion in it than "actually existing capitalism." In contrast to anarchism, "anarcho"-capitalism, with its narrow definitions, restricts freedom to only a few aspects of social life and ignores domination and authority beyond those aspects. As Peter Marshall points out, the right-libertarian's *"definition of freedom is entirely negative. It calls for the absence of coercion but cannot guarantee the positive freedom of individual autonomy and independence."* [**Demanding the Impossible**, p. 564] By confining freedom to such a narrow range of human action, "anarcho"-capitalism is clearly **not** a form of anarchism. Real anarchists support freedom in every aspect of an individual's life. #secf21

2.1 What are the implications of defining liberty in terms of (property) rights?

The change from defending liberty to defending (property) rights has important implications. For one thing, it allows right libertarians to imply that private property is similar to a "fact of nature," and so to conclude that the restrictions on freedom produced by it can be ignored. This can be seen in Robert Nozick's argument that decisions are voluntary if the limitations on one's actions are not caused by human action which infringe the rights of others. Thus, in a "pure" capitalist society the restrictions on freedom caused by wage slavery are not really restrictions because the worker voluntarily consents to the contract. The circumstances that drive a worker to make the contract are irrelevant because they are created by people exercising their rights and not violating other peoples' ones (see the section on *"Voluntary Exchange"* in **Anarchy, State, and Utopia**, pp. 262–265).

This means that within a society *"[w]hether a person's actions are voluntary depends on what limits his alternatives. If facts of nature do so, the actions are voluntary. (I may voluntarily walk to someplace I would prefer to fly to unaided)."* [**Anarchy, State, and Utopia**, p. 262] Similarly, the results of voluntary actions and the transference of property can be considered alongside the "facts of nature" (they are, after all, the resultants of "natural rights"). This means that the circumstances created by the existence and use of property can be considered, in essence, as a "natural" fact and so the actions we take in response to these circumstances are therefore "voluntary" and we are "free" (Nozick presents the example [p. 263] of someone who marries the only available person — all the more attractive people having already chosen others — as a case of an action that is voluntary despite removal of all but the least attractive alternative through

the legitimate actions of others. Needless to say, the example can be — and is — extended to workers on the labour market — although, of course, you do not starve to death if you decide not to marry).

However, such an argument fails to notice that property is different from gravity or biology. Of course not being able to fly does not restrict freedom. Neither does not being able to jump 10 feet into the air. But unlike gravity (for example), private property has to be protected by laws and the police. No one stops you from flying, but laws and police forces must exist to ensure that capitalist property (and the owners' authority over it) is respected. The claim, therefore, that private property in general, and capitalism in particular, can be considered as "facts of nature," like gravity, ignores an important fact: namely that the people involved in an economy must accept the rules of its operation — rules that, for example, allow contracts to be enforced; forbid using another's property without his or her consent ("theft," trespass, copyright infringement, etc.); prohibit "conspiracy," unlawful assembly, rioting, and so on; and create monopolies through regulation, licensing, charters, patents, etc. This means that capitalism has to include the mechanisms for deterring property crimes as well as mechanisms for compensation and punishment should such crimes be committed. In other words, capitalism is in fact far more than "voluntary bilateral exchange," because it **must** include the policing, arbitration, and legislating mechanisms required to ensure its operation. Hence, like the state, the capitalist market is a social institution, and the distributions of goods that result from its operation are therefore the distributions sanctioned by a capitalist society. As Benjamin Franklin pointed out, *"Private property ... is a Creature of Society, and is subject to the Calls of that Society."*

Thus, to claim with Sir Isaiah Berlin (the main, modern, source of the concepts of *"negative"* and *"positive"* freedom — although we must add that Berlin was not a right-Libertarian), that *"[i]f my poverty were a kind of disease, which prevented me from buying bread ... as lameness prevents me from running, this inability would not naturally be described as a lack of freedom"* totally misses the point [*"Two Concepts of Liberty"*, in **Four Essays on Liberty**, p. 123]. If you are lame, police officers do not come round to stop you running. They do not have to. However, they **are** required to protect property against the dispossessed and those who reject capitalist property rights.

This means that by using such concepts as "negative" liberty and ignoring the social nature of private property, right-libertarians are trying to turn the discussion away from liberty toward "biology" and other facts of nature. And conveniently, by placing property rights alongside gravity and other natural laws, they also succeed in reducing debate even about rights.

Of course, coercion and restriction of liberty **can** be resisted, unlike "natural forces" like gravity. So if, as Berlin argues, *"negative"* freedom means that you *"lack political freedom only if you are prevented from attaining a goal by human beings,"* then capitalism is indeed based on such a lack, since property rights need to be enforced by human beings (*"I am prevented by others from doing what I could otherwise do"*). After all, as Proudhon long ago noted, the market is manmade, hence any constraint it imposes is the coercion of man by man and so economic laws are not as inevitable as natural ones [see Alan Ritter's **The Political Thought of Pierre-Joseph Proudhon**, p. 122]. Or, to put it slightly differently, capitalism requires coercion in order to work, and hence, is **not** similar to a "fact of nature," regardless of Nozick's claims (i.e. property rights have to be defined and enforced by human beings, although the nature of the labour market resulting from capitalist property definitions is such that direct coercion is usually not needed). This implication is actually recognised by right-libertarians, because they argue that the rights-framework

of society should be set up in one way rather than another. In other words, they recognise that society is not independent of human interaction, and so can be changed.

Perhaps, as seems the case, the "anarcho"-capitalist or right-Libertarian will claim that it is only **deliberate** acts which violate your (libertarian defined) rights by other humans beings that cause unfreedom (*"we define freedom ... as the **absence of invasion** by another man of an man's person or property"* [Rothbard, **The Ethics of Liberty**, p. 41]) and so if no-one deliberately coerces you then you are free. In this way the workings of the capitalist market can be placed alongside the "facts of nature" and ignored as a source of unfreedom. However, a moments thought shows that this is not the case. Both deliberate and non-deliberate acts can leave individuals lacking freedom.

Let us assume (in an example paraphrased from Alan Haworth's excellent book **Anti-Libertarianism**, p. 49) that someone kidnaps you and places you down a deep (naturally formed) pit, miles from anyway, which is impossible to climb up. No one would deny that you are unfree. Let us further assume that another person walks by and accidentally falls into the pit with you.

According to right-libertarianism, while you are unfree (i.e. subject to deliberate coercion) your fellow pit-dweller is perfectly free for they have subject to the "facts of nature" and not human action (deliberate or otherwise). Or, perhaps, they "voluntarily choose" to stay in the pit, after all, it is "only" the "facts of nature" limiting their actions. But, obviously, both of you are in **exactly the same position,** have **exactly the same choices** and so are **equally** unfree! Thus a definition of "liberty" that maintains that only deliberate acts of others — for example, coercion — reduces freedom misses the point totally.

Why is this example important? Let us consider Murray Rothbard's analysis of the situation after the abolition of serfdom in Russia and slavery in America. He writes:

> *"The **bodies** of the oppressed were freed, but the property which they had worked and eminently deserved to own, remained in the hands of their former oppressors. With economic power thus remaining in their hands, the former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits."* [**The Ethics of Liberty**, p. 74]

However, contrast this with Rothbard's claims that if market forces ("voluntary exchanges") result in the creation of free tenants or labourers then these labourers and tenants are free (see, for example, **The Ethics of Liberty**, pp. 221–2 on why "economic power" within capitalism does not exist). But the labourers dispossessed by market forces are in **exactly** the same situation as the former serfs and slaves. Rothbard sees the obvious *"economic power"* in the later case, but denies it in the former. But the **conditions** of the people in question are identical and it is these conditions that horrify us. It is only his ideology that stops Rothbard drawing the obvious conclusion — identical conditions produce identical social relationships and so if the formally "free" ex-serfs are subject to *"economic power"* and *"masters"* then so are the formally "free" labourers within capitalism! Both sets of workers may be formally free, but their circumstances are such that they are "free" to "consent" to sell their freedom to others (i.e. economic power produces relationships of domination and unfreedom between formally free individuals).

Thus Rothbard's definition of liberty in terms of rights fails to provide us with a realistic and viable understanding of freedom. Someone can be a virtual slave while still having her rights

non-violated (conversely, someone can have their property rights violated and still be free; for example, the child who enters your backyard without your permission to get her ball hardly violates your liberty — indeed, you would never know that she has entered your property unless you happened to see her do it). So the idea that freedom means non-aggression against person and their legitimate material property justifies extensive **non-freedom** for the working class. The non-violation of property rights does **not** imply freedom, as Rothbard's discussion of the former slaves shows. Anyone who, along with Rothbard, defines freedom *"as the **absence of invasion** by another man of any man's person or property"* in a deeply inequality society is supporting, and justifying, capitalist and landlord domination. As anarchists have long realised, in an unequal society, a contractarian starting point implies an absolutist conclusion.

Why is this? Simply because freedom is a result of **social** interaction, not the product of some isolated, abstract individual (Rothbard uses the model of Robinson Crusoe to construct his ideology). But as Bakunin argued, *"the freedom of the individual is a function of men in society, a necessary consequence of the collective development of mankind."* He goes on to argue that *"man in isolation can have no awareness of his liberty ... Liberty is therefore a feature not of isolation but of interaction, not of exclusion but rather of connection."* [**Selected Writings**, p. 146, p. 147] Right Libertarians, by building their definition of freedom from the isolated person, end up by supporting restrictions of liberty due to a neglect of an adequate recognition of the actual interdependence of human beings, of the fact what each person does is effected by and affects others. People become aware of their humanity (liberty) in society, not outside it. It is the **social relationships** we take part in which determine how free we are and any definition of freedom which builds upon an individual without social ties is doomed to create relations of domination, not freedom, between individuals — as Rothbard's theory does (to put it another way, voluntary association is a necessary, but not sufficient, condition for freedom. Which is why anarchists have always stressed the importance of equality — see section 3 for details).

So while facts of nature can restrict your options and freedom, it is the circumstances within which they act and the options they limit that are important (a person trapped at the bottom of a pit is unfree as the options available are so few; the lame person is free because their available options are extensive). In the same manner, the facts of society can and do restrict your freedom because they are the products of human action and are defined and protected by human institutions, it is the circumstances within which individuals make their decisions and the social relationships these decisions produce that are important (the worker driven by poverty to accept a slave contract in a sweat shop is unfree because the circumstances he faces have limited his options and the relations he accepts are based upon hierarchy; the person who decides to join an anarchist commune is free because the commune is non-hierarchical and she has the option of joining another commune, working alone and so forth).

All in all, the right-Libertarian concept of freedom is lacking. For an ideology that takes the name "Libertarianism" it is seems happy to ignore actual liberty and instead concentrate on an abstract form of liberty which ignores so many sources of unfreedom as to narrow the concept until it becomes little more than a justification for authoritarianism. This can be seen from right-Libertarian attitudes about private property and its effects on liberty (as discussed in the next section). #secf22

2.2 How does private property affect freedom?

The right-libertarian does not address or even acknowledge that the (absolute) right of private property may lead to extensive control by property owners over those who use, but do not own, property (such as workers and tenants). Thus a free-market capitalist system leads to a very selective and class-based protection of "rights" and "freedoms." For example, under capitalism, the "freedom" of employers inevitably conflicts with the "freedom" of employees. When stockholders or their managers exercise their "freedom of enterprise" to decide how their company will operate, they violate their employee's right to decide how their labouring capacities will be utilised. In other words, under capitalism, the "property rights" of employers will conflict with and restrict the "human right" of employees to manage themselves. Capitalism allows the right of self-management only to the few, not to all. Or, alternatively, capitalism does not recognise certain human rights as **universal** which anarchism does.

This can be seen from Austrian Economist W. Duncan Reekie's defence of wage labour. While referring to *"intra-firm labour markets"* as *"hierarchies"*, Reekie (in his best *ex cathedra* tone) states that *"[t]here is nothing authoritarian, dictatorial or exploitative in the relationship. Employees order employers to pay them amounts specified in the hiring contract just as much as employers order employees to abide by the terms of the contract."* [**Markets, Entrepreneurs and Liberty**, p. 136, p. 137]. Given that *"the terms of contract"* involve the worker agreeing to obey the employers orders and that they will be fired if they do not, its pretty clear that the ordering that goes on in the *"intra-firm labour market"* is decidedly **one way**. Bosses have the power, workers are paid to obey. And this begs the question, **if** the employment contract creates a free worker, why must she abandon her liberty during work hours?

Reekie actually recognises this lack of freedom in a "round about" way when he notes that *"employees in a firm at any level in the hierarchy can exercise an entrepreneurial role. The area within which that role can be carried out increases the more authority the employee has."* [**Op. Cit.**, p. 142] Which means workers **are** subject to control from above which restricts the activities they are allowed to do and so they are **not** free to act, make decisions, participate in the plans of the organisation, to create the future and so forth within working hours. And it is strange that while recognising the firm as a hierarchy, Reekie tries to deny that it is authoritarian or dictatorial — as if you could have a hierarchy without authoritarian structures or an unelected person in authority who is not a dictator. His confusion is shared by Austrian guru Ludwig von Mises, who asserts that the *"entrepreneur and capitalist are not irresponsible autocrats"* because they are *"unconditionally subject to the sovereignty of the consumer"* while, **on the next page**, admitting there is a *"managerial hierarchy"* which contains *"the average subordinate employee."* [**Human Action**, p. 809 and p. 810] It does not enter his mind that the capitalist may be subject to some consumer control while being an autocrat to their subordinated employees. Again, we find the right-"libertarian" acknowledging that the capitalist managerial structure is a hierarchy and workers are subordinated while denying it is autocratic to the workers! Thus we have "free" workers within a relationship distinctly **lacking** freedom (in the sense of self-government) — a strange paradox. Indeed, if your personal life were as closely monitored and regulated as the work life of millions of people across the world, you would rightly consider it oppression.

Perhaps Reekie (like most right-libertarians) will maintain that workers voluntarily agree ("consent") to be subject to the bosses dictatorship (he writes that *"each will only enter into the contractual agreement known as a firm if each believes he will be better off thereby. The firm is*

simply another example of mutually beneficial exchange" [**Op. Cit.**, p. 137]). However, this does not stop the relationship being authoritarian or dictatorial (and so exploitative as it is **highly** unlikely that those at the top will not abuse their power). And as we argue further in the next section (and also see sections B.4, 3.1 and 10.2), in a capitalist society workers have the option of finding a job or facing abject poverty and/or starvation.

Little wonder, then, that people "voluntarily" sell their labour and "consent" to authoritarian structures! They have little option to do otherwise. So, **within** the labour market, workers **can** and **do** seek out the best working conditions possible, but that does not mean that the final contract agreed is "freely" accepted and not due to the force of circumstances, that both parties have equal bargaining power when drawing up the contract or that the freedom of both parties is ensured. Which means to argue (as many right-libertarians do) that freedom cannot be restricted by wage labour because people enter into relationships they consider will lead to improvements over their initial situation totally misses the points. As the initial situation is not considered relevant, their argument fails. After all, agreeing to work in a sweatshop 14 hours a day **is** an improvement over starving to death — but it does not mean that those who so agree are free when working there or actually **want** to be there. They are not and it is the circumstances, created and enforced by the law, that have ensured that they "consent" to such a regime (given the chance, they would desire to **change** that regime but cannot as this would violate their bosses property rights and they would be repressed for trying).

So the right-wing "libertarian" right is interested only in a narrow concept of freedom (rather than in "freedom" or "liberty" as such). This can be seen in the argument of Ayn Rand (a leading ideologue of "libertarian" capitalism) that *"**Freedom**, in a political context, means freedom from government coercion. It does **not** mean freedom from the landlord, or freedom from the employer, or freedom from the laws of nature which do not provide men with automatic prosperity. It means freedom from the coercive power of the state — and nothing else!"* [**Capitalism: The Unknown Ideal**, p. 192] By arguing in this way, right libertarians ignore the vast number of authoritarian social relationships that exist in capitalist society and, as Rand does here, imply that these social relationships are like "the laws of nature." However, if one looks at the world without prejudice but with an eye to maximising freedom, the major coercive institution is seen to be not the state but capitalist social relationships (as indicated in section B.4).

The right "libertarian," then, far from being a defender of freedom, is in fact a keen defender of certain forms of authority and domination. As Peter Kropotkin noted, the *"modern Individualism initiated by Herbert Spencer is, like the critical theory of Proudhon, a powerful indictment against the dangers and wrongs of government, but its practical solution of the social problem is miserable — so miserable as to lead us to inquire if the talk of 'No force' be merely an excuse for supporting landlord and capitalist domination."* [**Act For Yourselves**, p. 98]

To defend the "freedom" of property owners is to defend authority and privilege — in other words, statism. So, in considering the concept of liberty as "freedom from," it is clear that by defending private property (as opposed to possession) the "anarcho"-capitalist is defending the power and authority of property owners to govern those who use "their" property. And also, we must note, defending all the petty tyrannies that make the work lives of so many people frustrating, stressful and unrewarding.

However, anarchism, by definition, is in favour of organisations and social relationships which are non-hierarchical and non-authoritarian. Otherwise, some people are more free than others. Failing to attack hierarchy leads to massive contradiction. For example, since the British Army

is a volunteer one, it is an "anarchist" organisation! (see next section for a discussion on why the "anarcho"-capitalism concept of freedom also allows the state to appear "libertarian").

In other words, "full capitalist property rights" do not protect freedom, in fact they actively deny it. But this lack of freedom is only inevitable if we accept capitalist private property rights. If we reject them, we can try and create a world based on freedom in all aspects of life, rather than just in a few. #secf23

2.3 Can "anarcho"-capitalist theory justify the state?

Ironically enough, "anarcho"-capitalist ideology actually allows the state to be justified along with capitalist hierarchy. This is because the reason why capitalist authority is acceptable to the "anarcho"-capitalist is because it is "voluntary" — no one forces the worker to join or remain within a specific company (force of circumstances are irrelevant in this viewpoint). Thus capitalist domination is not really domination at all. But the same can be said of all democratic states as well. Few such states bar exit for its citizens – they are free to leave at any time and join any other state that will have them (exactly as employees can with companies). Of course there **are** differences between the two kinds of authority — anarchists do not deny that — but the similarities are all too clear.

The "anarcho"-capitalist could argue that changing jobs is easier than changing states and, sometimes, this is correct — but not always. Yes, changing states does require the moving of home and possessions over great distances but so can changing job (indeed, if a worker has to move half-way across a country or even the world to get a job "anarcho"-capitalists would celebrate this as an example of the benefits of a "flexible" labour market). Yes, states often conscript citizens and send them into dangerous situations but bosses often force their employees to accept dangerous working environments on pain of firing. Yes, many states do restrict freedom of association and speech, but so do bosses. Yes, states tax their citizens but landlords and companies only let others use their property if they get money in return (i.e. rent or profits). Indeed, if the employee or tenant does not provide the employer or landlord with enough profits, they will quickly be shown the door. Of course employees can start their own companies but citizens can start their own state if they convince an existing state (the owner of a set of resources) to sell/give land to them. Setting up a company also requires existing owners to sell/give resources to those who need them. Of course, in a democratic state citizens can influence the nature of laws and orders they obey. In a capitalist company, this is not the case.

This means that, logically, "anarcho"-capitalism must consider a series of freely exitable states as "anarchist" and not a source of domination. If consent (not leaving) is what is required to make capitalist domination not domination then the same can be said of statist domination. Stephen L. Newman makes the same point:

> *"The emphasis [right-wing] libertarians place on the opposition of liberty and political power tends to obscure the role of authority in their worldview ... the authority exercised in private relationships, however — in the relationship between employer and employee, for instance — meets with no objection... . [This] reveals a curious insensitivity to the use of private authority as a means of social control. Comparing public and private authority, we might well ask of the [right-wing] libertarians: When the price of exercising one's freedom is terribly high, what practical difference is there between the*

> *commands of the state and those issued by one's employer? ... Though admittedly the circumstances are not identical, telling disgruntled empowers that they are always free to leave their jobs seems no different in principle from telling political dissidents that they are free to emigrate."* [**Liberalism at Wit's End**, pp. 45–46]

Murray Rothbard, in his own way, agrees:

> *"**If** the State may be said too properly **own** its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there **is** no private property in its area, because it really owns the entire land surface. **So long** as the State permits its subjects to leave its territory, then, it can be said to act as does any other owner who sets down rules for people living on his property."* [**The Ethics of Liberty**, p. 170]

Rothbard's argues that this is **not** the case simply because the state did not acquire its property in a *"just"* manner and that it claims rights over virgin land (both of which violates Rothbard's "homesteading" theory of property — see section 4.1 for details and a critique). Rothbard argues that this defence of statism (the state as property owner) is unrealistic and ahistoric, but his account of the origins of property is equally unrealistic and ahistoric and that does not stop him supporting capitalism. People in glass houses should not throw stones!

Thus he claims that the state is evil and its claims to authority/power false simply because it acquired the resources it claims to own *"unjustly"* — for example, by violence and coercion (see **The Ethics of Liberty**, pp. 170–1, for Rothbard's attempt to explain why the state should not be considered as the owner of land). And even **if** the state **was** the owner of its territory, it cannot appropriate virgin land (although, as he notes elsewhere, the *"vast"* US frontier no longer exists *"and there is no point crying over the fact"* [**Op. Cit.**, p. 240]).

So what makes hierarchy legitimate for Rothbard is whether the property it derives from was acquired justly or unjustly. Which leads us to a few **very** important points.

Firstly, Rothbard is explicitly acknowledging the similarities between statism and capitalism. He is arguing that **if** the state had developed in a *"just"* way, then it is perfectly justifiable in governing (*"set[ting] down rules"*) those who "consent" to live on its territory in **exactly** the same why a property owner does. In other words, private property can be considered as a "justly" created state! These similarities between property and statism have long been recognised by anarchists and that is why we reject private property along with the state (Proudhon did, after all, note that *"property is despotism"* and well as *"theft"*). But, according to Rothbard, something can look like a state (i.e. be a monopoly of decision making over an area) and act like a state (i.e. set down rules for people, govern them, impose a monopoly of force) but not be a state. But if it looks like a duck and sounds like a duck, it is a duck. Claiming that the origins of the thing are what counts is irrelevant — for example, a cloned duck is just as much a duck as a naturally born one. A statist organisation is authoritarian whether it comes from *"just"* or *"unjust"* origins. Does transforming the ownership of the land from states to capitalists **really** make the relations of domination created by the dispossession of the many less authoritarian and unfree? Of course not.

Secondly, much property in "actually existing" capitalism is the product (directly or indirectly) of state laws and violence (*"the emergence of both agrarian and industrial capitalism in Britain*

[and elsewhere, we must add] ... could not have got off the ground without resources to state violence — legal or otherwise" [Brian Morris, **Ecology & Anarchism**, p. 190]). If state claims of ownership are invalid due to their history, then so are many others (particularly those which claim to own land). As the initial creation was illegitimate, so are the transactions which have sprung from it. Thus if state claims of property rights are invalid, so are most (if not all) capitalist claims. If the laws of the state are illegitimate, so are the rules of the capitalist. If taxation is illegitimate, then so are rent, interest and profit. Rothbard's "historical" argument against the state can also be applied to private property and if the one is unjustified, then so is the other.

Thirdly, **if** the state had evolved "justly" then Rothbard would actually have nothing against it! A strange position for an anarchist to take. Logically this means that if a system of corporate states evolved from the workings of the capitalist market then the "anarcho"-capitalist would have nothing against it. This can be seen from "anarcho"-capitalist support for company towns even though they have correctly been described as *"industrial feudalism"* (see section 6 for more on this).

Fourthly, Rothbard's argument implies that similar circumstances producing similar relationships of domination and unfreedom are somehow different if they are created by *"just"* and *"unjust"* means. Rothbard claims that because the property is *"justly"* acquired it means the authority a capitalist over his employees is totally different from that of a state over its subject. But such a claim is false — both the subject/citizen and the employee are in a similar relationship of domination and authoritarianism. As we argued in section 2.2, how a person got into a situation is irrelevant when considering how free they are. Thus, the person who "consents" to be governed by another because all available resources are privately owned is in exactly the same situation as a person who has to join a state because all available resources are owned by one state or another. Both are unfree and are part of authoritarian relationships based upon domination.

And, lastly, while "anarcho"-capitalism may be a "just" society, it is definitely **not** a free one. It will be marked by extensive hierarchy, unfreedom and government, but these restrictions of freedom will be of a private nature. As Rothbard indicates, the property owner and the state create/share the same authoritarian relationships. If statism is unfree, then so is capitalism. And, we must add, how "just" is a system which undermines liberty. Can "justice" ever be met in a society in which one class has more power and freedom than another. If one party is in an inferior position, then they have little choice but to agree to the disadvantageous terms offered by the superior party (see section 3.1). In such a situation, a "just" outcome will be unlikely as any contract agreed will be skewed to favour one side over the other.

The implications of these points are important. We can easily imagine a situation within "anarcho"-capitalism where a few companies/people start to buy up land and form company regions and towns. After all, this **has** happened continually throughout capitalism. Thus a "natural" process may develop where a few owners start to accumulate larger and larger tracks of land "justly". Such a process does not need to result in **one** company owning the world. It is likely that a few hundred, perhaps a few thousand, could do so. But this is not a cause for rejoicing — after all the current "market" in "unjust" states also has a few hundred competitors in it. And even if there is a large multitude of property owners, the situation for the working class is exactly the same as the citizen under current statism! Does the fact that it is "justly" acquired property that faces the worker really change the fact she must submit to the government and rules of another to gain access to the means of life?

When faced with anarchist criticisms that **circumstances** force workers to accept wage slavery the "anarcho"-capitalist claims that these are to be considered as objective facts of nature and so wage labour is not domination. However, the same can be said of states — we are born into a world where states claim to own all the available land. If states are replaced by individuals or groups of individuals does this change the essential nature of our dispossession? Of course not.

Rothbard argues that *"[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc."* [**Op. Cit.**, p. 173] and, equally obviously, this ultimate-decision making power extends to those who **use,** but do not own, such property. But how "free" is a free society where the majority have to sell their liberty to another in order to live? Rothbard (correctly) argues that the State *"uses its monopoly of force ... to control, regulate, and coerce its hapless subjects. Often it pushes its way into controlling the morality and the very lives of its subjects."* [**Op. Cit.**, p. 171] However he fails to note that employers do exactly the same thing to their employees. This, from an anarchist perspective, is unsurprising, for (after all) the employer **is** *"the ultimate decision-making power over his just property"* just as the state is over its "unjust" property. That similar forms of control and regulation develop is not a surprise given the similar hierarchical relations in both structures.

That there is a choice in available states does not make statism any less unjust and unfree. Similarly, just because we have a choice between employers does not make wage labour any less unjust or unfree. But trying to dismiss one form of domination as flowing from "just" property while attacking the other because it flows from "unjust" property is not seeing the wood for the trees. If one reduces liberty, so does the other. Whether the situation we are in resulted from "just" or "unjust" steps is irrelevant to the restrictions of freedom we face because of them (and as we argue in section 2.5, "unjust" situations can easily flow from "just" steps).

The "anarcho"-capitalist insistence that the voluntary nature of an association determines whether it is anarchistic is deeply flawed — so flawed in fact that states and state-like structures (such as capitalist firms) can be considered anarchistic! In contrast, anarchists think that the hierarchical nature of the associations we join is equally as important as its voluntary nature when determining whether it is anarchistic or statist. However this option is not available to the "anarcho"-capitalist as it logically entails that capitalist companies are to be opposed along with the state as sources of domination, oppression and exploitation. #secf24

2.4 But surely transactions on the market are voluntary?

Of course, it is usually maintained by "anarcho"-capitalists that no-one puts a gun to a worker's head to join a specific company. Yes, indeed, this is true — workers can apply for any job they like. But the point is that the vast majority cannot avoid having to sell their liberty to others (self-employment and co-operatives **are** an option, but they account for less than 10% of the working population and are unlikely to spread due to the nature of capitalist market forces — see sections J.5.11 and J.5.12 for details). And as Bob Black pointed out, right libertarians argue that *"'one can at least change jobs.' but you can't avoid having a job – just as under statism one can at least change nationalities but you can't avoid subjection to one nation-state or another. But freedom means more than the right to change masters."* [**The Libertarian as Conservative**]

So why do workers agree to join a company? Because circumstances force them to do so — circumstances created, we must note, by **human** actions and institutions and not some abstract "fact of nature." And if the world that humans create by their activity is detrimental to what we

should value most (individual liberty and individuality) then we should consider how to **change that world for the better.** Thus "circumstances" (current "objective reality") is a valid source of unfreedom and for human investigation and creative activity — regardless of the claims of right-Libertarians.

Let us look at the circumstances created by capitalism. Capitalism is marked by a class of dispossessed labourers who have nothing to sell by their labour. They are legally barred from access to the means of life and so have little option but to take part in the labour market. As Alexander Berkman put it:

> "The law says your employer does not sell anything from you, because it is done with your consent. You have agreed to work for your boss for certain pay, he to have all that you produce ...
>
> "But did you really consent?
>
> "When the highway man holds his gun to your head, you turn your valuables over to him. You 'consent' all right, but you do so because you cannot help yourself, because you are **compelled** by his gun.
>
> "Are you not **compelled** to work for an employer? Your need compels you just as the highwayman's gun. You must live... You can't work for yourself ...The factories, machinery, and tools belong to the employing class, so you **must** hire yourself out to that class in order to work and live. Whatever you work at, whoever your employer may be, it is always comes to the same: you must work **for him**. You can't help yourself. You are **compelled**." [**What is Communist Anarchism?**, p. 9]

Due to this class monopoly over the means of life, workers (usually) are at a disadvantage in terms of bargaining power — there are more workers than jobs (see sections B.4.3 and 10.2 for a discussion why this is the normal situation on the labour market).

As was indicated in section B.4 (How does capitalism affect liberty?), within capitalism there is no equality between owners and the dispossessed, and so property is a source of **power.** To claim that this power should be "left alone" or is "fair" is *"to the anarchists... preposterous. Once a State has been established, and most of the country's capital privatised, the threat of physical force is no longer necessary to coerce workers into accepting jobs, even with low pay and poor conditions. To use Ayn Rand's term, 'initial force' has **already taken place,** by those who now have capital against those who do not... . In other words, if a thief died and willed his 'ill-gotten gain' to his children, would the children have a right to the stolen property? Not legally. So if 'property is theft,' to borrow Proudhon's quip, and the fruit of exploited labour is simply legal theft, then the only factor giving the children of a deceased capitalist a right to inherit the 'booty' is the law, the State. As Bakunin wrote, 'Ghosts should not rule and oppress this world, which belongs only to the living'"* [Jeff Draughn, **Between Anarchism and Libertarianism**].

Or, in other words, right-Libertarianism fails to *"meet the charge that normal operations of the market systematically places an entire class of persons (wage earners) in circumstances that compel them to accept the terms and conditions of labour dictated by those who offer work. While it is true that individuals are formally free to seek better jobs or withhold their labour in the hope of receiving higher wages, in the end their position in the market works against them; they cannot live if they do not find employment. When circumstances regularly bestow a relative disadvantage on one class*

of persons in their dealings with another class, members of the advantaged class have little need of coercive measures to get what they want." [Stephen L. Newman, **Liberalism at Wit's End**, p. 130]

To ignore the circumstances which drive people to seek out the most "beneficial exchange" is to blind yourself to the power relationships inherent within capitalism — power relationships created by the unequal bargaining power of the parties involved (also see section 3.1). And to argue that "consent" ensures freedom is false; if you are "consenting" to be join a dictatorial organisation, you "consent" **not** to be free (and to paraphrase Rousseau, a person who renounces freedom renounces being human).

Which is why circumstances are important — if someone truly wants to join an authoritarian organisation, then so be it. It is their life. But if circumstances ensure their "consent" then they are not free. The danger is, of course, that people become **accustomed** to authoritarian relationships and end up viewing them as forms of freedom. This can be seen from the state, which the vast majority support and "consent" to. And this also applies to wage labour, which many workers today accept as a "necessary evil" (like the state) but, as we indicate in section 8.6, the first wave of workers viewed with horror as a form of (wage) slavery and did all that they could to avoid. In such situations all we can do is argue with them and convince them that certain forms of organisations (such as the state and capitalist firms) are an evil and urge them to change society to ensure their extinction.

So due to this lack of appreciation of circumstances (and the fact that people become accustomed to certain ways of life) "anarcho"-capitalism actively supports structures that restrict freedom for the many. And how is "anarcho"-capitalism **anarchist** if it generates extensive amounts of archy? It is for this reason that all anarchists support self-management within free association — that way we maximise freedom both inside **and** outside organisations. But only stressing freedom outside organisations, "anarcho"-capitalism ends up denying freedom as such (after all, we spend most of our waking hours at work). If "anarcho"-capitalists **really** desired freedom, they would reject capitalism and become anarchists — only in a libertarian socialist society would agreements to become a wage worker be truly voluntary as they would not be driven by circumstances to sell their liberty.

This means that while right-Libertarianism appears to make "choice" an ideal (which sounds good, liberating and positive) in practice it has become a "dismal politics," a politics of choice where most of the choices are bad. And, to state the obvious, the choices we are "free" to make are shaped by the differences in wealth and power in society (see section 3.1) as well as such things as "isolation paradoxes" (see section B.6) and the laws and other human institutions that exist. If we ignore the context within which people make their choices then we glorify abstract processes at the expense of real people. And, as importantly, we must add that many of the choices we make under capitalism (shaped as they are by the circumstances within which they are made), such as employment contracts, result in our "choice" being narrowed to "love it or leave it" in the organisations we create/join as a result of these "free" choices.

This ideological blind spot flows from the "anarcho"-capitalist definition of "freedom" as "absence of coercion" — as workers "freely consent" to joining a specific workplace, their freedom is unrestricted. But to defend **only** "freedom from" in a capitalist society means to defend the power and authority of the few against the attempts of the many to claim their freedom and rights. To requote Emma Goldman, *"'Rugged individualism' has meant all the 'individualism' for the masters ... , in whose name political tyranny and social oppression are defended and held up as*

virtues' while every aspiration and attempt of man to gain freedom ... is denounced as ... evil in the name of that same individualism." [**Red Emma Speaks**, p. 112]

In other words, its all fine and well saying (as right-libertarians do) that you aim to abolish force from human relationships but if you support an economic system which creates hierarchy (and so domination and oppression) by its very workings, "defensive" force will always be required to maintain and enforce that domination. Moreover, if one class has extensive power over another due to the systematic (and normal) workings of the market, any force used to defend that power is **automatically** "defensive". Thus to argue against the use of force and ignore the power relationships that exist within and shape a society (and so also shape the individuals within it) is to defend and justify capitalist and landlord domination and denounce any attempts to resist that domination as "initiation of force."

Anarchists, in contrast, oppose **hierarchy** (and so domination within relationships — bar S&M personal relationships, which are a totally different thing altogether; they are truly voluntary and they also do not attempt to hide the power relationships involved by using economic jargon). This opposition, while also including opposition to the use of force against equals (for example, anarchists are opposed to forcing workers and peasants to join a self-managed commune or syndicate), also includes support for the attempts of those subject to domination to end it (for example, workers striking for union recognition are not "initiating force", they are fighting for their freedom).

In other words, apparently "voluntary" agreements can and do limit freedom and so the circumstances that drive people into them **must** be considered when deciding whether any such limitation is valid. By ignoring circumstances, "anarcho"-capitalism ends up by failing to deliver what it promises — a society of free individuals — and instead presents us with a society of masters and servants. The question is, what do we feel moved to insist that people enjoy? Formal, abstract (bourgeois) self-ownership ("freedom") or a more substantive control over one's life (i.e. autonomy)? #secf25

2.5 But surely circumstances are the result of liberty and so cannot be objected to?

It is often argued by right-libertarians that the circumstances we face within capitalism are the result of individual decisions (i.e. individual liberty) and so we must accept them as the expressions of these acts (the most famous example of this argument is in Nozick's **Anarchy, State, and Utopia** pp. 161–163 where he maintains that *"liberty upsets patterns"*). This is because whatever situation evolves from a just situation by just (i.e. non-coercive steps) is also (by definition) just.

However, it is not apparent that adding just steps to a just situation will result in a just society. We will illustrate with a couple of banal examples. If you add chemicals which are non-combustible together you can create a new, combustible, chemical (i.e. X becomes not-X by adding new X to it). Similarly, if you have an odd number and add another odd number to it, it becomes even (again, X becomes not-X by adding a new X to it). So it **is** very possible to go from an just state to an unjust state by just step (and it is possible to remain in an unjust state by just acts; for example if we tried to implement "anarcho"-capitalism on the existing — unjustly created — situation of "actually existing" capitalism it would be like having an odd number and adding even numbers to it). In other words, the outcome of "just" steps can increase inequality

within society and so ensure that some acquire an unacceptable amount of power over others, via their control over resources. Such an inequality of power would create an "unjust" situation where the major are free to sell their liberty to others due to inequality in power and resources on the "free" market.

Ignoring this objection, we could argue (as many "anarcho"-capitalists and right-libertarians do) that the unforeseen results of human action are fine unless we assume that these human actions are in themselves bad (i.e. that individual choice is evil).

Such an argument is false for three reasons.

First, when we make our choices the aggregate impact of these choices are unknown to us — and not on offer when we make our choices. Thus we cannot be said to "choose" these outcomes, outcomes which we may consider deeply undesirable, and so the fact that these outcomes are the result of individual choices is besides the point (if we knew the outcome we could refrain from doing them). The choices themselves, therefore, do not validate the outcome as the outcome was not part of the choices when they where made (i.e. the means do not justify the ends). In other words, private acts often have important public consequences (and "bilateral exchanges" often involve externalities for third parties). Secondly, if the outcome of individual choices is to deny or restrict individual choice on a wider scale at a later stage, then we are hardly arguing that individual choice is a bad thing. We want to arrange it so that the decisions we make now do not result in them restricting our ability to make choices in important areas of life at a latter stage. Which means we are in favour of individual choices and so liberty, not against them. Thirdly, the unforeseen or unplanned results of individual actions are not necessarily a good thing. If the aggregate outcome of individual choices harms individuals then we have a right to modify the circumstances within which choices are made and/or the aggregate results of these choices.

An example will show what we mean (again drawn from Haworth's excellent **Anti-Libertarianism**, p. 35). Millions of people across the world bought deodorants which caused a hole to occur in the ozone layer surrounding the Earth. The resultant of these acts created a situation in which individuals and the eco-system they inhabited were in great danger. The actual acts themselves were by no means wrong, but the aggregate impact was. A similar argument can apply to any form of pollution. Now, unless the right-Libertarian argues that skin cancer or other forms of pollution related illness are fine, its clear that the resultant of individual acts can be harmful to individuals.

The right-Libertarian could argue that pollution is an "initiation of force" against an individual's property-rights in their person and so individuals can sue the polluters. But hierarchy also harms the individual (see section B.1) — and so can be considered as an infringement of their "property-rights" (i.e. liberty, to get away from the insane property fetish of right-Libertarianism). The loss of autonomy can be just as harmful to an individual as lung cancer although very different in form. And the differences in wealth resulting from hierarchy is well known to have serious impacts on life-span and health.

As noted in section 2.1, the market is just as man-made as pollution. This means that the "circumstances" we face are due to aggregate of millions of individual acts and these acts occur within a specific framework of rights, institutions and ethics. Anarchists think that a transformation of our society and its rights and ideals is required so that the resultant of individual choices does not have the ironic effect of limiting individual choice (freedom) in many important ways (such as in work, for example).

In other words, the **circumstances** created by capitalist rights and institutions requires a **transformation** of these rights and institutions in such a way as to maximise individual choice for all — namely, to abolish these rights and replace them with new ones (for example, replace property rights with use rights). Thus Nozick's claims that *"Z does choose voluntarily if the other individuals A through Y each acted voluntarily and within their rights"* [**Op. Cit.**, p. 263] misses the point — it is these rights that are in question (given that Nozick **assumes** these rights then his whole thesis is begging the question).

And we must add (before anyone points it out) that, yes, we are aware that many decisions will unavoidably limit current and future choices. For example, the decision to build a factory on a green-belt area will make it impossible for people to walk through the woods that are no longer there. But such "limitations" (if they can be called that) of choice are different from the limitations we are highlighting here, namely the lose of freedom that accompanies the circumstances created via exchange in the market. The human actions which build the factory modify reality but do not generate social relationships of domination between people in so doing. The human actions of market exchange, in contrast, modify the relative strengths of everyone in society and so has a distinct impact on the social relationships we "voluntarily" agree to create. Or, to put it another way, the decision to build on the green-belt site does "limit" choice in the abstract but it does **not** limit choice in the kind of relationships we form with other people nor create authoritarian relationships between people due to inequality influencing the content of the associations we form. However, the profits produced from using the factory increases inequality (and so market/economic power) and so weakens the position of the working class in respect to the capitalist class within society. This increased inequality will be reflected in the "free" contracts and working regimes that are created, with the weaker "trader" having to compromise far more than before.

So, to try and defend wage slavery and other forms of hierarchy by arguing that "circumstances" are created by individual liberty runs aground on its own logic. If the circumstances created by individual liberty results in pollution then the right-Libertarian will be the first to seek to change those circumstances. They recognise that the right to pollute while producing is secondary to our right to be healthy. Similarly, if the circumstances created by individual liberty results in hierarchy (pollution of the mind and our relationships with others as opposed to the body, although it affects that to) then we are entitled to change these circumstances too and the means by which we get there (namely the institutional and rights framework of society). Our right to liberty is more important than the rights of property — sadly, the right-Libertarian refuses to recognise this. #secf26

2.6 Do Libertarian-capitalists support slavery?

Yes. It may come as a surprise to many people, but right-Libertarianism is one of the few political theories that justifies slavery. For example, Robert Nozick asks whether *"a free system would allow [the individual] to sell himself into slavery"* and he answers *"I believe that it would."* [**Anarchy, State and Utopia**, p. 371] While some right-Libertarians do not agree with Nozick, there is no logical basis in their ideology for such disagreement.

The logic is simple, you cannot really own something unless you can sell it. Self-ownership is one of the cornerstones of laissez-faire capitalist ideology. Therefore, since you own yourself you can sell yourself.

(For Murray Rothbard's claims of the *"unenforceability, in libertarian theory, of voluntary slave contracts"* see **The Ethics of Liberty**, pp. 134–135 — of course, **other** libertarian theorists claim the exact opposite so *"libertarian theory"* makes no such claims, but nevermind! Essentially, his point revolves around the assertion that a person *"cannot, in nature, sell himself into slavery and have this sale enforced — for this would mean that his future will over his own body was being surrendered in advance"* and that if a *"labourer remains totally subservient to his master's will voluntarily, he is not yet a slave since his submission is voluntary."* [p. 40] However, as we noted in section 2, Rothbard emphasis on quitting fails to recognise that actual denial of will and control over ones own body that is explicit in wage labour. It is this failure that pro-slave contract "libertarians" stress — as we will see, they consider the slave contract as an extended wage contract. Moreover, a modern slave contract would likely take the form of a *"performance bond"* [p. 136] in which the slave agrees to perform X years labour or pay their master substantial damages. The threat of damages that enforces the contract and such a "contract" Rothbard does agree is enforceable — along with *"conditional exchange"* [p. 141] which could be another way of creating slave contracts.)

Nozick's defence of slavery should not come as a surprise to any one familiar with classical liberalism. An elitist ideology, its main rationale is to defend the liberty and power of property owners and justify unfree social relationships (such as government and wage labour) in terms of "consent." Nozick just takes it to its logical conclusion, a conclusion which Rothbard, while balking at the label used, does not actually disagree with.

This is because Nozick's argument is not new but, as with so many others, can be found in John Locke's work. The key difference is that Locke refused the term *"slavery"* and favoured *"drudgery"* as, for him, slavery mean a relationship *"between a lawful conqueror and a captive"* where the former has the power of life and death over the latter. Once a *"compact"* is agreed between them, *"an agreement for a limited power on the one side, and obedience on the other ... slavery ceases."* As long as the master could not kill the slave, then it was *"drudgery."* Like Nozick, he acknowledges that *"men did sell themselves; but, it is plain, this was only to drudgery, not to slavery: for, it is evident, the person sold was not under an absolute, arbitrary, despotical power: for the master could not have power to kill him, at any time, whom, at a certain time, he was obliged to let go free out of his service."* [Locke, **Second Treatise of Government**, Section 24] In other words, like Rothbard, voluntary slavery was fine but just call it something else.

Not that Locke was bothered by involuntary slavery. He was heavily involved in the slave trade. He owned shares in the "Royal Africa Company" which carried on the slave trade for England, making a profit when he sold them. He also held a significant share in another slave company, the "Bahama Adventurers." In the *"Second Treatise"*, Locke justified slavery in terms of *"Captives taken in a just war."* [Section 85] In other words, a war waged against aggressors. That, of course, had nothing to do with the **actual** slavery Locke profited from (slave raids were common, for example). Nor did his "liberal" principles stop him suggesting a constitution that would ensure that *"every freeman of Carolina shall have absolute power and authority over his Negro slaves."* The constitution itself was typically autocratic and hierarchical, designed explicitly to *"avoid erecting a numerous democracy."* [**The Works of John Locke**, vol. X, p. 196]

So the notion of contractual slavery has a long history within right-wing liberalism, although most refuse to call it by that name. It is of course simply embarrassment that stops Rothbard calling a spade a spade. He incorrectly assumes that slavery has to be involuntary. In fact, historically, voluntary slave contracts have been common (David Ellerman's **Property and Con-**

tract in Economics has an excellent overview). Any new form of voluntary slavery would be a "civilised" form of slavery and could occur when an individual would "agree" to sell themselves to themselves to another (as when a starving worker would "agree" to become a slave in return for food). In addition, the contract would be able to be broken under certain conditions (perhaps in return for breaking the contract, the former slave would have pay damages to his or her master for the labour their master would lose — a sizeable amount no doubt and such a payment could result in debt slavery, which is the most common form of "civilised" slavery. Such damages may be agreed in the contract as a "performance bond" or "conditional exchange").

In summary, right-Libertarians are talking about "civilised" slavery (or, in other words, civil slavery) and not forced slavery. While some may have reservations about calling it slavery, they agree with the basic concept that since people own themselves they can sell themselves as well as selling their labour for a lifetime.

We must stress that this is no academic debate. "Voluntary" slavery has been a problem in many societies and still exists in many countries today (particularly third world ones where bonded labour — i.e. where debt is used to enslave people — is the most common form). With the rise of sweat shops and child labour in many "developed" countries such as the USA, "voluntary" slavery (perhaps via debt and bonded labour) may become common in all parts of the world — an ironic (if not surprising) result of "freeing" the market and being indifferent to the actual freedom of those within it.

And it is interesting to note that even Murray Rothbard is not against the selling of humans. He argued that children are the property of their parents. They can (bar actually murdering them by violence) do whatever they please with them, even sell them on a *"flourishing free child market."* [**The Ethics of Liberty**, p. 102] Combined with a whole hearted support for child labour (after all, the child can leave its parents if it objects to working for them) such a "free child market" could easily become a "child slave market" — with entrepreneurs making a healthy profit selling infants to other entrepreneurs who could make profits from the toil of "their" children (and such a process did occur in 19th century Britain). Unsurprisingly, Rothbard ignores the possible nasty aspects of such a market in human flesh (such as children being sold to work in factories, homes and brothels). And, of course, such a market could see women "specialising" in producing children for it (the use of child labour during the Industrial Revolution actually made it economically sensible for families to have more children) and, perhaps, gluts and scarcities of babies due to changing market conditions. But this is besides the point.

Of course, this theoretical justification for slavery at the heart of an ideology calling itself "libertarianism" is hard for many right-Libertarians to accept. Some of the "anarcho"-capitalist type argue that such contracts would be very hard to enforce in their system of capitalism. This attempt to get out of the contradiction fails simply because it ignores the nature of the capitalist market. If there is a demand for slave contracts to be enforced, then companies will develop to provide that "service" (and it would be interesting to see how two "protection" firms, one defending slave contracts and another not, could compromise and reach a peaceful agreement over whether slave contracts were valid). Thus we could see a so-called "anarchist" or "free" society producing companies whose specific purpose was to hunt down escaped slaves (i.e. individuals in slave contracts who have not paid damages to their owners for freedom). Of course, perhaps Rothbard would claim that such slave contracts would be "outlawed" under his "general libertarian law code" but this is a denial of market "freedom". If slave contracts **are** "banned" then surely

this is paternalism, stopping individuals from contracting out their "labour services" to whom and however long they "desire". You cannot have it both ways.

So, ironically, an ideology proclaiming itself to support "liberty" ends up justifying and defending slavery. Indeed, for the right-libertarian the slave contract is an exemplification, not the denial, of the individual's liberty! How is this possible? How can slavery be supported as an expression of liberty? Simple, right-Libertarian support for slavery is a symptom of a **deeper** authoritarianism, namely their uncritical acceptance of contract theory. The central claim of contract theory is that contract is the means to secure and enhance individual freedom. Slavery is the antithesis to freedom and so, in theory, contract and slavery must be mutually exclusive. However, as indicated above, some contract theorists (past and present) have included slave contracts among legitimate contracts. This suggests that contract theory cannot provide the theoretical support needed to secure and enhance individual freedom. Why is this?

As Carole Pateman argues, *"contract theory is primarily about a way of creating social relations constituted by subordination, not about exchange."* Rather than undermining subordination, contract theorists justify modern subjection — *"contract doctrine has proclaimed that subjection to a master — a boss, a husband — is freedom."* [**The Sexual Contract**, p. 40 and p. 146] The question central to contract theory (and so right-Libertarianism) is not "are people free" (as one would expect) but "are people free to subordinate themselves in any manner they please." A radically different question and one only fitting to someone who does not know what liberty means.

Anarchists argue that not all contracts are legitimate and no free individual can make a contract that denies his or her own freedom. If an individual is able to express themselves by making free agreements then those free agreements must also be based upon freedom internally as well. Any agreement that creates domination or hierarchy negates the assumptions underlying the agreement and makes itself null and void. In other words, voluntary government is still government and the defining chararacteristic of an anarchy must be, surely, "no government" and "no rulers."

This is most easily seen in the extreme case of the slave contract. John Stuart Mill stated that such a contract would be "null and void." He argued that an individual may voluntarily choose to enter such a contract but in so doing *"he abdicates his liberty; he foregoes any future use of it beyond that single act. He therefore defeats, in his own case, the very purpose which is the justification of allowing him to dispose of himself…The principle of freedom cannot require that he should be free not to be free. It is not freedom, to be allowed to alienate his freedom."* He adds that *"these reasons, the force of which is so conspicuous in this particular case, are evidently of far wider application."* [quoted by Pateman, **Op. Cit.**, pp. 171–2]

And it is such an application that defenders of capitalism fear (Mill did in fact apply these reasons wider and unsurprisingly became a supporter of a market syndicalist form of socialism). If we reject slave contracts as illegitimate then, logically, we must also reject **all** contracts that express qualities similar to slavery (i.e. deny freedom) including wage slavery. Given that, as David Ellerman points out, *"the voluntary slave … and the employee cannot in fact take their will out of their intentional actions so that they could be 'employed' by the master or employer"* we are left with *"the rather implausible assertion that a person can vacate his or her will for eight or so hours a day for weeks, months, or years on end but cannot do so for a working lifetime."* [**Property and Contract in Economics**, p. 58]

The implications of supporting voluntary slavery is quite devastating for all forms of right-wing "libertarianism." This was proven by Ellerman when he wrote an extremely robust de-

fence of it under the pseudonym "J. Philmore" called **The Libertarian Case for Slavery** (first published in **The Philosophical Forum**, xiv, 1982). This classic rebuttal takes the form of "proof by contradiction" (or **reductio ad absurdum**) whereby he takes the arguments of right-libertarianism to their logical end and shows how they reach the memorably conclusion that the *"time has come for liberal economic and political thinkers to stop dodging this issue and to critically re-examine their shared prejudices about certain voluntary social institutions ... this critical process will inexorably drive liberalism to its only logical conclusion: libertarianism that finally lays the true moral foundation for economic and political slavery."*

Ellerman shows how, from a right-"libertarian" perspective there is a *"fundamental contradiction"* in a modern liberal society for the state to prohibit slave contracts. He notes that there *"seems to be a basic shared prejudice of liberalism that slavery is inherently involuntary, so the issue of genuinely voluntary slavery has received little scrutiny. The perfectly valid liberal argument that involuntary slavery is inherently unjust is thus taken to include voluntary slavery (in which case, the argument, by definition, does not apply). This has resulted in an abridgment of the freedom of contract in modern liberal society."* Thus it is possible to argue for a *"civilised form of contractual slavery."* ["J. Philmore,", **Op. Cit.**]

So accurate and logical was Ellerman's article that many of its readers were convinced it **was** written by a right-libertarian (including, we have to say, us!). One such writer was Carole Pateman, who correctly noted that *"[t]here is a nice historical irony here. In the American South, slaves were emancipated and turned into wage labourers, and now American contractarians argue that all workers should have the opportunity to turn themselves into civil slaves."* [**Op. Cit.**, p. 63]).

The aim of Ellerman's article was to show the problems that employment (wage labour) presents for the concept of self-government and how contract need not result in social relationships based on freedom. As "Philmore" put it, *"[a]ny thorough and decisive critique of voluntary slavery or constitutional nondemocratic government would carry over to the employment contract — which is the voluntary contractual basis for the free-market free-enterprise system. Such a critique would thus be a* ***reductio ad absurdum****."* As *"contractual slavery"* is an *"extension of the employer-employee contract,"* he shows that the difference between wage labour and slavery is the time scale rather than the principle or social relationships involved. [**Op. Cit.**] This explains, firstly, the early workers' movement called capitalism ***"wage slavery"*** (anarchists still do) and, secondly, why capitalists like Rothbard support the concept but balk at the name. It exposes the unfree nature of the system they support! While it is possible to present wage labour as "freedom" due to its "consensual" nature, it becomes much harder to do so when talking about slavery or dictatorship. Then the contradictions are exposed for all to see and be horrified by.

All this does not mean that we must reject free agreement. Far from it! Free agreement is **essential** for a society based upon individual dignity and liberty. There are a variety of forms of free agreement and anarchists support those based upon co-operation and self-management (i.e. individuals working together as equals). Anarchists desire to create relationships which reflect (and so express) the liberty that is the basis of free agreement. Capitalism creates relationships that deny liberty. The opposition between autonomy and subjection can only be maintained by modifying or rejecting contract theory, something that capitalism cannot do and so the right-wing Libertarian rejects autonomy in favour of subjection (and so rejects socialism in favour of capitalism).

The real contrast between anarchism and right-Libertarianism is best expressed in their respective opinions on slavery. Anarchism is based upon the individual whose individuality depends

upon the maintenance of free relationships with other individuals. If individuals deny their capacities for self-government from themselves through a contract the individuals bring about a qualitative change in their relationship to others — freedom is turned into mastery and subordination. For the anarchist, slavery is thus the paradigm of what freedom is **not**, instead of an exemplification of what it is (as right-Libertarians state). As Proudhon argued:

> *"If I were asked to answer the following question: What is slavery? and I should answer in one word, It is murder, my meaning would be understood at once. No extended argument would be required to show that the power to take from a man his thought, his will, his personality, is a power of life and death; and that to enslave a man is to kill him."* [**What is Property?**, p. 37]

In contrast, the right-Libertarian effectively argues that "I support slavery because I believe in liberty." It is a sad reflection of the ethical and intellectual bankruptcy of our society that such an "argument" is actually taken seriously by (some) people. The concept of "slavery as freedom" is far too Orwellian to warrant a critique — we will leave it up to right Libertarians to corrupt our language and ethical standards with an attempt to prove it.

From the basic insight that slavery is the opposite of freedom, the anarchist rejection of authoritarian social relations quickly follows (the right-wing Libertarians fear):

> *"Liberty is inviolable. I can neither sell nor alienate my liberty; every contract, every condition of a contract, which has in view the alienation or suspension of liberty, is null: the slave, when he plants his foot upon the soil of liberty, at that moment becomes a free man.. . Liberty is the original condition of man; to renounce liberty is to renounce the nature of man: after that, how could we perform the acts of man?"* [P.J. Proudhon, **Op. Cit.**, p. 67]

The employment contract (i.e. wage slavery) abrogates liberty. It is based upon inequality of power and *"exploitation is a consequence of the fact that the sale of labour power entails the worker's subordination."* [Carole Pateman, **Op. Cit.**, P. 149] Hence Proudhon's (and Mill's) support of self-management and opposition to capitalism — any relationship that resembles slavery is illegitimate and no contract that creates a relationship of subordination is valid. Thus in a truly anarchistic society, slave contracts would be unenforceable — people in a truly free (i.e. non-capitalist) society would **never** tolerate such a horrible institution or consider it a valid agreement. If someone was silly enough to sign such a contract, they would simply have to say they now rejected it in order to be free — such contracts are made to be broken and without the force of a law system (and private defence firms) to back it up, such contracts will stay broken.

The right-Libertarian support for slave contracts (and wage slavery) indicates that their ideology has little to do with liberty and far more to do with justifying property and the oppression and exploitation it produces. Their support and theoretical support for slavery indicates a deeper authoritarianism which negates their claims to be libertarians.

2.7 But surely abolishing capitalism would restrict liberty?

Many "anarcho"-capitalists and other supporters of capitalism argue that it would be "authoritarian" to restrict the number of alternatives that people can choose between by abolishing

capitalism. If workers become wage labourers, so it is argued, it is because they "value" other things more — otherwise they would not agree to the exchange. But such an argument ignores that reality of capitalism.

By **maintaining** capitalist private property, the options available to people **are** restricted. In a fully developed capitalist economy the vast majority have the "option" of selling their labour or starving/living in poverty — self-employed workers account for less than 10% of the working population. Usually, workers are at a disadvantage on the labour market due to the existence of unemployment and so accept wage labour because otherwise they would starve (see section 10.2 for a discussion on why this is the case). And as we argue in sections J.5.11 and J.5.12, even **if** the majority of the working population desired co-operative workplaces, a capitalist market will not provide them with that outcome due to the nature of the capitalist workplace (also see Juliet C. Schor's excellent book **The Overworked American** for a discussion of why workers desire for more free time is not reflected in the labour market). In other words, it is a myth to claim that wage labour exists or that workplaces are hierarchical because workers value other things — they are hierarchical because bosses have more clout on the market than workers and, to use Schor's expression, workers end up wanting what they get rather than getting what they want.

Looking at the reality of capitalism we find that because of inequality in resources (protected by the full might of the legal system, we should note) those with property get to govern those without it during working hours (and beyond in many cases). If the supporters of capitalism were actually concerned about liberty (as opposed to property) that situation would be abhorrent to them — after all, individuals can no longer exercise their ability to make decisions, choices, and are reduced to being order takers. If choice and liberty are the things we value, then the ability to make choices in all aspects of life automatically follows (including during work hours). However, the authoritarian relationships and the continual violation of autonomy wage labour implies are irrelevant to "anarcho"-capitalists (indeed, attempts to change this situation are denounced as violations of the autonomy of the property owner!). By purely concentrating on the moment that a contract is signed they blind themselves to the restricts of liberty that wage contracts create.

Of course, anarchists have no desire to **ban** wage labour — we aim to create a society within which people are not forced by circumstances to sell their liberty to others. In order to do this, anarchists propose a modification of property and property rights to ensure true freedom of choice (a freedom of choice denied to us by capitalism). As we have noted many times, "bilateral exchanges" can and do adversely effect the position of third parties if they result in the build-up of power/money in the hands of a few. And one of these adverse effects can be the restriction of workers options due to economic power. Therefore it is the supporter of capitalist who restricts options by supporting an economic system and rights framework that by their very workings reduce the options available to the majority, who then are "free to choose" between those that remain (see also section B.4). Anarchists, in contrast, desire to expand the available options by abolishing capitalist private property rights and removing inequalities in wealth and power that help restrict our options and liberties artificially.

So does an anarchist society have much to fear from the spread of wage labour within it? Probably not. If we look at societies such as the early United States or the beginnings of the Industrial Revolution in Britain, for example, we find that, given the choice, most people preferred to work for themselves. Capitalists found it hard to find enough workers to employ and the amount of wages that had to be offered to hire workers were so high as to destroy any profit

margins. Moreover, the mobility of workers and their "laziness" was frequently commented upon, with employers despairing at the fact workers would just work enough to make end meet and then disappear. Thus, left to the actions of the "free market," it is doubtful that wage labour would have spread. But it was not left to the "free market".

In response to these "problems", the capitalists turned to the state and enforced various restrictions on society (the most important being the land, tariff and money monopolies — see sections B.3 and 8). In free competition between artisan and wage labour, wage labour only succeeded due to the use of state action to create the required circumstances to discipline the labour force and to accumulate enough capital to give capitalists an edge over artisan production (see section 8 for more details).

Thus an anarchist society would not have to fear the spreading of wage labour within it. This is simply because would-be capitalists (like those in the early United States) would have to offer such excellent conditions, workers' control and high wages as to make the possibility of extensive profits from workers' labour nearly impossible. Without the state to support them, they will not be able to accumulate enough capital to give them an advantage within a free society. Moreover, it is somewhat ironic to hear capitalists talking about anarchism denying choice when we oppose wage labour considering the fact workers were not given any choice when the capitalists used the state to develop wage labour in the first place!

2.8 Why should we reject the "anarcho"-capitalist definitions of freedom and justice?

Simply because they lead to the creation of authoritarian social relationships and so to restrictions on liberty. A political theory which, when consistently followed, has evil or iniquitous consequences, is a bad theory.

For example, any theory that can justify slavery is obviously a bad theory — slavery does not cease to stink the moment it is seen to follow your theory. As right-Libertarians can justify slave contracts as a type of wage labour (see section 2.6) as well as numerous other authoritarian social relationships, it is obviously a bad theory.

It is worth quoting Noam Chomsky at length on this subject:

> "Consider, for example, the 'entitlement theory of justice'... [a]ccording to this theory, a person has a right to whatever he has acquired by means that are just. If, by luck or labour or ingenuity, a person acquires such and such, then he is entitled to keep it and dispose of it as he wills, and a just society will not infringe on this right.
>
> "One can easily determine where such a principle might lead. It is entirely possible that by legitimate means — say, luck supplemented by contractual arrangements 'freely undertaken' under pressure of need — one person might gain control of the necessities of life. Others are then free to sell themselves to this person as slaves, if he is willing to accept them. Otherwise, they are free to perish. Without extra question-begging conditions, the society is just.
>
> "The argument has all the merits of a proof that 2 + 2 = 5... Suppose that some concept of a 'just society' is advanced that fails to characterise the situation just described as unjust... Then one of two conclusions is in order. We may conclude that the concept is simply unimportant and of no interest as a guide to thought or action, since it fails

> to apply properly even in such an elementary case as this. Or we may conclude that the concept advanced is to be dismissed in that it fails to correspond to the pretheorectical notion that it intends to capture in clear cases. If our intuitive concept of justice is clear enough to rule social arrangements of the sort described as grossly unjust, then the sole interest of a demonstration that this outcome might be 'just' under a given 'theory of justice' lies in the inference by **reductio ad absurdum** to the conclusion that the theory is hopelessly inadequate. While it may capture some partial intuition regarding justice, it evidently neglects others.
>
> "The real question to be raised about theories that fail so completely to capture the concept of justice in its significant and intuitive sense is why they arouse such interest. Why are they not simply dismissed out of hand on the grounds of this failure, which is striking in clear cases? Perhaps the answer is, in part, the one given by Edward Greenberg in a discussion of some recent work on the entitlement theory of justice. After reviewing empirical and conceptual shortcomings, he observes that such work 'plays an important function in the process of . .. 'blaming the victim,' and of protecting property against egalitarian onslaughts by various non-propertied groups.' An ideological defence of privileges, exploitation, and private power will be welcomed, regardless of its merits.
>
> "These matters are of no small importance to poor and oppressed people here and elsewhere." [**The Chomsky Reader**, pp. 187–188]

It may be argued that the reductions in liberty associated with capitalism is not really an iniquitous outcome, but such an argument is hardly fitting for a theory proclaiming itself "libertarian." And the results of these authoritarian social relationships? To quote Adam Smith, under the capitalist division of labour the worker *"has no occasion to exert his understanding, or exercise his invention"* and *"he naturally loses, therefore, the habit of such exercise and generally becomes as stupid and ignorant as it is possible for a human creature to become."* The worker's mind falls *"into that drowsy stupidity, which, in a civilised society, seems to benumb the understanding of almost all of the inferior [sic!] ranks of people."* [cited by Chomsky, **Op. Cit.**, p. 186]

Of course, it may be argued that these evil effects of capitalist authority relations on individuals are also not iniquitous (or that the very real domination of workers by bosses is not really domination) but that suggests a desire to sacrifice real individuals, their hopes and dreams and lives to an abstract concept of liberty, the accumulative effect of which would be to impoverish all our lives. The kind of relationships we create **within** the organisations we join are of as great an importance as their voluntary nature. Social relations **shape** the individual in many ways, restricting their freedom, their perceptions of what freedom is and what their interests actually are. This means that, in order not to be farcical, any relationships we create must reflect in their internal workings the critical evaluation and self-government that created them in the first place. Sadly capitalist individualism masks structures of power and relations of domination and subordination within seemingly "voluntary" associations – it fails to note the relations of domination resulting from private property and so *"what has been called 'individualism' up to now has been only a foolish egoism which belittles the individual. Foolish because it was not individualism at all. It did not lead to what was established as a goal; that is the complete, broad, and most perfectly attainable development of individuality."* [Peter Kropotkin, **Selected Writings**, p. 297]

This right-Libertarian lack of concern for concrete individual freedom and individuality is a reflection of their support for "free markets" (or "economic liberty" as they sometimes phrase it). However, as Max Stirner noted, this fails to understand that *"[p]olitical liberty means that the **polis,** the State, is free; ... not, therefore, that I am free of the State... It does not mean **my** liberty, but the liberty of a power that rules and subjugates me; it means that one of my **despots** ... is free."* [**The Ego and Its Own**, p. 107] Thus the desire for "free markets" results in a blindness that while the market may be "free" the individuals within it may not be (as Stirner was well aware, *"[u]nder the **regime** of the commonality the labourers always fall into the hands of the possessors ... of the capitalists, therefore."* [**Op. Cit.**, p. 115])

In other words, right-libertarians give the greatest importance to an abstract concept of freedom and fail to take into account the fact that real, concrete freedom is the outcome of self-managed activity, solidarity and voluntary co-operation. For liberty to be real it must exist in all aspects of our daily life and cannot be contracted away without seriously effecting our minds, bodies and lives. Thus, the right-Libertarian's *"defence of freedom is undermined by their insistence on the concept of negative liberty, which all too easily translates in experience as the negation of liberty."* [Stephan L. Newman, **Liberalism as Wit's End**, p. 161]

Thus right-Libertarian's fundamental fallacy is that "contract" does not result in the end of power or domination (particularly when the bargaining power or wealth of the would-be contractors is not equal). As Carole Pateman notes, *"[i]ronically, the contractarian ideal cannot encompass capitalist employment. Employment is not a continual series of discrete contracts between employer and worker, but ... one contract in which a worker binds himself to enter an enterprise and follow the directions of the employer for the duration of the contract. As Huw Benyon has bluntly stated, 'workers are paid to obey.'"* [**The Sexual Contract**, p. 148] This means that *"the employment contract (like the marriage contract) is not an exchange; both contracts create social relations that endure over time — social relations of subordination."* [**Ibid.**]

Authority impoverishes us all and must, therefore, be combated wherever it appears. That is why anarchists oppose capitalism, so that there shall be *"no more government of man by man, by means of accumulation of capital."* [P-J Proudhon, cited by Woodcock in **Anarchism**, p. 110] If, as Murray Bookchin point it, *"the object of anarchism is to increase choice"* [**The Ecology of Freedom**, p. 70] then this applies both to when we are creating associations/relationships with others and when we are **within** these associations/relationships — i.e. that they are consistent with the liberty of all, and that implies participation and self-management **not** hierarchy. "Anarcho"-capitalism fails to understand this essential point and by concentrating purely on the first condition for liberty ensures a society based upon domination, oppression and hierarchy and not freedom.

It is unsurprising, therefore, to find that the basic unit of analysis of the "anarcho"-capitalist/right-libertarian is the transaction (the "trade," the "contract"). The freedom of the individual is seen as revolving around an act, the contract, and **not** in our relations with others. All the social facts and mechanisms that precede, surround and result from the transaction are omitted. In particular, the social relations that result from the transaction are ignored (those, and the circumstances that make people contract, are the two unmentionables of right-libertarianism).

For anarchists it seems strange to concentrate on the moment that a contract is signed and ignore the far longer time the contract is active for (as we noted in section A.2.14, if the worker is free when they sign a contract, slavery soon overtakes them). Yes, the voluntary nature of a decision is important, but so are the social relationships we experience due to those decisions.

For the anarchist, freedom is based upon the insight that other people, apart from (indeed, **because** of) having their own intrinsic value, also are "means to my end", that it is through their freedom that I gain my own — so enriching my life. As Bakunin put it:

> *"I who want to be free cannot be because all the men around me do not yet want to be free, and consequently they become tools of oppression against me."* [quoted by Errico Malatesta in **Anarchy**, p. 27]

Therefore anarchists argue that we must reject the right-Libertarian theories of freedom and justice because they end up supporting the denial of liberty as the expression of liberty. What this fails to recognise is that freedom is a product of social life and that (in Bakunin's words) *"[n]o man can achieve his own emancipation without at the same time working for the emancipation of all men around him. My freedom is the freedom of all since I am not truly free in thought and in fact, except when my freedom and my rights are confirmed and approved in the freedom and rights of all men who are my equals."* [**Ibid.**]

Other people give us the possibilities to develop our full human potentiality and thereby our freedom, so when we destroy the freedom of others we limit our own. *"To treat others and oneself as property,"* argues anarchist L. Susan Brown, *"objectifies the human individual, denies the unity of subject and object and is a negation of individual will ... even the freedom gained by the other is compromised by this relationship, for to negate the will of another to achieve one's own freedom destroys the very freedom one sought in the first place."* [**The Politics of Individualism**, p. 3]

Fundamentally, it is for this reason that anarchists reject the right-Libertarian theories of freedom and justice — it just does not ensure individual freedom or individuality.

3 Why do anarcho"-capitalists place little or no value on "equality"?

Murray Rothbard argues that *"the 'rightist' libertarian is not opposed to inequality."* [**For a New Liberty**, p. 47] In contrast, "leftist" libertarians oppose inequality because it has harmful effects on individual liberty.

Part of the reason "anarcho"-capitalism places little or no value on "equality" derives from their definition of that term. Murray Rothbard defines equality as:

> *"A and B are 'equal' if they are identical to each other with respect to a given attribute... There is one and only one way, then, in which any two people can really be 'equal' in the fullest sense: they must be identical in **all** their attributes."*

He then points out the obvious fact that *"men are not uniform,... . the species, mankind, is uniquely characterised by a high degree of variety, diversity, differentiation: in short, inequality."* [**Egalitarianism as a Revolt against Nature and Other Essays**, p. 4, p.5]

In others words, every individual is unique. Something no egalitarian has ever denied. On the basis of this amazing insight, he concludes that equality is impossible (except "equality of rights") and that the attempt to achieve "equality" is a "revolt against nature" — as if any anarchist had ever advocated such a notion of equality as being identical!

And so, because we are all unique, the outcome of our actions will not be identical and so social inequality flows from natural differences and not due to the economic system we live under. Inequality of endowment implies inequality of outcome and so social inequality. As individual differences are a fact of nature, attempts to create a society based on "equality" (i.e. making everyone identical in terms of possessions and so forth) is impossible and "unnatural."

Before continuing, we must note that Rothbard is destroying language to make his point and that he is not the first to abuse language in this particular way. In George Orwell's **1984**, the expression *"all men are created equal"* could be translated into Newspeak, but it would make as much sense as saying *"all men have red hair,"* an obvious falsehood (see *"The Principles of Newspeak"* Appendix). It's nice to know that "Mr. Libertarian" is stealing ideas from Big Brother, and for the same reason: to make critical thought impossible by restricting the meaning of words.

"Equality," in the context of political discussion, does not mean "identical," it usually means equality of rights, respect, worth, power and so forth. It does not imply treating everyone identically (for example, expecting an eighty year old man to do identical work to an eighteen violates treating both with respect as unique individuals). For anarchists, as Alexander Berkman writes, *"equality does not mean an equal amount but equal* ***opportunity****... Do not make the mistake of identifying equality in liberty with the forced equality of the convict camp. True anarchist equality implies freedom, not quantity. It does not mean that every one must eat, drink, or wear the same things, do the same work, or live in the same manner. Far from it: the very reverse, in fact. Individual needs and tastes differ, as appetites differ. It is* ***equal*** *opportunity to satisfy them that constitutes true equality. Far from levelling, such equality opens the door for the greatest possible variety of activity and development. For human character is diverse, and only the repression of this free diversity results in levelling, in uniformity and sameness. Free opportunity and acting out your individuality means development of natural dissimilarities and variations... . Life in freedom, in anarchy will do more than liberate man merely from his present political and economic bondage. That will be only the first step, the preliminary to a truly human existence."* [**The ABC of Anarchism**, p. 25]

Thus anarchists reject the Rothbardian-Newspeak definition of equality as meaningless within political discussion. No two people are identical and so imposing "identical" equality between them would mean treating them as **unequals**, i.e. not having equal worth or giving them equal respect as befits them as human beings and fellow unique individuals.

So what should we make of Rothbard's claim? It is tempting just to quote Rousseau when he argued *"it is ... useless to inquire whether there is any essential connection between the two inequalities [social and natural]; for this would be only asking, in other words, whether those who command are necessarily better than those who obey, and if strength of body or of mind, wisdom, or virtue are always found in particular individuals, in proportion to their power or wealth: a question fit perhaps to be discussed by slaves in the hearing of their masters, but highly unbecoming to reasonable and free men in search of the truth."* [**The Social Contract and Discourses**, p. 49] But a few more points should be raised.

The uniqueness of individuals has always existed but for the vast majority of human history we have lived in very egalitarian societies. If social inequality did, indeed, flow from natural inequalities then **all** societies would be marked by it. This is not the case. Indeed, taking a relatively recent example, many visitors to the early United States noted its egalitarian nature, something that soon changed with the rise of wage labour and industrial capitalism (a rise dependent upon state action, we must add, — see section 8). This implies that the society we live in (its rights framework, the social relationships it generates and so forth) has a far more of a

decisive impact on inequality than individual differences. Thus certain rights frameworks will tend to magnify "natural" inequalities (assuming that is the source of the initial inequality, rather than, say, violence and force). As Noam Chomsky argues:

> *"Presumably it is the case that in our 'real world' some combination of attributes is conducive to success in responding to 'the demands of the economic system' ... One might suppose that some mixture of avarice, selfishness, lack of concern for others, aggressiveness, and similar characteristics play a part in getting ahead [in capitalism]... Whatever the correct collection of attributes may be, we may ask what follows from the fact, if it is a fact, that some partially inherited combination of attributes tends to material success? All that follows . .. is a comment on our particular social and economic arrangements .. . The egalitarian might responds, in all such cases, that the social order should be changes so that the collection of attributes that tends to bring success no longer do so ...* " [**The Chomsky Reader**, p. 190]

So, perhaps, if we change society then the social inequalities we see today would disappear. It is more than probable that natural difference has been long ago been replaced with **social** inequalities, especially inequalities of property (which will tend to increase, rather than decrease, inequality). And as we argue in section 8 these inequalities of property were initially the result of force, **not** differences in ability. Thus to claim that social inequality flows from natural differences is false as most social inequality has flown from violence and force. This initial inequality has been magnified by the framework of capitalist property rights and so the inequality within capitalism is far more dependent upon, say, the existence of wage labour, rather than "natural" differences between individuals.

If we look at capitalism, we see that in workplaces and across industries many, if not most, unique individuals receive identical wages for identical work (although this often is not the case for women and blacks, who receive less wages than male, white workers). Similarly, capitalists have deliberately introduced wage inequalities and hierarchies for no other reason that to divide (and so rule) the workforce (see section D.10). Thus, if we assume egalitarianism **is** a revolt against nature, then much of capitalist economic life is in such a revolt (and when it is not, the "natural" inequalities have been imposed artificially by those in power).

Thus "natural" differences do not necessarily result in inequality as such. Given a different social system, "natural" differences would be encouraged and celebrated far wider than they are under capitalism (where, as we argued in section B.1, hierarchy ensures the crushing of individuality rather than its encouragement) without any change in social equality. The claim that "natural" differences generates social inequalities is question begging in the extreme — it takes the rights framework of society as a given and ignores the initial source of inequality in property and power. Indeed, inequality of outcome or reward is more likely to be influenced by social conditions rather than individual differences (as would be the case in a society based on wage labour or other forms of exploitation).

Another reason for "anarcho"-capitalist lack of concern for equality is that they think that *"liberty upsets patterns"* (see section 2.5, for example). It is argued that equality can only be maintained by restricting individual freedom to make exchanges or by taxation of income. However, what this argument fails to acknowledge is that inequality also restricts individual freedom (see next section, for example) and that the capitalist property rights framework is not the only one

possible. After all, money is power and inequalities in terms of power easily result in restrictions of liberty and the transformation of the majority into order takers rather than free producers. In other words, once a certain level of inequality is reached, property does not promote, but actually conflicts with, the ends which render private property legitimate. Moreover, Nozick (in his "liberty upsets patterns" argument) *"has produced ... an argument for unrestricted private property using unrestricted private property, and thus he begs the question he tries to answer."* [Andrew Kerhohan, *"Capitalism and Self-Ownership"*, from **Capitalism**, p. 71] For example, a worker employed by a capitalist cannot freely exchange the machines or raw materials they have been provided with to use but Nozick does not class this distribution of "restricted" property rights as infringing liberty (nor does he argue that wage slavery itself restricts freedom, of course).

So in response to the claim that equality could only be maintained by continuously interfering with people's lives, anarchists would say that the inequalities produced by capitalist property rights also involve extensive and continuous interference with people's lives. After all, as Bob Black notes *"[y]our foreman or supervisor gives you more or-else orders in a week than the police do in a decade"* nevermind the other effects of inequality such as stress, ill health and so on [**Libertarian as Conservative**]. Thus claims that equality involves infringing liberty ignores the fact that inequality also infringes liberty. A reorganisation of society could effectively minimise inequalities by eliminating the major source of such inequalities (wage labour) by self-management (see section I.5.12 for a discussion of "capitalistic acts" within an anarchist society). We have no desire to restrict free exchanges (after all, most anarchists desire to see the "gift economy" become a reality sooner or later) but we argue that free exchanges need not involve the unrestricted property rights Nozick assumes. As we argue in sections 2 and 3.1, inequality can easily led to the situation where self-ownership is used to justify its own negation and so unrestricted property rights may undermine the meaningful self-determination (what anarchists would usually call "freedom" rather than self-ownership) which many people intuitively understand by the term "self-ownership".

Thus, for anarchists, the "anarcho"-capitalist opposition to equality misses the point and is extremely question begging. Anarchists do not desire to make humanity "identical" (which would be impossible and a total denial of liberty **and** equality) but to make the social relationships between individuals equal in **power.** In other words, they desire a situation where people interact together without institutionalised power or hierarchy and are influenced by each other "naturally," in proportion to how the (individual) **differences** between (social) **equals** are applicable in a given context. To quote Michael Bakunin, *"[t]he greatest intelligence would not be equal to a comprehension of the whole. Thence results... the necessity of the division and association of labour. I receive and I give — such is human life. Each directs and is directed in his turn. Therefore there is no fixed and constant authority, but a continual exchange of mutual, temporary, and, above all, voluntary authority and subordination."* [**God and the State**, p. 33]

Such an environment can only exist within self-managed associations, for capitalism (i.e. wage labour) creates very specific relations and institutions of authority. It is for this reason anarchists are socialists (i.e. opposed to wage labour, the existence of a proletariat or working class). In other words, anarchists support equality precisely **because** we recognise that everyone is unique. If we are serious about "equality of rights" or "equal freedom" then conditions must be such that people can enjoy these rights and liberties. If we assume the right to develop one's capacities to the fullest, for example, then inequality of resources and so power within society destroys that

right simply because people do not have the means to freely exercise their capacities (they are subject to the authority of the boss, for example, during work hours).

So, in direct contrast to anarchism, right-Libertarianism is unconcerned about any form of equality except "equality of rights". This blinds them to the realities of life; in particular, the impact of economic and social power on individuals within society and the social relationships of domination they create. Individuals may be "equal" before the law and in rights, but they may not be free due to the influence of social inequality, the relationships it creates and how it affects the law and the ability of the oppressed to use it. Because of this, all anarchists insist that equality is essential for freedom, including those in the Individualist Anarchist tradition the "anarcho"-capitalist tries to co-opt — *"Spooner and Godwin insist that inequality corrupts freedom. Their anarchism is directed as much against inequality as against tyranny"* and *"[w]hile sympathetic to Spooner's individualist anarchism, they [Rothbard and David Friedman] fail to notice or conveniently overlook its egalitarian implications."* [Stephen L. Newman, **Liberalism at Wit's End**, p. 74, p. 76]

Why equality is important is discussed more fully in the next section. Here we just stress that without social equality, individual freedom is so restricted that it becomes a mockery (essentially limiting freedom of the majority to choosing **which** employer will govern them rather than being free within and outside work).

Of course, by defining "equality" in such a restrictive manner, Rothbard's own ideology is proved to be nonsense. As L.A. Rollins notes, *"Libertarianism, the advocacy of 'free society' in which people enjoy 'equal freedom' and 'equal rights,' is actually a specific form of egalitarianism. As such, Libertarianism itself is a revolt against nature. If people, by their very biological nature, are unequal in all the attributes necessary to achieving, and preserving 'freedom' and 'rights'... then there is no way that people can enjoy 'equal freedom' or 'equal rights'. If a free society is conceived as a society of 'equal freedom,' then there ain't no such thing as 'a free society'."* [**The Myth of Natural Law**, p. 36]

Under capitalism, freedom is a commodity like everything else. The more money you have, the greater your freedom. "Equal" freedom, in the Newspeak-Rothbardian sense, **cannot** exist! As for "equality before the law", its clear that such a hope is always dashed against the rocks of wealth and market power (see next section for more on this). As far as rights go, of course, both the rich and the poor have an "equal right" to sleep under a bridge (assuming the bridge's owner agrees of course!); but the owner of the bridge and the homeless have **different** rights, and so they cannot be said to have "equal rights" in the Newspeak-Rothbardian sense either. Needless to say, poor and rich will not "equally" use the "right" to sleep under a bridge, either.

Bob Black observes in **The Libertarian as Conservative** that *"[t]he time of your life is the one commodity you can sell but never buy back. Murray Rothbard thinks egalitarianism is a revolt against nature, but his day is 24 hours long, just like everybody else's."*

By twisting the language of political debate, the vast differences in power in capitalist society can be "blamed" not on an unjust and authoritarian system but on "biology" (we are all unique individuals, after all). Unlike genes (although biotechnology corporations are working on this, too!), human society **can** be changed, by the individuals who comprise it, to reflect the basic features we all share in common — our humanity, our ability to think and feel, and our need for freedom.

3.1 Why is this disregard for equality important?

Simply because a disregard for equality soon ends with liberty for the majority being negated in many important ways. Most "anarcho"-capitalists and right-Libertarians deny (or at best ignore) market power. Rothbard, for example, claims that economic power does not exist; what people call *"economic power"* is *"simply the right under freedom to refuse to make an exchange"* [**The Ethics of Liberty**, p. 222] and so the concept is meaningless.

However, the fact is that there are substantial power centres in society (and so are the source of hierarchical power and authoritarian social relations) which are **not the state.** The central fallacy of "anarcho"-capitalism is the (unstated) assumption that the various actors within an economy have relatively equal power. This assumption has been noted by many readers of their works. For example, Peter Marshall notes that *"'anarcho-capitalists' like Murray Rothbard assume individuals would have equal bargaining power in a [capitalist] market-based society"* [**Demanding the Impossible**, p. 46] George Walford also makes this clear in his comments on David Friedman's **The Machinery of Freedom**:

> "The private ownership envisages by the anarcho-capitalists would be very different from that which we know. It is hardly going too far to say that while the one is nasty, the other would be nice. In anarcho-capitalism there would be no National Insurance, no Social Security, no National Health Service and not even anything corresponding to the Poor Laws; there would be no public safety-nets at all. It would be a rigorously competitive society: work, beg or die. But as one reads on, learning that each individual would have to buy, personally, all goods and services needed, not only food, clothing and shelter but also education, medicine, sanitation, justice, police, all forms of security and insurance, even permission to use the streets (for these also would be privately owned), as one reads about all this a curious feature emerges: everybody always has enough money to buy all these things.
>
> "There are no public casual wards or hospitals or hospices, but neither is there anybody dying in the streets. There is no public educational system but no uneducated children, no public police service but nobody unable to buy the services of an efficient security firm, no public law but nobody unable to buy the use of a private legal system. Neither is there anybody able to buy much more than anybody else; no person or group possesses economic power over others.
>
> "No explanation is offered. The anarcho-capitalists simply take it for granted that in their favoured society, although it possesses no machinery for restraining competition (for this would need to exercise authority over the competitors and it is an **anarcho**- capitalist society) competition would not be carried to the point where anybody actually suffered from it. While proclaiming their system to be a competitive one, in which private interest rules unchecked, they show it operating as a co-operative one, in which no person or group profits at the cost of another." [**On the Capitalist Anarchists**]

This assumption of (relative) equality comes to the fore in Murray Rothbard's "Homesteading" concept of property (discussed in section 4.1). "Homesteading" paints a picture of individuals

and families doing into the wilderness to make a home for themselves, fighting against the elements and so forth. It does **not** invoke the idea of transnational corporations employing tens of thousands of people or a population without land, resources and selling their labour to others. Indeed, Rothbard argues that economic power does not exist (at least under capitalism; as we saw in section 2.1 he does make — highly illogical – exceptions). Similarly, David Friedman's example of a pro-death penalty and anti-death penalty "defence" firm coming to an agreement (see section 6.3) assumes that the firms have equal bargaining powers and resources — if not, then the bargaining process would be very one-sided and the smaller company would think twice before taking on the larger one in battle (the likely outcome if they cannot come to an agreement on this issue) and so compromise.

However, the right-libertarian denial of market power is unsurprising. The necessity, not the redundancy, of equality is required if the inherent problems of contract are not to become too obvious. If some individuals **are** assumed to have significantly more power than others, and if they are always self-interested, then a contract that creates equal partners is impossible — the pact will establish an association of masters and servants. Needless to say, the strong will present the contract as being to the advantage of both: the strong no longer have to labour (and become rich, i.e. even stronger) and the weak receive an income and so do not starve.

If freedom is considered as a function of ownership then it is very clear that individuals lacking property (outside their own body, of course) loses effective control over their own person and labour (which was, lets not forget, the basis of their equal natural rights). When ones bargaining power is weak (which is typically the case in the labour market) exchanges tend to magnify inequalities of wealth and power over time rather than working towards an equalisation.

In other words, "contract" need not replace power if the bargaining position and wealth of the would-be contractors are not equal (for, if the bargainers had equal power it is doubtful they would agree to sell control of their liberty/time to another). This means that "power" and "market" are not antithetical terms. While, in an abstract sense, all market relations are voluntary in practice this is not the case within a capitalist market. For example, a large company has a comparative advantage over small ones and communities which will definitely shape the outcome of any contract. For example, a large company or rich person will have access to more funds and so stretch out litigations and strikes until their opponents resources are exhausted. Or, if a local company is polluting the environment, the local community may put up with the damage caused out of fear that the industry (which it depends upon) would relocate to another area. If members of the community **did** sue, then the company would be merely exercising its property rights when it threatened to move to another location. In such circumstances, the community would "freely" consent to its conditions or face massive economic and social disruption. And, similarly, *"the landlords' agents who threaten to discharge agricultural workers and tenants who failed to vote the reactionary ticket"* in the 1936 Spanish election were just exercising their legitimate property rights when they threatened working people and their families with economic uncertainty and distress. [Murray Bookchin, **The Spanish Anarchists**, p. 260]

If we take the labour market, it is clear that the "buyers" and "sellers" of labour power are rarely on an equal footing (if they were, then capitalism would soon go into crisis — see section 10.2). In fact, competition *"in labour markets is typically skewed in favour of employers: it is a buyer's market. And in a buyer's, it is the sellers who compromise."* [Juliet B. Schor, **The Overworked American**, p. 129] Thus the ability to refuse an exchange weights most heavily on one class than

another and so ensures that "free exchange" works to ensure the domination (and so exploitation) of one party by the other.

Inequality in the market ensures that the decisions of the majority of within it are shaped in accordance with that needs of the powerful, not the needs of all. It was for this reason that the Individual Anarchist J.K. Ingalls opposed Henry George's proposal of nationalising the land. Ingalls was well aware that the rich could outbid the poor for leases on land and so the dispossession of the working classes would continue.

The market, therefore, does not end power or unfreedom — they are still there, but in different forms. And for an exchange to be truly voluntary, both parties must have equal power to accept, reject, or influence its terms. Unfortunately, these conditions are rarely meet on the labour market or within the capitalist market in general. Thus Rothbard's argument that economic power does not exist fails to acknowledge that the rich can out-bid the poor for resources and that a corporation generally has greater ability to refuse a contract (with an individual, union or community) than vice versa (and that the impact of such a refusal is such that it will encourage the others involved to "compromise" far sooner). And in such circumstances, formally free individuals will have to "consent" to be unfree in order to survive.

As Max Stirner pointed out in the 1840s, free competition *"is not 'free,' because I lack the **things** for competition."* [**The Ego and Its Own**, p. 262] Due to this basic inequality of wealth (of "things") we find that *"[u]nder the **regime** of the commonality the labourers always fall into the hands of the possessors ... of the capitalists, therefore. The labourer cannot **realise** on his labour to the extent of the value that it has for the customer."* [**Op. Cit.**, p. 115] Its interesting to note that even Stirner recognises that capitalism results in exploitation. And we may add that value the labourer does not *"realise"* goes into the hands of the capitalists, who invest it in more "things" and which consolidates and increases their advantage in "free" competition.

To quote Stephan L. Newman:

> *"Another disquieting aspect of the libertarians' refusal to acknowledge power in the market is their failure to confront the tension between freedom and autonomy... Wage labour under capitalism is, of course, formally free labour. No one is forced to work at gun point. Economic circumstance, however, often has the effect of force; it compels the relatively poor to accept work under conditions dictated by owners and managers. The individual worker retains freedom [i.e. negative liberty] but loses autonomy [positive liberty]."* [**Liberalism at Wit's End**, pp. 122–123]

(As an aside, we should point out that the full Stirner quote cited above is *"[u]nder the **regime** of the commonality the labourers always fall into the hands of the possessors, of those who have at their disposal some bit of the state domains (and everything possessible in State domain belongs to the State and is only a fief of the individual), especially money and land; of the capitalists, therefore. The labourer cannot **realise** on his labour to the extent of the value that it has for the customer."*

It could be argued that we misrepresenting Stirner by truncating the quote, but we feel that such a claim this is incorrect. Its clear from his book that Stirner is considering the "minimal" state (*"The State is a — commoners' State ... It protects man ...according to whether the rights entrusted to him by the State are enjoyed and managed in accordance with the will, that is, laws, of the State."* The State *"looks on indifferently as one grows poor and the other rich, unruffled by this alternation. As **individuals** they are really equal before its face."* [**Op. Cit.**, p. 115, p. 252]). As

"anarcho"-capitalists consider their system to be one of rights and laws (particularly property rights), we feel that its fair to generalise Stirner's comments into capitalism **as such** as opposed to "minimum state" capitalism. If we replace "State" by "libertarian law code" you will see what we mean. We have included this aside before any right-libertarians claim that we are misrepresenting Stirner' argument.)

If we consider "equality before the law" it is obvious that this also has limitations in an (materially) unequal society. Brian Morris notes that for Ayn Rand, *"[u]nder capitalism ... politics (state) and economics (capitalism) are separated ... This, of course, is pure ideology, for Rand's justification of the state is that it 'protects' private property, that is, it supports and upholds the economic power of capitalists by coercive means."* [**Ecology & Anarchism**, p. 189] The same can be said of "anarcho"-capitalism and its "protection agencies" and "general libertarian law code." If within a society a few own all the resources and the majority are dispossessed, then any law code which protects private property **automatically** empowers the owning class. Workers will **always** be initiating force if act against the code and so "equality before the law" reinforces inequality of power and wealth.

This means that a system of property rights protects the liberties of some people in a way which gives them an unacceptable degree of power over others. And this cannot be met merely by reaffirming the rights in question, we have to assess the relative importance of various kinds of liberty and other values we how dear.

Therefore right-libertarian disregard for equality is important because it allows "anarcho"-capitalism to ignore many important restrictions of freedom in society. In addition, it allows them to brush over the negative effects of their system by painting an unreal picture of a capitalist society without vast extremes of wealth and power (indeed, they often construe capitalist society in terms of an ideal — namely artisan production — that is really **pre**-capitalist and whose social basis has been eroded by capitalist development). Inequality shapes the decisions we have available and what ones we make:

> *"An 'incentive' is always available in conditions of substantial social inequality that ensure that the 'weak' enter into a contract. When social inequality prevails, questions arises about what counts as voluntary entry into a contract ... Men and women ... are now juridically free and equal citizens, but, in unequal social conditions, the possibility cannot be ruled out that some or many contracts create relationships that bear uncomfortable resemblances to a slave contract."* [Carole Pateman, **The Sexual Contract**, p. 62]

This ideological confusion of right-libertarianism can also be seen from their opposition to taxation. On the one hand, they argue that taxation is wrong because it takes money from those who "earn" it and gives it to the poor. On the other hand, "free market" capitalism is assumed to be a more equal society! If taxation takes from the rich and gives to the poor, how will "anarcho"-capitalism be more egalitarian? That equalisation mechanism would be gone (of course, it could be claimed that all great riches are purely the result of state intervention skewing the "free market" but that places all their "rags to riches" stories in a strange position). Thus we have a problem, either we have relative equality or we do not. Either we have riches, and so market power, or we do not. And its clear from the likes of Rothbard, "anarcho"-capitalism will not be without its millionaires (there is, after all, apparently nothing un-libertarian about *"organisation, hierarchy,*

wage-work, granting of funds by libertarian millionaires, and a libertarian party"). And so we are left with market power and so extensive unfreedom.

Thus, for a ideology that denounces egalitarianism as a *"revolt against nature"* it is pretty funny that they paint a picture of "anarcho"-capitalism as a society of (relative) equals. In other words, their propaganda is based on something that has never existed, and never will, namely an egalitarian capitalist society.

3.2 But what about "anarcho"-capitalist support for charity?

Yes, while being blind to impact of inequality in terms of economic and social power and influence, most right-libertarians **do** argue that the very poor could depend on charity in their system. But such a recognition of poverty does not reflect an awareness of the need for equality or the impact of inequality on the agreements we make. Quite the reverse in fact, as the existence of extensive inequality is assumed – after all, in a society of relative equals, poverty would not exist, nor would charity be needed.

Ignoring the fact that their ideology hardly promotes a charitable perspective, we will raise four points. Firstly, charity will not be enough to countermand the existence and impact of vast inequalities of wealth (and so power). Secondly, it will be likely that charities will be concerned with "improving" the moral quality of the poor and so will divide them into the "deserving" (i.e. obedient) and "undeserving" (i.e. rebellious) poor. Charity will be forthcoming to the former, those who agree to busy-bodies sticking their noses into their lives. In this way charity could become another tool of economic and social power (see Oscar Wilde's **The Soul of Man Under Socialism** for more on charity). Thirdly, it is unlikely that charity will be able to replace all the social spending conducted by the state — to do so would require a ten-fold increase in charitable donations (and given that most right-libertarians denounce the government for making them pay taxes to help the poor, it seems unlikely that they will turn round and **increase** the amount they give). And, lastly, charity is an implicate recognition that, under capitalism, no one has the right of life — its a privilege you have to pay for. That in itself is enough to reject the charity option. And, of course, in a system designed to secure the life and liberty of each person, how can it be deemed acceptable to leave the life and protection of even one individual to the charitable whims of others? (Perhaps it will be argued that individual's have the right to life, but not a right to be a parasite. This ignores the fact some people **cannot** work — babies and some handicapped people — and that, in a functioning capitalist economy, many people cannot find work all the time. Is it this recognition of that babies cannot work that prompts many right-libertarians to turn them into property? Of course, rich folk who have never done a days work in their lives are never classed as parasites, even if they inherited all their money). All things considered, little wonder that Proudhon argued that:

> "Even charitable institutions serve the ends of those in authority marvellously well.
>
> "Charity is the strongest chain by which privilege and the Government, bound to protect them, holds down the lower classes. With charity, sweeter to the heart of men, more intelligible to the poor man than the abstruse laws of Political Economy, one may dispense with justice." [**The General Idea of the Revolution**, pp. 69–70]

As noted, the right-libertarian (passing) acknowledgement of poverty does not mean that they recognise the existence of market power. They never ask themselves how can someone be free if

their social situation is such that they are drowning in a see of usury and have to sell their labour (and so liberty) to survive.

4 What is the right-libertarian position on private property?

Right libertarians are not interested in eliminating capitalist private property and thus the authority, oppression and exploitation which goes with it. It is true that they call for an end to the state, but this is not because they are concerned about workers being exploited or oppressed but because they don't want the state to impede capitalists' "freedom" to exploit and oppress workers even more than is the case now!

They make an idol of private property and claim to defend absolute, "unrestricted" property rights (i.e. that property owners can do anything they like with their property, as long as it does not damage the property of others. In particular, taxation and theft are among the greatest evils possible as they involve coercion against "justly held" property). They agree with John Adams that *"[t]he moment that idea is admitted into society that property is not as sacred as the Laws of God, and that there is not a force of law and public justice to protect it, anarchy and tyranny commence. Property must be sacred or liberty cannot exist."*

But in their celebration of property as the source of liberty they ignore the fact that private property is a source of "tyranny" in itself (see sections B.1 and B.4, for example — and please note that anarchists only object to private property, **not** individual possession, see section B.3.1). However, as much anarchists may disagree about other matters, they are united in condemning private property. Thus Proudhon argued that property was *"theft"* and *"despotism"* while Stirner indicated the religious and statist nature of private property and its impact on individual liberty when he wrote :

> "Property in the civic sense means **sacred** property, such that I must **respect** your property... Be it ever so little, if one only has somewhat of his own — to wit, a **respected** property: The more such owners... the more 'free people and good patriots' has the State.
>
> "Political liberalism, like everything religious, counts on **respect,** humaneness, the virtues of love... . For in practice people respect nothing, and everyday the small possessions are bought up again by greater proprietors, and the 'free people' change into day labourers." [**The Ego and Its Own**, p. 248]

Thus "anarcho"-capitalists reject totally one of the common (and so defining) features of all anarchist traditions — the opposition to capitalist property. From Individualist Anarchists like Tucker to Communist-Anarchists like Bookchin, anarchists have been opposed to what Godwin termed *"accumulated property."* This was because it was in *"direct contradiction"* to property in the form of *"the produce of his [the worker's] own industry"* and so it allows *"one man... [to] dispos[e] of the produce of another man's industry."* [**The Anarchist Reader**, pp. 129–131] Thus, for anarchists, capitalist property is a source exploitation and domination, **not** freedom (it undermines the freedom associated with possession by created relations of domination between owner and employee).

Hardly surprising then the fact that, according to Murray Bookchin, Murray Rothbard *"attacked me [Bookchin] as an anarchist with vigour because, as he put it, I am opposed to private property."* [**The Raven**, no. 29, p. 343]

We will discuss Rothbard's "homesteading" justification of property in the next section. However, we will note here one aspect of right-libertarian defence of "unrestricted" property rights, namely that it easily generates evil side effects such as hierarchy and starvation. As famine expert Amartya Sen notes:

> *"Take a theory of entitlements based on a set of rights of 'ownership, transfer and rectification.' In this system a set of holdings of different people are judged to be just (or unjust) by looking at past history, and not by checking the consequences of that set of holdings. But what if the consequences are recognisably terrible? .. .[R]efer[ing] to some empirical findings in a work on famines ... evidence [is presented] to indicate that in many large famines in the recent past, in which millions of people have died, there was no over-all decline in food availability at all, and the famines occurred precisely because of shifts in entitlement resulting from exercises of rights that are perfectly legitimate... . [Can] famines ... occur with a system of rights of the kind morally defended in various ethical theories, including Nozick's. I believe the answer is straightforwardly yes, since for many people the only resource that they legitimately possess, viz. their labour-power, may well turn out to be unsaleable in the market, giving the person no command over food ... [i]f results such as starvations and famines were to occur, would the distribution of holdings still be morally acceptable despite their disastrous consequences? There is something deeply implausible in the affirmative answer."* [**Resources, Values and Development**, pp. 311–2]

Thus "unrestricted" property rights can have seriously bad consequences and so the existence of "justly held" property need not imply a just or free society — far from it. The inequalities property can generate can have a serious on individual freedom (see section 3.1). Indeed, Murray Rothbard argued that the state was evil not because it restricted individual freedom but because the resources it claimed to own were not "justly" acquired. Thus right-libertarian theory judges property **not** on its impact on current freedom but by looking at past history. This has the interesting side effect of allowing its supporters to look at capitalist and statist hierarchies, acknowledge their similar negative effects on the liberty of those subjected to them but argue that one is legitimate and the other is not simply because of their history! As if this changed the domination and unfreedom that both inflict on people living today (see section 2.3 for further discussion and sections 2.8 and 4.2 for other examples of "justly acquired" property producing terrible consequences).

The defence of capitalist property does have one interesting side effect, namely the need arises to defend inequality and the authoritarian relationships inequality creates. In order to protect the private property needed by capitalists in order to continue exploiting the working class, "anarcho"-capitalists propose private security forces rather than state security forces (police and military) — a proposal that is equivalent to bringing back the state under another name.

Due to (capitalist) private property, wage labour would still exist under "anarcho"-capitalism (it is capitalism after all). This means that "defensive" force, a state, is required to "defend" exploitation, oppression, hierarchy and authority from those who suffer them. Inequality makes a

mockery of free agreement and "consent" (see section 3.1). As Peter Kropotkin pointed out long ago:

> *"When a workman sells his labour to an employer … it is a mockery to call that a free contract. Modern economists may call it free, but the father of political economy — Adam Smith — was never guilty of such a misrepresentation. As long as three-quarters of humanity are compelled to enter into agreements of that description, force is, of course, necessary, both to enforce the supposed agreements and to maintain such a state of things. Force — and a good deal of force — is necessary to prevent the labourers from taking possession of what they consider unjustly appropriated by the few… . The Spencerian party [proto-right-libertarians] perfectly well understand that; and while they advocate no force for changing the existing conditions, they advocate still more force than is now used for maintaining them. As to Anarchy, it is obviously as incompatible with plutocracy as with any other kind of -cracy."* [**Anarchism and Anarchist Communism**, pp. 52–53]

Because of this need to defend privilege and power, "anarcho"-capitalism is best called "private-state" capitalism. This will be discussed in more detail in section 6.

By advocating private property, right libertarians contradict many of their other claims. For example, they say that they support the right of individuals to travel where they like. They make this claim because they assume that only the state limits free travel. But this is a false assumption. Owners must agree to let you on their land or property (*"people only have the right to move to those properties and lands where the owners desire to rent or sell to them."* [Murray Rothbard, **The Ethics of Liberty**, p. 119]. There is no "freedom of travel" onto private property (including private roads). Therefore immigration may be just as hard under "anarcho"-capitalism as it is under statism (after all, the state, like the property owner, only lets people in whom it wants to let in). People will still have to get another property owner to agree to let them in before they can travel — exactly as now (and, of course, they also have to get the owners of the road to let them in as well). Private property, as can be seen from this simple example, is the state writ small.

One last point, this ignoring of ("politically incorrect") economic and other views of dead political thinkers and activists while claiming them as "libertarians" seems to be commonplace in right-Libertarian circles. For example, Aristotle (beloved by Ayn Rand) *"thought that only living things could bear fruit. Money, not a living thing, was by its nature barren, and any attempt to make it bear fruit (**tokos**, in Greek, the same word used for interest) was a crime against nature."* [Marcello de Cecco, quoted by Doug Henwood, **Wall Street**, p. 41] Such opposition to interest hardly fits well into capitalism, and so either goes unmentioned or gets classed as an "error" (although we could ask why Aristotle is in error while Rand is not). Similarly, individualist anarchist opposition to capitalist property and rent, interest and profits is ignored or dismissed as "bad economics" without realising that these ideas played a key role in their politics and in ensuring that an anarchy would not see freedom corrupted by inequality. To ignore such an important concept in a person's ideas is to distort the remainder into something it is not.

4.1 What is wrong with a "homesteading" theory of property?

So how do "anarcho"-capitalists justify property? Looking at Murray Rothbard, we find that he proposes a *"homesteading theory of property"*. In this theory it is argued that property comes

from occupancy and mixing labour with natural resources (which are assumed to be unowned). Thus the world is transformed into private property, for *"title to an unowned resource (such as land) comes properly only from the expenditure of labour to transform that resource into use."* [**The Ethics of Liberty**, p. 63]

Rothbard paints a conceptual history of individuals and families forging a home in the wilderness by the sweat of their labour (its tempting to rename his theory the *"immaculate conception of property"* as his conceptual theory is somewhat at odds with actual historical fact).

Sadly for Murray Rothbard, his "homesteading" theory was refuted by Proudhon in **What is Property?** in 1840 (along with many other justifications of property). Proudhon rightly argues that *"if the liberty of man is sacred, it is equally sacred in all individuals; that, if it needs property for its objective action, that is, for its life, the appropriation of material is equally necessary for all ... Does it not follow that if one individual cannot prevent another ... from appropriating an amount of material equal to his own, no more can he prevent individuals to come."* And if all the available resources are appropriated, and the owner *"draws boundaries, fences himself in ... Here, then, is a piece of land upon which, henceforth, no one has a right to step, save the proprietor and his friends ... Let [this]... multiply, and soon the people ... will have nowhere to rest, no place to shelter, no ground to till. They will die at the proprietor's door, on the edge of that property which was their birthright."* [**What is Property?**, pp. 84–85, p. 118]

As Rothbard himself noted in respect to the aftermath of slavery (see section 2.1), not having access to the means of life places one the position of unjust dependency on those who do. Rothbard's theory fails because for *"[w]e who belong to the proletaire class, property excommunicates us!"* [P-J Proudhon, **Op. Cit.**, p. 105] and so the vast majority of the population experience property as theft and despotism rather than as a source of liberty and empowerment (which possession gives). Thus, Rothbard's account fails to take into account the Lockean Proviso (see section B.3.4) and so, for all its intuitive appeal, ends up justifying capitalist and landlord domination (see next section on why the Lockean Proviso is important).

It also seems strange that while (correctly) attacking social contract theories of the state as invalid (because *"no past generation can bind later generations"* [**Op. Cit.**, p. 145]) he fails to see he is doing **exactly that** with his support of private property (similarly, Ayn Rand argued that *"[a]ny alleged 'right' of one man, which necessitates the violation of the right of another, is not and cannot be a right"* [**Capitalism: The Unknown Ideal**, p. 325] but obviously appropriating land does violate the rights of others to walk, use or appropriate that land). Due to his support for appropriation and inheritance, he is clearly ensuring that future generations are **not** born as free as the first settlers were (after all, they cannot appropriate any land, it is all taken!). If future generations cannot be bound by past ones, this applies equally to resources and property rights. Something anarchists have long realised — there is no defensible reason why those who first acquired property should control its use by future generations.

However, if we take Rothbard's theory at face value we find numerous problems with it. If title to unowned resources comes via the *"expenditure of labour"* on it, how can rivers, lakes and the oceans be appropriated? The banks of the rivers can be transformed, but can the river itself? How can you mix your labour with water? "Anarcho"-capitalists usually blame pollution on the fact that rivers, oceans, and so forth are unowned, but how can an individual "transform" water by their labour? Also, does fencing in land mean you have "mixed labour" with it? If so then transnational corporations can pay workers to fence in vast tracks of virgin land (such as rainforest) and so come to "own" it. Rothbard argues that this is not the case (he expresses

opposition to *"arbitrary claims"*). He notes that it is **not** the case that *"the first discoverer ... could properly lay claim to [a piece of land] ... [by] laying out a boundary for the area."* He thinks that *"their claim would still be no more than the boundary **itself**, and not to any of the land within, for only the boundary will have been transformed and used by men"* [**Op. Cit.**, p. 50f]

However, if the boundary **is** private property and the owner refuses others permission to cross it, then the enclosed land is inaccessible to others! If an "enterprising" right-libertarian builds a fence around the only oasis in a desert and refuses permission to cross it to travellers unless they pay his price (which is everything they own) then the person **has** appropriated the oasis without "transforming" it by his labour. The travellers have the choice of paying the price or dying (and the oasis owner is well within his rights letting them die). Given Rothbard's comments, it is probable that he will claim that such a boundary is null and void as it allows "arbitrary" claims — although this position is not at all clear. After all, the fence builder **has** transformed the boundary and "unrestricted" property rights is what right-libertarianism is all about.

And, of course, Rothbard ignores the fact of economic power — a transnational corporation can "transform" far more virgin resources in a day than a family could in a year. Transnational's "mixing their labour" with the land does not spring into mind reading Rothbard's account of property growth, but in the real world that is what will happen.

If we take the question of wilderness (a topic close to many eco-anarchists' and deep ecologists' hearts) we run into similar problems. Rothbard states clearly that *"libertarian theory must invalidate [any] claim to ownership"* of land that has *"never been transformed from its natural state"* (he presents an example of an owner who has left a piece of his *"legally owned"* land untouched). If another person appears who **does** transform the land, it becomes *"justly owned by another"* and the original owner cannot stop her (and should the original owner *"use violence to prevent another settler from entering this never-used land and transforming it into use"* they also become a *"criminal aggressor"*). Rothbard also stresses that he is **not** saying that land must continually be in use to be valid property [**Op. Cit.**, pp. 63–64] (after all, that would justify landless workers seizing the land from landowners during a depression and working it themselves).

Now, where does that leave wilderness? In response to ecologists who oppose the destruction of the rainforest, "anarcho"-capitalists suggest that they put their money where their mouth is and **buy** rainforest land. In this way, it is claimed, rainforest will be protected (see section B.5 for why such arguments are nonsense). As ecologists desire the rainforest **because it is wilderness** they are unlikely to "transform" it by human labour (its precisely that they want to stop). From Rothbard's arguments it is fair to ask whether logging companies have a right to "transform" the virgin wilderness owned by ecologists, after all it meets Rothbard's criteria (it is still wilderness). Perhaps it will be claimed that fencing off land "transforms" it (hardly what you imagine "mixing labour" with to mean, but nevermind) — but that allows large companies and rich individuals to hire workers to fence in vast tracks of land (and recreate the land monopoly by a "libertarian" route). But as we noted above, fencing off land does not seem to imply that it becomes property in Rothbard's theory. And, of course, fencing in areas of rainforest disrupts the local eco-system — animals cannot freely travel, for example — which, again, is what ecologists desire to stop. Would Rothbard accept a piece of paper as "transforming" land? We doubt it (after all, in his example the wilderness owner **did** legally own it) – and so most ecologists will have a hard time in "anarcho"-capitalism (wilderness is just not an option).

As an aside, we must note that Rothbard fails to realise — and this comes from his worship of the market and his "Austrian economics" — is that people value many things which do not

appear on the market. He claims that wilderness is *"valueless unused natural objects"* (for it people valued them, they would use — i.e. appropriate — them). But unused things may be of **considerable** value to people, wilderness being a classic example. And if something **cannot** be transformed into private property, does that mean people do not value it? For example, people value community, stress free working environments, meaningful work — if the market cannot provide these, does that mean they do not value them? Of course not (see Juliet Schor's **The Overworked American** on how working people's desire for shorter working hours was not transformed into options on the market).

Moreover, Rothbard's "homesteading" theory actually violates his support for unrestricted property rights. What if a property owner **wants** part of her land to remain wilderness? Their desires are violated by the "homesteading" theory (unless, of course, fencing things off equals "transforming" them, which it apparently does not). How can companies provide wilderness holidays to people if they have no right to stop settlers (including large companies) "homesteading" that wilderness? And, of course, where does Rothbard's theory leave hunter-gather or nomad societies. They **use** the resources of the wilderness, but they do not "transform" them (in this case you cannot easily tell if virgin land is empty or being used as a resource). If a troop of nomads find its traditionally used, but natural, oasis appropriated by a homesteader what are they to do? If they ignore the homesteaders claims he can call upon his "defence" firm to stop them — and then, in true Rothbardian fashion, the homesteader can refuse to supply water to them unless they hand over all their possessions (see section 4.2 on this). And if the history of the United States (which is obviously the model for Rothbard's theory) is anything to go by, such people will become "criminal aggressors" and removed from the picture.

Which is another problem with Rothbard's account. It is completely ahistoric (and so, as we noted above, is more like an *"immaculate conception of property"*). He has transported "capitalist man" into the dawn of time and constructed a history of property based upon what he is trying to justify (not surprising, as he does this with his "Natural Law" theory too — see section 7). What **is** interesting to note, though, is that the **actual** experience of life on the US frontier (the historic example Rothbard seems to want to claim) was far from the individualistic framework he builds upon it and (ironically enough) it was destroyed by the development of capitalism.

As Murray Bookchin notes, *"the independence that the New England yeomanry enjoyed was itself a function of the co-operative social base from which it emerged. To barter home-grown goods and objects, to share tools and implements, to engage in common labour during harvesting time in a system of mutual aid, indeed, to help new-comers in barn-raising, corn-husking, log-rolling, and the like, was the indispensable cement that bound scattered farmsteads into a united community."* [**The Third Revolution**, vol. 1, p. 233] Bookchin quotes David P. Szatmary (author of a book on Shay' Rebellion) stating that it was a society based upon *"co-operative, community orientated interchanges"* and not a *"basically competitive society."* [**Ibid.**]

Into this non-capitalist society came capitalist elements. Market forces and economic power soon resulted in the transformation of this society. Merchants asked for payment in specie which (and along with taxes) soon resulted in indebtedness and the dispossession of the homesteaders from their land and goods. In response Shay's rebellion started, a rebellion which was an important factor in the centralisation of state power in America to ensure that popular input and control over government were marginalised and that the wealthy elite and their property rights were protected against the many (see Bookchin, **Op. Cit.**, for details). Thus the homestead sys-

tem was undermined, essentially, by the need to pay for services in specie (as demanded by merchants).

So while Rothbard's theory as a certain appeal (reinforced by watching too many Westerns, we imagine) it fails to justify the "unrestricted" property rights theory (and the theory of freedom Rothbard derives from it). All it does is to end up justifying capitalist and landlord domination (which is probably what it was intended to do).

4.2 Why is the "Lockean Proviso" important?

Robert Nozick, in his work **Anarchy, State, and Utopia** presented a case for private property rights that was based on what he termed the *"Lockean Proviso"* — namely that common (or unowned) land and resources could be appropriated by individuals as long as the position of others is not worsen by so doing. However, if we **do** take this Proviso seriously private property rights cannot be defined (see section B.3.4 for details). Thus Nozick's arguments in favour of property rights fail.

Some right-libertarians, particularly those associated with the Austrian school of economics argue that we must reject the Lockean Proviso (probably due to the fact it can be used to undermine the case for absolute property rights). Their argument goes as follows: if an individual appropriates and uses a previously unused resource, it is because it has value to him/her, as an individual, to engage in such action. The individual has stolen nothing because it was previously unowned and we cannot know if other people are better or worse off, all we know is that, for whatever reason, they did not appropriate the resource (*"If latecomers are worse off, well then that is their proper assumption of risk in this free and uncertain world. There is no longer a vast frontier in the United States, and there is no point crying over the fact."* [Murray Rothbard, **The Ethics of Liberty**, p. 240]).

Hence the appropriation of resources is an essentially individualistic, asocial act — the requirements of others are either irrelevant or unknown. However, such an argument fails to take into account **why** the Lockean Proviso has such an appeal. When we do this we see that rejecting it leads to massive injustice, even slavery.

However, let us start with a defence of rejecting the Proviso from a leading Austrian economist:

> *"Consider ... the case ... of the unheld sole water hole in the desert (which **everyone** in a group of travellers knows about), which one of the travellers, by racing ahead of the others, succeeds in appropriating ... [This] clearly and unjustly violates the Lockean proviso... For use, however, this view is by no means the only one possible. We notice that the energetic traveller who appropriated all the water was not doing anything which (always ignoring, of course, prohibitions resting on the Lockean proviso itself) the other travellers were not equally free to do. The other travellers, too, could have raced ahead ... [they] did **not** bother to race for the water ... It does not seem obvious that these other travellers can claim that they were **hurt** by an action which they could themselves have easily taken"* [Israel M. Kirzner, *"Entrepreneurship, Entitlement, and Economic Justice"*, pp. 385–413, in **Reading Nozick**, p. 406]

Murray Rothbard, we should note, takes a similar position in a similar example, arguing that *"the owner [of the sole oasis] is scarcely being 'coercive'; in fact he is supplying a vital service, and*

should have the right to refuse a sale or charge whatever the customers will pay. The situation may be unfortunate for the customers, as are many situations in life." [**The Ethics of Liberty**, p. 221] (Rothbard, we should note, is relying to the right-libertarian von Hayek who — to his credit – does maintain that this is a coercive situation; but as others, including other right-libertarians, point out, he has to change his definition of coercion/freedom to do so — see Stephan L. Newman's **Liberalism at Wit's End**, pp. 130–134 for an excellent summary of this debate).

Now, we could be tempted just to rant about the evils of the right libertarian mind-frame but we will try to present a clam analysis of this position. Now, what Kirzner (and Rothbard et al) fails to note is that without the water the other travellers will die in a matter of days. The monopolist has the power of life and death over his fellow travellers. Perhaps he hates one of them and so raced ahead to ensure their death. Perhaps he just recognised the vast power that his appropriation would give him and so, correctly, sees that the other travellers would give up all their possessions and property to him in return for enough water to survive.

Either way, its clear that perhaps the other travellers did not *"race ahead"* because they were ethical people — they would not desire to inflict such tyranny on others because they would not like it inflicted upon them.

Thus we can answer Kirzner's question — *"What ... is so obviously acceptable about the Lockean proviso... ?"* [**Ibid.**]

It is the means by which human actions are held accountable to social standards and ethics. It is the means by which the greediest, most evil and debased humans are stopped from dragging the rest of humanity down to their level (via a "race to the bottom") and inflicting untold tyranny and domination on their fellow humans. An ideology that could consider the oppression which could result from such an appropriation as "supplying a vital service" and any act to remove this tyranny as "coercion" is obviously a very sick ideology. And we may note that the right-libertarian position on this example is a good illustration of the dangers of deductive logic from assumptions (see section 1.3 for more on this right-libertarian methodology) — after all W. Duncan Reekie, in his introduction to Austrian Economics, states that *"[t]o be intellectually consistent one must concede his absolute right to the oasis."* [**Markets, Entrepreneurs and Liberty**, p. 181] To place ideology before people is to ensure humanity is placed on a Procrustean bed.

Which brings us to another point. Often right-libertarians say that anarchists and other socialists are "lazy" or "do not want to work". You could interpret Kirzner's example as saying that the other travellers are "lazy" for not rushing ahead and appropriating the oasis. But this is false. For under capitalism you can only get rich by exploiting the labour of others via wage slavery or, within a company, get better pay by taking "positions of responsibility" (i.e. management positions). If you have an ethical objection to treating others as objects ("means to an end") then these options are unavailable to you. Thus anarchists and other socialists are not "lazy" because they are not rich — they just have no desire to get rich off the labour and liberty of others (as expressed in their opposition to private property and the relations of domination it creates). In other words, Anarchism is not the "politics of envy"; it is the politics of liberty and the desire to treat others as "ends in themselves".

Rothbard is aware of what is involved in accepting the Lockean Proviso – namely the existence of private property (*"Locke's proviso may lead to the outlawry of **all** private property of land, since one can always say that the reduction of available land leaves everyone else .. . worse off"*, **The Ethics of Liberty**, p. 240 — see section B.3.4 for a discussion on why the Proviso **does** imply the end of capitalist property rights). Which is why he, and other right-libertarians, reject it. Its

simple. Either you reject the Proviso and embrace capitalist property rights (and so allow one class of people to be dispossessed and another empowered at their expense) or you reject private property in favour of possession and liberty. Anarchists, obviously, favour the latter option.

As an aside, we should point out that (following Stirner) the would-be monopolist is doing nothing wrong (as such) in attempting to monopolise the oasis. He is, after all, following his self-interest. However, what is objectionable is the right-libertarian attempt to turn thus act into a "right" which must be respected by the other travellers. Simply put, if the other travellers gang up and dispose of this would be tyrant then they are right to do so — to argue that this is a violation of the monopolists "rights" is insane and an indication of a slave mentality (or, following Rousseau, that the others are *"simple"*). Of course, if the would-be monopolist has the necessary **force** to withstand the other travellers then his property then the matter is closed — might makes right. But to worship rights, even when they obviously result in despotism, is definitely a case of *"spooks in the head"* and "man is created for the Sabbath" not "the Sabbath is created for man."

4.3 How does private property effect individualism?

Private property is usually associated by "anarcho"-capitalism with individualism. Usually private property is seen as the key way of ensuring individualism and individual freedom (and that private property is the expression of individualism). Therefore it is useful to indicate how private property can have a serious impact on individualism.

Usually right-libertarians contrast the joys of "individualism" with the evils of "collectivism" in which the individual is sub-merged into the group or collective and is made to work for the benefit of the group (see any Ayn Rand book or essay on the evils of collectivism).

But what is ironic is that right-libertarian ideology creates a view of industry which would (perhaps) shame even the most die-hard fan of Stalin. What do we mean? Simply that right-libertarians stress the abilities of the people at the top of the company, the owner, the entrepreneur, and tend to ignore the very real subordination of those lower down the hierarchy (see, again, any Ayn Rand book on the worship of business leaders). In the Austrian school of economics, for example, the entrepreneur is considered the driving force of the market process and tend to abstract away from the organisations they govern. This approach is usually followed by right-libertarians. Often you get the impression that the accomplishments of a firm are the personal triumphs of the capitalists, as though their subordinates are merely tools not unlike the machines on which they labour.

We should not, of course, interpret this to mean that right-libertarians believe that entrepreneurs run their companies single-handedly (although you do get that impression sometimes!). But these abstractions help hide the fact that the economy is overwhelmingly interdependent and organised hierarchically within industry. Even in their primary role as organisers, entrepreneurs depend on the group. A company president can only issue general guidelines to his managers, who must inevitably organise and direct much of their departments on their own. The larger a company gets, the less personal and direct control an entrepreneur has over it. They must delegate out an increasing share of authority and responsibility, and is more dependent than ever on others to help him run things, investigate conditions, inform policy, and make recommendations. Moreover, the authority structures are from the "top-down" — indeed the firm is essentially a command economy, with all members part of a collective working on a common plan to achieve a common goal (i.e. it is essentially collectivist in

nature — which means it is not too unsurprising that Lenin argued that state socialism could be considered as one big firm or office and why the system he built on that model was so horrific).

So the firm (the key component of the capitalist economy) is marked by a distinct **lack** of individualism, a lack usually ignored by right libertarians (or, at best, considered as "unavoidable"). As these firms are hierarchical structures and workers are paid to obey, it does make **some** sense — in a capitalist environment — to assume that the entrepreneur is the main actor, but as an individualistic model of activity it fails totally. Perhaps it would not be unfair to say that capitalist individualism celebrates the entrepreneur because this reflects a hierarchical system in which for the one to flourish, the many must obey? (Also see section 1.1).

Capitalist individualism does not recognise the power structures that exist within capitalism and how they affect individuals. In Brian Morris' words, what they fail *"to recognise is that most productive relations under capitalism allow little scope for creativity and self-expression on the part of workers; that such relationships are not equitable; nor are they freely engaged in for the mutual benefit of both parties, for workers have no control over the production process or over the product of their labour. Rand [like other right-libertarians] misleadingly equates trade, artistic production and wage-slavery... [but] wage-slavery ... is quite different from the trade principle"* as it is a form of *"exploitation."* [**Ecology & Anarchism**, p. 190]

He further notes that *"[s]o called trade relations involving human labour are contrary to the egoist values Rand [and other capitalist individualists] espouses — they involve little in the way of independence, freedom, integrity or justice."* [**Ibid.**, p. 191]

Moreover, capitalist individualism actually **supports** authority and hierarchy. As Joshua Chen and Joel Rogers point out, the *"achievement of short-run material satisfaction often makes it irrational [from an individualist perspective] to engage in more radical struggle, since that struggle is by definition against those institutions which provide one's current gain."* In other words, to rise up the company structure, to "better oneself," (or even get a good reference) you cannot be a pain in the side of management — obedient workers do well, rebel workers do not.

Thus the hierarchical structures help develop an "individualistic" perspective which actually reinforces those authority structures. This, as Cohn and Rogers notes, means that *"the structure in which [workers] find themselves yields less than optimal social results from their isolated but economically rational decisions."* [quoted by Alfie Kohn, **No Contest**, p. 67, p. 260f]

Steve Biko, a black activist murdered by the South African police in the 1970s, argued that *"the most potent weapon of the oppressor is the mind of the oppressed."* And this is something capitalists have long recognised. Their investment in "Public Relations" and "education" programmes for their employees shows this clearly, as does the hierarchical nature of the firm. By having a ladder to climb, the firm rewards obedience and penalises rebellion. This aims at creating a mind-set which views hierarchy as good and so helps produce servile people.

This is why anarchists would agree with Alfie Kohn when he argues that *"the individualist worldview is a profoundly conservative doctrine: it inherently stifles change."* [**Ibid.**, p. 67] So, what is the best way for a boss to maintain his or her power? Create a hierarchical workplace and encourage capitalist individualism (as capitalist individualism actually works **against** attempts to increase freedom from hierarchy). Needless to say, such a technique cannot work forever — hierarchy also encourages revolt — but such divide and conquer can be **very** effective.

And as anarchist author Michael Moorcock put it, *"Rugged individualism also goes hand in hand with a strong faith in paternalism — albeit a tolerant and somewhat distant paternalism — and many otherwise sharp-witted libertarians seem to see nothing in the morality of a John Wayne*

Western to conflict with their views. Heinlein's paternalism is at heart the same as Wayne's... To be an anarchist, surely, is to reject authority but to accept self-discipline and community responsibility. To be a rugged individualist a la Heinlein and others is to be forever a child who must obey, charm and cajole to be tolerated by some benign, omniscient father: Rooster Coburn shuffling his feet in front of a judge he respects for his office (but not necessarily himself) in True Grit." [**Starship Stormtroopers**]

One last thing, don't be fooled into thinking that individualism or concern about individuality — not **quite** the same thing — is restricted to the right, they are not. For example, the *"individualist theory of society ... might be advanced in a capitalist or in an anti-capitalist form ... the theory as developed by critics of capitalism such as Hodgskin and the anarchist Tucker saw ownership of capital by a few as an obstacle to genuine individualism, and the individualist ideal was realisable only through the free association of labourers (Hodgskin) or independent proprietorship (Tucker)."* [David Miller, **Social Justice**, pp. 290–1]

And the reason why social anarchists oppose capitalism is that it creates a **false** individualism, an abstract one which crushes the individuality of the many and justifies (and supports) hierarchical and authoritarian social relations. In Kropotkin's words, *"what has been called 'individualism' up to now has been only a foolish egoism which belittles the individual. It did not led to what it was established as a goal: that is the complete, broad, and most perfectly attainable development of individuality."* The new individualism desired by Kropotkin *"will not consist ... in the oppression of one's neighbour ... [as this] reduced the [individualist] ...to the level of an animal in a herd."* [**Selected Writings**, p, 295, p. 296]

4.4 How does private property affect relationships?

Obviously, capitalist private property affects relationships between people by creating structures of power. Property, as we have argued all through this FAQ, creates relationships based upon domination — and this cannot help but produce servile tendencies within those subject to them (it also produces rebellious tendencies as well, the actual ratio between the two tendencies dependent on the individual in question and the community they are in). As anarchists have long recognised, power corrupts — both those subjected to it and those who exercise it.

While few, if any, anarchists would fail to recognise the importance of possession — which creates the necessary space all individuals need to be themselves — they all agree that private property corrupts this liberatory aspect of "property" by allowing relationships of domination and oppression to be built up on top of it. Because of this recognition, all anarchists have tried to equalise property and turn it back into possession.

Also, capitalist individualism actively builds barriers between people. Under capitalism, money rules and individuality is expressed via consumption choices (i.e. money). But money does not encourage an empathy with others. As Frank Stronach (chair of Magna International, a Canadian auto-parts maker that shifted its production to Mexico) put it, *"[t]o be in business your first mandate is to make money, and money has no heart, no soul, conscience, homeland."* [cited by Doug Henwood, **Wall Street**, p. 113] And for those who study economics, it seems that this dehumanising effect also strikes them as well:

> "Studying economics also seems to make you a nastier person. Psychological studies have shown that economics graduate students are more likely to 'free ride' — shirk

> contributions to an experimental 'public goods' account in the pursuit of higher private returns — than the general public. Economists also are less generous that other academics in charitable giving. Undergraduate economics majors are more likely to defect in the classic prisoner's dilemma game that are other majors. And on other tests, students grow less honest — expressing less of a tendency, for example, to return found money — after studying economics, but not studying a control subject like astronomy.
>
> "This is no surprise, really. Mainstream economics is built entirely on a notion of self-interested individuals, rational self-maximisers who can order their wants and spend accordingly. There's little room for sentiment, uncertainty, selflessness, and social institutions. Whether this is an accurate picture of the average human is open to question, but there's no question that capitalism as a system and economics as a discipline both reward people who conform to the model." [Doug Henwood, **Op. Cit.**, p, 143]

Which, of course, highlights the problems within the "trader" model advocated by Ayn Rand. According to her, the trader is **the** example of moral behaviour — you have something I want, I have something you want, we trade and we both benefit and so our activity is self-interested and no-one sacrifices themselves for another. While this has **some** intuitive appeal it fails to note that in the real world it is a pure fantasy. The trader wants to get the best deal possible for themselves and if the bargaining positions are unequal then one person will gain at the expense of the other (if the "commodity" being traded is labour, the seller may not even have the option of not trading at all). The trader is only involved in economic exchange, and has no concern for the welfare of the person they are trading with. They are a bearer of things, **not** an individual with a wide range of interests, concerns, hopes and dreams. These are irrelevant, unless you can make money out of them of course! Thus the trader is often a manipulator and outside novels it most definitely is a case of "buyer beware!"

If the trader model is taken as the basis of interpersonal relationships, economic gain replaces respect and empathy for others. It replaces human relationships with relationships based on things — and such a mentality does not encompass how interpersonal relationships affect both you and the society you life in. In the end, it impoverishes society and individuality. Yes, any relationship must be based upon self-interest (mutual aid is, after all, something we do because we benefit from it in some way) but the trader model presents such a **narrow** self-interest that it is useless and actively impoverishes the very things it should be protecting — individuality and interpersonal relationships (see section I.7.4 on how capitalism does not protect individuality).

4.5 Does private property co-ordinate without hierarchy?

It is usually to find right-libertarians maintain that private property (i.e. capitalism) allows economic activity to be co-ordinated by non-hierarchical means. In other words, they maintain that capitalism is a system of large scale co-ordination without hierarchy. These claims follow the argument of noted right-wing, "free market" economist Milton Friedman who contrasts *"central planning involving the use of coercion — the technique of the army or the modern totalitarian state"* with *"voluntary co-operation between individuals — the technique of the marketplace"* as

two distinct ways of co-ordinating the economic activity of large groups (*"millions"*) of people. [**Capitalism and Freedom**, p. 13].

However, this is just playing with words. As they themselves point out the internal structure of a corporation or capitalist company is **not** a "market" (i.e. non-hierarchical) structure, it is a "non-market" (hierarchical) structure of a market participant (see section 2.2). However "market participants" are part of the market. In other words, capitalism is **not** a system of co-ordination without hierarchy because it does contain hierarchical organisations which **are an essential part of the system**!

Indeed, the capitalist company **is** a form of central planning and shares the same "technique" as the army. As the pro-capitalist writer Peter Drucker noted in his history of General Motors, *"[t]here is a remarkably close parallel between General Motors' scheme of organisation and those of the two institutions most renowned for administrative efficiency: that of the Catholic Church and that of the modern army .. ."* [quoted by David Enger, **Apostles of Greed**, p. 66]. And so capitalism is marked by a series of totalitarian organisations — and since when was totalitarianism liberty enhancing? Indeed, many "anarcho"-capitalists actually celebrate the command economy of the capitalist firm as being more "efficient" than self-managed firms (usually because democracy stops action with debate). The same argument is applied by the Fascists to the political sphere. It does not change much — nor does it become less fascistic — when applied to economic structures. To state the obvious, such glorification of workplace dictatorship seems somewhat at odds with an ideology calling itself "libertarian" or "anarchist". Is dictatorship more liberty enhancing to those subject to it than democracy? Anarchists doubt it (see section A.2.11 for details).

In order to claim that capitalism co-ordinates individual activity without hierarchy right-libertarians have to abstract from individuals and how they interact **within** companies and concentrate purely on relationships **between** companies. This is pure sophistry. Like markets, companies require at least two or more people to work — both are forms of social co-operation. If co-ordination within companies is hierarchical, then the system they work within is based upon hierarchy. To claim that capitalism co-ordinates without hierarchy is simply false — its based on hierarchy and authoritarianism. Capitalist companies are based upon denying workers self-government (i.e. freedom) during work hours. The boss tells workers what to do, when to do, how to do and for how long. This denial of freedom is discussed in greater depth in sections B.1 and B.4.

Because of the relations of power it creates, opposition to capitalist private property (and so wage labour) and the desire to see it ended is an essential aspect of anarchist theory. Due to its ideological blind spot with regards to apparently "voluntary" relations of domination and oppression created by the force of circumstances (see section 2 for details), "anarcho"-capitalism considers wage labour as a form of freedom and ignore its fascistic aspects (when not celebrating those aspects). Thus "anarcho"-capitalism is not anarchist. By concentrating on the moment the contract is signed, they ignore that freedom is restricted during the contract itself. While denouncing (correctly) the totalitarianism of the army, they ignore it in the workplace. But factory fascism is just as freedom destroying as the army or political fascism.

Due to this basic lack of concern for freedom, "anarcho"-capitalists cannot be considered as anarchists. Their total lack of concern about factory fascism (i.e. wage labour) places them totally outside the anarchist tradition. Real anarchists have always been aware of that private property

and wage labour restriction freedom and desired to create a society in which people would be able to avoid it. In other words, where **all** relations are non-hierarchical and truly co-operative.

To conclude, to claim that private property eliminates hierarchy is false. Nor does capitalism co-ordinate economic activities without hierarchical structures. For this reason anarchists support co-operative forms of production rather than capitalistic forms.

5 Will privatising "the commons" increase liberty?

"Anarcho"-capitalists aim for a situation in which *"no land areas, no square footage in the world shall remain 'public,'"* in other words **everything** will be *"privatised."* [Murray Rothbard, **Nations by Consent**, p. 84] They claim that privatising "the commons" (e.g. roads, parks, etc.) which are now freely available to all will increase liberty. Is this true? We have shown before why the claim that privatisation can protect the environment is highly implausible (see section E.2). Here we will concern ourselves with private ownership of commonly used "property" which we all take for granted and pay for with taxes.

Its clear from even a brief consideration of a hypothetical society based on "privatised" roads (as suggested by Murray Rothbard in **For a New Liberty**, pp. 202–203 and David Friedman in **The Machinery of Freedom**, pp. 98–101) that the only increase of liberty will be for the ruling elite. As "anarcho"-capitalism is based on paying for what one uses, privatisation of roads would require some method of tracking individuals to ensure that they pay for the roads they use. In the UK, for example, during the 1980s the British Tory government looked into the idea of toll-based motorways. Obviously having toll-booths on motorways would hinder their use and restrict "freedom," and so they came up with the idea of tracking cars by satellite. Every vehicle would have a tracking device installed in it and a satellite would record where people went and which roads they used. They would then be sent a bill or have their bank balances debited based on this information (in the fascist city-state/company town of Singapore such a scheme **has** been introduced).

If we extrapolate from this example to a system of **fully** privatised "commons," it would clearly require all individuals to have tracking devices on them so they could be properly billed for use of roads, pavements, etc. Obviously being tracked by private firms would be a serious threat to individual liberty. Another, less costly, option would be for private guards to randomly stop and question car-owners and individuals to make sure they had paid for the use of the road or pavement in question. "Parasites" would be arrested and fined or locked up. Again, however, being stopped and questioned by uniformed individuals has more in common with police states than liberty. Toll-boothing **every** street would be highly unfeasible due to the costs involved and difficulties for use that it implies. Thus the idea of privatising roads and charging drivers to gain access seems impractical at best and distinctly freedom endangering if implemented at worse.

Of course, the option of owners letting users have free access to the roads and pavements they construct and run would be difficult for a profit-based company. No one could make a profit in that case. If companies paid to construct roads for their customers/employees to use, they would be financially hindered in competition with other companies that did not, and thus would be unlikely to do so. If they restricted use purely to their own customers, the tracking problem appears again.

Some may object that this picture of extensive surveillance of individuals would not occur or be impossible. However, Murray Rothbard (in a slightly different context) argued that technology would be available to collate information about individuals. He argued that *"[i]t should be pointed out that modern technology makes even more feasible the collection and dissemination of information about people's credit ratings and records of keeping or violating their contracts or arbitration agreements. Presumably, an anarchist [sic!] society would see the expansion of this sort of dissemination of data."* [*"Society Without A State"*, in **Nomos XIX**, Pennock and Chapman (eds.), p. 199] So, perhaps, with the total privatisation of society we would also see the rise of private Big Brothers, collecting information about individuals for use by property owners. The example of the **Economic League** (a British company who provided the "service" of tracking the political affiliations and activities of workers for employers) springs to mind.

And, of course, these privatisation suggestions ignore differences in income and market power. If, for example, variable pricing is used to discourage road use at times of peak demand (to eliminate traffic jams at rush-hour) as is suggested both by Murray Rothbard and David Friedman, then the rich will have far more "freedom" to travel than the rest of the population. And we may even see people having to go into debt just to get to work or move to look for work.

Which raises another problem with notion of total privatisation, the problem that it implies the end of freedom of travel. Unless you get permission or (and this seems more likely) pay for access, you will not be able to travel **anywhere.** As Rothbard **himself** makes clear, "anarcho"-capitalism means the end of the right to roam or even travel. He states that *"it became clear to me that a totally privatised country would not have open borders at all. If every piece of land in a country were owned ... no immigrant could enter there unless invited to enter and allowed to rent, or purchase, property."* [**Nations by Consent**, p. 84] What happens to those who cannot **afford** to pay for access is not addressed (perhaps, being unable to exit a given capitalist's land they will become bonded labourers? Or be imprisoned and used to undercut workers' wages via prison labour? Perhaps they will just be shot as trespassers? Who can tell?). Nor is it addressed how this situation actually **increases** freedom. For Rothbard, a *"totally privatised country would be as closed as the particular inhabitants and property owners [**not** the same thing, we must point out] desire. It seems clear, then, that the regime of open borders that exists **de facto** in the US really amounts to a compulsory opening by the central state... and does not genuinely reflect the wishes of the proprietors."* [**Op. Cit.**, p. 85] Of course, the wishes of **non**-proprietors (the vast majority) do not matter in the slightest. Thus, it is clear, that with the privatisation of "the commons" the right to roam, to travel, would become a privilege, subject to the laws and rules of the property owners. This can hardly be said to **increase** freedom for anyone bar the capitalist class.

Rothbard acknowledges that *"in a fully privatised world, access rights would obviously be a crucial part of land ownership."* [**Nations by Consent**, p. 86] Given that there is no free lunch, we can imagine we would have to pay for such "rights." The implications of this are obviously unappealing and an obvious danger to individual freedom. The problem of access associated with the idea of privatising the roads can only be avoided by having a "right of passage" encoded into the "general libertarian law code." This would mean that road owners would be required, by law, to let anyone use them. But where are "absolute" property rights in this case? Are the owners of roads not to have the same rights as other owners? And if "right of passage" is enforced, what would this mean for road owners when people sue them for car-pollution related illnesses? (The right of those injured by pollution to sue polluters is the main way "anarcho"-capitalists propose to protect the environment. See sections E.2 and E.3). It is unlikely that

those wishing to bring suit could find, never mind sue, the millions of individual car owners who could have potentially caused their illness. Hence the road-owners would be sued for letting polluting (or unsafe) cars onto "their" roads. The road-owners would therefore desire to restrict pollution levels by restricting the right to use their property, and so would resist the "right of passage" as an "attack" on their "absolute" property rights. If the road-owners got their way (which would be highly likely given the need for "absolute" property rights and is suggested by the variable pricing way to avoid traffic jams mentioned above) and were able to control who used their property, freedom to travel would be **very** restricted and limited to those whom the owner considered "desirable." Indeed, Murray Rothbard supports such a regime (*"In the free [sic!] society, they [travellers] would, in the first instance, have the right to travel only on those streets whose owners agree to have them there"* [**The Ethics of Liberty**, p. 119]). The threat to liberty in such a system is obvious — to all but Rothbard and other right-libertarians, of course.

To take another example, let us consider the privatisation of parks, streets and other public areas. Currently, individuals can use these areas to hold political demonstrations, hand out leaflets, picket and so on. However, under "anarcho"-capitalism the owners of such property can restrict such liberties if they desire, calling such activities "initiation of force" (although they cannot explain how speaking your mind is an example of "force"). Therefore, freedom of speech, assembly and a host of other liberties we take for granted would be reduced (if not eliminated) under a right-"libertarian" regime. Or, taking the case of pickets and other forms of social struggle, its clear that privatising "the commons" would only benefit the bosses. Strikers or other activists picketing or handing out leaflets in shopping centre's are quickly ejected by private security even today. Think about how much worse it would become under "anarcho"-capitalism when the whole world becomes a series of malls — it would be impossible to hold a picket when the owner of the pavement objects, for example (as Rothbard himself argues, **Op. Cit.**, p. 132) and if the owner of the pavement also happens to be the boss being picketed, then workers' rights would be zero. Perhaps we could also see capitalists suing working class organisations for littering their property if they do hand out leaflets (so placing even greater stress on limited resources).

The I.W.W. went down in history for its rigorous defence of freedom of speech because of its rightly famous "free speech" fights in numerous American cities and towns. Repression was inflicted upon wobblies who joined the struggle by "private citizens," but in the end the I.W.W. won. Consider the case under "anarcho"-capitalism. The wobblies would have been "criminal aggressors" as the owners of the streets have refused to allow "undesirables" to use them to argue their case. If they refused to acknowledge the decree of the property owners, private cops would have taken them away. Given that those who controlled city government in the historical example were the wealthiest citizens in town, its likely that the same people would have been involved in the fictional ("anarcho"-capitalist) account. Is it a good thing that in the real account the wobblies are hailed as heroes of freedom but in the fictional one they are "criminal aggressors"? Does converting public spaces into private property **really** stop restrictions on free speech being a bad thing?

Of course, Rothbard (and other right-libertarians) are aware that privatisation will not remove restrictions on freedom of speech, association and so on (while, at the same time, trying to portray themselves as supporters of such liberties!). However, for right-libertarians such restrictions are of no consequence. As Rothbard argues, any *"prohibitions would not be state imposed, but would simply be requirements for residence or for use of some person's or community's land area."* [**Nations by Consent**, p. 85] Thus we yet again see the blindness of right-libertarians to the

commonality between private property and the state. The state also maintains that submitting to its authority is the requirement for taking up residence in its territory (see also section 2.3 for more on this). As Benjamin Tucker noted, the state can be defined as (in part) *"the assumption of sole authority over a given area and all within it."* [**The Individualist Anarchists**, p. 24] If the property owners can determine "prohibitions" (i.e. laws and rules) for those who use the property then they are the *"sole authority over a given area and all within it,"* i.e. a state. Thus privatising "the commons" means subjecting the non-property owners to the rules and laws of the property owners — in effect, privatising the state and turning the world into a series of Monarchies and oligarchies without the pretence of democracy and democratic rights.

These examples can hardly be said to be increasing liberty for society as a whole, although "anarcho" capitalists seem to think they would. So far from **increasing** liberty for all, then, privatising the commons would only increase it for the ruling elite, by giving them yet another monopoly from which to collect income and exercise their power over. It would **reduce** freedom for everyone else. As Peter Marshall notes, *"[i]n the name of freedom, the anarcho-capitalists would like to turn public spaces into private property, but freedom does not flourish behind high fences protected by private companies but expands in the open air when it is enjoyed by all"* [**Demanding the Impossible**, p. 564].

Little wonder Proudhon argued that *"if the public highway is nothing but an accessory of private property; if the communal lands are converted into private property; if the public domain, in short, is guarded, exploited, leased, and sold like private property — what remains for the proletaire? Of what advantage is it to him that society has left the state of war to enter the regime of police?"* [**System of Economic Contradictions**, p. 371]

6 Is "anarcho"-capitalism against the state?

No. Due to its basis in private property, "anarcho"-capitalism implies a class division of society into bosses and workers. Any such division will require a state to maintain it. However, it need not be the same state as exists now. Regarding this point, "anarcho"-capitalism plainly advocates "defence associations" to protect property. For the "anarcho"-capitalist, however, these private companies are not states. For anarchists, they most definitely are.

According to Murray Rothbard [*"Society Without A State"*, in **Nomos XIX**, Pennock and Chapman, eds., p. 192.], a state must have one or both of the following characteristics:

He makes the same point in **The Ethics of Liberty** [p. 171].

Instead of this, the "anarcho"-capitalist thinks that people should be able to select their own "defence companies" (which would provide the needed police) and courts from the free market in "defence" which would spring up after the state monopoly has been eliminated. These companies *"all... would have to abide by the basic law code"* [*"Society Without A State"*, p. 206]. Thus a *"general libertarian law code"* would govern the actions of these companies. This "law code" would prohibit coercive aggression at the very least, although to do so it would have to specify what counted as legitimate property, how said can be owned and what actually constitutes aggression. Thus the law code would be quite extensive.

How is this law code to be actually specified? Would these laws be democratically decided? Would they reflect common usage (i.e. custom)? "supply and demand"? "Natural law"? Given the strong dislike of democracy shown by "anarcho"-capitalists, we think we can safely say that

some combination of the last two options would be used. Murray Rothbard, as noted in section 1.4, opposed the individualist anarchist principle that juries would judge both the facts and the law, suggesting instead that *"Libertarian lawyers and jurists"* would determine a *"rational and objective code of libertarian legal principles and procedures."* The judges in his system would *"not [be] making the law but finding it on the basis of agreed-upon principles derived either from custom or reason."* [*"Society without a State"*, **Op. Cit.**, p. 206] David Friedman, on the other hand, argues that different defence firms would sell their own laws. [**The Machinery of Freedom**, p. 116] It is sometimes acknowledged that non-libertarian laws may be demanded (and supplied) in such a market.

Around this system of "defence companies" is a free market in "arbitrators" and "appeal judges" to administer justice and the "basic law code." Rothbard believes that such a system would see *"arbitrators with the best reputation for efficiency and probity...[being] chosen by the various parties in the market...[and] will come to be given an increasing amount of business."* [Rothbard, **Op. Cit.**, p.199] Judges *"will prosper on the market in proportion to their reputation for efficiency and impartiality."* [**Op. Cit.**, p. 204]

Therefore, like any other company, arbitrators would strive for profits and wealth, with the most successful ones becoming *"prosperous."* Of course, such wealth would have no impact on the decisions of the judges, and if it did, the population (in theory) are free to select any other judge (although, of course, they would also *"strive for profits and wealth"* — which means the choice of character may be somewhat limited! – and the laws which they were using to guide their judgements would be enforcing capitalist rights).

Whether or not this system would work as desired is discussed in the following sections. We think that it will not. Moreover, we will argue that "anarcho"-capitalist "defence companies" meet not only the criteria of statehood we outlined in section B.2, but also Rothbard's own criteria for the state, quoted above.

As regards the anarchist criterion, it is clear that "defence companies" exist to defend private property; that they are hierarchical (in that they are capitalist companies which defend the power of those who employ them); that they are professional coercive bodies; and that they exercise a monopoly of force over a given area (the area, initially, being the property of the person or company who is employing the "association"). If, as Ayn Rand noted (using a Weberian definition of the state) a government is an institution *"that holds the exclusive power to **enforce** certain rules of conduct in a given geographical area"* [**Capitalism: The Unknown Ideal**, p. 239] then these "defence companies" are the means by which the property owner (who exercises a monopoly to determine the rules governing their property) enforce their rules.

For this (and other reasons), we should call the "anarcho"-capitalist defence firms "private states" — that is what they are — and "anarcho"-capitalism "private state" capitalism.

Before discussing these points further, it is necessary to point out a relatively common fallacy of "anarcho"-capitalists. This is the idea that "defence" under the system they advocate means defending people, not territorial areas. This, for some, means that defence companies are not "states." However, as people and their property and possessions do not exist merely in thought but on the Earth, it is obvious that these companies will be administering "justice" over a given area of the planet. It is also obvious, therefore, that these "defence associations" will operate over a (property-owner defined) area of land and enforce the property-owner's laws, rules and regulations. The deeply anti-libertarian, indeed fascistic, aspects of this "arrangement" will be examined in the following sections.

6.1 What's wrong with this "free market" justice?

It does not take much imagination to figure out whose interests *"prosperous"* arbitrators, judges and defence companies would defend: their own, as well as those who pay their wages — which is to say, other members of the rich elite. As the law exists to defend property, then it (by definition) exists to defend the power of capitalists against their workers.

Rothbard argues that the *"judges"* would *"not [be] making the law but finding it on the basis of agreed-upon principles derived either from custom or reason"* [Rothbard, **Op. Cit.**, p. 206]. However, this begs the question: **whose** reason? **whose** customs? Do individuals in different classes share the same customs? The same ideas of right and wrong? Would rich and poor desire the same from a *"basic law code"*? Obviously not. The rich would only support a code which defended their power over the poor.

Although only *"finding"* the law, the arbitrators and judges still exert an influence in the "justice" process, an influence not impartial or neutral. As the arbitrators themselves would be part of a profession, with specific companies developing within the market, it does not take a genius to realise that when "interpreting" the "basic law code," such companies would hardly act against their own interests as companies. In addition, if the "justice" system was based on "one dollar, one vote," the "law" would best defend those with the most "votes" (the question of market forces will be discussed in section 6.3). Moreover, even if "market forces" would ensure that "impartial" judges were dominant, all judges would be enforcing a **very** partial law code (namely one that defended **capitalist** property rights). Impartiality when enforcing partial laws hardly makes judgements less unfair.

Thus, due to these three pressures — the interests of arbitrators/judges, the influence of money and the nature of the law — the terms of "free agreements" under such a law system would be tilted in favour of lenders over debtors, landlords over tenants, employers over employees, and in general, the rich over the poor, just as we have today. This is what one would expect in a system based on "unrestricted" property rights and a (capitalist) free market. A similar tendency towards the standardisation of output in an industry in response to influences of wealth can be seen from the current media system (see section D.3 — How does wealth influence the mass media?)

Some "anarcho"-capitalists, however, claim that just as cheaper cars were developed to meet demand, so cheaper defence associations and "people's arbitrators" would develop on the market for the working class. In this way impartiality will be ensured. This argument overlooks a few key points:

Firstly, the general "libertarian" law code would be applicable to **all** associations, so they would have to operate within a system determined by the power of money and of capital. The law code would reflect, therefore, property **not** labour and so "socialistic" law codes would be classed as "outlaw" ones. The options then facing working people is to select a firm which best enforced the **capitalist** law in their favour. And as noted above, the impartial enforcement of a biased law code will hardly ensure freedom or justice for all.

Secondly, in a race between a Jaguar and a Volkswagen Beetle, who is more likely to win? The rich would have "the best justice money can buy," as they do now. Members of the capitalist class would be able to select the firms with the best lawyers, best private cops and most resources. Those without the financial clout to purchase quality "justice" would simply be out of luck — such is the "magic" of the marketplace.

Thirdly, because of the tendency toward concentration, centralisation, and oligopoly under capitalism (due to increasing capital costs for new firms entering the market, as discussed in section C.4), a few companies would soon dominate the market — with obvious implications for "justice."

Different firms will have different resources. In other words, in a conflict between a small firm and a larger one, the smaller one is at a disadvantage in terms of resources. They may not be in a position to fight the larger company if it rejects arbitration and so may give in simply because, as the "anarcho"-capitalists so rightly point out, conflict and violence will push up a company's costs and so they would have to be avoided by smaller companies. It is ironic that the "anarcho"-capitalist implicitly assumes that every "defence company" is approximately of the same size, with the same resources behind it. In real life, this would clearly **not** the case.

Fourthly, it is **very** likely that many companies would make subscription to a specific "defence" firm or court a requirement of employment. Just as today many (most?) workers have to sign no-union contracts (and face being fired if they change their minds), it does not take much imagination to see that the same could apply to "defence" firms and courts. This was/is the case in company towns (indeed, you can consider unions as a form of "defence" firm and these companies refused to recognise them). As the labour market is almost always a buyer's market, it is not enough to argue that workers can find a new job without this condition. They may not and so have to put up with this situation. And if (as seems likely) the laws and rules of the property-owner will take precedence in any conflict, then workers and tenants will be at a disadvantage no matter how "impartial" the judges.

Ironically, some "anarcho"-capitalists point to current day company/union negotiations as an example of how different defence firms would work out their differences peacefully. Sadly for this argument, union rights under "actually existing capitalism" were created and enforced by the state in direct opposition to capitalist "freedom of contract." Before the law was changed, unions were often crushed by force — the companies were better armed, had more resources and had the law on their side. Today, with the "downsizing" of companies we can see what happens to "peaceful negotiation" and "co-operation" between unions and companies when it is no longer required (i.e. when the resources of both sides are unequal). The market power of companies far exceeds those of the unions and the law, by definition, favours the companies. As an example of how competing "protection agencies" will work in an "anarcho"-capitalist society, it is far more insightful than originally intended!

Now let us consider the *"basic law code"* itself. How the laws in the *"general libertarian law code"* would actually be selected is anyone's guess, although many "anarcho"-capitalists support the myth of "natural law," and this would suggest an unchangeable law code selected by those considered as "the voice of nature" (see section 11. for a discussion of its authoritarian implications). David Friedman argues that as well as a market in defence companies, there will also be a market in laws and rights. However, there will be extensive market pressure to unify these differing law codes into one standard one (imagine what would happen if ever CD manufacturer created a unique CD player, or every computer manufacturer different sized floppy-disk drivers — little wonder, then, that over time companies standardise their products). Friedman himself acknowledges that this process is likely (and uses the example of standard paper sizes to indicate such a process).

In any event, the laws would not be decided on the basis of "one person, one vote"; hence, as market forces worked their magic, the "general" law code would reflect vested interests and so be

very hard to change. As rights and laws would be a commodity like everything else in capitalism, they would soon reflect the interests of the rich — particularly if those interpreting the law are wealthy professionals and companies with vested interests of their own. Little wonder that the individualist anarchists proposed "trial by jury" as the only basis for real justice in a free society. For, unlike professional "arbitrators," juries are ad hoc, made up of ordinary people and do not reflect power, authority, or the influence of wealth. And by being able to judge the law as well as a conflict, they can ensure a populist revision of laws as society progresses.

Thus a system of "defence" on the market will continue to reflect the influence and power of property owners and wealth and not be subject to popular control beyond choosing between companies to enforce the capitalist laws.

6.2 What are the social consequences of such a system?

The "anarcho" capitalist imagines that there will be police agencies, "defence associations," courts, and appeals courts all organised on a free-market basis and available for hire. As David Weick points out, however, the major problem with such a system would not be the corruption of "private" courts and police forces (although, as suggested above, this could indeed be a problem):

> *"There is something more serious than the 'Mafia danger', and this other problem concerns the role of such 'defence' institutions in a given social and economic context.*
>
> *"[The] context... is one of a free-market economy with no restraints upon accumulation of property. Now, we had an American experience, roughly from the end of the Civil War to the 1930's, in what were in effect private courts, private police, indeed private governments. We had the experience of the (private) Pinkerton police which, by its spies, by its* ***agents provocateurs,*** *and by methods that included violence and kidnapping, was one of the most powerful tools of large corporations and an instrument of oppression of working people. We had the experience as well of the police forces established to the same end, within corporations, by numerous companies... . (The automobile companies drew upon additional covert instruments of a private nature, usually termed vigilante, such as the Black Legion). These were, in effect, private armies, and were sometimes described as such. The territories owned by coal companies, which frequently included entire towns and their environs, the stores the miners were obliged by economic coercion to patronise, the houses they lived in, were commonly policed by the private police of the United States Steel Corporation or whatever company owned the properties. The chief practical function of these police was, of course, to prevent labour organisation and preserve a certain balance of 'bargaining.'*
>
> *"These complexes were a law unto themselves, powerful enough to ignore, when they did not purchase, the governments of various jurisdictions of the American federal system. This industrial system was, at the time, often characterised as feudalism... ."* [*"Anarchist Justice"*, **Op. Cit.**, pp. 223–224]

For a description of the weaponry and activities of these private armies, the economic historian Maurice Dobbs presents an excellent summary in **Studies in Capitalist Development** [pp. 353–357]. According to a report on *"Private Police Systems"* cited by Dobbs, in a town dominated by Republican Steel, the *"civil liberties and the rights of labour were suppressed by company police.*

Union organisers were driven out of town." Company towns had their own (company-run) money, stores, houses and jails and many corporations had machine-guns and tear-gas along with the usual shot-guns, rifles and revolvers. The *"usurpation of police powers by privately paid 'guards and 'deputies', often hired from detective agencies, many with criminal records"* was *"a general practice in many parts of the country."*

The local (state-run) law enforcement agencies turned a blind-eye to what was going on (after all, the workers **had** broken their contracts and so were "criminal aggressors" against the companies) even when union members and strikers were beaten and killed. The workers own defence organisations were the only ones willing to help them, and if the workers seemed to be winning then troops were called in to "restore the peace" (as happened in the Ludlow strike, when strikers originally cheered the troops as they thought they would defend their civil rights; needless to say, they were wrong).

Here we have a society which is claimed by many "anarcho"-capitalists as one of the closest examples to their "ideal," with limited state intervention, free reign for property owners, etc. What happened? The rich reduced the working class to a serf-like existence, capitalist production undermined independent producers (much to the annoyance of individualist anarchists at the time), and the result was the emergence of the corporate America that "anarcho"-capitalists say they oppose.

Are we to expect that "anarcho"-capitalism will be different? That, unlike before, "defence" firms will intervene on behalf of strikers? Given that the "general libertarian law code" will be enforcing capitalist property rights, workers will be in exactly the same situation as they were then. Support of strikers violating property rights would be a violation of the "general libertarian law code" and be costly for profit making firms to do (if not dangerous as they could be "outlawed" by the rest). Thus "anarcho"-capitalism will extend extensive rights and powers to bosses, but few if any rights to rebellious workers. And this difference in power is enshrined within the fundamental institutions of the system.

In evaluating "anarcho"-capitalism's claim to be a form of anarchism, Peter Marshall notes that *"private protection agencies would merely serve the interests of their paymasters."* [**Demanding the Impossible**, p. 653] With the increase of private "defence associations" under "really existing capitalism" today (associations that many "anarcho"-capitalists point to as examples of their ideas), we see a vindication of Marshall's claim. There have been many documented experiences of protesters being badly beaten by private security guards. As far as market theory goes, the companies are only supplying what the buyer is demanding. The rights of others are **not a factor** (yet more "externalities," obviously). Even if the victims successfully sue the company, the message is clear — social activism can seriously damage your health. With a reversion to "a general libertarian law code" enforced by private companies, this form of "defence" of "absolute" property rights can only increase, perhaps to the levels previously attained in the heyday of US capitalism, as described above by Weick.

6.3 But surely market forces will stop abuses by the rich?

Unlikely. The rise of corporations within America indicates exactly how a "general libertarian law code" would reflect the interests of the rich and powerful. The laws recognising corporations as "legal persons" were **not** primarily a product of "the state" but of private lawyers hired by the rich — a result with which Rothbard would have no problem. As Howard Zinn notes:

> *"the American Bar Association, organised by lawyers accustomed to serving the wealthy, began a national campaign of education to reverse the [Supreme] Court decision [that companies could not be considered as a person]... . By 1886... the Supreme Court had accepted the argument that corporations were 'persons' and their money was property protected by the process clause of the Fourteenth Amendment... . The justices of the Supreme Court were not simply interpreters of the Constitution. They were men of certain backgrounds, of certain [class] interests."* [**A People's History of the United States**, p. 255]

Of course it will be argued that the Supreme Court is a monopoly and so our analysis is flawed. In "anarcho"-capitalism there is no monopoly. But the corporate laws came about because there was a demand for them. That demand would still have existed in "anarcho"-capitalism. Now, while there may be no Supreme Court, Rothbard does maintain that *"the basic Law Code ...would have to be agreed upon by all the judicial agencies"* but he maintains that this *"would imply no unified legal system"*! Even though *"[a]ny agencies that transgressed the basic libertarian law code would be open outlaws"* and soon crushed this is **not**, apparently, a monopoly. [**The Ethics of Liberty**, p. 234] So, you either agree to the law code or you go out of business. And that is **not** a monopoly! Therefore, we think, our comments on the Supreme Court decision are valid.

If all the available defence firms enforce the same laws, then it can hardly be called "competitive"! And if this is the case (and it is) *"when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing 'companies.'"* [Weick, **Op. Cit.**, p. 225]

This is particularly true if these companies are themselves Big Business and so have a large impact on the laws they are enforcing. If the law code recognises and protects capitalist power, property and wealth as fundamental **any** attempt to change this is "initiation of force" and so the power of the rich is written into the system from the start!

(And, we must add, if there is a general libertarian law code to which all must subscribe, where does that put customer demand? If people demand a non-libertarian law code, will defence firms refuse to supply it? If so, will not new firms, looking for profit, spring up that will supply what is being demanded? And will that not put them in direct conflict with the existing, pro-general law code ones? And will a market in law codes not just reflect economic power and wealth? David Friedman, who is for a market in law codes, argues that *"[i]f almost everyone believes strongly that heroin addiction is so horrible that it should not be permitted anywhere under any circumstances anarcho-capitalist institutions will produce laws against heroin. Laws are being produced on the market, and that is what the market wants."* And he adds that *"market demands are in dollars, not votes. The legality of heroin will be determined, not by how many are for or against but how high a cost each side is willing to bear in order to get its way."* [**The Machinery of Freedom**, p. 127] And, as the market is less than equal in terms of income and wealth, such a position will mean that the capitalist class will have a higher effective demand than the working class, and more resources to pay for any conflicts that arise. Thus any law codes that develop will tend to reflect the interests of the wealthy.)

Which brings us nicely on to the next problem regarding market forces.

As well as the obvious influence of economic interests and differences in wealth, another problem faces the "free market" justice of "anarcho"-capitalism. This is the *"general libertarian law*

code" itself. Even if we assume that the system actually works like it should in theory, the simple fact remains that these "defence companies" are enforcing laws which explicitly defend capitalist property (and so social relations). Capitalists own the means of production upon which they hire wage-labourers to work and this is an inequality established **prior** to any specific transaction in the labour market. This inequality reflects itself in terms of differences in power within (and outside) the company and in the "law code" of "anarcho"-capitalism which protects that power against the dispossessed.

In other words, the law code within which the defence companies work assumes that capitalist property is legitimate and that force can legitimately be used to defend it. This means that, in effect, "anarcho"-capitalism is based on a monopoly of law, a monopoly which explicitly exists to defend the power and capital of the wealthy. The major difference is that the agencies used to protect that wealth will be in a weaker position to act independently of their pay-masters. Unlike the state, the "defence" firm is not remotely accountable to the general population and cannot be used to equalise even slightly the power relationships between worker and capitalist.

And, needless to say, it is very likely that the private police forces **will** give preferential treatment to their wealthier customers (what business does not?) and that the law code will reflect the interests of the wealthier sectors of society (particularly if *"prosperous"* judges administer that code) in reality, even if not in theory. Since, in capitalist practice, "the customer is always right," the best-paying customers will get their way in "anarcho"-capitalist society.

For example, in chapter 29 of **The Machinery of Freedom**, David Friedman presents an example of how a clash of different law codes could be resolved by a bargaining process (the law in question is the death penalty). This process would involve one defence firm giving a sum of money to the other for them accepting the appropriate (anti/pro capital punishment) court. Friedman claims that *"[a]s in any good trade, everyone gains"* but this is obviously not true. Assuming the anti-capital punishment defence firm pays the pro one to accept an anti-capital punishment court, then, yes, both defence firms have made money and so are happy, so are the anti-capital punishment consumers but the pro-death penalty customers have only (perhaps) received a cut in their bills. Their desire to see criminals hanged (for whatever reason) has been ignored (if they were not in favour of the death penalty, they would not have subscribed to that company). Friedman claims that the deal, by allowing the anti-death penalty firm to cut its costs, will ensure that it *"keep its customers and even get more"* but this is just an assumption. It is just as likely to loose customers to a defence firm that refuses to compromise (and has the resources to back it up). Friedman's assumption that lower costs will automatically win over people's passions is unfounded. As is the assumption that both firms have equal resources and bargaining power. If the pro-capital punishment firm demands more than the anti can provide and has larger weaponry and troops, then the anti defence firm may have to agree to let the pro one have its way.

So, all in all, it is **not** clear that *"everyone gains"* — there may be a sizeable percentage of those involved who do not "gain" as their desire for capital punishment is traded away by those who claimed they would enforce it.

In other words, a system of competing law codes and privatised rights does not ensure that **all** consumers interests are meet. Given unequal resources within society, it is also clear that the "effective demand" of the parties involved to see their law codes enforced is drastically different. The wealthy head of a transnational corporation will have far more resources available to him to pay for **his** laws to be enforced than one of his employees on the assembly line. Moreover,

as we argue in sections 3.1 and 10.2, the labour market is usually skewed in favour of capitalists. This means that workers have to compromise to get work and such compromises may involve agreeing to join a specific "defence" firm or not join one at all (just as workers are often forced to sign non-union contracts today in order to get work). In other words, a privatised law system is very likely to skew the enforcement of laws in line with the skewing of income and wealth in society. At the very least, unlike every other market, the customer is **not** guaranteed to get exactly what they demand simply because the product they "consume" is dependent on other within the same market to ensure its supply. The unique workings of the law/defence market are such as to deny customer choice (we will discuss other aspects of this unique market shortly).

Weick sums up by saying *"any judicial system is going to exist in the context of economic institutions. If there are gross inequalities of power in the economic and social domains, one has to imagine society as strangely compartmentalised in order to believe that those inequalities will fail to reflect themselves in the judicial and legal domain, and that the economically powerful will be unable to manipulate the legal and judicial system to their advantage. To abstract from such influences of context, and then consider the merits of an abstract judicial system. .. is to follow a method that is not likely to take us far. This, by the way, is a criticism that applies...to any theory that relies on a rule of law to override the tendencies inherent in a given social and economic system"* [Weick, **Op. Cit.**, p. 225] (For a discussion of this problem as it would surface in attempts to protect the environment under "anarcho"-capitalism, see sections E.2 and E.3).

There is another reason why "market forces" will not stop abuse by the rich, or indeed stop the system from turning from private to public statism. This is due to the nature of the "defence" market (for a similar analysis of the "defence" market see Tyler Cowen's *"Law as a Public Good: The Economics of Anarchy"* in **Economics and Philosophy**, no. 8 (1992), pp. 249–267 and *"Rejoinder to David Friedman on the Economics of Anarchy"* in **Economics and Philosophy**, no. 10 (1994), pp. 329–332). In "anarcho"-capitalist theory it is assumed that the competing "defence companies" have a vested interest in peacefully settling differences between themselves by means of arbitration. In order to be competitive on the market, companies will have to co-operate via contractual relations otherwise the higher price associated with conflict will make the company uncompetitive and it will go under. Those companies that ignore decisions made in arbitration would be outlawed by others, ostracised and their rulings ignored. By this process, it is argued, a system of competing "defence" companies will be stable and not turn into a civil war between agencies with each enforcing the interests of their clients against others by force.

However, there is a catch. Unlike every other market, the businesses in competition in the "defence" industry **must** co-operate with its fellows in order to provide its services for its customers. They need to be able to agree to courts and judges, agree to abide by decisions and law codes and so forth. In economics there are other, more accurate, terms to describe co-operative activity between companies: collusion and cartels. Collusion and cartels is where companies in a specific market agree to work together to restrict competition and reap the benefits of monopoly power by working to achieve the same ends in partnership with each other. In other words this means that collusion is built into the system, with the necessary contractual relations between agencies in the "protection" market requiring that firms co-operate and, by so doing, to behave (effectively) as one large firm (and so, effectively, resemble the state even more than they already do). Quoting Adam Smith seems appropriate here: *"People of the same trade seldom meet together, even for merriment and diversion, but the conversation ends in a conspiracy against the public, or in some contrivance to raise prices."* [**The Wealth of Nations**, p. 117]

For example, when buying food it does not matter whether the supermarkets I visit have good relations with each other. The goods I buy are independent of the relationships that exist between competing companies. However, in the case of private states, this is **not** the case. If a specific "defence" company has bad relationships with other companies in the market then it is against my self-interest to subscribe to it. Why join a private state if its judgements are ignored by the others and it has to resort to violence to be heard? This, as well as being potentially dangerous, will also push up the prices I have to pay. Arbitration is one of the most important services a defence firm can offer its customers and its market share is based upon being able to settle interagency disputes without risk of war or uncertainty that the final outcome will not be accepted by all parties.

Therefore, the market set-up within the "anarcho"-capitalist "defence" market is such that private states **have to co-operate** with the others (or go out of business fast) and this means collusion can take place. In other words, a system of private states will have to agree to work together in order to provide the service of "law enforcement" to their customers and the result of such co-operation is to create a cartel. However, unlike cartels in other industries, the "defence" cartel will be a stable body simply because its members **have** to work with their competitors in order to survive.

Let us look at what would happen after such a cartel is formed in a specific area and a new "defence company" desired to enter the market. This new company will have to work with the members of the cartel in order to provide its services to its customers (note that "anarcho"-capitalists already assume that they *"will have to"* subscribe to the same law code). If the new defence firm tries to under-cut the cartel's monopoly prices, the other companies would refuse to work with it. Having to face constant conflict or the possibility of conflict, seeing its decisions being ignored by other agencies and being uncertain what the results of a dispute would be, few would patronise the new "defence company." The new company's prices would go up and so face either folding or joining the cartel. Unlike every other market, if a "defence company" does not have friendly, co-operative relations with other firms in the same industry then it will go out of business.

This means that the firms that are co-operating have but to agree not to deal with new firms which are attempting to undermine the cartel in order for them to fail. A "cartel busting" firm goes out of business in the same way an outlaw one does — the higher costs associated with having to solve all its conflicts by force, not arbitration, increases its production costs much higher than the competitors and the firm faces insurmountable difficulties selling its products at a profit (ignoring any drop of demand due to fears of conflict by actual and potential customers). Even if we assume that many people will happily join the new firm in spite of the dangers to protect themselves against the cartel and its taxation (i.e. monopoly profits), enough will remain members of the cartel (perhaps they will be fired if they change, perhaps they dislike change and think the extra money is worth peace, perhaps they fear that by joining the new company their peace will be disrupted or the outcomes of their problems with others too unsure to be worth it, perhaps they are shareholders and want to maintain their income) so that co-operation will still be needed and conflict unprofitable and dangerous (and as the cartel will have more resources than the new firm, it could usually hold out longer than the new firm could). In effect, breaking the cartel may take the form of an armed revolution — as it would with any state.

The forces that break up cartels and monopolies in other industries (such as free entry — although, of course the "defence" market will be subject to oligopolistic tendencies as any other and this will create barriers to entry, see section C.4) do not work here and so new firms have to

co-operate or loose market share and/or profits. This means that "defence companies" will reap monopoly profits and, more importantly, have a monopoly of force over a given area.

Hence a monopoly of private states will develop in addition to the existing monopoly of law and this is a de facto monopoly of force over a given area (i.e. some kind of public state run by share holders). New companies attempting to enter the "defence" industry will have to work with the existing cartel in order to provide the services it offers to its customers. The cartel is in a dominant position and new entries into the market either become part of it or fail. This is exactly the position with the state, with "private agencies" free to operate as long as they work to the state's guidelines. As with the monopolist "general libertarian law code", if you do not toe the line, you go out of business fast.

It is also likely that a multitude of cartels would develop, with a given cartel operating in a given locality. This is because law enforcement would be localised in given areas as most crime occurs where the criminal lives. Few criminals would live in New York and commit crimes in Portland. However, as defence companies have to co-operate to provide their services, so would the cartels. Few people live all their lives in one area and so firms from different cartels would come into contact, so forming a cartel of cartels.

A cartel of cartels may (perhaps) be less powerful than a local cartel, but it would still be required and for exactly the same reasons a local one is. Therefore "anarcho"-capitalism would, like "actually existing capitalism," be marked by a series of public states covering given areas, co-ordinated by larger states at higher levels. Such a set up would parallel the United States in many ways except it would be run directly by wealthy shareholders without the sham of "democratic" elections. Moreover, as in the USA and other states there will still be a monopoly of rules and laws (the "general libertarian law code").

Some "anarcho"-capitalists claim that this will not occur, but that the co-operation needed to provide the service of law enforcement will somehow **not** turn into collusion between companies. However, they are quick to argue that renegade "agencies" (for example, the so-called "Mafia problem" or those who reject judgements) will go out of business because of the higher costs associated with conflict and not arbitration. However, these higher costs are ensured because the firms in question do not co-operate with others. If other agencies boycott a firm but co-operate with all the others, then the boycotted firm will be at the same disadvantage — regardless of whether it is a cartel buster or a renegade.

The "anarcho"-capitalist is trying to have it both ways. If the punishment of non-conforming firms cannot occur, then "anarcho"-capitalism will turn into a war of all against all or, at the very least, the service of social peace and law enforcement cannot be provided. If firms cannot deter others from disrupting the social peace (one service the firm provides) then "anarcho"-capitalism is not stable and will not remain orderly as agencies develop which favour the interests of their own customers and enforce their own law codes at the expense of others. If collusion cannot occur (or is too costly) then neither can the punishment of non-conforming firms and "anarcho"-capitalism will prove to be unstable.

So, to sum up, the "defence" market of private states has powerful forces within it to turn it into a monopoly of force over a given area. From a privately chosen monopoly of force over a specific (privately owned) area, the market of private states will turn into a monopoly of force over a general area. This is due to the need for peaceful relations between companies, relations which are required for a firm to secure market share. The unique market forces that exist within this market ensure collusion and monopoly.

In other words, the system of private states will become a cartel and so a public state — unaccountable to all but its shareholders, a state of the wealthy, by the wealthy, for the wealthy. In other words, fascism.

6.4 Why are these "defence associations" states?

It is clear that "anarcho"-capitalist defence associations meet the criteria of statehood outlined in section B.2 ("Why are anarchists against the state"). They defend property and preserve authority relationships, they practice coercion, and are hierarchical institutions which govern those under them on behalf of a "ruling elite," i.e. those who employ both the governing forces and those they govern. Thus, from an anarchist perspective, these "defence associations" as most definitely states.

What is interesting, however, is that by their own definitions a very good case can be made that these "defence associations" as states in the "anarcho"-capitalist sense too. Capitalist apologists usually define a "government" (or state) as those who have a monopoly of force and coercion within a given area. Relative to the rest of the society, these defence associations would have a monopoly of force and coercion of a given piece of property; thus, by the "anarcho"-capitalists' **own definition** of statehood, these associations would qualify!

If we look at Rothbard's definition of statehood, which requires (a) the power to tax and/or (b) a *"coerced monopoly of the provision of defence over a given area"*, "anarcho"-capitalism runs into trouble.

In the first place, the costs of hiring defence associations will be deducted from the wealth created by those who use, but do not own, the property of capitalists and landlords. Let not forget that a capitalist will only employ a worker or rent out land and housing if they make a profit from so doing. Without the labour of the worker, there would be nothing to sell and no wages to pay for rent. Thus a company's or landlord's "defence" firm will be paid from the revenue gathered from the capitalists power to extract a tribute from those who use, but do not own, a property. In other words, workers would pay for the agencies that enforce their employers' authority over them via the wage system and rent — taxation in a more insidious form.

In the second, under capitalism most people spend a large part of their day on other people's property — that is, they work for capitalists and/or live in rented accommodation. Hence if property owners select a "defence association" to protect their factories, farms, rental housing, etc., their employees and tenants will view it as a *"coerced monopoly of the provision of defence over a given area."* For certainly the employees and tenants will not be able to hire their own defence companies to expropriate the capitalists and landlords. So, from the standpoint of the employees and tenants, the owners do have a monopoly of "defence" over the areas in question. Of course, the "anarcho"-capitalist will argue that the tenants and workers "consent" to **all** the rules and conditions of a contract when they sign it and so the property owner's monopoly is not "coerced." However, the "consent" argument is so weak in conditions of inequality as to be useless (see sections 2.4 and 3.1, for example) and, moreover, it can and has been used to justify the state. In other words, "consent" in and of itself does not ensure that a given regime is not statist (see section 2.3 for more on this). So an argument along these lines is deeply flawed and can be used to justify regimes which are little better than "industrial feudalism" (such as, as indicated in section B.4, company towns, for example — an institution which right-libertarianism has no problem with). Even the *"general libertarian law code,"* could be considered a "monopoly of

government over a particular area," particularly if ordinary people have no real means of affecting the law code, either because it is market-driven and so is money-determined, or because it will be "natural" law and so unchangeable by mere mortals.

In other words, **if** the state *"arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area"* [Rothbard, **The Ethics of Liberty**, p. 170] then its pretty clear that the property owner shares this power. The owner is, after all, the *"ultimate decision-making power"* in their workplace or on their land. If the boss takes a dislike to you (for example, you do not follow their orders) then you get fired. If you cannot get a job or rent the land without agreeing to certain conditions (such as not joining a union or subscribing to the "defence firm" approved by your employer) then you either sign the contract or look for something else. Of course Rothbard fails to note that bosses have this monopoly of power and is instead referring to *"prohibiting the voluntary purchase and sale of defence and judicial services."* [**Op. Cit.**, p. 171] But just as surely as the law of contract allows the banning of unions from a property, it can just as surely ban the sale and purchase of defence and judicial services (it could be argued that market forces will stop this happening, but this is unlikely as bosses usually have the advantage on the labour market and workers have to compromise to get a job — see section 10.2 on why this is the case). After all, in the company towns, only company money was legal tender and company police the only law enforcers.

Therefore, it is obvious that the "anarcho"-capitalist system meets the Weberian criteria of a monopoly to enforce certain rules in a given area of land. The *"general libertarian law code"* is a monopoly and property owners determine the rules that apply to their property. Moreover, if the rules that property owners enforce are subject to rules contained in the monopolistic *"general libertarian law code"* (for example, that they cannot ban the sale and purchase of certain products — such as defence — on their own territory) then "anarcho"-capitalism **definitely** meets the Weberian definition of the state (as described by Ayn Rand as an institution *"that holds the exclusive power to **enforce** certain rules of conduct in a given geographical area"* [**Capitalism: The Unknown Ideal**, p. 239]) as its "law code" overrides the desires of property owners to do what they like on their own property.

Therefore, no matter how you look at it, "anarcho"-capitalism and its "defence" market promotes a *"monopoly of ultimate decision making power"* over a *"given territorial area"*. It is obvious that for anarchists, the "anarcho"-capitalist system is a state system. As, as we note, a reasonable case can be made for it also being a state in "anarcho"-capitalist theory as well.

So, in effect, "anarcho"-capitalism has a **different** sort of state, one in which bosses hire and fire the policeman. As Peter Sabatini notes [in **Libertarianism: Bogus Anarchy**], *"[w]ithin Libertarianism, Rothbard represents a minority perspective that actually argues for the total elimination of the state. However Rothbard's claim as an anarchist is quickly voided when it is shown that he only wants an end to the public state. In its place he allows countless private states, with each person supplying their own police force, army, and law, or else purchasing these services from capitalist vendors... Rothbard sees nothing at all wrong with the amassing of wealth, therefore those with more capital will inevitably have greater coercive force at their disposal, just as they do now."*

Far from wanting to abolish the state, then, "anarcho"-capitalists only desire to privatise it — to make it solely accountable to capitalist wealth. Their "companies" perform the same services as the state, for the same people, in the same manner. However, there is one slight difference. Property owners would be able to select between competing companies for their "services." Because such "companies" are employed by the boss, they would be used to reinforce the totalitarian na-

ture of capitalist firms by ensuring that the police and the law they enforce are not even slightly accountable to ordinary people.

Looking beyond the "defence association" to the defence market itself (as we argued in the last section), this will become a cartel and so become some kind of public state. The very nature of the private state, its need to co-operate with others in the same industry, push it towards a monopoly network of firms and so a monopoly of force over a given area. Given the assumptions used to defend "anarcho"-capitalism, its system of private statism will develop into public statism — a state run by managers accountable only to the share-holding elite.

To quote Peter Marshall again, the "anarcho"-capitalists *"claim that all would benefit from a free exchange on the market, it is by no means certain; any unfettered market system would most likely sponsor a reversion to an unequal society with defence associations perpetuating exploitation and privilege."* [**Demanding the Impossible**, p. 565] History, and current practice, prove this point.

In short, "anarcho"-capitalists are not anarchists at all, they are just capitalists who desire to see private states develop — states which are strictly accountable to their paymasters without even the sham of democracy we have today. Hence a far better name for "anarcho"-capitalism would be "private-state" capitalism. At least that way we get a fairer idea of what they are trying to sell us. As Bob Black writes in **The Libertarian as Conservative**, *"To my mind a right-wing anarchist is just a minarchist who'd abolish the state to his own satisfaction by calling it something else... . They don't denounce what the state does, they just object to who's doing it."*

6.5 What other effects would "free market" justice have?

Such a system would be dangerous simply because of the power it places in the hands of companies. As Michael Taylor notes, *"whether the [protection] market is competitive or not, it must be remembered that the product is a peculiar one: when we buy cars or shoes or telephone services we do not give the firm power based on force, but armed protection agencies, like the state, make customers (their own and others') vulnerable, and having given them power we cannot be sure that they will use it only for our protection."* [**Community, Anarchy and Liberty**, p. 65]

As we argued above, there are many reasons to believe that a "protection" market will place most of society (bar the wealthy elite) in a "vulnerable" position. One such reason is the assumptions of the "anarcho"-capitalists themselves. As they note, capitalism is marked by an extreme division of labour. Instead of everyone having all the skills they need, these skills are distributed throughout society and all (so it is claimed) benefit.

This applies equally to the "defence" market. People subscribe to a "defence firm" because they either cannot or do not want the labour of having to protect their own property and person. The skills of defence, therefore, are concentrated in these companies and so these firms will have an advantage in terms of experience and mental state (they are trained to fight) as well as, as seems likely, weaponry. This means that most normal people will be somewhat at a disadvantage if a cartel of defence firms decides to act coercively. The division of labour society will discourage the spread of skills required for sustained warfare throughout society and so, perhaps, ensure that customers remain "vulnerable." The price of liberty may be eternal vigilance, but are most people willing to include eternal preparation of war as well? For modern society, the answer seems to be no, they prefer to let others do that (namely the state and its armed forces). And,

we should note, an armed society may be a polite one, but its politeness comes from fear, **not** mutual respect and so totally phoney and soul destroying.

If we look at inequality within society, this may produce a ghettoisation effect within "anarcho"-capitalism. As David Friedman notes, conflict between defence firms is bad for business. Conflict costs money both in terms of weaponry used and increased ("danger money") wages. For this reason he thinks that peaceful co-operation will exist between firms. However, if we look at poor areas with high crime rates then its clear that such an area will be a dangerous place. In other words, it is very likely to be high in conflict. But conflict increases costs, and so prices. Does this mean that those areas which need police most will also have the highest prices for law enforcement? That is the case with insurance now, so perhaps we will see whole areas turning into Hobbesian anarchy simply because the high costs associated with dangerous areas will make the effective demand for their services approach zero.

In a system based on "private statism," police and justice would be determined by "free market" forces. As indicated in section B.4.1, right-libertarians maintain that one would have few rights on other peoples' property, and so the owner's will would be the law (possibly restricted somewhat by a "general libertarian law code", perhaps not — see last section). In this situation, those who could not afford police protection would become victims of roving bandits and rampant crime, resulting in a society where the wealthy are securely protected in their bastions by their own armed forces, with a bunch of poor crowded around them for protection. This would be very similar to feudal Europe.

The competing police forces would also be attempting to execute the laws of their sponsors in areas that may not be theirs to begin with, which would lead to conflicts unless everyone agreed to follow a "general libertarian law code" (as Rothbard, for one, wants). If there were competing law codes, the problem of whose "laws" to select and enforce would arise, with each of the wealthy security sponsors desiring that their law control all of the land. And, as noted earlier, if there were **one** "libertarian law code," this would be a *"monopoly of government"* over a given area, and therefore statist.

In addition, it should be noted that the right-libertarian claim that under their system anarchistic associations would be allowed as long as they are formed voluntarily just reflects their usual vacuous concept of freedom. This is because such associations would exist within and be subject to the "general libertarian law code" of "anarcho"-capitalist society. These laws would reflect and protect the interests and power of those with capitalist property, meaning that unless these owners agree, trying to live an anarchist life would be nearly impossible (its all fine and well to say that those with property can do what they like, if you do not have property then experimentation could prove difficult — not to mention, of course, few areas are completely self-sufficient meaning that anarchistic associations will be subject to market forces, market forces which stress and reward the opposite of the values these communes were set up to create). Thus we must **buy** the right to be free!

If, as anarchists desire, most people refuse to recognise or defend the rights of private property and freely associate accordingly to organise their own lives and ignore their bosses, this would still be classed as "initiation of force" under "anarcho"-capitalism, and thus repressed. In other words, like any authoritarian system, the "rules" within "anarcho"-capitalism do not evolve with society and its changing concepts (this can be seen from the popularity of "natural law" with right-libertarians, the authoritarian nature of which is discussed in section 11).

Therefore, in "anarcho"-capitalism you are free to follow the (capitalist) laws and to act within the limits of these laws. It is only within this context that you can experiment (if you can afford to). If you act outside these laws, then you will be subject to coercion. The amount of coercion required to prevent such actions depends on how willing people are to respect the laws. Hence it is not the case that an "anarcho"-capitalist society is particularly conducive to social experimentation and free evolution, as its advocates like to claim. Indeed, the opposite may be the case, as any capitalist system will have vast differences of wealth and power within it, thus ensuring that the ability to experiment is limited to those who can afford it. As Jonathan Wolff points out, the *"image of people freely moving from one utopia to another until they find their heaven, ignores the thought that certain choices may be irreversible... This thought may lead to speculation about whether a law of evolution would apply to the plural utopias. Perhaps, in the long run, we may find the framework regulated by the law of survival of the economically most fit, and so we would expect to see a development not of diversity but of homogeneity. Those communities with great market power would eventually soak up all but the most resistant of those communities around them."* [**Robert Nozick: Property, Justice and the Minimal State**, p. 135]

And if the initial distribution of resources is similar to that already existing then the *"economically most fit"* will be capitalistic (as argued in section J.5.12, the capitalist market actively selects against co-operatives even though they are more productive). Given the head start provided by statism, it seems likely that explicitly capitalist utopia's would remain the dominant type (particularly as the rights framework is such as to protect capitalist property rights). Moreover, we doubt that most "anarcho"-capitalists would embrace the ideology if it was more than likely that non-capitalist utopias would overcome the capitalist ones (after all, they **are** self-proclaimed capitalists).

So, given that "anarcho"-capitalists who follow Murray Rothbard's ideas and minimal-statist right-libertarians agree that **all** must follow the basic *"general libertarian law code"* which defends capitalist property rights, we can safely say that the economically *"most fit"* would be capitalist ones. Hardly surprising if the law code reflects capitalist ideas of right and wrong. In addition, as George Reitzer has argued (see **The McDonaldization of Society**), capitalism is driven towards standardisation and conformity by its own logic. This suggests that plurality of communities would soon be replaced by a series of "communities" which share the same features of hierarchy and ruling elites. ("Anarcho"-capitalists who follow David Friedman's ideas consider it possible, perhaps likely, that a free market in laws will result in one standard law code and so this also applies to that school as well)

So, in the end, the "anarcho" capitalists argue that in their system you are free to follow the (capitalist) law and work in the (capitalist) economy, and if you are lucky, take part in a "commune" as a collective capitalist. How **very** generous of them! Of course, any attempt to change said rules or economy are illegal and would be stopped by private states.

As well as indicating the falsity of "anarcho"-capitalist claims to support "experimentation," this discussion has also indicated that coercion would not be absent from "anarcho"-capitalism. This would be the case only if everyone voluntarily respected private property rights and abided by the law (i.e. acted in a capitalist-approved way). As long as you follow the law, you will be fine — which is exactly the same as under public statism. Moreover, if the citizens of a society do not want a capitalist order, it may require a lot of coercion to impose it. This can be seen from the experiences of the Italian factory occupations in 1920 (see section A.5.5), in which workers refused to accept capitalist property or authority as valid and ignored it. In response to this

change of thought within a large part of society, the capitalists backed fascism in order to stop the evolutionary process within society.

The socialist economic historian Maurice Dobbs, after reviewing the private armies in 1920s and 1930s America made much the same point:

> *"When business policy takes the step of financing and arming a mass political movement to capture the machinery of government, to outlaw opposing forms of organisation and suppress hostile opinions we have merely a further and more logical stage beyond [private armies]"* [**Op, Cit.**, p. 357]

(Noted Austrian Economist Ludwig von Mises whose extreme free market liberal political and economic ideas inspired right-libertarianism in many ways had this to say about fascism: *"It cannot be denied that Fascism and similar movements aiming at the establishment of dictatorships are full of the best intentions and that their intervention has, for the moment, saved European civilisation. The merit that Fascism has thereby won for itself will live eternally in history."* [**Liberalism**, p. 51])

This example illustrates the fact that capitalism **per se** is essentially authoritarian, because it is necessarily based on coercion and hierarchy, which explains why capitalists have resorted to the most extreme forms of authoritarianism — including totalitarian dictatorship – during crises that threatened the fundamental rules of the system itself. There is no reason to think that "anarcho"-capitalism would be any different.

Since "anarcho"-capitalism, with its private states, does not actually want to get rid of hierarchical forms of authority, the need for one government to unify the enforcement activities of the various defence companies becomes apparent. In the end, that is what "anarcho"-capitalism recognises with its "general libertarian law code" (based either on market forces or "natural law"). Thus it appears that one government/hierarchy over a given territory is inevitable under any form of capitalism. That being the case, it is obvious that a democratic form of statism, with its checks and balances, is preferable to a dictatorship that imposes "absolute" property rights and so "absolute" power.

Of course, we do have another option than either private or public statism. This is anarchism, the end of hierarchical authority and its replacement by the "natural" authority of communal and workplace self-management.

7 How does the history of "anarcho"-capitalism show that it is not anarchist?

Of course, "anarcho"-capitalism does have historic precedents and "anarcho"-capitalists spend considerable time trying to co-opt various individuals into their self-proclaimed tradition of "anti-statist" liberalism. That, in itself, should be enough to show that anarchism and "anarcho"-capitalism have little in common as anarchism developed in opposition to liberalism and its defence of capitalism. Unsurprisingly, these "anti-state" liberals tended to, at best, refuse to call themselves anarchists or, at worse, explicitly deny they were anarchists.

One "anarcho"-capitalist overview of their tradition is presented by David M. Hart. His perspective on anarchism is typical of the school, noting that in his essay anarchism or anarchist *"are*

used in the sense of a political theory which advocates the maximum amount of individual liberty, a necessary condition of which is the elimination of governmental or other organised force." [David M. Hart, *"Gustave de Molinari and the Anti-statist Liberal Tradition: Part I"*, pp. 263–290, **Journal of Libertarian Studies**, vol. V, no. 3, p. 284] Yet anarchism has **never** been solely concerned with abolishing the state. Rather, anarchists have always raised economic and social demands and goals along with their opposition to the state. As such, anti-statism may be a necessary condition to be an anarchist, but not a sufficient one to count a specific individual or theory as anarchist.

Specifically, anarchists have turned their analysis onto private property noting that the hierarchical social relationships created by inequality of wealth (for example, wage labour) restricts individual freedom. This means that if we do seek *"the maximum of individual liberty"* then our analysis cannot be limited to just the state or government. Consequently, to limit anarchism as Hart does requires substantial rewriting of history, as can be seen from his account of William Godwin.

Hart tries to co-opt of William Godwin into the ranks of "anti-state" liberalism, arguing that he *"defended individualism and the right to property."* [**Op. Cit.**, p. 265] He, of course, quotes from Godwin to support his claim yet strangely truncates Godwin's argument to exclude his conclusion that *"[w]hen the laws of morality shall be clearly understood, their excellence universally apprehended, and themselves seen to be coincident with each man's private advantage, the idea of property in this sense will remain, but no man will have the least desire, for purposes of ostentation or luxury, to possess more than his neighbours."* [**An Enquiry into Political Justice**, p. 199] In other words, personal property (possession) would still exist but not private property in the sense of capital or inequality of wealth.

This analysis is confirmed in book 8 of Godwin's classic work entitled ***"On Property."*** Needless to say, Hart fails to mention this analysis, unsurprising as it was later reprinted as a socialist pamphlet. Godwin thought that the *"subject of property is the key-stone that completes the fabric of political justice."* Like Proudhon, Godwin subjects property as well as the state to an anarchist analysis. For Godwin, there were *"three degrees"* of property. The first is possession of things you need to live. The second is *"the empire to which every man is entitled over the produce of his own industry."* The third is *"that which occupies the most vigilant attention in the civilised states of Europe. It is a system, in whatever manner established, by which one man enters into the faculty of disposing of the produce of another man's industry."* He notes that it is *"clear therefore that the third species of property is in direct contradiction to the second."* [**Op. Cit.**, p. 701 and p. 710–2]

Godwin, unlike classical liberals, saw the need to *"point out the evils of accumulated property,"* arguing that the the *"spirit of oppression, the spirit of servility, and the spirit of fraud ... are the immediate growth of the established administration of property. They are alike hostile to intellectual and moral improvement."* Like the socialists he inspired, Godwin argued that *"it is to be considered that this injustice, the unequal distribution of property, the grasping and selfish spirit of individuals, is to be regarded as one of the original sources of government, and, as it rises in its excesses, is continually demanding and necessitating new injustice, new penalties and new slavery."* He stressed, *"let it never be forgotten that accumulated property is usurpation."* [**Op. Cit.**, p. 732, pp. 717–8, and p. 718]

Godwin argued against the current system of property and in favour of *"the justice of an equal distribution of the good things of life."* This would be based on *"[e]quality of conditions, or, in other words, an equal admission to the means of improvement and pleasure"* as this *"is a law rigorously*

enjoined upon mankind by the voice of justice." [**Op. Cit.**, p. 725 and p. 736] Thus his anarchist ideas were applied to private property, noting like subsequent anarchists that economic inequality resulted in the loss of liberty for the many and, consequently, an anarchist society would see a radical change in property and property rights. As Kropotkin noted, Godwin *"stated in 1793 in a quite definite form the political and economic principle of Anarchism."* Little wonder he, like so many others, argued that Godwin was *"the first theoriser of Socialism without government — that is to say, of Anarchism."* [**Environment and Evolution**, p. 62 and p. 26] For Kropotkin, anarchism was by definition not restricted to purely political issues but also attacked economic hierarchy, inequality and injustice. As Peter Marshall confirms, *"Godwin's economics, like his politics, are an extension of his ethics."* [**Demanding the Impossible**, p. 210]

Godwin's theory of property is significant because it reflected what was to become standard nineteenth century socialist thought on the matter. In Britain, his ideas influenced Robert Owen and, as a result, the early socialist movement in that country. His analysis of property, as noted, predated Proudhon's classic anarchist analysis. As such, to state, as Hart did, that Godwin simply *"concluded that the state was an evil which had to be reduced in power if not eliminated completely"* while not noting his analysis of property gives a radically false presentation of his ideas. [Hart, **Op. Cit.**, p. 265] However, it does fit into his flawed assertion that anarchism is purely concerned with the state. Any evidence to the contrary is simply ignored.

7.1 Are competing governments anarchism?

No, of course not. Yet according to "anarcho"-capitalism, it is. This can be seen from the ideas of Gustave de Molinari.

Hart is on firmer ground when he argues that the 19th century French economist Gustave de Molinari is the true founder of "anarcho"-capitalism. With Molinari, he argues, *"the two different currents of anarchist thought converged: he combined the political anarchism of Burke and Godwin with the nascent economic anarchism of Adam Smith and Say to create a new forms of anarchism"* that has been called *"anarcho-capitalism, or free market anarchism."* [**Op. Cit.**, p. 269] Of course, Godwin (like other anarchists) did not limit his anarchism purely to "political" issues and so he discussed *"economic anarchism"* as well in his critique of private property (as Proudhon also did later). As such, to artificially split anarchism into political and economic spheres is both historically and logically flawed. While some dictionaries limit "anarchism" to opposition to the state, anarchists did and do not.

The key problem for Hart is that Molinari refused to call himself an anarchist. He did not even oppose government, as Hart himself notes Molinari proposed a system of insurance companies to provide defence of property and *"called these insurance companies 'governments' even though they did not have a monopoly within a given geographical area."* As Hart notes, Molinari was the sole defender of such free-market justice at the time in France. [David M. Hart, *"Gustave de Molinari and the Anti-statist Liberal Tradition: Part II"*, pp. 399–434,Journal of Libertarian Studies, vol. V, no. 4, p. 415 and p. 411] Molinari was clear that he wanted *"a regime of free government,"* counterpoising *"monopolist or communist governments"* to *"free governments."* This would lead to *"freedom of government"* rather than its abolition (not freedom **from** government). For Molinarie the future would not bring *"the suppression of the state which is the dream of the anarchists .. . It will bring the diffusion of the state within society. That is ... 'a free state in a free society.'"* [quoted

by Hart, **Op. Cit.**, p. 429, p. 411 and p. 422] As such, Molinari can hardly be considered an anarchist, even if "anarchist" is limited to purely being against government.

Moreover, in another sense Molinari was in favour of the state. As we discuss in section 6, these companies would have a monopoly within a given geographical area — they have to in order to enforce the property owner's power over those who use, but do not own, the property in question. The key contradiction can be seen in Molinari's advocating of company towns, privately owned communities (his term was a *"proprietary company"*). Instead of taxes, people would pay rent and the *"administration of the community would be either left in the hands of the company itself or handled special organisations set up for this purpose."* Within such a regime *"those with the most property had proportionally the greater say in matters which affected the community."* If the poor objected then they could simply leave. [**Op. Cit.**, pp. 421–2 and p. 422]

Given this, the idea that Molinari was an anarchist in any form can be dismissed. His system was based on privatising government, not abolishing it (as he himself admitted). This would be different from the current system, of course, as landlords and capitalists would be hiring force directly to enforce their decisions rather than relying on a state which they control indirectly. This system, as we proved in section 6, would not be anarchist as can be seen from American history. There capitalists and landlords created their own private police forces and armies, which regularly attacked and murdered union organisers and strikers. As an example, there is Henry Ford's Service Department (private police force):

> *"In 1932 a hunger march of the unemployed was planned to march up to the gates of the Ford plant at Dearborn... The machine guns of the Dearborn police and the Ford Motor Company's Service Department killed [four] and wounded over a score of others... Ford was fundamentally and entirely opposed to trade unions. The idea of working men questioning his prerogatives as an owner was outrageous ... [T]he River Rouge plant... was dominated by the autocratic regime of Bennett's service men. Bennett .. organise[d] and train[ed] the three and a half thousand private policemen employed by Ford. His task was to maintain discipline amongst the work force, protect Ford's property [and power], and prevent unionisation... Frank Murphy, the mayor of Detroit, claimed that 'Henry Ford employs some of the worst gangsters in our city.' The claim was well based. Ford's Service Department policed the gates of his plants, infiltrated emergent groups of union activists, posed as workers to spy on men on the line... Under this tyranny the Ford worker had no security, no rights. So much so that any information about the state of things within the plant could only be freely obtained from ex-Ford workers."* [Huw Beynon, **Working for Ford**, pp. 29–30]

The private police attacked women workers handing out pro-union handbills and gave them *"a severe beating."* At Kansas and Dallas *"similar beatings were handed out to the union men."* This use of private police to control the work force was not unique. General Motors *"spent one million dollars on espionage, employing fourteen detective agencies and two hundred spies at one time [between 1933 and 1936]. The Pinkerton Detective Agency found anti-unionism its most lucrative activity."* [**Op. Cit.**, p. 34 and p. 32] We must also note that the Pinkerton's had been selling their private police services for decades before the 1930s. For over 60 years the Pinkerton Detective Agency had *"specialised in providing spies, agent provocateurs, and private armed forces for employers combating labour organisations."* By 1892 it *"had provided its services*

for management in seventy major labour disputes, and its 2 000 active agents and 30 000 reserves totalled more than the standing army of the nation." [Jeremy Brecher, **Strike!**, p. 55] With this force available, little wonder unions found it so hard to survive in the USA.

Only an "anarcho"-capitalist would deny that this is a private government, employing private police to enforce private power. Given that unions could be considered as "defence" agencies for workers, this suggests a picture of how "anarcho"-capitalism may work in practice radically different from the pictures painted by its advocates. The reason is simple, it does not ignore inequality and subjects economics to an anarchist analysis. Little wonder, then, that Proudhon stressed that it *"becomes necessary for the workers to form themselves into democratic societies, with equal conditions for all members, on pain of a relapse into feudalism."* Anarchism, in other words, would see *"[c]apitalistic and proprietary exploitation stopped everywhere, the wage system abolished"* and so *"the economic organisation [would] replac[e] the governmental and military system."* [**The General Idea of the Revolution**, p. 227 and p. 281] Clearly, the idea that Proudhon shared the same political goal as Molinari is a joke. He would have dismissed such a system as little more than an updated form of feudalism in which the property owner is sovereign and the workers subjects (see section B.4 for more details).

Unsurprisingly, Molinari (unlike the individualist anarchists) attacked the jury system, arguing that its obliged people to *"perform the duties of judges. This is pure communism."* People would *"judge according to the colour of their opinions, than according to justice."* [quoted by Hart, **Op. Cit.**, p. 409] As the jury system used amateurs (i.e. ordinary people) rather than full-time professionals it could not be relied upon to defend the power and property rights of the rich. As we noted in section 1.4, Rothbard criticised the individualist anarchists for supporting juries for essentially the same reasons.

But, as is clear from Hart's account, Molinari had little concern that working class people should have a say in their own lives beyond consuming goods. His perspective can be seen from his lament about those *"colonies where slavery has been abolished without the compulsory labour being replaced with an equivalent quantity of free [sic!] labour [i.e., wage labour], there has occurred the opposite of what happens everyday before our eyes. Simple workers have been seen to exploit in their turn the industrial* ***entrepreneurs,*** *demanding from them wages which bear absolutely no relation to the legitimate share in the product which they ought to receive. The planters were unable to obtain for their sugar a sufficient price to cover the increase in wages, and were obliged to furnish the extra amount, at first out of their profits, and then out of their very capital. A considerable number of planters have been ruined as a result ... It is doubtless better that these accumulations of capital should be destroyed than that generations of men should perish [Marx: 'how generous of M. Molinari'] but would it not be better if both survived?"* [quoted by Karl Marx, **Capital**, vol. 1, p. 937f]

So workers exploiting capital is the *"opposite of what happens everyday before our eyes"*? In other words, it is normal that entrepreneurs *"exploit"* workers under capitalism? Similarly, what is a *"legitimate share"* which workers *"ought to receive"*? Surely that is determined by the eternal laws of supply and demand and not what the capitalists (or Molinari) thinks is right? And those poor former slave drivers, they really do deserve our sympathy. What horrors they face from the impositions subjected upon them by their ex-chattels — they had to reduce their profits! How dare their ex-slaves refuse to obey them in return for what their ex-owners think was their *"legitimate share in the produce"*! How *"simple"* these workers are, not understanding the sacrifices their former masters suffer nor appreciating how much more difficult it is for their

ex-masters to create *"the product"* without the whip and the branding iron to aid them! As Marx so rightly comments: *"And what, if you please, is this 'legitimate share', which, according to [Molinari's] own admission, the capitalist in Europe daily neglects to pay? Over yonder, in the colonies, where the workers are so 'simple' as to 'exploit' the capitalist, M. Molinari feels a powerful itch to use police methods to set on the right road that law of supply and demand which works automatically everywhere else."* [**Op. Cit.**, p. 937f]

An added difficulty in arguing that Molinari was an anarchist is that he was a contemporary of Proudhon, the first self-declared anarchist, and lived in a country with a vigorous anarchist movement. Surely if he was really an anarchist, he would have proclaimed his kinship with Proudhon and joined in the wider movement. He did not, as Hart notes as regards Proudhon:

> *"their differences in economic theory were considerable, and it is probably for this reason that Molinari refused to call himself an anarchist in spite of their many similarities in political theory. Molinari refused to accept the socialist economic ideas of Proudhon .. . in Molinari's mind, the term 'anarchist' was intimately linked with socialist and statist economic views."* [**Op. Cit.**, p. 415]

Yet Proudhon's economic views, like Godwin's, flowed from his anarchist analysis and principles. They cannot be arbitrarily separated as Hart suggests. So while arguing that *"Molinari was just as much an anarchist as Proudhon,"* Hart forgets the key issue. Proudhon was aware that private property ensured that the proletarian did not exercise *"self-government"* during working hours, i.e. was not a self-governing individual. As for Hart claiming that Proudhon had *"statist economic views"* it simply shows how far an "anarcho"-capitalist perspective is from genuine anarchism. Proudhon's economic analysis, his critique of private property and capitalism, flowed from his anarchism and was an integral aspect of it.

To restrict anarchism purely to opposition to the state, Hart is impoverishing anarchist theory and denying its history. Given that anarchism was born from a critique of private property as well as government, this shows the false nature of Hart's claim that *"Molinari was the first to develop a theory of free-market, proprietary anarchism that extended the laws of the market and a rigorous defence of property to its logical extreme."* [**Op. Cit.**, p. 415 and p. 416] Hart shows how far from anarchism Molinari was as Proudhon had turned his anarchist analysis to property, showing that *"defence of property"* lead to the oppression of the many by the few in social relationships identical to those which mark the state. Moreover, Proudhon, argued the state would always be required to defend such social relations. Privatising it would hardly be a step forward.

Unsurprisingly, Proudhon dismissed the idea that the laissez faire capitalists shared his goals. *"The school of Say,"* Proudhon argued, was *"the chief focus of counter-revolution next to the Jesuits"* and *"has for ten years past seemed to exist only to protect and applaud the execrable work of the monopolists of money and necessities, deepening more and more the obscurity of a science naturally difficult and full of complications."* Much the same can be said of "anarcho"- capitalists, incidentally. For Proudhon, *"the disciples of Malthus and of Say, who oppose with all their might any intervention of the State in matters commercial or industrial, do not fail to avail themselves of this seemingly liberal attitude, and to show themselves more revolutionary than the Revolution. More than one honest searcher has been deceived thereby."* However, this apparent "anti-statist" attitude of supporters of capitalism is false as pure free market capitalism cannot solve the social question, which arises because of capitalism itself. As such, it was impossible to abolish the state under

capitalism. Thus *"this inaction of Power in economic matters was the foundation of government. What need should we have of a political organisation, if Power once permitted us to enjoy economic order?"* Instead of capitalism, Proudhon advocated the *"constitution of Value,"* the *"organisation of credit,"* the elimination of interest, the *"establishment of workingmen's associations"* and *"the use of a just price."* [**The General Idea of the Revolution**, p. 225, p. 226 and p. 233]

Clearly, then, the claims that Molinari was an anarchist fail as he, unlike his followers, were aware of what anarchism actually stood for. Hart, in his own way, acknowledges this:

> *"In spite of his protestations to the contrary, Molinari should be considered an anarchist thinker. His attack on the state's monopoly of defence must surely warrant the description of anarchism. His reluctance to accept this label stemmed from the fact that the socialists had used it first to describe a form of non-statist society which Molinari definitely opposed. Like many original thinkers, Molinari had to use the concepts developed by others to describe his theories. In his case, he had come to the same political conclusions as the communist anarchists although he had been working within the liberal tradition, and it is therefore not surprising that the terms used by the two schools were not compatible. It would not be until the latter half of the twentieth century that radical, free-trade liberals would use the word 'anarchist' to describe their beliefs."* [**Op. Cit.**, p. 416]

It should be noted that Proudhon was **not** a communist-anarchist, but the point remains. The aims of anarchism were recognised by Molinari as being inconsistent with his ideology. Consequently, he (rightly) refused the label. If only his self-proclaimed followers in the *"latter half of the twentieth century"* did the same anarchists would not have to bother with them!

As such, it seems ironic that the founder of "anarcho"-capitalism should have come to the same conclusion as modern day anarchists on the subject of whether his ideas are a form of anarchism or not!

7.2 Is government compatible with anarchism?

Of course not, but ironically this is the conclusion arrived at by Hart's analyst of the British "voluntaryists," particularly Auberon Herbert. Voluntaryism was a fringe part of the right-wing individualist movement inspired by Herbert Spencer, a spokesman for free market capitalism in the later half of the nineteenth century. As with Molinari, there is a problem with presenting this ideology as anarchist, namely that its leading light, Herbert, explicitly rejected the label "anarchist."

Herbert was clearly aware of individualist anarchism and distanced himself from it. He argued that such a system would be *"pandemonium."* He thought that people should *"not direct our attacks — as the anarchists do — **against all government** , against government in itself"* but *"only against the overgrown, the exaggerated, the insolent, unreasonable and indefensible forms of government, which are found everywhere today."* Government should be *"strictly limited to its legitimate duties in defence of self-ownership and individual rights."* He stressed that *"we are governmentalists ... formally constituted by the nation, employing in this matter of force the majority method."* Moreover, Herbert knew of, and rejected, individualist anarchism, considering it to be *"founded on a fatal mistake."* [**Essay X: The Principles Of Voluntaryism And Free Life**] As such, claims that he was an anarchist or "anarcho"-capitalist cannot be justified.

Hart is aware of this slight problem, quoting Herbert's claim that he aimed for *"regularly constituted government, generally accepted by all citizens for the protection of the individual."* [quoted by Hart, **Op. Cit.**, p. 86] Like Molinari, Herbert was aware that anarchism was a form of socialism and that the political aims could not be artificially separated from its economic and social aims. As such, he was right **not** to call his ideas anarchism as it would result in confusion (particularly as anarchism was a much larger movement than his). As Hart acknowledges, *"Herbert faced the same problems that Molinari had with labelling his philosophy. Like Molinari, he rejected the term 'anarchism,' which he associated with the socialism of Proudhon and .. . terrorism."* While *"quite tolerant"* of individualist anarchism, he thought they *"were mistaken in their rejections of 'government.'"* However, Hart knows better than Herbert about his own ideas, arguing that his ideology *"is in fact a new form of anarchism, since the most important aspect of the modern state, the monopoly of the use of force in a given area, is rejected in no uncertain terms by both men."* [**Op. Cit.**, p. 86] He does mention that Benjamin Tucker called Herbert a *"true anarchist in everything but name,"* but Tucker denied that Kropotkin was an anarchist suggesting that he was hardly a reliable guide. [quoted by Hart, **Op. Cit.**, p. 87] As it stands, it seems that Tucker was mistaken in his evaluation of Herbert's politics.

Economically, Herbert was not an anarchist, arguing that the state should protect Lockean property rights. Of course, Hart may argue that these economic differences are not relevant to the issue of Herbert's anarchism but that is simply to repeat the claim that anarchism is simply concerned with government, a claim which is hard to support. This position cannot be maintained, given that both Herbert and Molinari defended the right of capitalists and landlords to force their employees and tenants to follow their orders. Their "governments" existed to defend the capitalist from rebellious workers, to break unions, strikes and occupations. In other words, they were a monopoly of the use of force in a given area to enforce the monopoly of power in a given area (namely, the wishes of the property owner). While they may have argued that this was "defence of liberty," in reality it is defence of power and authority.

What about if we just look at the political aspects of his ideas? Did Herbert actually advocate anarchism? No, far from it. He clearly demanded a minimal state based on voluntary taxation. The state would not use force of any kind, *"except for purposes of restraining force."* He argued that in his system, while *"the state should compel no services and exact no payments by force,"* it *"should be free to conduct many useful undertakings ... in competition with all voluntary agencies ... in dependence on voluntary payments."* [Herbert, **Op. Cit.**] As such, *"the state"* would remain and unless he is using the term "state" in some highly unusual way, it is clear that he means a system where individuals live under a single elected government as their common law maker, judge and defender within a given territory.

This becomes clearer once we look at how the state would be organised. In his essay *"A Politician in Sight of Haven,"* Herbert does discuss the franchise, stating it would be limited to those who paid a voluntary *"income tax,"* anyone *"paying it would have the right to vote; those who did not pay it would be — as is just — without the franchise. There would be no other tax."* The law would be strictly limited, of course, and the *"government ... must confine itself simply to the defense of life and property, whether as regards internal or external defense."* In other words, Herbert was a minimal statist, with his government elected by a majority of those who choose to pay their income tax and funded by that (and by any other voluntary taxes they decided to pay). Whether individuals and companies could hire their own private police in such a regime is irrelevant in determining whether it is an anarchy.

This can be best seen by comparing Herbert with Ayn Rand. No one would ever claim Rand was an anarchist, yet her ideas were extremely similar to Herbert's. Like Herbert, Rand supported laissez-faire capitalism and was against the "initiation of force." Like Herbert, she extended this principle to favour a government funded by voluntary means [*"Government Financing in a Free Society,"* **The Virtue of Selfishness**, pp. 116–20] Moreover, like Herbert, she explicitly denied being an anarchist and, again like Herbert, thought the idea of competing defence agencies ("governments") would result in chaos. The similarities with Herbert are clear, yet no "anarcho"-capitalist would claim that Rand was an anarchist, yet they do claim that Herbert was.

This position is, of course, deeply illogical and flows from the non-anarchist nature of "anarcho"-capitalism. Perhaps unsurprisingly, when Rothbard discusses the ideas of the "voluntaryists" he fails to address the key issue of who determines the laws being enforced in society. For Rothbard, the key issue is **who** is enforcing the law, not where that law comes from (as long, of course, as it is a law code he approves of). The implications of this is significant, as it implies that "anarchism" need not be opposed to either the state nor government! This can be clearly seen from Rothbard's analysis of voluntary taxation.

Rothbard, correctly, notes that Herbert advocated voluntary taxation as the means of funding a state whose basic role was to enforce Lockean property rights. For Rothbard, the key issue was **not** who determines the law but who enforces it. For Rothbard, it should be privatised police and courts and he suggests that the *"voluntary taxationists have never attempted to answer this problem; they have rather stubbornly assumed that no one would set up a competing defence agency within a State's territorial limits."* If the state **did** bar such firms, then that system is not a genuine free market. However, *"if the government **did** permit free competition in defence service, there would soon no longer be a central government over the territory. Defence agencies, police and judicial, would compete with one another in the same uncoerced manner as the producers of any other service on the market."* [**Power and Market**, p. 122 and p. 123]

However, this misses the point totally. The key issue that Rothbard ignores is who determines the laws which these private "defence" agencies would enforce. If the laws are determined by a central government, then the fact that citizen's can hire private police and attend private courts does not stop the regime being statist. We can safely assume Rand, for example, would have had no problem with companies providing private security guards or the hiring of private detectives within the context of her minimal state. Ironically, Rothbard stresses the need for such a monopoly legal system:

> *"While 'the government' would cease to exist, the same cannot be said for a constitution or a rule of law, which, in fact, would take on in the free society a far more important function than at present. For the freely competing judicial agencies would have to be guided by a body of absolute law to enable them to distinguish objectively between defence and invasion. This law, embodying elaborations upon the basic injunction to defend person and property from acts of invasion, would be codified in the basic legal code. Failure to establish such a code of law would tend to break down the free market, for then defence against invasion could not be adequately achieved."* [**Op. Cit.**, p. 123–4]

So if you violate the *"absolute law"* defending (absolute) property rights then you would be in trouble. The problem now lies in determining who sets that law. Rothbard is silent on how his

system of monopoly laws are determined or specified. The "voluntaryists" did propose a solution, namely a central government elected by the majority of those who voluntarily decided to pay an income tax. In the words of Herbert:

> *"We agree that there must be a central agency to deal with crime — an agency that defends the liberty of all men, and employs force against the uses of force; but my central agency rests upon voluntary support, whilst Mr. Levy's central agency rests on compulsory support."* [quoted by Carl Watner, *"The English Individualists As They Appear In Liberty,"* pp. 191–211, **Benjamin R. Tucker and the Champions of Liberty**, p. 194]

And all Rothbard is concerned over private cops would exist or not! This lack of concern over the existence of the state and government flows from the strange fact that "anarcho"-capitalists commonly use the term "anarchism" to refer to any philosophy that opposes all forms of initiatory coercion. Notice that government does not play a part in this definition, thus Rothbard can analyse Herbert's politics without commenting on who determines the law his private "defence" agencies enforce. For Rothbard, *"an anarchist society"* is defined *"as one where there is no legal possibility for coercive aggression against the person and property of any individual."* He then moved onto the state, defining that as an *"institution which possesses one or both (almost always both) of the following properties: (1) it acquires its income by the physical coercion known as 'taxation'; and (2) it acquires and usually obtains a coerced monopoly of the provision of defence service (police and courts) over a given territorial area."* [*"Society without a State"*, in **Nomos XIX**, Pennock and Chapman (eds.)., p. 192]

This is highly unusual definition of "anarchism," given that it utterly fails to mention or define government. This, perhaps, is understandable as any attempt to define it in terms of *"monopoly of decision-making power"* results in showing that capitalism is statist (see section 1 for a summary). The key issue here is the term *"legal possibility."* That suggestions a system of laws which determine what is *"coercive aggression"* and what constitutes what is and what is not legitimate "property." Herbert is considered by "anarcho"-capitalists as one of them. Which brings us to a strange conclusion, that for "anarcho"-capitalists you can have a system of "anarchism" in which there is a government and state — as long as the state does not impose taxation nor stop private police forces from operating!

As Rothbard argues *"if a government based on voluntary taxation permits free competition, the result will be the purely free-market system ... The previous government would now simply be one competing defence agency among many on the market."* [**Power and Market**, p. 124] That the government is specifying what is and is not legal does not seem to bother him or even cross his mind. Why should it, when the existence of government is irrelevant to his definition of anarchism and the state? That private police are enforcing a monopoly law determined by the government seems hardly a step in the right direction nor can it be considered as anarchism. Perhaps this is unsurprising, for under his system there would be *"a basic, common Law Code"* which *"all would have to abide by"* as well as *"some way of resolving disputes that will gain a majority consensus in society ... whose decision will be accepted by the great majority of the public."* [*"Society without a State,"* **Op. Cit.**, p. 205]

At least Herbert is clear that this would be a government system, unlike Rothbard who assumes a monopoly law but seems to think that this is not a government or a state. As David Wieck

argued, this is illogical for according to Rothbard *"all 'would have to' conform to the same legal code"* and this can only be achieved by means of *"the forceful action of adherents to the code against those who flout it"* and so *"in his system* ***there would stand over against every individual the legal authority of all the others.*** *An individual who did not recognise private property as legitimate would surely perceive this as a tyranny of law, a tyranny of the majority or of the most powerful — in short, a hydra-headed state. If the law code is itself unitary, then this multiple state might be said to have properly a single head — the law . .. But it looks as though one might still call this 'a state,' under Rothbard's definition, by satisfying* ***de facto*** *one of his pair of sufficient conditions: 'It asserts and usually obtains a coerced monopoly of provision of defence service (police and courts) over a given territorial area' ... Hobbes's individual sovereign would seem to have become many sovereigns — with but one law, however, and in truth, therefore, a single sovereign in Hobbes's more important sense of the latter term. One might better, and less confusingly, call this a libertarian state than an anarchy."* [*"Anarchist Justice"*, in **Nomos XIX**, Pennock and Chapman (eds.)., pp. 216–7]

The obvious recipients of the coercion of the new state would be those who rejected the authority of their bosses and landlords, those who reject the Lockean property rights Rothbard and Herbert hold dear. In such cases, the rebels and any "defence agency" (like, say, a union) which defended them would be driven out of business as it violated the law of the land. How this is different from a state banning competing agencies is hard to determine. This is a *"difficulty"* argues Wieck, which *"results from the attachment of a principle of private property, and of unrestricted accumulation of wealth, to the principle of individual liberty. This increases sharply the possibility that many reasonable people who respect their fellow men and women will find themselves outside the law because of dissent from a property interpretation of liberty."* Similarly, there is the economic results of capitalism. *"One can imagine,"* Wieck continues, *"that those who lose out badly in the free competition of Rothbard's economic system, perhaps a considerable number, might regard the legal authority as an alien power, state for them, based on violence, and might be quite unmoved by the fact that, just as under nineteenth century capitalism, a principle of liberty was the justification for it all."* [**Op. Cit.**, p. 217 and pp. 217–8]

7.3 Can there be a "right-wing" anarchism?

Hart, of course, mentions the individualist anarchists, calling Tucker's ideas *"**laissez faire** liberalism."* [**Op. Cit.**, p. 87] However, Tucker called his ideas *"socialism"* and presented a left-wing critique of most aspects of liberalism, particularly its Lockean based private property rights. Tucker based much of his ideas on property on Proudhon, so if Hart dismisses the latter as a socialist then this must apply to the former. Given that he notes that there are *"two main kinds of anarchist thought,"* namely *"communist anarchism which denies the right of an individual to seek profit, charge rent or interest and to own property"* and a *"'right-wing' proprietary anarchism, which vigorously defends these rights"* then Tucker, like Godwin, would have to be placed in the *"left-wing"* camp. [*"Gustave de Molinari and the Anti-statist Liberal Tradition: Part II"*, **Op. Cit.**, p. 427] Tucker, after all, argued that he aimed for the end of profit, interest and rent and attacked private property in land and housing beyond "occupancy and use."

As can be seen, Hart's account of the history of "anti-state" liberalism is flawed. Godwin is included only by ignoring his views on property, views which in many ways reflects the later "socialist" (i.e. anarchist) analysis of Proudhon. He then discusses a few individuals who were

alone in their opinions even within extreme free market right and all of whom knew of anarchism and explicitly rejected the name for their respective ideologies. In fact, they preferred the term *"government"* to describe their systems which, on the face of it, would be hard to reconcile with the usual "anarcho"-capitalist definition of anarchism as being "no government." Hart's discussion of individualist anarchism is equally flawed, failing to discuss their economic views (just as well, as its links to "left-wing" anarchism would be obvious).

However, the similarities of Molinari's views with what later became known as "anarcho"-capitalism are clear. Hart notes that with Molinari's death in 1912, *"liberal anti-statism virtually disappeared until it was rediscovered by the economist Murray Rothbard in the late 1950's"* [*"Gustave de Molinari and the Anti-statist Liberal Tradition: Part III"*, **Op. Cit.**, p. 88] While this fringe is somewhat bigger than previously, the fact remains that the ideas expounded by Rothbard are just as alien to the anarchist tradition as Molinari's. It is a shame that Rothbard, like his predecessors, did not call his ideology something other than anarchism. Not only would it have been more accurate, it would also have lead to much less confusion and no need to write this section of the FAQ! As it stands, the only reason why "anarcho"-capitalism is considered a form of "anarchism" by some is because one person (Rothbard) decided to steal the name of a well established and widespread political and social theory and movement and apply it to an ideology with little, if anything, in common with it.

As Hart inadvertently shows, it is not a firm base to build a claim. That anyone can consider "anarcho"-capitalism as anarchist simply flows from a lack of knowledge about anarchism. As numerous anarchists have argued. For example, *"Rothbard's conjunction of anarchism with capitalism,"* according to David Wieck, *"results in a conception that is entirely outside the mainstream of anarchist theoretical writings or social movements ... this conjunction is a self-contradiction."* He stressed that *"the main traditions of anarchism are entirely different. These traditions, and theoretical writings associated with them, express the perspectives and the aspirations, and also, sometimes, the rage, of the oppressed people in human society: not only those economically oppressed, although the major anarchist movements have been mainly movements of workers and peasants, but also those oppressed by power in all those social dimensions ... including of course that of political power expressed in the state."* In other words, *"anarchism represents . .. a moral commitment (Rothbard's anarchism I take to be diametrically opposite)."* [*"Anarchist Justice"*, in **Nomos XIX**, Pennock and Chapman (eds.), p. 215, p. 229 and p. 234]

It is a shame that some academics consider only the word Rothbard uses as relevant rather than the content and its relation to anarchist theory and history. If they did, they would soon realise that the expressed opposition of so many anarchists to "anarcho"-capitalism is something which cannot be ignored or dismissed. In other words, a "right-wing" anarchist cannot and does not exist, no matter how often they use that word to describe their ideology. As Bob Black put it, *"a right-wing anarchist is just a minarchist who'd abolish the state to his own satisfaction by calling it something else ... They don't denounce what the state does, they just object to who's doing it."* [**Libertarian as Conservative**]

The reason is simple. Anarchist economics and politics cannot be artificially separated, they are linked. Godwin and Proudhon did not stop their analysis at the state. They extended it the social relationships produced by inequality of wealth, i.e. economic power as well as political power. To see why, we need only consult Rothbard's work. As noted in the last section, for Rothbard the key issue with the "voluntary taxationists" was not who determined the *"body of*

absolute law" but rather who enforced it. In his discussion, he argued that a democratic "defence agency" is at a disadvantage in his "free market" system. As he put it:

> *"It would, in fact, be competing at a severe disadvantage, having been established on the principle of 'democratic voting.' Looked at as a market phenomenon, 'democratic voting' (one vote per person) is simply the method of the consumer 'co-operative.' Empirically, it has been demonstrated time and again that co-operatives cannot compete successfully against stock-owned companies, especially when both are equal before the law. There is no reason to believe that co-operatives for defence would be any more efficient. Hence, we may expect the old co-operative government to 'wither away' through loss of customers on the market, while joint-stock (i.e., corporate) defence agencies would become the prevailing market form."*

Notice how he assumes that both a co-operative and corporation would be *"equal before the law."* But who determines that law? Obviously **not** a democratically elected government, as the idea of "one person, one vote" in determining the common law all are subject to is *"inefficient."* Nor does he think, like the individualist anarchists, that the law would be judged by juries along with the facts. As we note in section 1.4, he rejects that in favour of it being determined by *"Libertarian lawyers and jurists."* Thus the law is unchangeable by ordinary people and enforced by private defence agencies hired to protect the liberty and property of the owning class. In the case of a capitalist economy, this means defending the power of landlords and capitalists against rebel tenants and workers.

This means that Rothbard's *"common Law Code"* will be determined, interpreted, enforced and amended by corporations based on the will of the majority of shareholders, i.e. the rich. That hardly seems likely to produce equality before the law. As he argues in a footnote:

> *"There is a strong **a priori** reason for believing that corporations will be superior to co-operatives in any given situation. For if each owner receives only one vote regardless of how much money he has invested in a project (and earnings are divided in the same way), there is no incentive to invest more than the next man; in fact, every incentive is the other way. This hampering of investment militates strongly against the co-operative form."*

So **if** the law is determined by the defence agencies and courts then it will be determined by those who have invested most in these companies. As it is unlikely that the rich will invest in defence firms which do not support their property rights, power, profits and definition of property rights, it is clear that agencies which favour the wealthy will survive on the market. The idea that market demand will counter this class rule seems unlikely, given Rothbard's own argument. After all, in order to compete successfully you need more than demand, you need source of investment. If co-operative defence agencies do form, they will be at a market disadvantage due to lack of investment. As argued in section J.5.12, even though co-operatives are more efficient than capitalist firms lack of investment (caused by the lack of control by capitalists Rothbard notes) stops them replacing wage slavery. Thus capitalist wealth and power inhibits the spread of freedom in production. If we apply his own argument to Rothbard's system, we suggest that the market in "defence" will also stop the spread of more libertarian associations thanks to capitalist

power and wealth. In other words, like any market, Rothbard's "defence" market will simply reflect the interests of the elite, not the masses.

Moreover, we can expect any democratic defence agency (like a union) to support, say, striking workers or squatting tenants, to be crushed. This is because, as Rothbard stresses, **all** "defence" firms would be expected to apply the *"common"* law, as written by *"Libertarian lawyers and jurists."* If they did not they would quickly be labelled "outlaw" agencies and crushed by the others. Ironically, Tucker would join Bakunin and Kropotkin in an "anarchist" court accused to violating "anarchist" law by practising and advocating "occupancy and use" rather than the approved Rothbardian property rights. Even if these democratic "defence" agencies could survive and not be driven out of the market by a combination of lack of investment and violence due to their "outlaw" status, there is another problem. As we discussed in section 1, landlords and capitalists have a monopoly of decision making power over their property. As such, they can simply refuse to recognise any democratic agency as a legitimate defence association and use the same tactics perfected against unions to ensure that it does not gain a foothold in their domain (see section 6 for more details).

Clearly, then, a "right-wing" anarchism is impossible as any system based on capitalist property rights will simply be an oligarchy run by and for the wealthy. As Rothbard notes, any defence agency based on democratic principles will not survive in the "market" for defence simply because it does not allow the wealthy to control it and its decisions. Little wonder Proudhon argued that laissez-faire capitalism meant *"the victory of the strong over the weak, of those who own property over those who own nothing."* [quoted by Peter Marshall, **Demanding the Impossible**, p. 259]

8 What role did the state take in the creation of capitalism?

If the "anarcho"-capitalist is to claim with any plausibility that "real" capitalism is non-statist or that it can exist without a state, it must be shown that capitalism evolved naturally, in opposition to state intervention. However, in reality, the opposite is the case. Capitalism was born from state intervention and, in the words of Kropotkin, *"the State ... and capitalism ... developed side by side, mutually supporting and re-enforcing each other."* [**Kropotkin's Revolutionary Pamphlets**, p. 181]

Numerous writers have made this point. For example, in Karl Polanyi's flawed masterpiece **The Great Transformation** we read that *"the road to the free market was opened and kept open by an enormous increase in continuous, centrally organised and controlled interventionism"* by the state [p. 140]. This intervention took many forms — for example, state support during "mercantilism," which allowed the "manufactures" (i.e. industry) to survive and develop, enclosures of common land, and so forth. In addition, the slave trade, the invasion and brutal conquest of the Americas and other "primitive" nations, and the looting of gold, slaves, and raw materials from abroad also enriched the European economy, giving the development of capitalism an added boost. Thus Kropotkin:

> *"The history of the genesis of capital has already been told by socialists many times. They have described how it was born of war and pillage, of slavery and serfdom, of modern fraud and exploitation. They have shown how it is nourished by the blood of the worker, and how little by little it has conquered the whole world."* [**Op. Cit.**,p. 207]

Or, if Kropotkin seems too committed to be fair, we have John Stuart Mill's statement that:

> *"The social arrangements of modern Europe commenced from a distribution of property which was the result, not of just partition, or acquisition by industry, but of conquest and violence... "* [**Principles of Political Economy**, p. 15]

Therefore, when supporters of "libertarian" capitalism say they are against the "initiation of force," they mean only **new** initiations of force; for the system they support was born from numerous initiations of force in the past. And, as can be seen from the history of the last 100 years, it also requires state intervention to keep it going (section D.1, "Why does state intervention occur?," addresses this point in some detail). Indeed, many thinkers have argued that it was precisely this state support and coercion (particularly the separation of people from the land) that played the **key** role in allowing capitalism to develop rather than the theory that *"previous savings"* did so. As the noted German thinker Franz Oppenheimer argued, *"the concept of a 'primitive accumulation,' or an original store of wealth, in land and in movable property, brought about by means of purely economic forces"* while *"seem[ing] quite plausible"* is in fact *"utterly mistaken; it is a 'fairly tale,' or it is a class theory used to justify the privileges of the upper classes."* [**The State**, pp. 5–6]

This thesis will be discussed in the following sections. It is, of course, ironic to hear right-wing libertarians sing the praises of a capitalism that never existed and urge its adoption by all nations, in spite of the historical evidence suggesting that only state intervention made capitalist economies viable — even in that Mecca of "free enterprise," the United States. As Noam Chomsky argues, *"who but a lunatic could have opposed the development of a textile industry in New England in the early nineteenth century, when British textile production was so much more efficient that half the New England industrial sector would have gone bankrupt without very high protective tariffs, thus terminating industrial development in the United States? Or the high tariffs that radically undermined economic efficiency to allow the United States to develop steel and other manufacturing capacities? Or the gross distortions of the market that created modern electronics?"* [**World Orders, Old and New**, p. 168]. To claim, therefore, that "mercantilism" is not capitalism makes little sense. Without mercantilism, "proper" capitalism would never have developed, and any attempt to divorce a social system from its roots is ahistoric and makes a mockery of critical thought.

Similarly, it is somewhat ironic when "anarcho"-capitalists and right libertarians claim that they support the freedom of individuals to choose how to live. After all, the working class was not given **that** particular choice when capitalism was developing. Indeed, their right to choose their own way of life was constantly violated and denied. So to claim that **now** (after capitalism has been created) we get the chance to try and live as we like is insulting in the extreme. The available options we have are not independent of the society we live in and are decisively shaped by the past. To claim we are "free" to live as we like (within the laws of capitalism) is basically to argue that we are able to "buy" the freedom that every individual is due from those who have stolen it from us in the first place!

Needless to say, some right-libertarians recognise that the state played a massive role in encouraging industrialisation (more correct to say "proletarianisation" as it created a working class which did not own the tools they used, although we stress that this process started on the land and not in industry). So they contrast "bad" business people (who took state aid) and "good" ones. Thus Rothbard's comment that Marxists have *"made no particular distinction between 'bourgeoisie'*

who made use of the state, and bourgeoisie who acted on the free market." [**The Ethics of Liberty**, p. 72]

But such an argument is nonsense as it ignores the fact that the "free market" is a network (and defined by the state by the property rights it enforces). For example, the owners of the American steel and other companies who grew rich and their companies big behind protectionist walls are obviously "bad" bourgeoisie. But are the bourgeoisie who supplied the steel companies with coal, machinery, food, "defence" and so on not also benefiting from state action? And the suppliers of the luxury goods to the wealthy steel company owners, did they not benefit from state action? Or the suppliers of commodities to the workers that laboured in the steel factories that the tariffs made possible, did they not benefit? And the suppliers to these suppliers? And the suppliers to these suppliers? Did not the users of technology first introduced into industry by companies protected by state orders also not benefit? Did not the capitalists who had a large and landless working class to select from benefit from the "land monopoly" even though they may not have, unlike other capitalists, directly advocated it? It increased the pool of wage labour for **all** capitalists and increased their bargaining position/power in the labour market at the expense of the working class. In other words, such a policy helped maintain capitalist market power, irrespective of whether individual capitalists encouraged politicians to vote to create/maintain it. And, similarly, **all** capitalists benefited from the changes in common law to recognise and protect capitalist private property and rights that the state enforced during the 19th century (see section B.2.5).

It appears that, for Rothbard, the collusion between state and business is the fault, not of capitalism, but of particular capitalists. The system is pure; only individuals are corrupt. But, for anarchists, the origins of the modern state-capitalist system lies not in the individual qualities of capitalists as such but in the dynamic and evolution of capitalism itself — a complex interaction of class interest, class struggle, social defence against the destructive actions of the market, individual qualities and so forth. In other words, Rothbard's claims are flawed — they fail to understand capitalism as a **system** and its dynamic nature.

Indeed, if we look at the role of the state in creating capitalism we could be tempted to rename "anarcho"-capitalism "marxian-capitalism". This is because, given the historical evidence, a political theory can be developed by which the "dictatorship of the bourgeoisie" is created and that this capitalist state "withers away" into anarchy. That this means rejecting the economic and social ideas of Marxism and their replacement by their direct opposite should not mean that we should reject the idea (after all, that is what "anarcho"-capitalism has done to Individualist Anarchism!). But we doubt that many "anarcho"-capitalists will accept such a name change (even though this would reflect their politics far better; after all they do not object to past initiations of force, just current ones and many do seem to think that the modern state **will** wither away due to market forces).

But this is beside the point. The fact remains that state action was required to create and maintain capitalism. Without state support it is doubtful that capitalism would have developed at all.

So, when the right suggests that "we" be "left alone," what they mean by "we" comes into clear focus when we consider how capitalism developed. Artisans and peasants were only "left alone" to starve, and the working classes of industrial capitalism were only "left alone" outside work and for only as long as they respected the rules of their "betters." As for the other side of the class divide, they desire to be "left alone" to exercise their power over others, as we will see.

That modern "capitalism" is, in effect, a kind of "corporate mercantilism," with states providing the conditions that allow corporations to flourish (e.g. tax breaks, subsidies, bailouts, anti-labour laws, etc.) says more about the statist roots of capitalism than the ideologically correct definition of capitalism used by its supporters.

8.1 What social forces lay behind the rise of capitalism?

Capitalist society is a relatively recent development. As Murray Bookchin points out, for a *"long era, perhaps spanning more than five centuries,"* capitalism *"coexisted with feudal and simple commodity relationships"* in Europe. He argues that this period *"simply cannot be treated as 'transitional' without reading back the present into the past."* [**From Urbanisation to Cities**, p. 179] In other words, capitalism was not a inevitable outcome of "history" or social evolution.

He goes on to note that capitalism existed *"with growing significance in the mixed economy of the West from the fourteenth century up to the seventeenth"* but that it *"literally exploded into being in Europe, particularly England, during the eighteenth and especially nineteenth centuries."* [**Op. Cit.**, p. 181] The question arises, what lay behind this *"growing significance"*? Did capitalism *"explode"* due to its inherently more efficient nature or where there other, non-economic, forces at work? As we will show, it was most definitely the later one — capitalism was born not from economic forces but from the political actions of the social elites which its usury enriched. Unlike artisan (simple commodity) production, wage labour generates inequalities and wealth for the few and so will be selected, protected and encouraged by those who control the state in their own economic and social interests.

The development of capitalism in Europe was favoured by two social elites, the rising capitalist class within the degenerating medieval cities and the absolutist state. The medieval city was *"thoroughly changed by the gradual increase in the power of commercial capital, due primarily to foreign trade... By this the inner unity of the commune was loosened, giving place to a growing caste system and leading necessarily to a progressive inequality of social interests. The privileged minorities pressed ever more definitely towards a centralisation of the political forces of the community... Mercantilism in the perishing city republics led logically to a demand for larger economic units [i.e. to nationalise the market]; and by this the desire for stronger political forms was greatly strengthened... . Thus the city gradually became a small state, paving the way for the coming national state."* [Rudolf Rocker, **Nationalism and Culture**, p. 94]

The rising economic power of the proto-capitalists conflicted with that of the feudal lords, which meant that the former required help to consolidate their position. That aid came in the form of the monarchical state. With the force of absolutism behind it, capital could start the process of increasing its power and influence by expanding the "market" through state action.

As far as the absolutist state was concerned, it *"was dependent upon the help of these new economic forces, and vice versa... ."* *"The absolutist state,"* Rocker argues, *"whose coffers the expansion of commerce filled ..., at first furthered the plans of commercial capital. Its armies and fleets ... contributed to the expansion of industrial production because they demanded a number of things for whose large-scale production the shops of small tradesmen were no longer adapted. Thus gradually arose the so-called manufactures, the forerunners of the later large industries."* [**Op. Cit.**, p. 117–8]

Some of the most important state actions from the standpoint of early industry were the so-called Enclosure Acts, by which the "commons" — the free farmland shared communally by the peasants in most rural villages — was "enclosed" or incorporated into the estates of various land-

lords as private property (see section 8.3). This ensured a pool of landless workers who had no option but to sell their labour to capitalists. Indeed, the widespread independence caused by the possession of the majority of households of land caused the rising class of merchants to complain *"that men who should work as wage-labourers cling to the soil, and in the naughtiness of their hearts prefer independence as squatters to employment by a master."* [R.H Tawney, cited by Allan Elgar in **The Apostles of Greed**, p. 12]

In addition, other forms of state aid ensured that capitalist firms got a head start, so ensuring their dominance over other forms of work (such as co-operatives). A major way of creating a pool of resources that could be used for investment was the use of mercantilist policies which used protectionist measures to enrich capitalists and landlords at the expense of consumers and their workers. For example, one of most common complaints of early capitalists was that workers could not turn up to work regularly. Once they had worked a few days, they disappeared as they had earned enough money to live on. With higher prices for food, caused by protectionist measures, workers had to work longer and harder and so became accustomed to factory labour. In addition, mercantilism allowed native industry to develop by barring foreign competition and so allowed industrialists to reap excess profits which they could then use to increase their investments. In the words of Marian-socialist economic historian Maurice Dobbs:

> *"In short, the Mercantile System was a system of State-regulated exploitation through trade which played a highly important rule in the adolescence of capitalist industry: it was essentially the economic policy of an age of primitive accumulation."* [**Studies in Capitalism Development**, p. 209]

As Rocker summarises, *"when abolutism had victoriously overcome all opposition to national unification, but its furthering of mercantilism and economic monopoly it gave the whole social evolution a direction which could only lead to capitalism."* [**Op. Cit.**, pp. 116–7]

This process of state aid in capitalist development was also seen in the United States of America. As Edward Herman points out, the *"level of government involvement in business in the United States from the late eighteenth century to the present has followed a U-shaped pattern: There was extensive government intervention in the pre-Civil War period (major subsidies, joint ventures with active government participation and direct government production), then a quasi-laissez faire period between the Civil War and the end of the nineteenth century [a period marked by "the aggressive use of tariff protection" and state supported railway construction, a key factor in capitalist expansion in the USA], followed by a gradual upswing of government intervention in the twentieth century, which accelerated after 1930."* [**Corporate Control, Corporate Power**, p. 162]

Such intervention ensured that income was transferred from workers to capitalists. Under state protection, America industrialised by forcing the consumer to enrich the capitalists and increase their capital stock. *"According to one study, of the tariff had been removed in the 1830s 'about half the industrial sector of New England would have been bankrupted' ... the tariff became a near-permanent political institution representing government assistance to manufacturing. It kept price levels from being driven down by foreign competition and thereby shifted the distribution of income in favour of owners of industrial property to the disadvantage of workers and customers."* [Richard B. Du Boff, **Accumulation and Power**, p. 56]

This protection was essential, for as Du Boff notes, the *"end of the European wars in 1814 ... reopened the United States to a flood of British imports that drove many American competitors out*

of business. Large portions of the newly expanded manufacturing base were wiped out, bringing a decade of near-stagnation." Unsurprisingly, the *"era of protectionism began in 1816, with northern agitation for higher tariffs. .. "* [**Op. Cit.**, p. 14, p. 55]

Combined with ready repression of the labour movement and government "homesteading" acts (see section 8.5), tariffs were the American equivalent of mercantilism (which, after all, was above all else a policy of protectionism, i.e. the use of government to stimulate the growth of native industry). Only once America was at the top of the economic pile did it renounce state intervention (just as Britain did, we must note).

This is **not** to suggest that government aid was limited to tariffs. The state played a key role in the development of industry and manufacturing. As John Zerzan notes, the *"role of the State is tellingly reflected by the fact that the 'armoury system' now rivals the older 'American system of manufactures' term as the more accurate to describe the new system of production methods"* developed in the early 1800s. [**Elements of Refusal**, p. 100] Moreover, the *"lead in technological innovation [during the US Industrial Revolution] came in armaments where assured government orders justified high fixed-cost investments in special-pursue machinery and managerial personnel. Indeed, some of the pioneering effects occurred in government-owned armouries."* [William Lazonick, **Competitive Advantage on the Shop Floor**, p. 218] The government also *"actively furthered this process [of "commercial revolution"] with public works in transportation and communication."* [Richard B. Du Boff, **Op. Cit.**, p. 15]

In addition to this "physical" aid, *"state government provided critical help, with devices like the chartered corporation"* [**Ibid.**] and, as we noted in section B.2.5, changes in the legal system which favoured capitalist interests over the rest of society.

Interestingly, there was increasing inequality between 1840 and 1860 in the USA This coincided with the victory of wage labour and industrial capitalism — the 1820s *"constituted a watershed in U.S. life. By the end of that decade ...industrialism assured its decisive American victory, by the end of the 1830s all of its cardinal features were definitely present."* [John Zerzan, **Op. Cit.**, p. 99] This is unsurprising, for as we have argued many times, the capitalist market tends to increase, not reduce, inequalities between individuals and classes. Little wonder the Individualist Anarchists at the time denounced the way that property had been transformed into *"a power [with which] to accumulate an income"* (to use the words of J.K. Ingalls).

Over all, as Paul Ormerod puts it, the *"advice to follow pure free-market polices seems ... to be contrary to the lessons of virtually the whole of economic history since the Industrial Revolution ... every country which has moved into ... strong sustained growth . .. has done so in outright violation of pure, free-market principles." "The model of entrepreneurial activity in the product market, with judicious state support plus repression in the labour market, seems to be a good model of economic development."* [**The Death of Economics**, p. 63]

Thus the social forces at work creating capitalism was a combination of capitalist activity and state action. But without the support of the state, it is doubtful that capitalist activity would have been enough to generate the initial accumulation required to start the economic ball rolling. Hence the necessity of Mercantilism in Europe and its modified cousin of state aid, tariffs and "homestead acts" in America.

8.2 What was the social context of the statement "laissez-faire?"

The honeymoon of interests between the early capitalists and autocratic kings did not last long. *"This selfsame monarchy, which for weighty reasons sought to further the aims of commercial capital and was... itself aided in its development by capital, grew at last into a crippling obstacle to any further development of European industry."* [Rudolf Rocker, **Nationalism and Culture**, p. 117]

This is the social context of the expression *"laissez-faire"* — a system which has outgrown the supports that protected it in its early stages of growth. Just as children eventually rebel against the protection and rules of their parents, so the capitalists rebelled against the over-bearing support of the absolutist state. Mercantilist policies favoured some industries and harmed the growth of industrial capitalism in others. The rules and regulations imposed upon those it did favour reduced the flexibility of capitalists to changing environments. As Rocker argues, *"no matter how the abolutist state strove, in its own interest, to meety the demands of commerce, it still put on industry countless fetters which became gradually more and more oppressive ... [it] became an unbearable burden ... which paralysed all economic and social life."* [*Op. Cit.*, p. 119] All in all, mercantilism became more of a hindrance than a help and so had to be replaced. With the growth of economic and social power by the capitalist class, this replacement was made easier.

Errico Malatesta notes, *"[t]he development of production, the vast expansion of commerce, the immeasurable power assumed by money ... have guaranteed this supremacy [of economic power over the political power] to the capitalist class which, no longer content with enjoying the support of the government, demanded that government arise from its own ranks. A government which owed its origin to the right of conquest . .. though subject by existing circumstances to the capitalist class, went on maintaining a proud and contemptuous attitude towards its now wealthy former slaves, and had pretensions to independence of domination. That government was indeed the defender, the property owners' gendarme, but the kind of gendarmes who think they are somebody, and behave in an arrogant manner towards the people they have to escort and defend, when they don't rob or kill them at the next street corner; and the capitalist class got rid of it ... [and replaced it] by a government [and state] ... at all times under its control and specifically organised to defend that class against any possible demands by the disinherited."* [**Anarchy**, pp. 19–20]

Malatesta here indicates the true meaning of *"leave us alone,"* or *"laissez-faire."* The **absolutist** state (not "the state" per se) began to interfere with capitalists' profit-making activities and authority, so they determined that it had to go — as happened, for example, in the English, French and American revolutions. However, in other ways, state intervention in society was encouraged and applauded by capitalists. *"It is ironic that the main protagonists of the State, in its political and administrative authority, were the middle-class Utilitarians, on the other side of whose Statist banner were inscribed the doctrines of economic Laissez Faire"* [E.P. Thompson, **The Making of the English Working Class**, p. 90]. Capitalists simply wanted **capitalist** states to replace monarchical states, so that heads of government would follow state economic policies regarded by capitalists as beneficial to their class as a whole. And as development economist Lance Taylor argues:

> *"In the long run, there are no laissez-faire transitions to modern economic growth. The state has always intervened to create a capitalist class, and then it has to regulate the capitalist class, and then the state has to worry about being taken over by the capitalist class, but the state has always been there."* [quoted by Noam Chomsky, **Year 501**, p. 104]

In order to attack mercantilism, the early capitalists had to ignore the successful impact of its policies in developing industry and a "store of wealth" for future economic activity. As William Lazonick points out, *"the political purpose of [Adam Smith's] the* ***Wealth of Nations*** *was to attack the mercantilist institutions that the British economy had built up over the previous two hundred years... In his attack on these institutions, Smith might have asked why the extent of the world market available to Britain in the late eighteenth century was* ***so uniquely under British control.*** *If Smith had asked this 'big question,' he might have been forced to grant credit for [it] ... to the very mercantilist institutions he was attacking ..."* Moreover, he *"might have recognised the integral relation between economic and political power in the rise of Britain to international dominance."* Overall, *"[w]hat the British advocates of laissez-faire neglected to talk about was the role that a system of national power had played in creating conditions for Britain to embark on its dynamic development path ... They did not bother to ask how Britain had attained th[e] position [of 'workshop of the world'], while they conveniently ignored the on going system of national power — the British Empire — that ... continued to support Britain's position."* [**Business Organisation and the Myth of the Market Economy**, p. 2, p. 3, p.5]

Similar comments are applicable to American supporters of laissez faire who fail to notice that the "traditional" American support for world-wide free trade is quite a recent phenomenon. It started only at the end of the Second World War (although, of course, **within** America military Keynesian policies were utilised). While American industry was developing, the country had no time for laissez-faire. After it had grown strong, the United States began preaching laissez-faire to the rest of the world — and began to kid itself about its own history, believing its slogans about laissez-faire as the secret of its success. In addition to the tariff, nineteenth-century America went in heavily for industrial planning–occasionally under that name but more often in the name of national defence. The military was the excuse for what is today termed rebuilding infrastructure, picking winners, promoting research, and co-ordinating industrial growth (as it still is, we should add).

As Richard B. Du Boff points out, the "anti-state" backlash of the 1840s onwards in America was highly selective, as the general opinion was that *"[h]enceforth, if governments wished to subsidise private business operations, there would be no objection. But if public power were to be used to control business actions or if the public sector were to undertake economic initiatives on its own, it would run up against the determined opposition of private capital."* [**Accumulation and Power**, p. 26] In other words, the state could aid capitalists indirectly (via tariffs, land policy, repression of the labour movement, infrastructure subsidy and so on) and it would "leave them alone" to oppress and exploit workers, exploit consumers, build their industrial empires and so forth.

So, the expression "laissez-faire" dates from the period when capitalists were objecting to the restrictions that helped create them in the first place. It has little to do with freedom as such and far more to do with the needs of capitalist power and profits (as Murray Bookchin argues, it is an error to depict this *"revolutionary era and its democratic aspirations as 'bourgeois,' an imagery that makes capitalism a system more committed to freedom, or even ordinary civil liberties, than it was historically"* [**From Urbanisation to Cities**, p. 180f]). Takis Fotopoules, in his essay *"The Nation-state and the Market"*, indicates that the social forces at work in "freeing" the market did not represent a "natural" evolution towards freedom:

> *"Contrary to what liberals and Marxists assert, marketisation of the economy was not just an evolutionary process, following the expansion of trade under mercantilism ...*

> *modern [i.e. capitalist] markets did not evolve out of local markets and/or markets for foreign goods ... the nation-state, which was just emerging at the end of the Middle Ages, played a crucial role creating the conditions for the 'nationalisation' of the market ... and ... by freeing the market [i.e. the rich and proto-capitalists] from effective social control."* [**Society and Nature**, Vol. 3, pp. 44–45]

The "freeing" of the market thus means freeing those who "own" most of the market (i.e. the wealthy elite) from *"effective social control,"* but the rest of society was not as lucky. Peter Kropotkin makes a similar point in **Modern Science and Anarchism**, *"[w]hile giving the capitalist any degree of free scope to amass his wealth at the expense of the helpless labourers, the government has **nowhere** and **never**. ..afforded the labourers the opportunity 'to do as they pleased'."* [**Kropotkin's Revolutionary Pamphlets**, p. 182]

The one essential form of support the "Libertarian" right wants the state (or "defence" firms) to provide capitalism is the enforcement of property rights — the right of property owners to "do as they like" on their own property, which can have obvious and extensive social impacts. What "libertarian" capitalists object to is attempts by others — workers, society as a whole, the state, etc. — to interfere with the authority of bosses. That this is just the defence of privilege and power (and **not** freedom) has been discussed in section B and elsewhere in this appendix, so we will not repeat ourselves here.

Samuel Johnson once observed that *"we hear the loudest **yelps** for liberty among the drivers of Negroes."* Our modern "libertarian" capitalist drivers of wage-slaves are yelping for exactly the same kind of "liberty." [Johnson quoted in Noam Chomsky, **Year 501**, p. 141]

8.3 What other forms did state intervention in creating capitalism take?

Beyond being a paymaster for new forms of production and social relations and defending the owners' power, the state intervened economically in other ways as well. As we noted in section B.2.5, the state played a key role in transforming the law codes of society in a capitalistic fashion, ignoring custom and common law to do so. Similarly, the use of tariffs and the granting of monopolies to companies played an important role in accumulating capital at the expense of working people, as did the breaking of unions and strikes by force.

However, one of the most blatant of these acts was the enclosure of common land. In Britain, by means of the Enclosure Acts, land that had been freely used by poor peasants for farming their small family plots was claimed by large landlords as private property. As E.P. Thompson notes, *"Parliament and law imposed capitalist definitions to exclusive property in land"* [**Customs in Common**, p. 163]. Property rights, which exclusively favoured the rich, replaced the use rights and free agreement that had governed peasant's use of the commons. Unlike use rights, which rest in the individual, property rights require state intervention to create and maintain.

This stealing of the land should not be under estimated. Without land, you cannot live and have to sell your liberty to others. This places those with capital at an advantage, which will tend to increase, rather than decrease, the inequalities in society (and so place the landless workers at an increasing disadvantage over time). This process can be seen from early stages of capitalism. With the enclosure of the land, an agricultural workforce was created which had to travel where the work was. This influx of landless ex-peasants into the towns ensured that the traditional guild system crumbled and was transformed into capitalistic industry with bosses and wage

slaves rather than master craftsmen and their journeymen. Hence the enclosure of land played a key role, for *"it is clear that economic inequalities are unlikely to create a division of society into an employing master class and a subject wage-earning class, unless access to the mans of production, including land, is by some means or another barred to a substantial section of the community."* [Maurice Dobbs, **Studies in Capitalist Development**, p. 253]

The importance of access to land is summarised by this limerick by the followers of Henry George (a 19th century writer who argued for a *"single tax"* and the nationalisation of land). The Georgites got their basic argument on the importance of land down these few, excellent lines:

A college economist planned
To live without access to land
He would have succeeded
But found that he needed
Food, shelter and somewhere to stand.

Thus the Individualist (and other) anarchists' concern over the *"land monopoly"* of which the Enclosure Acts were but one part. The land monopoly, to use Tucker's words, *"consists in the enforcement by government of land titles which do not rest upon personal occupancy and cultivation."* [**The Anarchist Reader**, p. 150] It is important to remember that wage labour first developed on the land and it was the protection of land titles of landlords and nobility, combined with enclosure, that meant people could not just work their own land.

In other words, the circumstances so created by enclosing the land and enforcing property rights to large estates ensured that capitalists did not have to point a gun at workers head to get them to work long hours in authoritarian, dehumanising conditions. In such circumstances, when the majority are dispossessed and face the threat of starvation, poverty, homelessness and so on, "initiation of force" is **not required.** But guns **were** required to enforce the system of private property that created the labour market in the first place, to enforce the enclosure of common land and protect the estates of the nobility and wealthy.

In addition to increasing the availability of land on the market, the enclosures also had the effect of destroying working-class independence. Through these Acts, innumerable peasants were excluded from access to their former means of livelihood, forcing them to migrate to the cities to seek work in the newly emerging factories of the budding capitalist class, who were thus provided with a ready source of cheap labour. The capitalists, of course, did not describe the results this way, but attempted to obfuscate the issue with their usual rhetoric about civilisation and progress. Thus John Bellers, a 17th-century supporter of enclosures, claimed that commons were *"a hindrance to Industry, and ... Nurseries of Idleness and Insolence."* The *"forests and great Commons make the Poor that are upon them too much like the **indians.**"* [quoted by Thompson, **Op. Cit.**, p. 163] Elsewhere Thompson argues that the commons *"were now seen as a dangerous centre of indiscipline ... Ideology was added to self-interest. It became a matter of public-spirited policy for gentlemen to remove cottagers from the commons, reduce his labourers to dependence ..."* [**The Making of the English Working Class**, pp. 242–3]

The commons gave working-class people a degree of independence which allowed them to be "insolent" to their betters. This had to be stopped, as it undermined to the very roots of authority relationships within society. The commons **increased** freedom for ordinary people and made them less willing to follow orders and accept wage labour. The reference to "Indians" is important, as the independence and freedom of Native Americans is well documented. The

common feature of both cultures was communal ownership of the means of production and free access to it (usufruct). This is discussed further in section I.7 (Won't Libertarian Socialism destroy individuality?)

As the early American economist Edward Wakefield noted in 1833, *"where land is cheap and all are free, where every one who so pleases can easily obtain a piece of land for himself, not only is labour dear, as respects the labourer's share of the product, but the difficulty is to obtain combined labour at any price."* [**England and America**, quoted by Jeremy Brecher and Tim Costello, **Commonsense for Hard Times**, p. 24]

The enclosure of the commons (in whatever form it took — see section 8.5 for the US equivalent) solved both problems — the high cost of labour, and the freedom and dignity of the worker. The enclosures perfectly illustrate the principle that capitalism requires a state to ensure that the majority of people do not have free access to any means of livelihood and so must sell themselves to capitalists in order to survive. There is no doubt that if the state had "left alone" the European peasantry, allowing them to continue their collective farming practices ("collective farming" because, as Kropotkin shows in **Mutual Aid**, the peasants not only shared the land but much of the farm labour as well), capitalism could not have taken hold (see **Mutual Aid**, pp. 184–189, for more on the European enclosures). As Kropotkin notes, *"[i]nstances of commoners themselves dividing their lands were rare, everywhere the State coerced them to enforce the division, or simply favoured the private appropriation of their lands"* by the nobles and wealthy. [**Mutual Aid**, p. 188]

Thus Kropotkin's statement that *"to speak of the natural death of the village community [or the commons] in virtue of economical law is as grim a joke as to speak of the natural death of soldiers slaughtered on a battlefield."* [**Op. Cit.**, p. 189]

Like the more recent case of fascist Chile, "free market" capitalism was imposed on the majority of society by an elite using the authoritarian state. This was recognised by Adam Smith when he opposed state intervention in **The Wealth of Nations**. In Smith's day, the government was openly and unashamedly an instrument of wealth owners. Less than 10 per cent of British men (and no women) had the right to vote. When Smith opposed state interference, he was opposing the imposition of wealth owners' interests on everybody else (and, of course, how "liberal", nevermind "libertarian", is a political system in which the many follow the rules and laws set-down in the so-called interests of all by the few? As history shows, any minority given, or who take, such power **will** abuse it in their own interests). Today, the situation is reversed, with neo-liberals and right libertarians opposing state interference in the economy (e.g. regulation of Big Business) so as to prevent the public from having even a minor impact on the power or interests of the elite.

The fact that "free market" capitalism always requires introduction by an authoritarian state should make all honest "Libertarians" ask: How "free" is the "free market"? And why, when it is introduced, do the rich get richer and the poor poorer? This was the case in Chile (see Section C.11). For the poverty associated with the rise of capitalism in England 200 years ago, E.P. Thompson's **The Making of the English Working Class** provides a detailed discussion. Howard Zinn's **A People's History of the United States** describes the poverty associated with 19th-century US capitalism.

8.4 Aren't the enclosures a socialist myth?

The short answer is no, they are not. While a lot of historical analysis has been spent in trying to deny the extent and impact of the enclosures, the simple fact is (in the words of noted historian E.P. Thompson) enclosure *"was a plain enough case of class robbery, played according to the fair rules of property and law laid down by a parliament of property-owners and lawyers."* [**The Making of the English Working Class**, pp. 237–8]

The enclosures were one of the ways that the *"land monopoly"* was created. The land monopoly was used to refer to capitalist property rights and ownership of land by (among others) the Individualist Anarchists. Instead of an *"occupancy and use"* regime advocated by anarchists, the land monopoly allowed a few to bar the many from the land — so creating a class of people with nothing to sell but their labour. While this monopoly is less important these days in developed nations (few people know how to farm) it was essential as a means of consolidating capitalism. Given the choice, most people preferred to become independent farmers rather than wage workers (see next section).

However, the importance of the enclosure movement is downplayed by supporters of capitalism. Little wonder, for it is something of an embarrassment for them to acknowledge that the creation of capitalism was somewhat less than "immaculate" — after all, capitalism is portrayed as an almost ideal society of freedom. To find out that an idol has feet of clay and that we are still living with the impact of its origins is something pro-capitalists must deny. So **is** the enclosures a socialist myth? Most claims that it is flow from the work of the historian J.D. Chambers' famous essay *"Enclosures and the Labour Supply in the Industrial Revolution."* [**Economic History Review**, 2nd series, no. 5, August 1953] In this essay, Chambers attempts to refute Karl Marx's account of the enclosures and the role it played in what Marx called *"primitive accumulation."*

We cannot be expected to provide an extensive account of the debate that has raged over this issue. All we can do is provide a summary of the work of William Lazonick who presented an excellent reply to those who claim that the enclosures were an unimportant historical event. We are drawing upon his summary of his excellent essay *"Karl Marx and Enclosures in England"* [**Review of Radical Political Economy**, no. 6, Summer, 1974] which can be found in his books **Competitive Advantage on the Shop Floor** and **Business Organisation and the Myth of the Market Economy**. There are three main claims against the socialist account of the enclosures. We will cover each in turn.

Firstly, it is often claimed that the enclosures drove the uprooted cottager and small peasant into industry. However, this was never claimed. It is correct that the agricultural revolution associated with the enclosures **increased** the demand for farm labour as claimed by Chambers and others. And this is the whole point — enclosures created a pool of dispossessed labourers who had to sell their time/liberty to survive. The *"critical transformation was not the level of agricultural employment before and after enclosure but the changes in employment relations caused by the reorganisation of landholdings and the reallocation of access to land."* [**Competitive Advantage on the Shop Floor**, p. 30] Thus the key feature of the enclosures was that it created a supply for farm labour, a supply that had no choice but to work for another. This would drive down wages and increase demand. Moreover, freed from the land, these workers could later move to the towns in search for better work.

Secondly, it is argued that the number of small farm owners increased, or at least did not greatly decline, and so the enclosure movement was unimportant. Again, this misses the point.

Small farm owners can still employ wage workers (i.e. become capitalist farmers as opposed to "yeomen" — independent peasant proprietor). As Lazonick notes, *"[i]t is true that after 1750 some petty proprietors continued to occupy and work their own land. But in a world of capitalist agriculture, the yeomanry no longer played an important role in determining the course of capitalist agriculture. As a social class that could influence the evolution of British economy society, the yeomanry had disappeared."* [**Op. Cit.**, p. 32]

Thirdly, it is often claimed that it was population growth, rather than enclosures, that caused the supply of wage workers. So was population growth more important that enclosures? Maurice Dobbs argues that *"the centuries in which a proletariat was most rapidly recruited were apt to be those of slow rather than of rapid natural increase of population, and the paucity or plenitude of a labour reserve in different countries was not correlated with comparable difference in their rates of population-growth."* [**Studies in Capitalist Development**, p. 223] Moreover, the population argument ignores the question of whether the changes in society caused by enclosures and the rise of capitalism have an impact on the observed trends towards earlier marriage and larger families after 1750. Lazonick argues that *"[t]here is reason to believe that they did."* [**Op. Cit.**, p. 33] Also, of course, the use of child labour in the factories created an economic incentive to have more children, an incentive created by the developing capitalist system. Overall, Lazonick notes that *"[t]o argue that population growth created the industrial labour supply is to ignore these momentous social transformations"* associated with the rise of capitalism [**Business Organisation and the Myth of the Market Economy**, p. 273].

In other words, there is good reason to think that the enclosures, far from being some kind of socialist myth, in fact played a key role in the development of capitalism. As Lazonick himself notes, *"Chambers misunderstood" "the argument concerning the 'institutional creation' of a proletarianised (i.e. landless) workforce. Indeed, Chamber's own evidence and logic tend to support the Marxian [and anarchist!] argument, when it is properly understood."* [**Op. Cit.**, p. 273]

8.5 What about the lack of enclosures in the Americas?

The enclosure movement was but one way of creating the *"land monopoly"* which ensured the creation of a working class. The circumstances facing the ruling class in the Americas were distinctly different than in the Old World and so the "land monopoly" took a different form there. In the Americas, enclosures were unimportant as customary land rights did not really exist. Here the problem was that (after the original users of the land were eliminated, of course) there were vast tracts of land available for people to use.

Unsurprisingly, there was a movement towards independent farming and this pushed up the price of labour, by reducing the supply. Capitalists found it difficult to find workers willing to work for them at wages low enough to provide them with sufficient profits. It was due the difficulty in finding cheap enough labour that capitalists in America turned to slavery. All things being equal, wage labour **is** more productive than slavery. But in early America all things were **not** equal. Having access to cheap (indeed, free) land meant that working people had a choice, and few desired to become wage slaves. Because of this, capitalists turned to slavery in the South and the "land monopoly" in the North and West.

This was because, in the words of Maurice Dobbs, it *"became clear to those who wished to reproduce capitalist relations of production in the new country that the foundation-stone of their endeavour must be the restriction of land-ownership to a minority and the exclusion of the major-*

ity from any share in [productive] property." [**Studies in Capitalist Development**, pp. 221–2] As one radical historian puts it, *"[w]hen land is 'free' or 'cheap'. as it was in different regions of the United States before the 1830s, there was no compulsion for farmers to introduce labour-saving technology. As a result, 'independent household production' ... hindered the development of capitalism ... [by] allowing large portions of the population to escape wage labour."* [Charlie Post, *"The 'Agricultural Revolution' in the United States"*, pp. 216–228, **Science and Society**, vol. 61, no. 2, p. 221]

It was precisely this option (i.e. of independent production) that had to be destroyed in order for capitalist industry to develop. The state had to violate the holy laws of "supply and demand" by controlling the access to land in order to ensure the normal workings of "supply and demand" in the labour market (i.e. that the bargaining position on the labour market favoured employer over employee). Once this situation became the typical one (i.e. when the option of self-employment was effectively eliminated) a (protectionist based) "laissez-faire" approach could be adopted and state action used only to protect private property from the actions of the dispossessed.

So how was this transformation of land ownership achieved?

Instead of allowing settlers to appropriate their own farms as was the case before the 1830s, the state stepped in once the army had cleared out the original users. Its first major role was to enforce legal rights of property on unused land. Land stolen from the Native Americans was sold at auction to the highest bidders, namely speculators, who then sold it on to farmers. This process started right *"after the revolution, [when] huge sections of land were bought up by rich speculators"* and their claims supported by the law [Howard Zinn, **A People's History of the United States**, p. 125] Thus land which should have been free was sold to land-hungry farmers and the few enriched themselves at the expense of the many. Not only did this increase inequality within society, it also encouraged the development of wage labour — having to pay for land would have ensured that many immigrants remained on the East Coast until they had enough money. Thus a pool of people with little option but to sell their labour was increased due to state protection of unoccupied land. That the land usually ended up in the hands of farmers did not (could not) countermand the shift in class forces that this policy created.

This was also the essential role of the various "Homesteading Acts" and, in general, the *"Federal land law in the 19th century provided for the sale of most of the public domain at public auction to the higher bidder ... Actual settlers were forced to buy land from speculators, at prices considerably above the federal minimal price"* (which few people could afford anyway) [Charlie Post, **Op. Cit.**, p. 222]. Little wonder the Individualist Anarchists supported an *"occupancy and use"* system of land ownership as a key way of stopping capitalist and landlord usury as well as the development of capitalism itself.

This change in the appropriation of land had significant effects on agriculture and the desirability of taking up farming for immigrants. As Post notes, *"[w]hen the social conditions for obtaining and maintaining possession of land change, as they did in the midwest between 1830 and 1840, pursuing the goal of preserving [family ownership and control] .. . produced very different results. In order to pay growing mortgages, debts and taxes, family farmers were compelled to specialise production toward cash crops and to market more and more of their output."* [**Op. Cit.**, p. 221–2]

So, in order to pay for land which was formerly free, farmers got themselves into debt and increasingly turned to the market to pay it off. Thus, the *"Federal land system, by transforming land into a commodity and stimulating land speculation, made the midwestern farmers dependent*

upon markets for the continual possession of their farms." [Charlie Post, **Op. Cit.**, p. 223] Once on the market, farmers had to invest in new machinery and this also got them into debt. In the face of a bad harvest or market glut, they could not repay their loans and their farms had to be sold to so do so. By 1880, 25% of all farms were rented by tenants, and the numbers kept rising.

This means that Murray Rothbard's comment that *"once the land was purchased by the settler, the injustice disappeared"* is nonsense — the injustice was transmitted to other parts of society and this, along with the legacy of the original injustice, lived on and helped transform society towards capitalism [**The Ethics of Liberty**, p. 73]. In addition, his comments about *"the establishment in North America of a truly libertarian land system"* would be one the Individualist Anarchists would have seriously disagreed with! [**Ibid.**]

Thus state action, in restricting free access to the land, ensured that workers were dependent on wage labour. In addition, the *"transformation of social property relations in northern agriculture set the stage for the 'agricultural revolution' of the 1840s and 1850s ... [R]ising debts and taxes forced midwestern family farmers to compete as commodity producers in order to maintain their land-holding ... The transformation ... was the central precondition for the development of industrial capitalism in the United States."* [Charlie Post, **Ibid.**, p. 226]

In addition to seizing the land and distributing it in such a way as to benefit capitalist industry, the *"government played its part in helping the bankers and hurting the farmers; it kept the amount of money — based in the gold supply — steady while the population rose, so there was less and less money in circulation. The farmer had to pay off his debts in dollars that were harder to get. The bankers, getting loans back, were getting dollars worth more than when they loaned them out — a kind of interest on top of interest. That was why ... farmers' movements [like the Individualist Anarchists, we must add] ... [talked about] putting more money in circulation."* [Howard Zinn, **Op. Cit.**, p. 278]

Overall, therefore, state action ensured the transformation of America from a society of independent workers to a capitalist one. By creating and enforcing the "land monopoly" (of which state ownership of unoccupied land and its enforcement of landlord rights were the most important) the state ensured that the balance of class forces tipped in favour of the capitalist class. By removing the option of farming your own land, the US government created its own form of enclosure and the creation of a landless workforce with little option but to sell its liberty on the "free market". This, combined with protectionism, ensured the transformation of American society from a pre-capitalist one into a capitalist one. They was nothing "natural" about it.

Little wonder the Individualist Anarchist J.K. Ingalls attacked the "land monopoly" in the following words:

> *"The earth, with its vast resources of mineral wealth, its spontaneous productions and its fertile soil, the free gift of God and the common patrimony of mankind, has for long centuries been held in the grasp of one set of oppressors by right of conquest or right of discovery; and it is now held by another, through the right of purchase from them. All of man's natural possessions ... have been claimed as property; nor has man himself escaped the insatiate jaws of greed. The invasion of his rights and possessions has resulted ... in clothing property with a power to accumulate an income."* [quoted by James Martin, **Men Against the State**, p. 142]

8.6 How did working people view the rise of capitalism?

The best example of how hated capitalism was can be seen by the rise and spread of the socialist movement, in all its many forms, across the world. It is no coincidence that the development of capitalism also saw the rise of socialist theories. However, in order to fully understand how different capitalism was from previous economic systems, we will consider early capitalism in the US, which for many "Libertarians" is **the** example of the "capitalism-equals-freedom" argument.

Early America was pervaded by artisan production — individual ownership of the means of production. Unlike capitalism, this system is **not** marked by the separation of the worker from the means of life. Most people did not have to work for another, and so did not. As Jeremy Brecher notes, in 1831 the *"great majority of Americans were farmers working their own land, primarily for their own needs. Most of the rest were self-employed artisans, merchants, traders, and professionals. Other classes — employees and industrialists in the North, slaves and planters in the South — were relatively small. The great majority of Americans were independent and free from anybody's command."* [**Strike!**, p. xxi] These conditions created the high cost of combined (wage) labour which ensured the practice of slavery existed.

However, toward the middle of the 19th century the economy began to change. Capitalism began to be imported into American society as the infrastructure was improved, which allowed markets for manufactured goods to grow. Soon, due to (state-supported) capitalist competition, artisan production was replaced by wage labour. Thus "evolved" modern capitalism. Many workers understood, resented, and opposed their increasing subjugation to their employers (*"the masters"*, to use Adam Smith's expression), which could not be reconciled with the principles of freedom and economic independence that had marked American life and sunk deeply into mass consciousness during the days of the early economy. In 1854, for example, a group of skilled piano makers wrote that *"the day is far distant when they [wage earners] will so far forget what is due to manhood as to glory in a system forced upon them by their necessity and in opposition to their feelings of independence and self-respect. May the piano trade be spared such exhibitions of the degrading power of the day [wage] system."* [quoted by Brecher and Costello, **Common Sense for Hard Times**, p. 26]

Clearly the working class did not consider working for a daily wage, in contrast to working for themselves and selling their own product, to be a step forward for liberty or individual dignity. The difference between selling the product of one's labour and selling one's labour (i.e. oneself) was seen and condemned (*"[w]hen the producer ... sold his product, he retained himself. But when he came to sell his labour, he sold himself ... the extension [of wage labour] to the skilled worker was regarded by him as a symbol of a deeper change"* [Norman Ware, **The Industrial Worker, 1840–1860**, p. xiv]). Indeed, one group of workers argued that they were *"slaves in the strictest sense of the word"* as they had *"to toil from the rising of the sun to the going down of the same for our masters — aye, masters, and for our daily bread"* [Quoted by Ware, **Op. Cit.**, p. 42] and another argued that *"the factory system contains in itself the elements of slavery, we think no sound reasoning can deny, and everyday continues to add power to its incorporate sovereignty, while the sovereignty of the working people decreases in the same degree."* [quoted by Brecher and Costello, **Op. Cit.**, p. 29]

Almost as soon as there were wage workers, there were strikes, machine breaking, riots, unions and many other forms of resistance. John Zerzan's argument that there was a *"relentless assault on the worker's historical rights to free time, self-education, craftsmanship, and play was at the*

heart of the rise of the factory system" is extremely accurate [**Elements of Refusal**, p. 105]. And it was an assault that workers resisted with all their might. In response to being subjected to the "law of value," workers rebelled and tried to organise themselves to fight the powers that be and to replace the system with a co-operative one. As the printer's union argued, *"[we] regard such an organisation [a union] not only as an agent of immediate relief, but also as an essential to the ultimate destruction of those unnatural relations at present subsisting between the interests of the employing and the employed classes... .[W]hen labour determines to sell itself no longer to speculators, but to become its own employer, to own and enjoy itself and the fruit thereof, the necessity for scales of prices will have passed away and labour will be forever rescued from the control of the capitalist."* [quoted by Brecher and Costello, **Op. Cit.**, pp. 27–28]

Little wonder, then, why wage labourers considered capitalism as a form of *"slavery"* and why the term *"wage slavery"* became so popular in the anarchist movement. It was just reflecting the feelings of those who experienced the wages system at first hand and joined the socialist and anarchist movements. As labour historian Norman Ware notes, the *"term 'wage slave' had a much better standing in the forties [of the 19th century] than it has today. It was not then regarded as an empty shibboleth of the soap-box orator. This would suggest that it has suffered only the normal degradation of language, has become a* ***cliche****, not that it is a grossly misleading characterisation."* [**Op. Cit.**, p. xvf]

These responses of workers to the experience of wage labour is important to show that capitalism is by no means "natural." The fact is the first generation of workers tried to avoid wage labour is at all possible as they hated the restrictions of freedom it imposed upon them. They were perfectly aware that wage labour was wage slavery — that they were decidedly **unfree** during working hours and subjected to the will of another. While many working people now are accustomed to wage labour (while often hating their job) the actual process of resistance to the development of capitalism indicates well its inherently authoritarian nature. Only once other options were closed off and capitalists given an edge in the "free" market by state action did people accept and become accustomed to wage labour.

Opposition to wage labour and factory fascism was/is widespread and seems to occur wherever it is encountered. *"Research has shown"*, summarises William Lazonick, *"that the 'free-born Englishman' of the eighteenth century — even those who, by force of circumstance, had to submit to agricultural wage labour — tenaciously resisted entry into the capitalist workshop."* [**Business Organisation and the Myth of the Market Economy**, p. 37] British workers shared the dislike of wage labour of their American cousins. A *"Member of the Builders' Union"* in the 1830s argued that the trade unions *"will not only strike for less work, and more wages, but will ultimately* ***abolish wages****, become their own masters and work for each other; labour and capital will no longer be separate but will be indissolubly joined together in the hands of workmen and workwomen."* [quoted by Geoffrey Ostergaard, **The Tradition of Workers' Control**, p. 133] This is unsurprising, for as Ostergaard notes, *"the workers then, who had not been swallowed up whole by the industrial revolution, could make critical comparisons between the factory system and what preceded it."* [**Op. Cit.**, p. 134] While wage slavery may seem "natural" today, the first generation of wage labourers saw the transformation of the social relationships they experienced in work, from a situation in which they controlled their own work (and so themselves) to one in which **others** controlled them, and they did not like it. However, while many modern workers instinctively hate wage labour and having bosses, without the awareness of some other method of working, many put up with it as "inevitable." The first generation of wage labourers had the

awareness of something else (although, of course, a flawed something else) and this gave then a deep insight into the nature of capitalism and produced a deeply radical response to it and its authoritarian structures.

Far from being a "natural" development, then, capitalism was imposed on a society of free and independent people by state action. Those workers alive at the time viewed it as *"unnatural relations"* and organised to overcome it. These feelings and hopes still exist, and will continue to exist until such time as we organise and *"abolish the wage system"* (to quote the IWW preamble) and the state that supports it.

8.7 Why is the history of capitalism important?

Simply because it provides us with an understanding of whether that system is "natural" and whether it can be considered as just and free. If the system was created by violence, state action and other unjust means then the apparent "freedom" which we currently face within it is a fraud, a fraud masking unnecessary and harmful relations of domination, oppression and exploitation. Moreover, by seeing how capitalist relationships were viewed by the first generation of wage slaves reminds us that just because many people have adjusted to this regime and consider it as normal (or even natural) it is nothing of the kind.

Murray Rothbard is well aware of the importance of history. He considered the *"moral indignation"* of socialism arises from the argument *"that the capitalists have stolen the rightful property of the workers, and therefore that existing titles to accumulated capital are unjust."* He argues that given *"this hypothesis, the remainder of the impetus for both Marxism and anarchosyndicalism follow quote logically."* [**The Ethics of Liberty**, p. 52]

So some right-libertarians are aware that the current property owners have benefited extensively from violence and state action in the past. Murray Rothbard argues (in **The Ethics of Liberty**, p. 57) that if the just owners cannot be found for a property, then the property simply becomes again unowned and will belong to the first person to appropriate and utilise it. If the current owners are not the actual criminals then there is no reason at all to dispossess them of their property; if the just owners cannot be found then they may keep the property as the first people to use it (of course, those who own capital and those who use it are usually different people, but we will ignore this obvious point).

Thus, since all original owners and the originally dispossessed are long dead nearly all current title owners are in just possession of their property except for recently stolen property. The principle is simple, dispossess the criminals, restore property to the dispossessed if they can be found otherwise leave titles where they are (as Native American tribes owned the land **collectively** this could have an interesting effect on such a policy in the USA. Obviously tribes that were wiped out need not apply, but would such right-libertarian policy recognise such collective, non-capitalist ownership claims? We doubt it, but we could be wrong — the Libertarian Party Manifesto states that their "just" property rights will be restored. And who defines "just"? And given that unclaimed federal land will be given to Native Americans, its seems pretty likely that the **original** land will be left alone).

Of course, that this instantly gives an advantage to the wealthy on the new "pure" market is not mentioned. The large corporations that, via state protection and support, built their empires and industrial base will still be in an excellent position to continue to dominate the market. Wealthy land owners, benefiting from the effects of state taxation and rents caused by the "land monopoly"

on farmstead failures, will keep their property. The rich will have a great initial advantage and this may be more than enough to maintain them in there place. After all, exchanges between worker and owner tend to reinforce existing inequalities, **not** reduce them (and as the owners can move their capital elsewhere or import new, lower waged, workers from across the world, its likely to stay that way).

So Rothbard's "solution" to the problem of past force seems to be (essentially) a justification of existing property titles and not a serious attempt to understand or correct past initiations of force that have shaped society into a capitalist one and still shape it today. The end result of his theory is to leave things pretty much as they are, for the past criminals are dead and so are their victims.

However, what Rothbard fails to note is that the **results** of this state action and coercion are still with us. He totally fails to consider that the theft of productive wealth has a greater impact on society than the theft itself. The theft of **productive** wealth shapes society in so many ways that **all** suffer from it (including current generations). This (the externalities generated by theft) cannot be easily undone by individualistic "solutions".

Let us take an example somewhat more useful that the one Rothbard uses (namely, a stolen watch). A watch cannot really be used to generate wealth (although if I steal a watch, sell it and buy a winning lottery ticket, does that mean I can keep the prize after returning the money value of your watch to you? Without the initial theft, I would not have won the prize but obviously the prize money far exceeds the amount stolen. Is the prize money mine?). Let us take a tool of production rather than a watch.

Let assume a ship sinks and 50 people get washed ashore on an island. One woman has foresight to take a knife from the ship and falls unconscious on the beach. A man comes along and steals her knife. When the woman awakes she cannot remember if she had managed to bring the knife ashore with her or not. The man maintains that he brought it with him and no one else saw anything. The survivors decide to split the island equally between them and work it separately, exchanging goods via barter.

However, the man with the knife has the advantage and soon carves himself a house and fields from the wilderness. Seeing that they need the knife and the tools created by the knife to go beyond mere existing, some of the other survivors hire themselves to the knife owner. Soon he is running a surplus of goods, including houses and equipment which he decides to hire out to others. This surplus is then used to tempt more and more of the other islanders to work for him, exchanging their land in return for the goods he provides. Soon he owns the whole island and never has to work again. His hut is well stocked and extremely luxurious. His workers face the option of following his orders or being fired (i.e. expelled from the island and so back into the water and certain death). Later, he dies and leaves his knife to his son. The woman whose knife it originally was had died long before, childless.

Note that the theft did not involve taking any land. All had equal access to it. It was the initial theft of the knife which provided the man with market power, an edge which allowed him to offer the others a choice between working by themselves or working for him. By working for him they did "benefit" in terms of increased material wealth (and also made the thief better off) but the accumulate impact of unequal exchanges turned them into the effective slaves of the thief.

Now, would it **really** be enough to turn the knife over to the whoever happened to be using it once the theft was discovered (perhaps the thief made a death-bed confession). Even if the

woman who had originally taken it from the ship been alive, would the return of the knife **really** make up for the years of work the survivors had put in enriching the the thief or the "voluntary exchanges" which had resulted in the thief owning all the island? The equipment people use, the houses they life in and the food they eat are all the product of many hours of collective work. Does this mean that the transformation of nature which the knife allowed remain in the hands of the descendants of the thief or become the collective property of all? Would dividing it equally between all be fair? Not everyone worked equally hard to produce it. So we have a problem — the result of the initial theft is far greater than the theft considered in isolation due to the productive nature of what was stolen.

In other words, what Rothbard ignores in his attempt to undermine anarchist use of history is that when the property stolen is of a productive nature, the accumulative effect of its use is such as to affect all of society. Productive assets produce **new** property, **new** values, create a **new** balance of class forces, **new** income and wealth inequalities and so on. This is because of the **dynamic** nature of production and human life. When the theft is such that it creates accumulative effects after the initial act, it is hardly enough to say that it does not really matter any more. If a nobleman invests in a capitalist firm with the tribute he extracted from his peasants, then (once the firm starts doing well) sells the land to the peasants and uses that money to expand his capitalist holdings, does that **really** make everything all right? Does not the crime transmit with the cash? After all, the factory would not exist without the prior exploitation of the peasants.

In the case of actually existing capitalism, born as it was of extensive coercive acts, the resultant of these acts have come to shape the **whole** society. For example, the theft of common land (plus the enforcement of property rights — the land monopoly — to vast estates owned by the aristocracy) ensured that working people had no option to sell their labour to the capitalists (rural or urban). The terms of these contracts reflected the weak position of the workers and so capitalists extracted surplus value from workers and used it to consolidate their market position and economic power. Similarly, the effect of mercantilist policies (and protectionism) was to enrich the capitalists at the expense of workers and allow them to build industrial empires.

The accumulative effect of these acts of violation of a "free" market was to create a class society wherein most people "consent" to be wage slaves and enrich the few. While those who suffered the impositions are long gone and the results of the specific acts have multiplied and magnified well beyond their initial form. And we are still living with them. In other words, the initial acts of coercion have been transmitted and transformed by collective activity (wage labour) into society-wide affects.

Rothbard argues in the situation where the descendants (or others) of those who initially tilled the soil and their aggressors (*"or those who purchased their claims"*) still extract *"tribute from the modern tillers"* that this is a case of *"**continuing** aggression against the true owners"*. This means that *"the land titles should be transferred to the peasants, without compensation to the monopoly landlords."* [**Op. Cit.**, p. 65] But what he fails to note is that the extracted "tribute" could have been used to invest in industry and transform society. Why ignore what the "tribute" has been used for? Does stolen property not remain stolen property after it has been transferred to another? And if the stolen property is used to create a society in which one class has to sell their liberty to another, then surely any surplus coming from those exchanges are also stolen (as it was generated directly and indirectly by the theft).

Yes, anarchist agree with Rothbard — peasants should take the land they use but which is owned by another. But this logic can equally be applied to capitalism. Workers are still living

with the effects of past initiations of force and capitalists still extract "tribute" from workers due to the unequal bargaining powers within the labour market that this has created. The labour market, after all, was created by state action (directly or indirectly) and is maintained by state action (to protect property rights and new initiations of force by working people). The accumulative effects of stealing productive resources as been to increase the economic power of one class compared to another. As the victims of these past abuses are long gone and attempts to find their descendants meaningless (because of the generalised effects the thefts in question), anarchists feel we are justified in demanding the ***"expropriation of the expropriators"***.

Due to Rothbard's failure to understand the dynamic and generalising effects that result from the theft of productive resources (i.e. externalities that occur from coercion of one person against a specific set of others) and the creation of a labour market, his attempt to refute anarchist analysis of the history of "actually existing capitalism" also fails. Society is the product of collective activity and should belong to us all (although whether and how we divide it up is another question).

9 Is Medieval Iceland an example of "anarcho"-capitalism working in practice?

Ironically, medieval Iceland is a good example of why "anarcho"-capitalism will **not** work, degenerating into de facto rule by the rich. It should be pointed out first that Iceland, nearly 1,000 years ago, was not a capitalistic system. In fact, like most cultures claimed by "anarcho"-capitalists as examples of their "utopia," it was a communal, not individualistic, society, based on artisan production, with extensive communal institutions as well as individual "ownership" (i.e. use) and a form of social self-administration, the **thing** — both local and Iceland-wide — which can be considered a "primitive" form of the anarchist communal assembly.

As William Ian Miller points out *"[p]eople of a communitarian nature.. . have reason to be attracted [to Medieval Iceland]... the limited role of lordship, the active participation of large numbers of free people ... in decision making within and without the homestead. The economy barely knew the existence of markets. Social relations preceded economic relations. The nexus of household, kin, Thing, even enmity, more than the nexus of cash, bound people to each other. The lack of extensive economic differentiation supported a weakly differentiated class system ... [and material] deprivations were more evenly distributed than they would be once state institutions also had to be maintained."* [**Bloodtaking and Peacemaking: Feud, Law and Society in Saga Iceland**, p. 306]

At this time Iceland *"remained entirely rural. There were no towns, not even villages, and early Iceland participated only marginally in the active trade of Viking Age Scandinavia."* There was a *"diminished level of stratification, which emerged from the first phase of social and economic development, lent an appearance of egalitarianism — social stratification was restrained and political hierarchy limited."* [Jesse Byock, **Viking Age Iceland**, p. 2] That such a society could be classed as "capitalist" or even considered a model for an advanced industrial society is staggering.

Kropotkin in **Mutual Aid** indicates that Norse society, from which the settlers in Iceland came, had various "mutual aid" institutions, including communal land ownership (based around what he called the *"village community"*) and the **thing** (see also Kropotkin's **The State: Its Historic Role** for a discussion of the "village community"). It is reasonable to think that the

first settlers in Iceland would have brought such institutions with them and Iceland did indeed have its equivalent of the commune or "village community," the **Hreppar**, which developed early in the country's history. Like the early local assemblies, it is not much discussed in the Sagas but is mentioned in the law book, the Grágás, and was composed of a minimum of twenty farms and had a five member commission. The Hreppar was self-governing and, among other things, was responsible for seeing that orphans and the poor within the area were fed and housed. The Hreppar also served as a property insurance agency and assisted in case of fire and losses due to diseased livestock.

In addition, as in most pre-capitalist societies, there were "commons", common land available for use by all. During the summer, *"common lands and pastures in the highlands, often called* ***almenning****, were used by the region's farmers for grazing."* This increased the independence of the population from the wealthy as these *"public lands offered opportunities for enterprising individuals to increase their store of provisions and to find saleable merchandise."* [Jesse Byock, **Op. Cit.**, p. 47 and p. 48]

Thus Icelandic society had a network of solidarity, based upon communal life:

> "The status of farmers as free agents was reinforced by the presence of communal units called **hreppar** (sing. **hreppr**) ... these [were] geographically defined associations of landowners... the **hreppr** were self-governing ... .[and] guided by a five-member steering committee ... As early as the 900s, the whole country seems to have been divided into **hreppar** ... **Hreppar** provided a blanket of local security, allowing the landowning farmers a measure of independence to participate in the choices of political life ...
>
> "Through copoperation among their members, **hreppar** organised and controlled summer grazing lands, organised communal labour, and provided an immediate local forum for settling disputes. Crucially, they provided fire and livestock insurance for local farmers... [They also] saw to the feeding and housing of local orphans, and administered poor relief to people who were recognised as inhabitants of their area. People who could not provide for themselves were assigned to member farms, which took turns in providing for them." [Byock, **Op. Cit.**, pp. 137–8]

In practice this meant that *"each commune was a mutual insurance company, or a miniature welfare state. And membership in the commune was not voluntary. Each farmer had to belong to the commune in which his farm was located and to contribute to its needs."* [Gissurarson quoted by Birgit T. Runolfsson Solvason, **Ordered Anarchy, State and Rent-Seeking: The Icelandic Commonwealth, 930–1262**] The Icelandic Commonwealth did not allow farmers **not** to join its communes and *"[o]nce attached to the local* ***hreppr****, a farm's affliation could not be changed."* However, they did play a key role in keeping the society free as the **hreppr** *"was essentially non-political and addressed subsistence and economic security needs. Its presence freed farmers from depending on an overclass to provide comparable services or corresponding security measures."* [Byock, **Op. Cit.**, p. 138]

Therefore, the Icelandic Commonwealth can hardly be claimed in any significant way as an example of "anarcho"-capitalism in practice. This can also be seen from the early economy, where prices were subject to popular judgement at the **skuldaping** (*"payment-thing"*) **not** supply and demand. [Kirsten Hastrup, **Culture and History in Medieval Iceland**, p. 125] Indeed, with its

communal price setting system in local assemblies, the early Icelandic commonwealth was more similar to Guild Socialism (which was based upon guild's negotiating "just prices" for goods and services) than capitalism. Therefore Miller correctly argues that it would be wrong to impose capitalist ideas and assumptions onto Icelandic society:

> *"Inevitably the attempt was made to add early Iceland to the number of regions that socialised people in nuclear families within simple households... what the sources tell us about the shape of Icelandic householding must compel a different conclusion."* [**Op. Cit.**, p. 112]

In other words, Kropotkin's analysis of communal society is far closer to the reality of Medieval Iceland than "anarcho"-capitalist attempts to turn it into a some kind of capitalist utopia.

However, the communal nature of Icelandic society also co-existed (as in most such cultures) with hierarchical institutions, including some with capitalistic elements, namely private property and "private states" around the local **godar.** The godar were local chiefs who also took the role of religious leaders. As the **Encyclopaedia Britannica** explains, *"a kind of local government was evolved [in Iceland] by which the people of a district who had most dealings together formed groups under the leadership of the most important or influential man in the district"* (the godi). The godi *"acted as judge and mediator"* and *"took a lead in communal activities"* such as building places of worship. These *"local assemblies... are heard of before the establishment of the althing"* (the national thing). This althing led to co-operation between the local assemblies.

Thus Icelandic society had different elements, one based on the local chiefs and communal organisations. Society was marked by inequalities as *"[a]mong the landed there were differences in wealth and prominence. Distinct cleavages existed between landowners and landless people and between free men and slaves."* This meant it was *"marked by aspects of statelessness and egalitarianism as well as elements of social hierarchy ... Although Iceland was not a democratic system, proto-democratic tendencies existed."* [Byock, **Op. Cit.**, p. 64 and p. 65] The Icelandic social system was designed to reduce the power of the wealthy by enhancing communal institutions:

> *"The society ... was based on a system of decentralised self-government ... The Viking Age settlers began by establishing local things, or assemblies, which had been the major forum for meetings of freemen and aristocrats in the old Scandinavian and Germanic social order... They [the Icelanders] excluded overlords with coercive power and expended the mandate of the assembly to fill the full spectrum of the interests of the landed free farmers. The changes transformed a Scandinavian decision-making body that mediated between freemen and overlords into an Icelandic self-contained governmental system without overlords. At the core of Icelandic government was the Althing, a national assembly of freemen."* [Byock, **Op. Cit.**, p. 75]

Therefore we see communal self-management in a basic form, **plus** co-operation between communities as well. These communistic, mutual-aid features exist in many non-capitalist cultures and are often essential for ensuring the people's continued freedom within those cultures (section B.2.5 on why the wealthy undermine these popular *"folk-motes"* in favour of centralisation). Usually, the existence of private property (and so inequality) soon led to the destruction of communal forms of self-management (with participation by all male members of the community as in Iceland), which are replaced by the rule of the rich.

While such developments are a commonplace in most "primitive" cultures, the Icelandic case has an unusual feature which explains the interest it provokes in "anarcho"-capitalist circles. This feature was that individuals could seek protection from any godi. As the **Encyclopaedia Britannica** puts it, *"the extent of the godord [chieftancy] was not fixed by territorial boundaries. Those who were dissatisfied with their chief could attach themselves to another godi... As a result rivalry arose between the godar [chiefs]; as may be seen from the Icelandic Sagas."* This was because, while there were *"a central legislature and uniform, country-wide judicial and legal systems,"* people would seek the protection of any godi, providing payment in return. [Byock, **Op. Cit.**, p. 2] These godi, in effect, would be subject to "market forces," as dissatisfied individuals could affiliate themselves to other godi. This system, however, had an obvious (and fatal) flaw. As the **Encyclopaedia Britannica** points out:

> *"The position of the godi could be bought and sold, as well as inherited; consequently, with the passing of time, the godord for large areas of the country became concentrated in the hands of one man or a few men. This was the principal weakness of the old form of government: it led to a struggle of power and was the chief reason for the ending of the commonwealth and for the country's submission to the King of Norway."*

It was the existence of these hierarchical elements in Icelandic society that explain its fall from anarchistic to statist society. As Kropotkin argued *"from chieftainship sprang on the one hand the State and on the other **private** property."* [**Act for Yourselves**, p. 85] Kropotkin's insight that chieftainship is a transitional system has been confirmed by anthropologists studying "primitive" societies. They have come to the conclusion that societies made up of chieftainships or chiefdoms are not states: *"Chiefdoms are neither stateless nor state societies in the fullest sense of either term: they are on the borderline between the two. Having emerged out of stateless systems, they give the impression of being on their way to centralised states and exhibit characteristics of both."* [Y. Cohen quoted by Birgit T. Runolfsson Solvason, **Op. Cit.**] Since the Commonwealth was made up of chiefdoms, this explains the contradictory nature of the society — it was in the process of transition, from anarchy to statism, from a communal economy to one based on private property.

The **political** transition within Icelandic society went hand in hand with an **economic** transition (both tendencies being mutually reinforcing). Initially, when Iceland was settled, large-scale farming based on extended households with kinsmen was the dominant economic mode. This semi-communal mode of production changed as the land was divided up (mostly through inheritance claims) between the 10th and 11th centuries. This new economic system based upon individual **possession** and artisan production was then slowly displaced by tenant farming, in which the farmer worked for a landlord, starting in the late 11th century. This economic system (based on tenant farming, i.e. capitalistic production) ensured that *"great variants of property and power emerged."* [Kirsten Hastrup, **Culture and History in Medieval Iceland**, pp. 172–173]

So significant changes in society started to occur in the eleventh century, as *"slavery all but ceased. Tenant farming ... took [its] place."* Iceland was moving from an economy based on **possession** to one based on **private property** and so *"the renting of land was a widely established practice by the late eleventh century ... the status of the **godar** must have been connected with landownership and rents."* This lead to increasing oligarchy and so the mid- to late-twelfth century was *"characterised by the appearance of a new elite, the big chieftains who are called storgodar ... [who] struggled from the 1220s to the 1260s to win what had earlier been unobtainable for Ice-*

landic leaders, the prize of overlordship or centralised executive authority." [Byock, **Op. Cit.**, p. 269 and pp. 3–4]

During this evolution in ownership patterns and the concentration of wealth and power into the hands of a few, we should note that the godi's and wealthy landowners' attitude to profit making also changed, with market values starting to replace those associated with honour, kin, and so on. Social relations became replaced by economic relations and the nexus of household, kin and Thing was replaced by the nexus of cash and profit. The rise of capitalistic social relationships in production and values within society was also reflected in exchange, with the local marketplace, with its pricing *"subject to popular judgement"* being *"subsumed under central markets."* [Hastrup, **Op. Cit.**, p. 225]

With a form of wage labour (tenant farming) being dominant within society, it is not surprising that great differences in wealth started to appear. Also, as protection did not come free, it is not surprising that a godi tended to become rich also (in Kropotkin's words, *"the individual accumulation of wealth and power"*). Powerful godi would be useful for wealthy landowners when disputes over land and rent appeared, and wealthy landowners would be useful for a godi looking for income. Concentrations of wealth, in other words, produce concentrations of social and political power (and vice versa) — *"power always follows wealth."* [Kropotkin, **Mutual Aid**, p. 131]

The transformation of **possession** into **property** and the resulting rise of hired labour was a **key** element in the accumulation of wealth and power, and the corresponding decline in liberty among the farmers. Moreover, with hired labour springs dependency — the worker is now dependent on good relations with their landlord in order to have access to the land they need. With such reductions in the independence of part of Icelandic society, the undermining of self-management in the various Things was also likely as labourers could not vote freely as they could be subject to sanctions from their landlord for voting the "wrong" way (*"The courts were less likely to base judgements on the evidence than to adjust decisions to satisfy the honour and resources of powerful individuals."* [Byock, **Op. Cit.**, p. 185]).. Thus hierarchy within the economy would spread into the rest of society, and in particular its social institutions, reinforcing the effects of the accumulation of wealth and power.

The resulting classification of Icelandic society played a key role in its move from relative equality and anarchy to a class society and statism. As Millar points out:

> *"as long as the social organisation of the economy did not allow for people to maintain retinues, the basic egalitarian assumptions of the honour system... were reflected reasonably well in reality... the mentality of hierarchy never fully extricated itself from the egalitarian ethos of a frontier society created and recreated by juridically equal farmers. Much of the egalitarian ethic maintained itself even though it accorded less and less with economic realities.. . by the end of the commonwealth period certain assumptions about class privilege and expectations of deference were already well enough established to have become part of the lexicon of self-congratulation and self-justification."* [**Op. Cit.**, pp. 33–4]

This process in turn accelerated the destruction of communal life and the emergence of statism, focused around the godord. In effect, the godi and wealthy farmers became rulers of the country. Political changes simply reflected economic changes from a communalistic, anarchistic society to

a statist, propertarian one. Ironically, this process was a natural aspect of the system of competing chiefs recommended by "anarcho"-capitalists:

> *"In the twelfth and thirteenth centuries Icelandic society experienced changes in the balance of power. As part of the evolution to a more stratified social order, the number of chieftains diminished and the power of the remaining leaders grew. By the thirteenth century six large families had come to monopolise the control and ownership of many of the original chieftaincies."* [Byock, **Op. Cit.**, p. 341]

These families were called **storgodar** and they *"gained control over whole regions."* This process was not imposed, as *"the rise in social complexity was evolutionary rather than revolutionary ... they simply moved up the ladder."* This political change reflected economic processes, for *"[a]t the same time other social transformations were at work. In conjunction with the development of the **storgadar** elite, the most successful among the **baendr** [farmers] also moved up a rung on the social ladder, being 'big farmers' or **Storbaendr**"* [**Op. Cit.**, p. 342] Unsurprisingly, it was the rich farmers who initiated the final step towards normal statism and by the 1250s the **storbaendr** and their followers had grown weary of the **storgodar** and their quarrels. In the end they accepted the King of Norway's offer to become part if his kingdom.

The obvious conclusion is that as long as Iceland was not capitalistic, it was anarchic and as it became more capitalistic, it became more statist.

This process, wherein the concentration of wealth leads to the destruction of communal life and so the anarchistic aspects of a given society, can be seen elsewhere, for example, in the history of the United States after the Revolution or in the degeneration of the free cities of Medieval Europe. Peter Kropotkin, in his classic work **Mutual Aid**, documents this process in some detail, in many cultures and time periods. However, that this process occurred in a society which is used by "anarcho"-capitalists as an example of their system in action reinforces the anarchist analysis of the statist nature of "anarcho"-capitalism and the deep flaws in its theory, as discussed in section 6.

As Miller argues, *"[i]t is not the have-nots, after all, who invented the state. The first steps toward state formation in Iceland were made by churchmen... and by the big men content with imitating Norwegian royal style. Early state formation, I would guess, tended to involve redistributions, not from rich to poor, but from poor to rich, from weak to strong."* [**Op. Cit.**, p. 306]

The "anarcho"-capitalist argument that Iceland was an example of their ideology working in practice is derived from the work of David Friedman. Friedman is less gun-ho than many of his followers, arguing in **The Machinery of Freedom**, that Iceland only had some features of an "anarcho"-capitalist society and these provide some evidence in support of his ideology. How a pre-capitalist society can provide any evidence to support an ideology aimed at an advanced industrial and urban economy is hard to say as the institutions of that society cannot be artificially separated from its social base. Ironically, though, it does present some evidence against "anarcho"-capitalism precisely because of the rise of capitalistic elements within it.

Friedman is aware of how the Icelandic Republic degenerated and its causes. He states in a footnote in his 1979 essay *"Private Creation and Enforcement of Law: A Historical Case"* that the *"question of why the system eventually broke down is both interesting and difficult. I believe that two of the proximate causes were increased concentration of wealth, and hence power, and the introduction into Iceland of a foreign ideology — kingship. The former meant that in many areas all*

or most of the godord were held by one family and the latter that by the end of the Sturlung period the chieftains were no longer fighting over the traditional quarrels of who owed what to whom, but over who should eventually rule Iceland. The ultimate reasons for those changes are beyond the scope of this paper."

However, from an anarchist point of view, the "foreign" ideology of kingship would be the **product** of changing socio-economic conditions that were expressed in the increasing concentration of wealth and not its cause. After all, the settlers of Iceland were well aware of the "ideology" of kingship for the 300 years during which the Republic existed. As Byock notes, Iceland *"inherited the tradition and the vocabulary of statehood from its European origins ... On the mainland, kings were enlarging their authority at the expense of the traditional rights of free farmers. The emigrants to Iceland were well aware of this process ... available evidence does suggest that the early Icelanders knew quite well what they did not want. In particular they were collectively opposed to the centralising aspects of a state."* [**Op. Cit.**, p. 64–6] Unless some kind of collective and cultural amnesia occurred, the notion of a "foreign ideology" causing the degeneration is hard to accept. Moreover, only the concentration of wealth allowed would-be Kings the opportunity to develop and act and the creation of boss-worker social relationships on the land made the poor subject to, and familiar with, the concept of authority. Such familiarity would spread into all aspects of life and, combined with the existence of "prosperous" (and so powerful) godi to enforce the appropriate servile responses, ensured the end of the relative equality that fostered Iceland's anarchistic tendencies in the first place.

In addition, as private property is a monopoly of rulership over a given area, the conflict between chieftains for power was, at its most basic, a conflict of who would **own** Iceland, and so rule it. The attempt to ignore the facts that private property creates rulership (i.e. a monopoly of government over a given area) and that monarchies are privately owned states does Friedman's case no good. In other words, the system of private property has a built in tendency to produce both the ideology and fact of Kingship — the power structures implied by Kingship are reflected in the social relations which are produced by private property.

Friedman is also aware that an *"objection [to his system] is that the rich (or powerful) could commit crimes with impunity, since nobody would be able to enforce judgement against them. Where power is sufficiently concentrated this might be true; this was one of the problems which led to the eventual breakdown of the Icelandic legal system in the thirteenth century. But so long as power was reasonably dispersed, as it seem to have been for the first two centuries after the system was established, this was a less serious problem."* [**Op. Cit.**]

Which is quite ironic. Firstly, because the first two centuries of Icelandic society was marked by **non-capitalist** economic relations (communal pricing and family/individual possession of land). Only when capitalistic social relationships developed (hired labour and property replacing possession and market values replacing social ones) in the 12th century did power become concentrated, leading to the breakdown of the system in the 13th century. Secondly, because Friedman is claiming that "anarcho"-capitalism will only work if there is an approximate equality within society! But this state of affairs is one most "anarcho"-capitalists claim is impossible and undesirable!

They claim there will **always** be rich and poor. But inequality in wealth will also become inequality of power. When "actually existing" capitalism has become more free market the rich have got richer and the poor poorer. Apparently, according to the "anarcho"-capitalists, in an even "purer" capitalism this process will be reversed! It is ironic that an ideology that denounces

egalitarianism as a revolt against nature implicitly requires an egalitarian society in order to work.

In reality, wealth concentration is a fact of life in **any** system based upon hierarchy and private property. Friedman is aware of the reasons why "anarcho"-capitalism will become rule by the rich but prefers to believe that "pure" capitalism will produce an egalitarian society! In the case of the commonwealth of Iceland this did not happen — the rise in private property was accompanied by a rise in inequality and this lead to the breakdown of the Republic into statism.

In short, Medieval Iceland nicely illustrates David Weick's comments (as quoted in section 6.3) that *"when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing 'companies.'"* This is to say that "free market" justice soon results in rule by the rich, and being able to affiliate with "competing" "defence companies" is insufficient to stop or change that process.

This is simply because any defence-judicial system does not exist in a social vacuum. The concentration of wealth — a natural process under the "free market" (particularly one marked by private property and wage labour) — has an impact on the surrounding society. Private property, i.e. monopolisation of the means of production, allows the monopolists to become a ruling elite by exploiting, and so accumulating vastly more wealth than, the workers. This elite then uses its wealth to control the coercive mechanisms of society (military, police, "private security forces," etc.), which it employs to protect its monopoly and thus its ability to accumulate ever more wealth and power. Thus, private property, far from increasing the freedom of the individual, has always been the necessary precondition for the rise of the state and rule by the rich. Medieval Iceland is a classic example of this process at work.

10 Would laissez-faire capitalism be stable?

Unsurprisingly, right-libertarians combine their support for "absolute property rights" with a whole-hearted support for laissez-faire capitalism. In such a system (which they maintain, to quote Ayn Rand, is an *"unknown ideal"*) everything would be private property and there would be few (if any) restrictions on "voluntary exchanges." "Anarcho"-capitalists are the most extreme of defenders of pure capitalism, urging that the state itself be privatised and no voluntary exchange made illegal (for example, children would be considered the property of their parents and it would be morally right to turn them into child prostitutes — the child has the option of leaving home if they object).

As there have been no example of "pure" capitalism it is difficult to say whether their claims about are true (for a discussion of a close approximation see the section 10.3). This section of the FAQ is an attempt to discover whether such a system would be stable or whether it would be subject to the usual booms and slumps. Before starting we should note that there is some disagreement within the right-libertarian camp itself on this subject (although instead of stability they usually refer to "equilibrium" — which is an economics term meaning that all of a societies resources are fully utilised).

In general terms, most right-Libertarians' reject the concept of equilibrium as such and instead stress that the economy is inherently a dynamic (this is a key aspect of the Austrian school of economics). Such a position is correct, of course, as such noted socialists as Karl Marx and Michal

Kalecki and capitalist economists as Keynes recognised long ago. There seems to be two main schools of thought on the nature of disequilibrium. One, inspired by von Mises, maintains that the actions of the entrepreneur/capitalist results in the market co-ordinating supply and demand and another, inspired by Joseph Schumpeter, who question whether markets co-ordinate because entrepreneurs are constantly innovating and creating new markets, products and techniques.

Of course both actions happen and we suspect that the differences in the two approaches are not important. The important thing to remember is that "anarcho"-capitalists and right-libertarians in general reject the notion of equilibrium — but when discussing their utopia they do not actually indicate this! For example, most "anarcho"-capitalists will maintain that the existence of government (and/or unions) causes unemployment by either stopping capitalists investing in new lines of industry or forcing up the price of labour above its market clearing level (by, perhaps, restricting immigration, minimum wages, taxing profits). Thus, we are assured, the worker will be better off in "pure" capitalism because of the unprecedented demand for labour it will create. However, full employment of labour is an equilibrium in economic terms and that, remember, is impossible due to the dynamic nature of the system. When pressed, they will usually admit there will be periods of unemployment as the market adjusts or that full unemployment actually means under a certain percentage of unemployment. Thus, if you (rightly) reject the notion of equilibrium you also reject the idea of full employment and so the labour market becomes a buyers market and labour is at a massive disadvantage.

The right-libertarian case is based upon logical deduction, and the premises required to show that laissez-faire will be stable are somewhat incredible. If banks do not set the wrong interest rate, if companies do not extend too much trade credit, if workers are willing to accept (real wage related) pay cuts, if workers altruistically do not abuse their market power in a fully employed society, if interest rates provide the correct information, if capitalists predict the future relatively well, if banks and companies do not suffer from isolation paradoxes, then, perhaps, laissez-faire will be stable.

So, will laissez-faire capitalism be stable? Let us see by analysing the assumptions of right-libertarianism — namely that there will be full employment and that a system of private banks will stop the business cycle. We will start on the banking system first (in section 10.1) followed by the effects of the labour market on economic stability (in section10.2). Then we will indicate, using the example of 19th century America, that actually existing ("impure") laissez-faire was very unstable.

Explaining booms and busts by state action plays an ideological convenience as it exonerates market processes as the source of instability within capitalism. We hope to indicate in the next two sections why the business cycle is inherent in the system (see also sections C.7, C.8 and C.9).

10.1 Would privatising banking make capitalism stable?

It is claimed that the existence of the state (or, for minimal statists, government policy) is the cause of the business cycle (recurring economic booms and slumps). This is because the government either sets interest rates too low or expands the money supply (usually by easing credit restrictions and lending rates, sometimes by just printing fiat money). This artificially increases investment as capitalists take advantage of the artificially low interest rates. The real balance between savings and investment is broken, leading to over-investment, a drop in the rate of profit and so a slump (which is quite socialist in a way, as many socialists also see over-investment

as the key to understanding the business cycle, although they obviously attribute the slump to different causes — namely the nature of capitalist production, not that the credit system does not play its part — see section C.7).

In the words of Austrian Economist W. Duncan Reekie, *"[t]he business cycle is generated by monetary expansion and contraction ... When new money is printed it appears as if the supply of savings has increased. Interest rates fall and businessmen are misled into borrowing additional founds to finance extra investment activity ... This would be of no consequence if it had been the outcome of [genuine saving] ... -but the change was government induced. The new money reaches factor owners in the form of wages, rent and interest ... the factor owners will then spend the higher money incomes in their existing consumption:investment proportions ... Capital goods industries will find their expansion has been in error and malinvestments have been inoccured."* [**Markets, Entrepreneurs and Liberty**, pp. 68–9]

In other words, there has been *"wasteful mis-investment due to government interference with the market."* [**Op. Cit.**, p. 69] In response to this (negative) influence in the workings of the market, it is suggested by right-libertarians that a system of private banks should be used and that interest rates are set by them, via market forces. In this way an interest rate that matches the demand and supply for savings will be reached and the business cycle will be no more. By truly privatising the credit market, it is hoped by the business cycle will finally stop.

Unsurprisingly, this particular argument has its weak points and in this section of the FAQ we will try to show exactly why this theory is wrong.

Let us start with Reckie's starting point. He states that the *"main problem"* of the slump is *"why is there suddenly a '**cluster**' of business errors? Businessmen and entrepreneurs are market experts (otherwise they would not survive) and why should they all make mistakes simultaneously?"* [**Op. Cit.**, p. 68] It is this *"cluster"* of mistakes that the Austrians' take as evidence that the business cycle comes from outside the workings of the market (i.e. is exogenous in nature). Reekie argues that an *"error cluster only occurs when all entrepreneurs have received the wrong signals on potential profitability, and all have received the signals simultaneously through government interference with the money supply."* [**Op. Cit.**, p. 74] But is this **really** the case?

The simple fact is that groups of (rational) individuals can act in the same way based on the same information and this can lead to a collective problem. For example, we do not consider it irrational that everyone in a building leaves it when the fire alarm goes off and that the flow of people can cause hold-ups at exits. Neither do we think that its unusual that traffic jams occur, after all those involved are all trying to get to work (i.e. they are reacting to the same desire). Now, is it so strange to think that capitalists who all see the same opportunity for profit in a specific market decide to invest in it? Or that the aggregate outcome of these individually rational decisions may be irrational (i.e. cause a glut in the market)?

In other words, a "cluster" of business failures may come about because a group of capitalists, acting in isolation, over-invest in a given market. They react to the same information (namely super profits in market X), arrange loans, invest and produce commodities to meet demand in that market. However, the aggregate result of these individually rational actions is that the aggregate supply far exceeds demand, causing a slump in that market and, perhaps, business failures. The slump in this market (and the potential failure of some firms) has an impact on the companies that supplied them, the companies that are dependent on their employees wages/demand, the banks that supplied the credit and so forth. The accumulative impact of this slump (or failures) on the chain of financial commitments of which they are but one link can be large and, perhaps,

push an economy into general depression. Thus the claim that it is something external to the system that causes depression is flawed.

It could be claimed the interest rate is the problem, that it does not accurately reflect the demand for investment or relate it to the supply of savings. But, as we argued in section C.8, it is not at all clear that the interest rate provides the necessary information to capitalists. They need investment information for their specific industry, but the interest rate is cross-industry. Thus capitalists in market X do not know if the investment in market X is increasing and so this lack of information can easily cause "mal-investment" as over-investment (and so over-production) occurs. As they have no way of knowing what the investment decisions of their competitors are or now these decisions will affect an already unknown future, capitalists may over-invest in certain markets and the net effects of this aggregate mistake can expand throughout the whole economy and cause a general slump. In other words, a cluster of business failures can be accounted for by the workings of the market itself and **not** the (existence of) government.

This is **one** possible reason for an internally generated business cycle but that is not the only one. Another is the role of class struggle which we discuss in the next section and yet another is the endogenous nature of the money supply itself. This account of money (proposed strongly by, among others, the post-Keynesian school) argues that the money supply is a function of the demand for credit, which itself is a function of the level of economic activity. In other words, the banking system creates as much money as people need and any attempt to control that creation will cause economic problems and, perhaps, crisis (interestingly, this analysis has strong parallels with mutualist and individualist anarchist theories on the causes of capitalist exploitation and the business cycle). Money, in other words, emerges from **within** the system and so the right-libertarian attempt to "blame the state" is simply wrong.

Thus what is termed "credit money" (created by banks) is an essential part of capitalism and would exist without a system of central banks. This is because money is created from within the system, in response to the needs of capitalists. In a word, money is endogenous and credit money an essential part of capitalism.

Right-libertarians do not agree. Reekie argues that *"[o]nce fractional reserve banking is introduced, however, the supply of money substitutes will include fiduciary media. The ingenuity of bankers, other financial intermediaries and the endorsement and* ***guaranteeing of their activities by governments and central banks*** *has ensured that the quantity of fiat money is immense."* [**Op. Cit.**, p. 73]

Therefore, what "anarcho"-capitalists and other right-libertarians seem to be actually complaining about when they argue that "state action" creates the business cycle by creating excess money is that the state **allows** bankers to meet the demand for credit by creating it. This makes sense, for the first fallacy of this sort of claim is how could the state **force** bankers to expand credit by loaning more money than they have savings. And this seems to be the normal case within capitalism — the central banks accommodate bankers activity, they do not force them to do it. Alan Holmes, a senior vice president at the New York Federal Reserve, stated that:

> *"In the real world, banks extend credit, creating deposits in the process, and look for the reserves later. The question then becomes one of whether and how the Federal Reserve will accommodate the demand for reserves. In the very short run, the Federal Reserve has little or no choice about accommodating that demand, over time, its influence can obviously be felt."* [quoted by Doug Henwood, **Wall Street**, p. 220]

(Although we must stress that central banks are **not** passive and do have many tools for affecting the supply of money. For example, central banks can operate "tight" money policies which can have significant impact on an economy and, via creating high enough interest rates, the demand for money.)

It could be argued that because central banks exist, the state creates an "environment" which bankers take advantage off. By not being subject to "free market" pressures, bankers could be tempted to make more loans than they would otherwise in a "pure" capitalist system (i.e. create credit money). The question arises, would "pure" capitalism generate sufficient market controls to stop banks loaning in excess of available savings (i.e. eliminate the creation of credit money/ fiduciary media).

It is to this question we now turn.

As noted above, the demand for credit is generated from **within** the system and the comments by Holmes reinforce this. Capitalists seek credit in order to make money and banks create it precisely because they are also seeking profit. What right-libertarians actually object to is the government (via the central bank) **accommodating** this creation of credit. If only the banks could be forced to maintain a savings to loans ration of one, then the business cycle would stop. But is this likely? Could market forces ensure that bankers pursue such a policy? We think not — simply because the banks are profit making institutions. As post-Keynesianist Hyman Minsky argues, *"[b]ecause bankers live in the same expectational climate as businessmen, profit-seeking bankers will find ways of accommodating their customers... Banks and bankers are not passive managers of money to lend or to invest; they are in business to maximise profits..."* [quoted by L. Randall Wray, **Money and Credit in Capitalist Economies**, p. 85]

This is recognised by Reekie, in passing at least (he notes that *"fiduciary media could still exist if bankers offered them and clients accepted them"* [**Op. Cit.**, p. 73]). Bankers will tend to try and accommodate their customers and earn as much money as possible. Thus Charles P. Kindleberger comments that monetary expansion *"is systematic and endogenous rather than random and exogenous"* seem to fit far better the reality of capitalism that the Austrian and right-libertarian viewpoint [**Manias, Panics, and Crashes**, p. 59] and post-Keynesian L. Randall Wray argues that *"the money supply ... is more obviously endogenous in the monetary systems which predate the development of a central bank."* [**Op. Cit.**, p. 150]

In other words, the money supply cannot be directly controlled by the central bank since it is determined by private decisions to enter into debt commitments to finance spending. Given that money is generated from **within** the system, can market forces ensure the non-expansion of credit (i.e. that the demand for loans equals the supply of savings)? To begin to answer this question we must note that investment is *"essentially determined by expected profitability."* [Philip Arestis, **The Post-Keynesian Approach to Economics**, p. 103] This means that the actions of the banks cannot be taken in isolation from the rest of the economy. Money, credit and banks are an essential part of the capitalist system and they cannot be artificially isolated from the expectations, pressures and influences of that system.

Let us assume that the banks desire to maintain a loans to savings ratio of one and try to adjust their interest rates accordingly. Firstly, changes in the rate of interest *"produce only a very small, if any, movement in business investment"* according to empirical evidence [**Op. Cit.**, pp. 82–83] and that *"the demand for credit is extremely inelastic with respect to interest rates."* [L. Randall Wray, **Op. Cit.**, p. 245] Thus, to keep the supply of savings in line with the demand for loans, interest rates would have to increase greatly (indeed, trying to control the money supply

by controlling the monetary bases in this way will only lead to very big fluctuations in interest rates). And increasing interest rates has a couple of paradoxical effects.

According to economists Joseph Stiglitz and Andrew Weiss (in *"Credit Rationing in Markets with Imperfect Knowledge"*, **American Economic Review**, no. 71, pp. 393–410) interest rates are subject to what is called the *"lemons problem"* (asymmetrical information between buyer and seller). Stiglitz and Weiss applied the "lemons problem" to the credit market and argued (and unknowingly repeated Adam Smith) that at a given interest rate, lenders will earn lower return by lending to bad borrowers (because of defaults) than to good ones. If lenders try to increase interest rates to compensate for this risk, they may chase away good borrowers, who are unwilling to pay a higher rate, while perversely not chasing away incompetent, criminal, or malignantly optimistic borrowers. This means that an increase in interest rates may actually increase the possibilities of crisis, as more loans may end up in the hands of defaulters.

This gives banks a strong incentive to keep interest rates lower than they otherwise could be. Moreover, *"increases in interest rates make it more difficult for economic agents to meet their debt repayments"* [Philip Arestis, **Op. Cit.**, pp. 237–8] which means when interest rates **are** raised, defaults will increase and place pressures on the banking system. At high enough short-term interest rates, firms find it hard to pay their interest bills, which cause/increase cash flow problems and so *"[s]harp increases in short term interest rates .. .leads to a fall in the present value of gross profits after taxes (quasi-rents) that capital assets are expected to earn."* [Hyman Minsky, **Post-Keynesian Economic Theory**, p. 45]

In addition, *"production of most investment goods is undertaken on order and requires time for completion. A rise in interest rates is not likely to cause firms to abandon projects in the process of production . .. This does not mean ... that investment is completely unresponsive to interest rates. A large increase in interest rates causes a 'present value reversal', forcing the marginal efficiency of capital to fall below the interest rate. If the long term interest rate is also pushed above the marginal efficiency of capital, the project may be abandoned."* [Wray, **Op. Cit.**, pp. 172–3] In other words, investment takes **time** and there is a lag between investment decisions and actual fixed capital investment. So if interest rates vary during this lag period, initially profitable investments may become white elephants.

As Michal Kalecki argued, the rate of interest must be lower than the rate of profit otherwise investment becomes pointless. The incentive for a firm to own and operate capital is dependent on the prospective rate of profit on that capital relative to the rate of interest at which the firm can borrow at. The higher the interest rate, the less promising investment becomes.

If investment is unresponsive to all but very high interest rates (as we indicated above), then a privatised banking system will be under intense pressure to keep rates low enough to maintain a boom (by, perhaps, creating credit above the amount available as savings). And if it does this, over-investment and crisis is the eventual outcome. If it does not do this and increases interest rates then consumption and investment will dry up as interest rates rise and the defaulters (honest and dishonest) increase and a crisis will eventually occur.

This is because increasing interest rates may increase savings **but** it also reduce consumption (*"high interest rates also deter both consumers and companies from spending, so that the domestic economy is weakened and unemployment rises"* [Paul Ormerod, **The Death of Economics**, p. 70]). This means that firms can face a drop off in demand, causing them problems and (perhaps) leading to a lack of profits, debt repayment problems and failure. An increase in interest rates also reduces demand for investment goods, which also can cause firms problems, increase unemployment and

so on. So an increase in interest rates (particularly a sharp rise) could reduce consumption and investment (i.e. reduce aggregate demand) and have a ripple effect throughout the economy which could cause a slump to occur.

In other words, interest rates and the supply and demand of savings/loans they are meant to reflect may not necessarily move an economy towards equilibrium (if such a concept is useful). Indeed, the workings of a "pure" banking system without credit money may increase unemployment as demand falls in both investment and consumption in response to high interest rates and a general shortage of money due to lack of (credit) money resulting from the "tight" money regime implied by such a regime (i.e. the business cycle would still exist). This was the case of the failed Monetarist experiments on the early 1980s when central banks in America and Britain tried to pursue a "tight" money policy. The "tight" money policy did not, in fact, control the money supply. All it did do was increase interest rates and lead to a serious financial crisis and a deep recession (as Wray notes, *"the central bank uses tight money polices to raise interest rates"* [**Op. Cit.**, p. 262]). This recession, we must note, also broke the backbone of working class resistance and the unions in both countries due to the high levels of unemployment it generated. As intended, we are sure.

Such an outcome would not surprise anarchists, as this was a key feature of the Individualist and Mutualist Anarchists' arguments against the "money monopoly" associated with specie money. They argued that the "money monopoly" created a "tight" money regime which reduced the demand for labour by restricting money and credit and so allowed the exploitation of labour (i.e. encouraged wage labour) and stopped the development of non-capitalist forms of production. Thus Lysander Spooner's comments that workers need *"**money capital** to enable them to buy the raw materials upon which to bestow their labour, the implements and machinery with which to labour ... Unless they get this capital, they must all either work at a disadvantage, or not work at all. A very large portion of them, to save themselves from starvation, have no alternative but to sell their labour to others ..."* [**A Letter to Grover Cleveland**, p. 39] It is interesting to note that workers **did** do well during the 1950s and 1960s under a "liberal" money regime than they did under the "tighter" regimes of the 1980s and 1990s.

We should also note that an extended period of boom will encourage banks to make loans more freely. According to Minsky's *"financial instability model"* crisis (see *"The Financial Instability Hypothesis"* in **Post-Keynesian Economic Theory** for example) is essentially caused by risky financial practices during periods of financial tranquillity. In other words, *"stability is destabilising."* In a period of boom, banks are happy and the increased profits from companies are flowing into their vaults. Over time, bankers note that they can use a reserve system to increase their income and, due to the general upward swing of the economy, consider it safe to do so (and given that they are in competition with other banks, they may provide loans simply because they are afraid of losing customers to more flexible competitors). This increases the instability within the system (as firms increase their debts due to the flexibility of the banks) and produces the possibility of crisis if interest rates are increased (because the ability of business to fulfil their financial commitments embedded in debts deteriorates).

Even if we assume that interest rates **do** work as predicted in theory, it is false to maintain that there is one interest rate. This is not the case. *"Concentration of capital leads to unequal access to investment funds, which obstructs further the possibility of smooth transitions in industrial activity. Because of their past record of profitability, large enterprises have higher credit ratings and easier access to credit facilities, and they are able to put up larger collateral for a loan."* [Michael

A. Bernstein, **The Great Depression**, p. 106] As we noted in section C.5.1, the larger the firm, the lower the interest rate they have to pay. Thus banks routinely lower their interest rates to their best clients even though the future is uncertain and past performance cannot and does not indicate future returns. Therefore it seems a bit strange to maintain that the interest rate will bring savings and loans into line if there are different rates being offered.

And, of course, private banks cannot affect the underlying fundamentals that drive the economy — like productivity, working class power and political stability — any more than central banks (although central banks can influence the speed and gentleness of adjustment to a crisis).

Indeed, given a period of full employment a system of private banks may actually speed up the coming of a slump. As we argue in the next section, full employment results in a profits squeeze as firms face a tight labour market (which drives up costs) and, therefore, increased workers' power at the point of production and in their power of exit. In a central bank system, capitalists can pass on these increasing costs to consumers and so maintain their profit margins for longer. This option is restricted in a private banking system as banks would be less inclined to devalue their money. This means that firms will face a profits squeeze sooner rather than later, which will cause a slump as firms cannot make ends meet. As Reekie notes, inflation *"can temporarily reduce employment by postponing the time when misdirected labour will be laid off"* but as Austrian's (like Monetarists) think *"inflation is a monetary phenomenon"* he does not understand the real causes of inflation and what they imply for a "pure" capitalist system [**Op. Cit.**, p. 67, p. 74]. As Paul Ormerod points out *"the claim that inflation is always and everywhere purely caused by increases in the money supply, and that there the rate of inflation bears a stable, predictable relationship to increases in the money supply is ridiculous."* And he notes that *"[i]ncreases in the rate of inflation tend to be linked to falls in unemployment, and vice versa"* which indicates its **real** causes — namely in the balance of class power and in the class struggle. [**The Death of Economics**, p. 96, p. 131]

Moreover, if we do take the Austrian theory of the business cycle at face value we are drawn to conclusion that in order to finance investment savings must be increased. But to maintain or increase the stock of loanable savings, inequality must be increased. This is because, unsurprisingly, rich people save a larger proportion of their income than poor people and the proportion of profits saved are higher than the proportion of wages. But increasing inequality (as we argued in section 3.1) makes a mockery of right-libertarian claims that their system is based on freedom or justice.

This means that the preferred banking system of "anarcho"-capitalism implies increasing, not decreasing, inequality within society. Moreover, most firms (as we indicated in section C.5.1) fund their investments with their own savings which would make it hard for banks to loan these savings out as they could be withdrawn at any time. This could have serious implications for the economy, as banks refuse to fund new investment simply because of the uncertainty they face when accessing if their available savings can be loaned to others (after all, they can hardly loan out the savings of a customer who is likely to demand them at any time). And by refusing to fund new investment, a boom could falter and turn to slump as firms do not find the necessary orders to keep going.

So, would market forces create "sound banking"? The answer is probably not. The pressures on banks to make profits come into conflict with the need to maintain their savings to loans ration (and so the confidence of their customers). As Wray argues, *"as banks are profit seeking firms, they find ways to increase their liabilities which don't entail increases in reserve requirements"* and *"[i]f banks share the profit expectations of prospective borrowers, they can create credit to allow*

[projects/investments] to proceed." [**Op. Cit.**, p. 295, p. 283] This can be seen from the historical record. As Kindleberger notes, *"the market will create new forms of money in periods of boom to get around the limit"* imposed on the money supply [**Op. Cit.**, p. 63]. Trade credit is one way, for example. Under the Monetarist experiments of 1980s, there was *"deregulation and central bank constraints raised interest rates and created a moral hazard — banks made increasingly risky loans to cover rising costs of issuing liabilities. Rising competition from nonbanks and tight money policy forced banks to lower standards and increase rates of growth in an attempt to 'grow their way to profitability'"* [**Op. Cit.**, p. 293]

Thus credit money ("fiduciary media") is an attempt to overcome the scarcity of money within capitalism, particularly the scarcity of specie money. The pressures that banks face within "actually existing" capitalism would still be faced under "pure" capitalism. It is likely (as Reekie acknowledges) that credit money would still be created in response to the demands of business people (although not at the same level as is currently the case, we imagine). The banks, seeking profits themselves and in competition for customers, would be caught between maintaining the value of their business (i.e. their money) and the needs to maximise profits. As a boom develops, banks would be tempted to introduce credit money to maintain it as increasing the interest rate would be difficult and potentially dangerous (for reasons we noted above). Thus, if credit money is not forth coming (i.e. the banks stick to the Austrian claims that loans must equal savings) then the rise in interest rates required will generate a slump. If it is forthcoming, then the danger of over-investment becomes increasingly likely. All in all, the business cycle is part of capitalism and **not** caused by "external" factors like the existence of government.

As Reekie notes, to Austrians *"ignorance of the future is endemic"* [**Op. Cit.**, p. 117] but you would be forgiven for thinking that this is not the case when it comes to investment. An individual firm cannot know whether its investment project will generate the stream of returns necessary to meet the stream of payment commitments undertaken to finance the project. And neither can the banks who fund those projects. Even **if** a bank does not get tempted into providing credit money in excess of savings, it cannot predict whether other banks will do the same or whether the projects it funds will be successful. Firms, looking for credit, may turn to more flexible competitors (who practice reserve banking to some degree) and the inflexible bank may see its market share and profits decrease. After all, commercial banks *"typically establish relations with customers to reduce the uncertainty involved in making loans. Once a bank has entered into a relationship with a customer, it has strong incentives to meet the demands of that customer."* [Wray, **Op. Cit.**, p. 85]

There are example of fully privatised banks. For example, in the United States (*"which was without a central bank after 1837"*) *"the major banks in New York were in a bind between their roles as profit seekers, which made them contributors to the instability of credit, and as possessors of country deposits against whose instability they had to guard."* [Kindleberger, **Op. Cit.**, p. 85]

In Scotland, the banks were unregulated between 1772 and 1845 but *"the leading commercial banks accumulated the notes of lessor ones, as the Second Bank of the United States did contemporaneously in [the USA], ready to convert them to specie if they thought they were getting out of line. They served, that is, as an informal controller of the money supply. For the rest, as so often, historical evidence runs against strong theory, as demonstrated by the country banks in England from 1745 to 1835, wildcat banking in Michigan in the 1830s, and the latest experience with bank deregulation in Latin America."* [**Op. Cit.**, p. 82] And we should note there were a few banking "wars" during the

period of deregulation in Scotland which forced a few of the smaller banks to fail as the bigger ones refused their money and that there was a major bank failure in the Ayr Bank.

Kendleberger argues that central banking *"arose to impose control on the instability of credit"* and did not cause the instability which right-libertarians maintain it does. And as we note in section 10.3, the USA suffered massive economic instability during its period without central banking. Thus, **if** credit money **is** the cause of the business cycle, it is likely that a "pure" capitalism will still suffer from it just as much as "actually existing" capitalism (either due to high interest rates or over-investment).

In general, as the failed Monetarist experiments of the 1980s prove, trying to control the money supply is impossible. The demand for money is dependent on the needs of the economy and any attempt to control it will fail (and cause a deep depression, usually via high interest rates). The business cycle, therefore, is an endogenous phenomenon caused by the normal functioning of the capitalist economic system. Austrian and right-libertarian claims that *"slump flows boom, but for a totally unnecessary reason: government inspired mal-investment"* [Reekie, **Op. Cit.**, p. 74] are simply wrong. Over-investment **does** occur, but it is **not** *"inspired"* by the government. It is *"inspired"* by the banks need to make profits from loans and from businesses need for investment funds which the banks accommodate. In other words, by the nature of the capitalist system.

10.2 How does the labour market effect capitalism?

In many ways, the labour market is the one that affects capitalism the most. The right-libertarian assumption (like that of mainstream economics) is that markets clear and, therefore, the labour market will also clear. As this assumption has rarely been proven to be true in actuality (i.e. periods of full employment within capitalism are few and far between), this leaves its supporters with a problem — reality contradicts the theory.

The theory predicts full employment but reality shows that this is not the case. Since we are dealing with logical deductions from assumptions, obviously the theory cannot be wrong and so we must identify external factors which cause the business cycle (and so unemployment). In this way attention is diverted away from the market and its workings — after all, it is assumed that the capitalist market works — and onto something else. This "something else" has been quite a few different things (most ridiculously, sun spots in the case of one of the founders of marginalist economics, William Stanley Jevons). However, these days most pro-free market capitalist economists and right-libertarians have now decided it is the state.

In this section of the FAQ we will present a case that maintains that the assumption that markets clear is false at least for one, unique, market — namely, the market for labour. As the fundamental assumption underlying "free market" capitalism is false, the logically consistent superstructure built upon comes crashing down. Part of the reason why capitalism is unstable is due to the commodification of labour (i.e. people) and the problems this creates. The state itself can have positive and negative impacts on the economy, but removing it or its influence will not solve the business cycle.

Why is this? Simply due to the nature of the labour market.

Anarchists have long realised that the capitalist market is based upon inequalities and changes in power. Proudhon argued that *"[t]he manufacturer says to the labourer, 'You are as free to go elsewhere with your services as I am to receive them. I offer you so much.' The merchant says to the customer, 'Take it or leave it; you are master of your money, as I am of my goods. I want so*

much.' Who will yield? The weaker." He, like all anarchists, saw that domination, oppression and exploitation flow from inequalities of market/economic power and that the *"power of invasion lies in superior strength."* [**What is Property?**, p. 216, p. 215]

This applies with greatest force to the labour market. While mainstream economics and right-libertarian variations of it refuse to acknowledge that the capitalist market is a based upon hierarchy and power, anarchists (and other socialists) do not share this opinion. And because they do not share this understanding with anarchists, right-libertarians will never be able to understand capitalism or its dynamics and development. Thus, when it comes to the labour market, it is essential to remember that the balance of power within it is the key to understanding the business cycle. Thus the economy must be understood as a system of power.

So how does the labour market effect capitalism? Let us consider a growing economy, on that is coming out of a recession. Such a growing economy stimulates demand for employment and as unemployment falls, the costs of finding workers increase and wage and condition demands of existing workers intensify. As the economy is growing and labour is scare, the threat associated with the hardship of unemployment is weakened. The share of profits is squeezed and in reaction to this companies begin to cut costs (by reducing inventories, postponing investment plans and laying off workers). As a result, the economy moves into a downturn. Unemployment rises and wage demands are moderated. Eventually, this enables the share of profits first of all to stabilise, and then rise. Such an *"interplay between profits and unemployment as the key determinant of business cycles"* is *"observed in the empirical data."* [Paul Ormerod, **The Death of Economics**, p. 188]

Thus, as an economy approaches full employment the balance of power on the labour market changes. The sack is no longer that great a threat as people see that they can get a job elsewhere easily. Thus wages and working conditions increase as companies try to get new (and keep) existing employees and output is harder to maintain. In the words of economist William Lazonick, labour *"that is able to command a higher price than previously because of the appearance of tighter labour markets is, by definition, labour that is highly mobile via the market. And labour that is highly mobile via the market is labour whose supply of effort is difficult for managers to control in the production process. Hence, the advent of tight labour markets generally results in more rapidly rising average costs ...as well as upward shifts in the average cost curve..."* [**Business Organisation and the Myth of the Market Economy**, p. 106]

In other words, under conditions of full-employment *"employers are in danger of losing the upper hand."* [Juliet B. Schor, **The Overworked American**, p. 75] Schor argues that *"employers have a structural advantage in the labour market, because there are typically more candidates ready and willing to endure this work marathon [of long hours] than jobs for them to fill."* [p. 71] Thus the labour market is usually a buyers market, and so the sellers have to compromise. In the end, workers adapt to this inequality of power and instead of getting what they want, they want what they get.

But under full employment this changes. As we argued in section B.4.4 and section C.7, in such a situation it is the bosses who have to start compromising. And they do not like it. As Schor notes, America *"has never experienced a sustained period of full employment. The closest we have gotten is the late 1960s, when the overall unemployment rate was under 4 percent for four years. But that experience does more to prove the point than any other example. The trauma caused to business by those years of a tight labour market was considerable. Since then, there has been a*

powerful consensus that the nation cannot withstand such a low rate of unemployment." [**Op. Cit.**, pp. 75–76]

So, in other words, full employment is not good for the capitalist system due to the power full employment provides workers. Thus unemployment is a necessary requirement for a successful capitalist economy and not some kind of aberration in an otherwise healthy system. Thus "anarcho"-capitalist claims that "pure" capitalism will soon result in permanent full employment are false. Any moves towards full employment will result in a slump as capitalists see their profits squeezed from below by either collective class struggle or by individual mobility in the labour market.

This was recognised by Individualist Anarchists like Benjamin Tucker, who argued that mutual banking would *"give an unheard of impetus to business, and consequently create an unprecedented demand for labour, — a demand which would always be in excess of the supply, directly contrary of the present condition of the labour market."* [**The Anarchist Reader**, pp. 149–150] In other words, full employment would end capitalist exploitation, drive non-labour income to zero and ensure the worker the full value of her labour — in other words, end capitalism. Thus, for most (if not all) anarchists the exploitation of labour is only possible when unemployment exists and the supply of labour exceeds the demand for it. Any move towards unemployment will result in a profits squeeze and either the end of capitalism or an economic slump.

Indeed, as we argued in the last section, the extended periods of (approximately) full employment until the 1960s had the advantage that any profit squeeze could (in the short run anyway) be passed onto working class people in the shape of inflation. As prices rise, labour is made cheaper and profits margins supported. This option is restricted under a "pure" capitalism (for reasons we discussed in the last section) and so "pure" capitalism will be affected by full employment faster than "impure" capitalism.

As an economy approaches full employment, *"hiring new workers suddenly becomes much more difficult. They are harder to find, cost more, and are less experiences. Such shortages are extremely costly for a firm."* [Schor, **Op. Cit.**, p. 75] This encourages a firm to pass on these rises to society in the form of price rises, so creating inflation. Workers, in turn, try to maintain their standard of living. *"Every general increase in labour costs in recent years,"* note J. Brecher and J. Costello in the late 1970s, *"has followed, rather than preceded, an increase in consumer prices. Wage increases have been the result of workers' efforts to catch up after their incomes have already been eroded by inflation. Nor could it easily be otherwise. All a businessman has to do to raise a price ... [is to] make an announcement... Wage rates ... are primarily determined by contracts"* and so cannot be easily adjusted in the short term. [**Common Sense for Bad Times**, p, 120]

These full employment pressures will still exist with "pure" capitalism (and due to the nature of the banking system will not have the safety value of inflation). This means that periodic profit squeezes will occur, due to the nature of a tight labour market and the increased power of workers this generates. This in turn means that a "pure" capitalism will be subject to periods of unemployment (as we argued in section C.9) and so still have a business cycle. This is usually acknowledged by right-libertarians in passing, although they seem to think that this is purely a "short-term" problem (it seems a strange "short-term" problem that continually occurs).

But such an analysis is denied by right-libertarians. For them government action, combined with the habit of many labour unions to obtain higher than market wage rates for their members, creates and exacerbates mass unemployment. This flows from the deductive logic of much capitalist economics. The basic assumption of capitalism is that markets clear. So if unemployment

exists then it can only be because the price of labour (wages) is too high (Austrian Economist W. Duncan Reekie argues that unemployment will *"disappear provided real wages are not artificially high"* [**Markets, Entrepreneurs and Liberty**, p. 72]).

Thus the assumption provokes the conclusion — unemployment is caused by an unclearing market as markets always clear. And the cause for this is either the state or unions. But what if the labour market **cannot** clear without seriously damaging the power and profits of capitalists? What if unemployment is required to maximise profits by weakening labours' bargaining position on the market and so maximising the capitalists power? In that case unemployment is caused by capitalism, not by forces external to it.

However, let us assume that the right-libertarian theory is correct. Let us assume that unemployment is all the fault of the selfish unions and that a job-seeker *"who does not want to wait will always get a job in the unhampered market economy."* [von Mises, **Human Action**, p. 595]

Would crushing the unions reduce unemployment? Let us assume that the unions have been crushed and government has been abolished (or, at the very least, become a minimum state). The aim of the capitalist class is to maximise their profits and to do this they invest in labour saving machinery and otherwise attempt to increase productivity. But increasing productivity means that the prices of goods fall and falling prices mean increasing real wages. It is high real wages that, according to right-libertarians, that cause unemployment. So as a reward for increasing productivity, workers will have to have their money wages cut in order to stop unemployment occurring! For this reason some employers might refrain from cutting wages in order to avoid damage to morale — potentially an important concern.

Moreover, wage contracts involve **time** — a contract will usually agree a certain wage for a certain period. This builds in rigidity into the market, wages cannot be adjusted as quickly as other commodity prices. Of course, it could be argued that reducing the period of the contract and/or allowing the wage to be adjusted could overcome this problem. However, if we reduce the period of the contract then workers are at a suffer disadvantage as they will not know if they have a job tomorrow and so they will not be able to easily plan their future (an evil situation for anyone to be in). Moreover, even without formal contracts, wage renegotiation can be expensive. After all, it takes time to bargain (and time is money under capitalism) and wage cutting can involve the risk of the loss of mutual good will between employer and employee. And would **you** give your boss the power to "adjust" your wages as he/she thought was necessary? To do so would imply an altruistic trust in others not to abuse their power.

Thus a "pure" capitalism would be constantly seeing employment increase and decrease as productivity levels change. There exist important reasons why the labour market need not clear which revolve around the avoidance/delaying of wage cuts by the actions of capitalists themselves. Thus, given a choice between cutting wages for all workers and laying off some workers without cutting the wages of the remaining employees, it is unsurprising that capitalists usually go for the later. After all, the sack is an important disciplining device and firing workers can make the remaining employees more inclined to work harder and be more obedient.

And, of course, many employers are not inclined to hire over-qualified workers. This is because, once the economy picks up again, their worker has a tendency to move elsewhere and so it can cost them time and money finding a replacement and training them. This means that involuntary unemployment can easily occur, so reducing tendencies towards full employment even more. In addition, one of the assumptions of the standard marginalist economic model is one of decreasing returns to scale. This means that as employment increases, costs rise and so prices also rise (and

so real wages fall). But in reality many industries have **increasing** returns to scale, which means that as production increases unit costs fall, prices fall and so real wages rise. Thus in such an economy unemployment would increase simply because of the nature of the production process!

Moreover, as we argued in-depth in section C.9, a cut in money wages is not a neutral act. A cut in money wages means a reduction in demand for certain industries, which may have to reduce the wages of its employees (or fire them) to make ends meet. This could produce a accumulative effect and actually **increase** unemployment rather than reduce it.

In addition, there are no "self-correcting" forces at work in the labour market which will quickly bring employment back to full levels. This is for a few reasons. Firstly, the supply of labour cannot be reduced by cutting back production as in other markets. All we can do is move to other areas and hope to find work there. Secondly, the supply of labour can sometimes adjust to wage decreases in the wrong direction. Low wages might drive workers to offer a greater amount of labour (i.e. longer hours) to make up for any short fall (or to keep their job). This is usually termed the *"efficiency wage"* effect. Similarly, another family member may seek employment in order to maintain a given standard of living. Falling wages may cause the number of workers seeking employment to **increase**, causing a full further fall in wages and so on (and this is ignoring the effects of lowering wages on demand discussed in section C.9).

The paradox of piece work is an important example of this effect. As Schor argues, *"piece-rate workers were caught in a viscous downward spiral of poverty and overwork... When rates were low, they found themselves compelled to make up in extra output what they were losing on each piece. But the extra output produced glutted the market and drove rates down further."* [Juliet C. Schor, **The Overworked American**, p, 58]

Thus, in the face of reducing wages, the labour market may see an accumulative move away from (rather than towards) full employment, The right-libertarian argument is that unemployment is caused by real wages being too high which in turn flows from the assumption that markets clear. If there is unemployment, then the price of the commodity labour is too high — otherwise supply and demand would meet and the market clear. But if, as we argued above, unemployment is essential to discipline workers then the labour market **cannot** clear except for short periods. If the labour market clears, profits are squeezed. Thus the claim that unemployment is caused by "too high" real wages is false (and as we argue in section C.9, cutting these wages will result in deepening any slump and making recovery longer to come about).

In other words, the assumption that the labour market must clear is false, as is any assumption that reducing wages will tend to push the economy quickly back to full employment. The nature of wage labour and the "commodity" being sold (i.e. human labour/time/liberty) ensure that it can never be the same as others. This has important implications for economic theory and the claims of right-libertarians, implications that they fail to see due to their vision of labour as a commodity like any other.

The question arises, of course, of whether, during periods of full employment, workers could not take advantage of their market power and gain increased workers' control, create co-operatives and so reform away capitalism. This was the argument of the Mutualist and Individualist anarchists and it does have its merits. However, it is clear (see section J.5.12) that bosses hate to have their authority reduced and so combat workers' control whenever they can. The logic is simple, if workers increase their control within the workplace the manager and bosses may soon be out of a job and (more importantly) they may start to control the allocation of profits. Any increase in working class militancy may provoke capitalists to stop/reduce

investment and credit and so create the economic environment (i.e. increasing unemployment) necessary to undercut working class power.

In other words, a period of full unemployment is not sufficient to reform capitalism away. Full employment (nevermind any struggle over workers' control) will reduce profits and if profits are reduced then firms find it hard to repay debts, fund investment and provide profits for shareholders. This profits squeeze would be enough to force capitalism into a slump and any attempts at gaining workers' self-management in periods of high employment will help push it over the edge (after all, workers' control without control over the allocation of any surplus is distinctly phoney). Moreover, even if we ignore the effects of full employment may not last due to problems associated with over-investment (see section C.7.2), credit and interest rate problems (see section 10.1) and realisation/aggregate demand disjoints. Full employment adds to the problems associated with the capitalist business cycle and so, if class struggle and workers power did not exist or cost problem, capitalism would still not be stable.

If equilibrium is a myth, then so is full employment. It seems somewhat ironic that "anarcho"-capitalists and other right-libertarians maintain that there will be equilibrium (full employment) in the one market within capitalism it can never actually exist in! This is usually quietly acknowledged by most right-libertarians, who mention in passing that some "temporary" unemployment **will** exist in their system — but "temporary" unemployment is not full employment. Of course, you could maintain that all unemployment is "voluntary" and get round the problem by denying it, but that will not get us very far.

So it is all fine and well saying that "libertarian" capitalism would be based upon the maxim *"From each as they choose, to each as they are chosen."* [Robert Nozick, **Anarchy, State, and Utopia**, p. 160] But if the labour market is such that workers have little option about what they "choose" to give and fear that they will **not** be chosen, then they are at a disadvantage when compared to their bosses and so "consent" to being treated as a resource from the capitalist can make a profit from. And so this will result in any "free" contract on the labour market favouring one party at the expense of the other — as can be seen from "actually existing capitalism".

Thus any "free exchange" on the labour market will usually **not** reflect the true desires of working people (and who will make all the "adjusting" and end up wanting what they get). Only when the economy is approaching full employment will the labour market start to reflect the true desires of working people and their wage start to approach its full product. And when this happens, profits are squeezed and capitalism goes into slump and the resulting unemployment disciplines the working class and restores profit margins. Thus full employment will be the exception rather than the rule within capitalism (and that is a conclusion which the historical record indicates).

In other words, in a normally working capitalist economy any labour contracts will not create relationships based upon freedom due to the inequalities in power between workers and capitalists. Instead, any contracts will be based upon domination, **not** freedom. Which prompts the question, how is libertarian capitalism **libertarian** if it erodes the liberty of a large class of people?

10.3 Was laissez-faire capitalism stable?

Firstly, we must state that a pure laissez-faire capitalist system has not existed. This means that any evidence we present in this section can be dismissed by right-libertarians for precisely this

fact — it was not "pure" enough. Of course, if they were consistent, you would expect them to shun all historical and current examples of capitalism or activity within capitalism, but this they do not. The logic is simple — if X is good, then it is permissible to use it. If X is bad, the system is not pure enough.

However, as right-libertarians **do** use historical examples so shall we. According to Murray Rothbard, there was *"quasi-laissez-faire industrialisation [in] the nineteenth century"* [**The Ethics of Liberty**, p. 264] and so we will use the example of nineteenth century America — as this is usually taken as being the closest to pure laissez-faire — in order to see if laissez-faire is stable or not.

Yes, we are well aware that 19th century USA was far from laissez-faire – there was a state, protectionism, government economic activity and so on — but as this example has been often used by right-Libertarians' themselves (for example, Ayn Rand) we think that we can gain a lot from looking at this imperfect approximation of "pure" capitalism (and as we argued in section 8, it is the "quasi" aspects of the system that counted in industrialisation, **not** the laissez-faire ones).

So, was 19th century America stable? No, it most definitely was not.

Firstly, throughout that century there were a continual economic booms and slumps. The last third of the 19th century (often considered as a heyday of private enterprise) was a period of profound instability and anxiety. Between 1867 and 1900 there were 8 complete business cycles. Over these 396 months, the economy expanded during 199 months and contracted during 197. Hardly a sign of great stability (since the end of world war II, only about a fifth of the time has spent in periods of recession or depression, by way of comparison). Overall, the economy went into a slump, panic or crisis in 1807, 1817, 1828, 1834, 1837, 1854, 1857, 1873, 1882, and 1893 (in addition, 1903 and 1907 were also crisis years).

Part of this instability came from the eras banking system. *"Lack of a central banking system,"* writes Richard Du Boff, *"until the Federal Reserve act of 1913 made financial panics worse and business cycle swings more severe"* [**Accumulation and Power**, p. 177] It was in response to this instability that the Federal Reserve system was created; and as Doug Henwood notes *"the campaign for a more rational system of money and credit was not a movement of Wall Street vs. industry or regional finance, but a broad movement of elite bankers and the managers of the new corporations as well as academics and business journalists. The emergence of the Fed was the culmination of attempts to define a standard of value that began in the 1890s with the emergence of the modern professionally managed corporation owned not by its managers but dispersed public shareholders."* [**Wall Street**, p. 93] Indeed, the Bank of England was often forced to act as lender of last resort to the US, which had no central bank.

In the decentralised banking system of the 19th century, during panics thousands of banks would hoard resources, so starving the system for liquidity precisely at the moment it was most badly needed. The creation of trusts was one way in which capitalists tried to manage the system's instabilities (at the expense of consumers) and the corporation was a response to the outlawing of trusts. *"By internalising lots of the competitive system's gaps — by bring more transactions within the same institutional walls — corporations greatly stabilised the economy."* [Henwood, **Op. Cit.**, p. 94]

All during the hey-day of laissez faire we also find popular protests against the money system used, namely specie (in particular gold), which was considered as a hindrance to economic activity and expansion (as well as being a tool for the rich). The Individualist Anarchists, for example,

considered the money monopoly (which included the use of specie as money) as the means by which capitalists ensured that *"the labourers ... [are] kept in the condition of wage labourers,"* and reduced *"to the conditions of servants; and subject to all such extortions as their employers ... may choose to practice upon them"*, indeed they became the *"mere tools and machines in the hands of their employers"*. With the end of this monopoly, *"[t]he amount of money, capable of being furnished ... [would assure that all would] be under no necessity to act as a servant, or sell his or her labour to others."* [Lysander Spooner, **A Letter to Grover Cleveland**, p. 47, p. 39, p. 50, p. 41] In other words, a specie based system (as desired by many "anarcho"-capitalists) was considered a key way of maintaining wage labour and exploitation.

Interestingly, since the end of the era of the Gold Standard (and so commodity money) popular debate, protest and concern about money has disappeared. The debate and protest was in response to the **effects** of commodity money on the economy — with many people correctly viewing the seriously restrictive monetary regime of the time responsible for economic problems and crisis as well as increasing inequalities. Instead radicals across the political spectrum urged a more flexible regime, one that did not cause wage slavery and crisis by reducing the amount of money in circulation when it could be used to expand production and reduce the impact of slumps. Needless to say, the Federal Reserve system in the USA was far from the institution these populists wanted (after all, it is run by and for the elite interests who desired its creation).

That the laissez-faire system was so volatile and panic-ridden suggests that "anarcho"-capitalist dreams of privatising everything, including banking, and everything will be fine are very optimistic at best (and, ironically, it was members of the capitalist class who lead the movement towards state-managed capitalism in the name of "sound money").

11 What is the myth of "Natural Law"?

Natural Law, and the related concept of Natural Rights, play an important part in Libertarian and "anarcho"-capitalist ideology. Right-libertarians are not alone in claiming that their particular ideology is based on the "law of nature". Hitler, for one, claimed the same thing for Nazi ideology. So do numerous other demagogues, religious fanatics, and political philosophers. However, each likes to claim that only **their** "natural law" is the "real" one, all the others being subjective impositions. We will ignore these assertions (they are not arguments) and concentrate on explaining why natural law, in all its forms, is a myth. In addition, we will indicate its authoritarian implications.

Instead of such myths anarchists urge people to "work it out for themselves" and realise that any ethical code is subjective and not a law of nature. If its a good "code", then others will become convinced of it by your arguments and their intellect. There is no need to claim its a function of "man's nature"!

The following books discuss the subject of "Natural Law" in greater depth and are recommended for a fuller discussion of the issues raised in this section:

Robert Anton Wilson, **Natural Law** and L.A. Rollins, **The Myth of Natural Law**.

We should note that these books are written by people associated, to some degree, with right-libertarianism and, of course, we should point out that not all right-libertarians subscribe to "natural law" theories (David Friedman, for example, does not). However, such a position seems to be the minority in right-Libertarianism (Ayn Rand, Robert Nozick and Murray Rothbard, among

others, did subscribe to it). We should also point out that the Individualist Anarchist Lysander Spooner also subscribed to "natural laws" (which shows that, as we noted above, the concept is not limited to one particular theory or ideology). We present a short critique of Spooner's ideas on this subject in section G.7.

Lastly, it could be maintained that it is a common "straw man" to maintain that supporters of Natural Law argue that their Laws are like the laws of physics (and so are capable of stopping people's actions just as the law of gravity automatically stops people flying from the Earth). But that is the whole point — using the term "Natural Law" implies that the moral rights and laws that its supporters argue for are to be considered just like the law of gravity (although they acknowledge, of course, that unlike gravity, **their** *"natural laws"* **can be violated in nature**). Far from saying that the rights they support are just that (i.e. rights **they** think are good) they try to associate them with universal facts. For example, Lysander Spooner (who, we must stress, used the concept of "Natural law" to **oppose** the transformation of America into a capitalist society, unlike Rand, Nozick and Rothbard who use it to defend capitalism) stated that:

> *"the true definition of law is, that it is a fixed, immutable, natural principle; and not anything that man ever made, or can make, unmake, or alter. Thus we speak of the laws of matter, and the laws of mind; of the laws of gravitation, the laws of light, heat, and electricity...etc., etc... . The law of justice is just as supreme and universal in the moral world, as these others are in the mental or physical world; and is as unalterable as are these by any human power. And it is just as false and absurd to talk of anybody's having the power to abolish the law of justice, and set up their own in its stead, as it would be to talk of their having the power to abolish the law of gravitation, or any other natural laws of the universe, and set up their own will in the place of them."* [**A Letter to Grover Cleveland**, p. 88]

Rothbard and other capitalist supporters of "Natural Law" make the same sort of claims (as we will see). Now, why, if they are aware of the fact that unlike gravity their "Natural Laws" can be violated, do they use the term at all? Benjamin Tucker said that "Natural Law" was a *"religious"* concept — and this provides a clue. To say "Do not violate these rights, otherwise I will get cross" does not have **quite** the same power as "Do not violate these rights, they are facts of natural and you are violating nature" (compare to "Do not violate these laws, or you will go to hell"). So to point out that "Natural Law" is **not** the same as the law of gravity (because it has to be enforced by humans) is not attacking some kind of "straw man" — it is exposing the fact that these "Natural Laws" are just the personal prejudices of those who hold them. If they do not want then to be exposed as such then they should call their laws what they are — personal ethical laws — rather than compare them to the facts of nature.

11.1 Why the term "Natural Law" in the first place?

Murray Rothbard claims that *"Natural Law theory rests on the insight.. . that each entity has distinct and specific properties, a distinct 'nature,' which can be investigated by man's reason"* [**For a New Liberty**, p. 25] and that *"man has rights because they are **natural** rights. They are grounded in the nature of man."* [**The Ethics of Liberty**, p. 155]

To put it bluntly, this form of "analysis" was originated by Aristotle and has not been used by science for centuries. Science investigates by proposing theories and hypotheses to explain

empirical observations, testing and refining them by experiment. In stark contrast, Rothbard **invents** definitions (*"distinct" "natures"*) and then draws conclusions from them. Such a method was last used by the medieval Church and is devoid of any scientific method. It is, of course, a fiction. It attempts to deduce the nature of a "natural" society from *a priori* considerations of the "innate" nature of human beings, which just means that the assumptions necessary to reach the desired conclusions have been built into the definition of "human nature." In other words, Rothbard defines humans as having the "distinct and specific properties" that, given his assumptions, will allow his dogma (private state capitalism) to be inferred as the "natural" society for humans.

Rothbard claims that *"if A, B, C, etc., have differing attributes, it follows that they have different **natures.**"* [**The Ethics of Liberty**, p. 9] Does this means that as every individual is unique (have different attributes), they have different natures? Skin and hair colour are different attributes, does this mean that red haired people have different natures than blondes? That black people have different natures than white (and such a "theory" of "natural law" was used to justify slavery — yes, slaves **are** human but they have "different natures" than their masters and so slavery is okay). Of course Rothbard aggregates "attributes" to species level, but why not higher? Humans are primates, does that mean we have the same natures are monkeys or gorillas? We are also mammals as well, we share many of the same attributes as whales and dogs. Do we have similar natures?

But this is by the way. To continue we find that after defining certain "natures," Rothbard attempts to derive *"Natural Rights and Laws"* from them. However, these *"Natural Laws"* are quite strange, as they can be violated in nature! Real natural laws (like the law of gravity) **cannot** be violated and therefore do not need to be enforced. The "Natural Laws" the "Libertarian" desires to foist upon us are not like this. They need to be enforced by humans and the institutions they create. Hence, Libertarian "Natural Laws" are more akin to moral prescriptions or juridical laws. However, this does not stop Rothbard explicitly *"plac[ing]"* his *"Natural Laws" "alongside physical or 'scientific' natural laws."* [**The Ethics of Liberty**, p. 42]

So why do so many Libertarians use the term "Natural Law?" Simply, it gives them the means by which to elevate their opinions, dogmas, and prejudices to a metaphysical level where nobody will dare to criticise or even think about them. The term smacks of religion, where "Natural Law" has replaced "God's Law." The latter fiction gave the priest power over believers. "Natural Law" is designed to give the Libertarian ideologist power over the people that he or she wants to rule.

How can one be against a "Natural Law" or a "Natural Right"? It is impossible. How can one argue against gravity? If private property, for example, is elevated to such a level, who would dare argue against it? Ayn Rand listed having landlords and employers along with *"the laws of nature."* They are **not** similar: the first two are social relationships which have to be imposed by the state; the *"laws of nature"* (like gravity, needing food, etc.) are **facts** which do not need to be imposed. Rothbard claims that *"the natural fact is that labour service **is** indeed a commodity."* [**Op. Cit.**, p. 40] However, this is complete nonsense — labour service as a commodity is a **social** fact, dependent on the distribution of property within society, its social customs and so forth. It is only "natural" in the sense that it exists within a given society (the state is also "natural" as it also exists within nature at a given time). But neither wage slavery or the state is "natural" in the sense that gravity is natural or a human having two arms is. Indeed, workers at the dawn of capitalism, faced with selling their labour services to another, considered it as decidedly "unnatural" and used the term "wage slavery" to describe it!

Thus, where and when a "fact" appears is essential. For example, Rothbard claims that *"[a]n apple, let fall, will drop to the ground; this we all observe and acknowledge to be **in the nature** of the apple."* [**The Ethics of Liberty**, p. 9] Actually, we do not "acknowledge" anything of the kind. We acknowledge that the apple was subject to the force of gravity and that is why it fell. The same apple, "let fall" in a space ship would **not** drop to the floor. Has the "nature" of the apple changed? No, but the situation it is in has. Thus any attempt to generate abstract "natures" requires you to ignore reality in favour of ideals.

Because of the confusion its usage creates, we are tempted to think that the use of "Natural Law" dogma is an attempt to **stop** thinking, to restrict analysis, to force certain aspects of society off the political agenda by giving them a divine, everlasting quality.

Moreover, such an "individualist" account of the origins of rights will always turn on a muddled distinction between individual rationality and some vague notion of rationality associated with membership of the human species. How are we to determine what is rational for an individual **as and individual** and what is rational for that same individual **as a human being**? It is hard to see that we can make such a distinction for *"[i]f I violently interfere with Murray Rothbard's freedom, this may violate the 'natural law' of Murray Rothbard's needs, but it doesn't violate the 'natural law' of **my** needs."* [L.A. Rollins, **The Myth of Natural Rights**, p. 28] Both parties, after all, are human and if such interference is, as Rothbard claims, *"antihuman"* then why? *"If it helps me, a human, to advance my life, then how can it be unequivocally 'antihuman'?"* [L. A. Rollins, **Op. Cit.**, p. 27] Thus "natural law" is contradictory as it is well within the bounds of human nature to violate it.

This means that in order to support the dogma of "Natural Law," the cultists **must** ignore reality. Ayn Rand claims that *"the source of man's rights is...the law of identity. A is A — and Man is Man."* But Rand (like Rothbard) **defines** *"Man"* as an *"entity of a specific kind — a rational being"* [**The Virtue of Selfishness**, pp. 94–95]. Therefore she cannot account for **irrational** human behaviours (such as those that violate "Natural Laws"), which are also products of our "nature." To assert that such behaviours are not human is to assert that A can be not-A, thus contradicting the law of identity. Her ideology cannot even meet its own test.

11.2 But "Natural Law" provides protection for individual rights from violation by the State. Those who are against Natural Law desire total rule by the state.

The second statement represents a common "Libertarian" tactic. Instead of addressing the issues, they accuse an opponent of being a "totalitarian" (or the less sinister "statist"). In this way, they hope to distract attention from, and so avoid discussing, the issue at hand (while at the same time smearing their opponent). We can therefore ignore the second statement.

Regarding the first, "Natural Law" has **never** stopped the rights of individuals from being violated by the state. Such "laws" are as much use as a chocolate fire-guard. If "Natural Rights" could protect one from the power of the state, the Nazis would not have been able to murder six million Jews. The only thing that stops the state from attacking people's rights is individual (and social) power — the ability and desire to protect oneself and what one considers to be right and fair. As the anarchist Rudolf Rocker pointed out:

> *"Political [or individual] rights do not exist because they have been legally set down on a piece of paper, but only when they have become the ingrown habit of a people,*

and when any attempt to impair them will be meet with the violent resistance of the populace... .One compels respect from others when he knows how to defend his dignity as a human being... .The people owe all the political rights and privileges which we enjoy today, in greater or lesser measure, not to the good will of their governments, but to their own strength." [**Anarcho-Syndicalism**, p. 64]

Of course, if is there are no "Natural Rights," then the state has no "right" to murder you or otherwise take away what are commonly regarded as human rights. One can object to state power without believing in "Natural Law."

11.3 Why is "Natural Law" authoritarian?

Rights, far from being fixed, are the product of social evolution and human action, thought and emotions. What is acceptable now may become unacceptable in the future. Slavery, for example, was long considered "natural." In fact, John Locke, the "father" of "Natural Rights," was heavily involved in the slave trade. He made a fortune in violating what is today regarded as a basic human right: not to be enslaved. Many in Locke's day claimed that slavery was a "Natural Law." Few would say so now.

Thomas Jefferson indicates exactly why "Natural Law" is authoritarian when he wrote *"[s]ome men look at constitutions with sanctimonious reverence, and deem them like the ark of the Covenant, too sacred to be touched. They ascribe to the men of the preceding age a wisdom more than human, and suppose what they did to be beyond amendment...laws and institutions must go hand in hand with the progress of the human mind.. . as that becomes more developed, more enlightened, as new discoveries are made, institutions must advance also, to keep pace with the times.. . We might as well require a man to wear still the coat which fitted him when a boy as civilised society to remain forever under the regimen of their barbarous ancestors."*

The "Natural Law" cult desires to stop the evolutionary process by which new rights are recognised. Instead they wish to fix social life into what **they** think is good and right, using a form of argument that tries to raise their ideology above critique or thought. Such a wish is opposed to the fundamental feature of liberty: the ability to think for oneself. Michael Bakunin writes *"the liberty of man consists solely in this: that he obeys natural laws because he has **himself** recognised them as such, and not because they have been externally imposed upon him by any extrinsic will whatever, divine or human, collective or individual."* [**Bakunin on Anarchism**, p. 227]

Thus anarchism, in contrast to the "natural law" cult, recognises that "natural laws" (like society) are the product of individual evaluation of reality and social life and are, therefore, subject to change in the light of new information and ideas (Society *"progresses slowly through the moving power of individual initiative"* [Bakunin, **The Political Philosophy of Bakunin**, p. 166] and so, obviously, do social rights and customs). Ethical or moral "laws" (which is what the "Natural Law" cult is actually about) is not a product of "human nature" or abstract individuals. Rather, it is a **social** fact, a creation of society and human interaction. In Bakunin's words, *"moral law is not an individual but a social fact, a creation of society"* and any *"natural laws"* are *"inherent in the social body"* (and so, we must add, not floating abstractions existing in "man's nature"). [**Ibid.**, p. 125, p. 166]

The case for liberty and a free society is based on the argument that, since every individual is unique, everyone can contribute something that no one else has noticed or thought about. It

is the free interaction of individuals which allows them, along with society and its customs and rights, to evolve, change and develop. "Natural Law," like the state, tries to arrest this evolution. It replaces creative inquiry with dogma, making people subject to yet another god, destroying critical thought with a new rule book.

In addition, if these "Natural Laws" are really what they are claimed to be, they are necessarily applicable to **all** of humanity (Rothbard explicitly acknowledges this when he wrote that *"one of the notable attributes of natural law"* is *"its applicability to all men, regardless of time or place"* [**The Ethics of Liberty**, p. 42]). In other words, every other law code **must** (by definition) be "against nature" and there exists **one** way of life (the "natural" one). The authoritarian implications of such arrogance is clear. That the Dogma of Natural Law was only invented a few hundred years ago, in one part of the planet, does not seem to bother its advocates. Nor does the fact that for the vast majority of human existence, people have lived in societies which violated almost **all** of their so-called "Natural Laws" To take one example, before the late Neolithic, most societies were based on usufruct, or free access to communally held land and other resources [see Murray Bookchin, **The Ecology of Freedom**]. Thus for millennia, all human beings lived in violation of the supposed "Natural Law" of private property — perhaps the chief "law" in the "Libertarian" universe.

If "Natural Law" did exist, then all people would have discovered these "true" laws years ago. To the contrary, however, the debate is still going on, with (for example) fascists and "Libertarians" each claiming "the laws of nature" (and socio-biology) as their own.

11.4 Does "Natural Law" actually provides protection for individual liberty?

But, it seems fair to ask, does "natural law" actually respect individuals and their rights (i.e. liberty)? We think not. Why?

According to Rothbard, *"the natural law ethic states that for man, goodness or badness can be determined by what fulfils or thwarts what is best for man's nature."* [**The Ethics of Liberty**, p. 10] But, of course, what may be "good" for "man" may be decidedly **bad** for men (and women). If we take the example of the sole oasis in a desert (see section 4.2) then, according to Rothbard, the property owner having the power of life and death over others is "good" while, if the dispossessed revolt and refuse to recognise his "property", this is "bad"! In other words, Rothbard's "natural law" is good for **some** people (namely property owners) while it can be bad for others (namely the working class). In more general terms, this means that a system which results in extensive hierarchy (i.e. **archy**, power) is "good" (even though it restricts liberty for the many) while attempts to **remove** power (such as revolution and the democratisation of property rights) is "bad". Somewhat strange logic, we feel.

However such a position fails to understand **why** we consider coercion to be wrong/unethical. Coercion is wrong because it subjects an individual to the will of another. It is clear that the victim of coercion is lacking the freedom that the philosopher Isaiah Berlin describes in the following terms:

> *"I wish my life and decisions to depend on myself, not on external forces of whatever kind. I wish to be an instrument of my own, not of other men's, acts of will. I wish to be a subject, not an object; to be moved by reasons, by conscious purposes, which are my own, not by causes which affect me, as it were, from outside. I wish to be somebody, not*

> *nobody; a doer — deciding, not being decided for, self-directed and not acted upon by external nature or by other mean as if I were a thing, or an animal, or a slave incapable of playing a human role, that is, of conceiving goals and policies of my own and realising them."* [**Four Essays on Liberty**, p. 131]

Or, as Alan Haworth points out, *"we have to view coercion as a violation of what Berlin calls* ***positive*** *freedom."* [**Anti-Libertarianism**, p. 48]

Thus, if a system results in the violation of (positive) liberty by its very nature — namely, subject a class of people to the will of another class (the worker is subject to the will of their boss and is turned into an order-taker) — then it is justified to end that system. Yes, it is "coercion" is dispossess the property owner — but "coercion" exists only for as long as they desire to exercise power over others. In other words, it is not domination to remove domination! And remember it is the domination that exists in coercion which fuels our hatred of it, thus "coercion" to free ourselves from domination is a necessary evil in order to stop far greater evils occurring (as, for example, in the clear-cut case of the oasis monopoliser).

Perhaps it will be argued that domination is only bad when it is involuntary, which means that it is only the involuntary nature of coercion that makes it bad, not the domination it involves. By this argument wage slavery is not domination as workers voluntarily agree to work for a capitalist (after all, no one puts a gun to their heads) and any attempt to overthrow capitalist domination is coercion and so wrong. However, this argument ignores that fact that **circumstances** force workers to sell their liberty and so violence on behalf of property owners is not (usually) required — market forces ensure that physical force is purely "defensive" in nature. And as we argued in section 2.2, even Rothbard recognised that the economic power associated with one class of people being dispossessed and another empowered by this fact results in relations of domination which cannot be considered "voluntary" by any stretch of the imagination (although, of course, Rothbard refuses to see the economic power associated with capitalism — when its capitalism, he cannot see the wood for the trees — and we are ignoring the fact that capitalism was created by extensive use of coercion and violence — see section 8).

Thus, "Natural law" and attempts to protect individuals rights/liberty and see a world in which people are free to shape their own lives are fatally flawed if they do not recognise that private property is incompatible with these goals. This is because the existence of capitalist property smuggles in power and so domination (the restriction of liberty, the conversion of some into order-givers and the many into order-takers) and so Natural Law does not fulfil its promise that each person is free to pursue their own goals. The unqualified right of property will lead to the domination and degradation of large numbers of people (as the oasis monopoliser so graphically illustrates).

And we stress that anarchists have no desire to harm individuals, only to change institutions. If a workplace is taken over by its workers, the owners are not harmed physically. If the oasis is taken from the monopoliser, the ex-monopoliser becomes like other users of the oasis (although probably **disliked** by others). Thus anarchists desire to treat people as fairly as possible and not replace one form of coercion and domination with another — individuals must **never** be treated as abstractions (if they have power over you, destroy what creates the relation of domination, **not** the individual, in other words! And if this power can be removed without resorting to force, so much the better – a point which social and individualist anarchists disagree on, namely whether capitalism can be reformed away or not comes directly from this. As the Individualists

think it can, they oppose the use of force. Most social anarchists think it cannot, and so support revolution).

This argument may be considered as "utilitarian" (the greatest good for the greatest number) and so treats people not as "ends in themselves" but as "means to an end". Thus, it could be argued, "natural law" is required to ensure that **all** (as opposed to some, or many, or the majority of) individuals are free and have their rights protected.

However, it is clear that "natural law" can easily result in a minority having their freedom and rights respected, while the majority are forced by circumstances (created by the rights/laws produced by applying "natural law" we must note) to sell their liberty and rights in order to survive. If it is wrong to treat anyone as a "means to an end", then it is equally wrong to support a theory or economic system that results in people having to negate themselves in order to live. A respect for persons — to treat them as ends and never as means — is not compatible with private property.

The simple fact is that **there are no easy answers** — we need to weight up our options and act on what we think is best. Yes, such subjectivism lacks the "elegance" and simplicity of "natural law" but it reflects real life and freedom far better. All in all, we must always remember that what is "good" for man need not be good for people. "Natural law" fails to do this and stands condemned.

11.5 But Natural Law was discovered, not invented!

This statement truly shows the religious nature of the Natural Law cult. To see why its notion of "discovery" is confused, let us consider the Law of Gravity. Newton did not "discover" the law of gravity, he invented a theory which explained certain observed phenomena in the physical world. Later Einstein updated Newton's theories in ways that allowed for a better explanation of physical reality. Thus, unlike "Natural Law," scientific laws can be updated and changed as our knowledge changes and grows. As we have already noted, however, "Natural Laws" cannot be updated because they are derived from fixed definitions (Rothbard is pretty clear on this, he states that it is *"[v]ery true"* that natural law is *"universal, fixed and immutable"* and so are *"'absolute' principles of justice"* and that they are *"independent of time and place"* [**The Ethics of Liberty**, p. 19]). However, what he fails to understand is that what the "Natural Law" cultists are "discovering" are simply the implications of their own definitions, which in turn simply reflect their own prejudices and preferences.

Since "Natural Laws" are thus "unchanging" and are said to have been "discovered" centuries ago, it's no wonder that many of its followers look for support in socio-biology, claiming that their "laws" are part of the genetic structure of humanity. But socio-biology has dubious scientific credentials for many of its claims. Also, it has authoritarian implications **exactly** like Natural Law. Murray Bookchin rightly characterises socio-biology as *"suffocatingly rigid; it not only impedes action with the autocracy of a genetic tyrant but it closes the door to any action that is not biochemically defined by its own configuration. When freedom is nothing more than the recognition of necessity...we discover the gene's tyranny over the greater totality of life...when knowledge becomes dogma (and few movements are more dogmatic than socio-biology) freedom is ultimately denied."* [*"Socio-biology or Social Ecology"*, in **Which way for the Ecology Movement?** pp. 49 — 75, p. 60]

In conclusion the doctrine of Natural Law, far from supporting individual freedom, is one of its greatest enemies. By locating individual rights within "Man's Nature," it becomes an unchanging set of dogmas. Do we really know enough about humanity to say what are "Natural" and universal Laws, applicable forever? Is it not a rejection of critical thinking and thus individual freedom to do so?

11.6 Why is the notion of "discovery" contradictory?

Ayn Rand indicates the illogical and contradictory nature of the concepts of "discovering" "natural law" and the "natural rights" this "discovery" argument creates when she stated that her theory was *"objective."* Her "Objectivist" political theory *"holds that good is neither an attribute of 'things in themselves' nor man's emotional state, but* ***an evaluation*** *of the facts of reality by man's consciousness according to a rational standard of value... The objective theory holds that* ***the good is an aspect of reality in relation to man*** *— and that it must be discovered, not invented, by man."* [**Capitalism: The Unknown Ideal**, p. 22]

However, this is playing with words. If something is "discovered" then it has always been there and so is an intrinsic part of it. If "good" **is** "discovered" by "man" then "good" exists independently of people – it is waiting to be "discovered." In other words, "good" is an attribute of *"man as man,"* of *"things in themselves"* (in addition, such a theory also implies that there is just **one** possible interpretation of what is "good" for all humanity). This can be seen when Rand talks about her system of "objective" values and rights.

When discussing the difference between *"subjective," "intrinsic"* and *"objective"* values Rand noted that *"intrinsic"* and *"subjective"* theories *"make it possible for a man to believe what is good is independent of man's mind and can be achieved by physical force."* [**Op. Cit.**, p. 22] In other words, intrinsic and subjective values justify tyranny. However, her *"objective"* values are placed squarely in *"Man's Nature"* — she states that *"[i]ndividual rights are the means of subordinating society to moral law"* and that *"the source of man's rights is man's nature."* [**Op. Cit.**, p. 320, p. 322]

She argues that the *"**intrinsic** theory holds that the good is inherent in certain things or actions, as such, regardless of their context and consequences, regardless of any benefit or injury they may cause to the actors and subjects involved."* [**Op. Cit.**, p. 21] According to the **Concise Oxford Dictionary**, *"intrinsic"* is defined as *"inherent," "essential," "belonging naturally"* and defines *"nature"* as *"a thing's, or person's, innate or essential qualities or character."* In other words, if, as Rand maintains, man's rights **are** the product of *"man's nature"* then such rights are **intrinsic**! And if, as Rand maintains, such rights are the *"extension of morality into the social system"* then morality itself is also intrinsic.

Again, her ideology fails to meet its own tests — and opens the way for tyranny. This can be seen by her whole hearted support for wage slavery and her total lack of concern how it, and concentrations of wealth and power, affect the individuals subjected to them. For, after all, what is "good" is "inherent" in capitalism, regardless of the context, consequences, benefits or injuries it may cause to the actors and subjects involved.

The key to understanding her contradictory and illogical ideology lies in her contradictory use of the word "man." Sometimes she uses it to describe individuals but usually it is used to describe the human race collectively (*"man's nature," "man's consciousness"*). But "Man" does not have a

consciousness, only individuals do. Man is an abstraction, it is individuals who live and think, not "Man." Such "Man worship" — like Natural Law — has all the markings of a religion.

As Max Stirner argues *"liberalism is a religion because it separates my essence from me and sets it above me, because it exalts 'Man' to the same extent as any other religion does to God... it sets me beneath Man."* [**The Ego and Its Own**, p. 176] Indeed, he *"who is infatuated with **Man** leaves persons out of account so far as that infatuation extends, and floats in an ideal, sacred interest. **Man**, you see, is not a person, but an ideal, a spook."* [**Op. Cit.**, p.79]

Rand argues that we must evaluate *"the facts of reality by man's consciousness according to a rational standard of value"* but who determines that value? She states that *"[v]alues are not determined by fiat nor by majority vote"* [p. 24] but, however, neither can they be determined by "man" or "man's consciousness" because "man" does not exist. Individuals exist and have consciousness and because they are unique have different values (but as we argued in section A.2.19, being social creatures these values are generalised across individuals into social, i.e. objective, values). So, the abstraction "man" does not exist and because of this we see the healthy sight of different individuals convincing others of their ideas and theories by discussion, presenting facts and rational debate. This can be best seen in scientific debate.

The aim of the scientific method is to invent theories that explain facts, the theories are not part of the facts but created by the individual's mind in order to explain those facts. Such scientific "laws" can and do change in light of new information and new thought. In other words, the scientific method is the creation of subjective theories that explain the objective facts. Rand's method is the opposite — she assumes "man's nature," "discovers" what is "good" from those assumptions and draws her theories by deduction from that. This is the **exact** opposite of the scientific method and, as we noted above, comes to us straight from the Roman Catholic church.

It is the subjective revolt by individuals against what is considered "objective" fact or "common sense" which creates progress and develops ethics (what is considered "good" and "right") and society. This, in turn, becomes "accepted fact" until the next free thinker comes along and changes how we view the world by presenting **new** evidence, re-evaluating old ideas and facts or exposing the evil effects associated with certain ideas (and the social relationships they reflect) by argument, fact and passion. Attempts to impose *"an evaluation of the facts of reality by man's consciousness"* would be a death blow to this process of critical thought, development and evaluation of the facts of reality by individual's consciousness. Human thought would be subsumed by dogma.
